DECISION NO. CT80-2073

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTES:

a. 7 paid holidays: A, C, D, E, F, Decoration Day & Good Friday.
b. 1 paid holiday: Good Friday. Employee must work 3 days during the work week in which the holiday falls, if scheduled, and if scheduled, the working day before and the working day after the holiday
c. 4 paid holidays: B, C, D, and Good Friday. Employee must be employed 14 consecutive days immediately, prior to the holiday.
d. 3 paid holidays: C, D, and E.
e. $7.50 per day
f. 3 paid holidays: B, C, and D.
g. The last 4 regular working hours prior to Christmas shall be paid half day.
h. 6 paid holidays: A through F
i. Employer contributes 8% of basic hourly rate for 5 years or more of service or 6% basic hourly rate for 6 months to 5 years of service as vacation pay credit.
j. 9 paid holidays: A through F, Washington's Birthday, Good Friday, and Columbus Day.
k. 9 paid holidays: A through F, Washington's Birthday, Good Friday, and Columbus Day.
l. The last 4 hours on Christmas Eve is a paid half day, if employee has worked 5 consecutive days prior to Christmas Eve.
m. 9 paid holidays: A through F, Washington's Birthday, Good Friday, and Christmas Eve provided the employee has worked 45 full days for the employer during the 120 days prior to the holiday and is available for work the day preceding and following the holiday.
n. 1% of the gross electrical labor payroll.
o. Employer contributes $1.50 per day to a supplemental unemployment fund.
p. 9 paid holidays: A through F, Washington's Birthday, Good Friday, and a floating holiday per year provided the employee has been employed for a period of 5 working days prior to the holidays and works the scheduled work days immediately preceding and following the holidays.
q. 1 paid holiday: ½ day pay on Labor Day.
r. 2 paid holidays: C and D providing the employee works the day before and the day after the holiday.
s. 4 paid holidays: B, C, D, and E providing the employee works the day before and the day after the holiday
t. 2 paid holidays: B and D and half day paid holiday the Friday after Thanksgiving and the last working day before Christmas and Good Friday paid half day.
u. 1 paid holiday: D and four hours for the day after Thanksgiving
w. Employer contributes $100.00 per year to the apprenticeship and training fund
y. 3% of gross earnings to SASMI

DECISION NO. CT80-2073

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTES:

a. 7 paid holidays A through F, and Good Friday
b. 1 paid holiday: Good Friday. Employee must work 3 days during the work week in which the holiday falls, if scheduled, and if scheduled, the working day before and the working day after the holiday
c. 4 paid holidays: B, C, D, and Good Friday. Employee must be employed 14 consecutive days immediately, prior to the holiday.
d. 3 paid holidays: C, D, and E.
e. $100.00 per year
f. 3 paid holidays: B, C, and D.
h. The last 4 regular working hours prior to Christmas shall be a paid half day.
i. 6 paid holidays: A through F
j. Employer contributes 8% of basic hourly rate for 5 years or more of service or 6% basic hourly rate for 6 months to 5 years of service as vacation pay credit.
k. 9 paid holidays: A through F, Washington's Birthday, Good Friday, and Columbus Day.
l. 9 paid holidays: A through F, Washington's Birthday, Good Friday, and Columbus Day.
m. The last 4 hours on Christmas Eve is a paid half day, if employee has worked 5 consecutive days prior to Christmas Eve.
n. 9 paid holidays: A through F, Washington's Birthday, Good Friday, and Christmas Eve provided the employee has worked 45 full days for the employer during the 120 days prior to the holiday and is available for work the day preceding and following the holiday.
o. 9 paid holidays: A through F, Washington's Birthday, Good Friday, and a floating holiday per year provided the employee has been employed for a period of 5 working days prior to the holidays and works the scheduled work days immediately preceding and following the holidays.
p. 2 paid holidays: C and D providing the employee works the day before and the day after the holiday.
q. 4 paid holidays: B, C, D, and E providing the employee works the day before and the day after the holiday
r. 1 paid holiday: D
s. Paid holidays: D, and the Friday after Thanksgiving is a paid half day, and December 24, provided it falls on a working day, is a paid half day
t. 3½ paid holidays: C, D, E, and the half day Friday after Thanksgiving
u. 1 paid holiday: D
v. 2 paid holidays: B, D, & half day paid holiday the Friday after Thanksgiving, and the last working day before Christmas, & Good Friday paid half day

CLASS I - Power shovel, crane (crawler, truck type or pile driving), dragline, backhoe clamshell, trencher (over 8" digging capacity), mechanic, endloader (over 1½ cu. yd. cap.), grader, scraper (self-propelled or tractor drawn), dozer (9' blade or over), concrete paver (2 drum or larger), side boom tractor (type D-4 or equivalent & larger), elevating grader, roller (asphalt), gradall (and similar type machine), batching plant operator (concrete), backfiller tamper, well drilling rig, slip from paver slope paver, conveyor loader (euclid type)
CLASS II - Trencher (8' digging capacity & smaller), endloader (1½ cu. yd. capacity & smaller), dozer (less than 9' blade), side boom tractor (smaller than type D-4 or equivalent), pump (1 or more 6" discharge or larger - gas or diesel powered or powered by generator of 300 amps or more inclusive of generator), hoist, boom truck (power sing type boom) tractor (neu-tired, other than backhoe or front endloader, crusher
CLASS III - Air compressor (2 or more - less than 600 CFM), air compressors 600 cu. ft. per min, or larger), pumpcrete machine (and similar equipment), mechanic helper, maintenance man, boom truck (non-swinging, non powered type boom), welding machine or generator (2 or more - 300 amp. or larger gas or diesel powered), pump (2 or more - 4" up to 6" discharge - gas or diesel powered - excluding submersible pumps), concrete paver (1 drum ½ cu. yd. or larger wagon drill (multiple), elevator (other than passenger), concrete breaker (self-propelled or truck mounted - including compressor)
CLASS IV - Hydraulic pipe pushing machine, pumps (2 or more up to 4"discharge if used 3 hours or more a day gas or diesel powered - excluding submersible pumps), trencher (service), boiler, vibrating compaction equipment, self propelled (6' wide or over), stump remover, mulching equipment, farm tractor (with attachment), finishing machine (concrete), roller (other than asphalt), curing machine (self-propelled), concrete saw (40 H.P. or over)

SUPERSEDEAS DECISION

STATE: Michigan
COUNTIES: Genesee, Lapeer, Saginaw, St. Clair & Shiawassee
DECISION NUMBER MI80-2067
DATE: Date of Publication
Supersedes Decision Number MI79-2017 dated May 4, 1979 in 44 FR 26455
DESCRIPTION OF WORK: Residential Construction Projects consisting of single family Homes and apartments up to and including 4 stories.

	Basic Hourly Rates	Fringe Benefits Payments: H & W	Pensions	Vacation	Education and/or Appr. Tr.

Welders - receive rate prescribed for craft performing operation to which welding is incidental

PAID HOLIDAYS

A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas

FOOTNOTES:

a. Employer contributes 6% basic hourly rate for 5 years or more of service or 8% basic hourly rate for 6 months to 5 years of service as Vacation Pay credit.

b. Holidays: A through F

c. Holidays: A through F: Washington's Birthday, Christmas Eve and Good Friday, providing employee has worked 45 full days during the 120 calendar days prior to the holiday, and the regular scheduled work days immediately preceding and following the holiday

d. Holidays: B through F, provided the employee has been employed 5 working days prior to the holiday and provided the employee works the scheduled work days immediately preceding and following the holiday

e. Holidays: B, C, and E provided employee works the day before and after each holiday

Part III

Department of Agriculture

Food and Nutrition Service

Food Stamp Workfare Demonstration Project

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Part 282

[Amendment No. 175]

Amendments to the Demonstration Research and Evaluation Projects; Food Stamp Workfare Demonstration Project

AGENCY: Food and Nutrition Service, USDA.

ACTION: Emergency final rule.

SUMMARY: This rulemaking amends the Workfare Demonstration Project rules issued November 28, 1978 in the **Federal Register** (43 FR 55334) by the Departments of Agriculture and Labor, as joint administrators of this project. Section 17(b)(2) of the Food Stamp Act of 1977 as amended, was amended by Pub. L. 96–249 (94 Stat. 357, May 26, 1980) to extend the operation of the project through the fiscal year ending September 30, 1981, and further to provide for 50 percent Federal reimbursement of administrative costs associated with operation of the project. The amendment also directs the Secretary of Agriculture to designate at least one pilot project to implement a ten-day food stamp work registration job seeking period in lieu of the current thirty-day period.

EFFECTIVE DATE: The funding provision of Pub. L. 96–249 (§ 282.10(i)) is effective as of May 26, 1980. Other amended provision are effective immediately upon publication.

COMMENT PERIOD: Comments must be received on or before October 14, 1980 to be assured of consideration.

ADDRESS: Comments should be submitted to: Claire Lipsman, Director, Program Development Division, Family Nutrition Programs, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250. All written comments will be open to public inspection at the Office of the Food and Nutrition Service, USDA, during regular business hours (8:30 a.m. to 5:00 p.m., Monday through Friday) at 500 12th Street, S.W., Washington, D.C., Room 672.

FOR FURTHER INFORMATION CONTACT: Claire Lipsman, Director, Program Development Division, U.S. Department of Agriculture, Room 658, 500 12th Street, S.W., Washington, D.C. 20250, Telephone: (202) 447–8325.

The Final Impact Statement describing the options considered in developing this final rule and the impact of implementing each option is available on request from the above named individual.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 and under Department of Labor (DOL) procedures as specified in 44 FR 5576 to implement Executive Order 12044, and has been classified not significant.

Bob Greenstein, Administrator for the Food and Nutrition Service, has determined that an emergency situation exists which warrants publication without opportunity for a public comment period on this final action because the Workfare Demonstration Project is due to expire at the end of fiscal year 1981 and adequate time is needed for implementation and evaluation of project sites prior to the expiration date. For these reasons, the Secretary of Labor is also waiving the Department's regulation at 29 CFR 2.7 which states that it is DOL's policy to use proposed rulemaking procedures when issuing its regulations.

Further, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this emergency final action are impracticable and contrary to the public interest; and good cause is found for making this emergency final action effective less than 30 days after publication of this document in the **Federal Register**. Comments will be solicited on or before October 14, 1980, and this emergency final action will be scheduled for review so that a final document discussing comments received and any amendments required can be published in the **Federal Register** as soon as possible.

The Departments of Agriculture and Labor published regulations pertaining to the Administration of the Workfare Demonstration Project in the November 28, 1978 **Federal Register**. Under this project, qualifying food stamp registrants at selected pilot sites are required to perform work in a public service capacity, in exchange for the coupon allotment to which they are normally entitled.

Under the 1977 Food Stamp Act, the Secretary was authorized to establish 14 project sites, one urban and one rural in each of the seven administrative regions of the Food and Nutrition Service. Following the initial application period early in 1979 and a subsequent reopening of applications in September of that year, seven projects are now operational. Original authorizing legislation did not provide any Federal funds for administrative costs incurred by the political jurisdictions in operating Workfare projects. During the application periods the absence of operational funding was cited by responding political jurisdictions as a major factor in their decision not to submit an application. The total authorized complement of 14 sites was not achieved.

In order to provide a more adequate test of the Workfare concept, the Congress has authorized an extension of the test program through September 30, 1981. To further increase the number of project sites, the Congress also authorized Federal funding for 50 percent of project administrative costs to the political jurisdictions administering the pilot projects. This new funding authority, where none existed before, would apply to costs incurred by existing projects as of the date of enactment of the law. Project sites selected under the extending authority will be funded as negotiated in the grant agreement following site selection. The legislative history stresses that selection of the 14 sites is to be based upon uniform criteria and that the original seven sites will enjoy no special status, but should be judged on a par with all other project applicants. House Rept. No. 96–788, 96th Cong., 2d Sess., Feb. 27, 1980, p. 147.

Although the Departments are expected to adhere to the statutory directive for 14 projects, with one urban and one rural project in each Food and Nutrition Service region, the legislative history indicates that if in a given region this distinction cannot be achieved, two acceptable sites of the same type (e.g. two rural or two urban) can be selected to conduct Workfare projects during the extended period.

The 1977 legislation authorizing the Workfare projects required that the project design include a 30-day job seeking period under the food stamp work registration requirement (see 7 CFR 273.7) before eligible food stamp participants referred to the jobs component administrator of the project could be scheduled for assignment to job sites. Public Law 96–249 amends the 1977 legislation to require that the 30-day job seeking period be reduced to 10 days in at least one site. The Departments are concerned that changing one of the parameters of the project design in mid-course could affect the soundness of the results of the study on Workfare, and accordingly will limit use of the 10-day job seeking period to one site.

Therefore, Part 282 of Title 7 of the Code of Federal Regulations is amended to read as follows:

PART 282—DEMONSTRATION, RESEARCH AND EVALUATION PROJECTS

In § 282.10, changes are made as follows:

§ 282.10 Workfare Demonstration Project.

* * * * *

1. Paragraph (a) (*Authority*) is amended by adding the words ", as amended," after "Subsection 17(b)(2) of the Act".

2. Paragraph (d)(1)(iii) is amended to read as follows:

* * * * *

(d) * * *

(1) * * *

(iii) He or she has been unable to secure a job in the private sector after 30 days from the date of initial registration for work as required in § 273.7(a). Household members becoming exempt from work registration during this 30 day period shall not be required to participate in Workfare until such exemption ends, the member reregisters and 30 days lapse. An exception to the 30-day job seeking period will be made in one project designated by the Secretary of Agriculture. Under this exception, for Workfare purposes, the duration of time from the initial registration for work as required in § 273.7(a) until the time that the participant is eligible to be scheduled for a Workfare assignment will be reduced from 30 to 10 days; and

3. A new paragraph (i) is added to read as follows:

* * * * *

(i) *Funding* (1) Workfare sponsors will be reimbursed by the Department of Agriculture for 50 percent of all approved administrative costs involved in project operation. Such payments will be made on the basis of an approved budget and the negotiated grant agreement.

(2) Funding for project operations by the Department of Agriculture to a State food stamp agency shall be limited to the payment of coupon allotments to which food stamp households are otherwise entitled and of administrative costs attributable to normal food stamp program operations under the appropriate administrative formula. Food stamp administrative costs of the State food stamp agency at sites where a Workfare project is being operated (except as provided in paragraph (i)(3) of this section) are covered under normal certification and work registration activities.

(3) The cost of data compilations, such as the monthly report, required specifically of the Workfare sponsor or the State food stamp agency at the direction of the evaluation contractor (i.e., the contractor selected to evaluate the Workfare Demonstration Project) shall be fully reimbursed.

(91 Stat. 958 as amended—94 Stat. 357 (7 U.S.C. 2011–2027))

BILLING CODE 3410–30–M

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Food Stamp Program; Demonstration Research, and Evaluation Projects

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice of Intent to Solicit Applications for the Food Stamp Workfare Demonstration Project.

SUMMARY: On November 28, 1978, 43 FR 55334, the Department published in the **Federal Register** final rulemaking and a Notice of Intent for the Food Stamp Workfare Demonstration Project which was mandated by subsection 17(b)(2) of the Food Stamp Act of 1977. Under this project food stamp work registrants are required to perform work in a public service capacity in exchange for the coupon allotment to which their household is otherwise normally entitled.

A Notice of Intent was published on June 13, 1980 (45 FR 40094) advising the public of the extension of the Food Stamp Workfare Demonstration Project by Act of Congress (Pub. L. 96–249, 94 Stat. 357, May 26, 1980) for an additional year of project operations, and the addition of Federal funds to reimburse 50 percent of the operating costs incurred by the sponsoring political jurisdiction. We are today publishing final rulemaking and this Notice of Intent reopens the application period for 30 days.

DATE: Applications must be postmarked no later than September 15, 1980 to be assured of consideration.

FOR FURTHER INFORMATION CONTACT: Claire Lipsman, Family Nutrition Programs, Food and Nutrition Service, United States Department of Agriculture, Washington, D.C. 20250. (202) 447–8325.

SUPPLEMENTARY INFORMATION: The Departments of Agriculture and of Labor are today publishing Final Rulemaking in the **Federal Register** to implement the workfare amendments contained in the Food Stamp Act Amendments of 1980, and to reopen the application process for project sponsors. Applications should be mailed to: Claire Lipsman, Director, Program Development Division, United States Department of Agriculture, Room 658, 500 12th Street, S.W., Washington, D.C. 20250.

Dated: August 18, 1980.

David de Ferranti,

Associate Administrator.

Part IV

Environmental Protection Agency

Premanufacture Review Program; Proposed Processor Requirements

V 45 A G 15 80 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 720

[OPTS-80009; FRL 1533-6]

Premanufacture Review Program; Proposed Processor Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: In this notice, EPA is proposing a rule to require persons to submit notices under section 5 of the Toxic Substances Control Act (TSCA) when they process for a nonexempt commercial purpose those substances exempt from the TSCA Inventory and the Premanufacture Review Program. Section 5 requires persons to submit notices on new chemical substances and significant new uses of chemical substances. The Agency is proposing this processor notification rule to prevent the processing of exempt substances for TSCA commercial purposes without EPA review for risk to humans or the environment. This rule supplements the section 5 rules proposed on January 10 and October 16, 1979.

DATES: Written comments must be submitted by October 14, 1980. Public meetings-by-request: October 22 and 23, 1980—Washington, D.C.

ADDRESSES: All comments should bear the identifying notation OPTS–80009 and be addressed to: Document Control Officer, Office of Pesticides and Toxic Substances (TS–793), Rm. 447E, Environmental Protection Agency, 401 M Street, S.W., Washington, DC 20460.

After written comments are submitted EPA officials responsible for developing this proposal will be available to meet upon request with persons interested in discussing specific issue raised by this proposal. These public meetings-by-request will be held on Wednesday, October 22 and Thursday October 23, 1980, 1–5 pm in Room 2126 at EPA, Waterside Mall, 401 M Street, S.W., Washington, DC. Persons interested in participating should call the Industry Assistance Office (800–424–9065 or, in Washington 554–1404).

FOR FURTHER INFORMATION CONTACT: John Ritch, Director, Industry Assistance Office (TS–799), Environmental Protection Agency, 401 M Street, S.W., Washington, DC 20460, Toll free (800–424–9065), Washington, DC (554–1404).

SUPPLEMENTARY INFORMATION: This proposed rule is part of the section 5 proposed rulemaking under TSCA which was published in the **Federal Register** of January 10, 1979 (44 FR 2242) and reproposed in part by publication in the **Federal Register** of October 16, 1979 (44 FR 59764). The schedule for promulgation of this rule is as follows. In the summer of 1980 EPA will publish the Draft Economic Impact Analysis of the section 5 program, which will include an economic analysis of this processor reporting rule and its major alternatives. The Agency intends to make the rule final as part of the larger section 5 program in the fall of 1980, after comments on the economic analysis and its implications for this rule have been received and considered.

TSCA Inventory

The following review of EPA's Inventory and proposed section 5 rules will place this processor notification proposal in perspective. The Inventory reporting regulations (40 CFR Part 710) were promulgated under the authority of section 8(a) and (b) of TSCA (90 Stat. 2003; 15 U.S.C. 2601 et seq.). These regulations were published in the **Federal Register** of December 23, 1977 (42 FR 64572), and were clarified in the **Federal Register** of March 6, 1978 (43 FR 9254), April 17, 1978 (43 FR 16178), and May 15, 1979 (44 FR 28558). These regulations and clarifications implemented the Initial and Revised Inventory reporting schemes.

Reporting for the Initial Inventory was limited to persons who manufactured or imported in bulk chemical substances for a commercial purpose between January 1, 1975 and 30 days after publication of the Initial Inventory, the effective date of premanufacture notification under section 5 of TSCA. The Initial Inventory was published on June 1, 1979, and premanufacture notification under section 5 became effective on July 1, 1979. Reporting for the Revised Inventory began on July 1, 1979 and was limited to persons who processed or used a chemical substance for a commercial purpose after January 1, 1975, and persons who imported a chemical substance as part of a mixture or article for a commercial purpose after January 1, 1975. "Commercial purposes" includes the purposes of distribution in commerce and use as an intermediate under (40 CFR 710.2 (p) and (U) (42 FR 64572, 64576) and proposed § 720.2 (44 FR 2242, 2264)). "Process," "process for commercial purposes," and "processor" are defined in 40 CFR 710.2(t) through (v), (42 FR 64572, 64576), and include the preparation of a chemical substance or mixture in the same or a different form or physical state from that in which it was received. Persons were encouraged to report for the Revised Inventory those chemical substances not included on the Initial Inventory.

Although the Revised Inventory reporting period extended from July 1, 1979 through December 31, 1979, EPA announced that substances imported as part of a mixture or article, processed, or used for the first time after December 31, 1979 could be reported when such activity began, until 30 days after publication of the Revised Inventory (44 FR 28558, 28561). This announced policy is not affected by the rule proposed here.

Exempt Substances Under TSCA

The Inventory rules did not permit reporting of certain chemicals, including those not within the definition of "chemical substances" under TSCA section 3(2)(B) (i.e., substances used only as pesticides, tobacco and tobacco products, specified nuclear materials, foods, food additives, drugs, cosmetics, or devices under 40 CFR 710.2(h)). Byproducts (substances manufactured with no commercial purpose) and chemicals manufactured solely in small quantities for research and development could not be reported for the Initial Inventory under 40 CFR 710.4(c)(3) and (d)(2). In addition, EPA did not permit reporting of chemical substances which were manufactured or imported only prior to January 1, 1975, unless they were processed after that date under 40 CFR 710.4(c)(4). These chemicals which were excluded from Inventory reporting are collectively referred to in this notice as "exempt substances" or "substances manufactured for an exempt purpose." The terms also include substances which would be granted exemptions from section 5 notification under proposed 40 CFR 720.15 (44 FR 2268) because they are being manufactured or imported solely for test marketing purposes.

EPA considers those substances which were previously manufactured or imported solely for an exempt purpose to be subject to TSCA when they are processed for a nonexempt commercial purpose. The term "nonexempt commercial purpose" includes those purposes for which a section 5 notice must be submitted and is identical in coverage with the term "commercial purpose" as defined above. The term "nonexempt commercial purpose" is to be contrasted with "exempt purposes" and is used in this notice to clarify that commercial activity for an exempt purpose is excluded from section 5 notice requirements. EPA provided that substances manufactured or imported for undifferentiated commercial purposes, both for exempt and nonexempt commercial purposes, as well as substances processed for nonexempt purposes, could be reported for the Inventory in 42 FR 64585–87 Comments 37–55 and 44 FR 2242, 2246.

Premanufacture Notice Provisions

The notification requirements of section 5 apply to any person who, after July 1, 1979, manufactures or imports in bulk for a nonexempt commercial purpose a substance that is not on the Inventory. EPA issued an interim policy concerning submission of notices, published in the **Federal Register** of May 15, 1979 (44 FR 28564), pending promulgation of the proposed section 5 rules. The Agency has stated that notice requirements for chemical substances imported for a commercial purpose as part of a mixture are to be effective 30 days after publication of the Revised Inventory under 40 CFR 710.3(b)(2) Note.

I. Proposed Processor Notification Rule

A. Substance of Proposed Rule

This rule would further implement the statutory directive in section 5 of TSCA that all new chemicals manufactured or imported for a nonexempt commercial purpose, or processed for a significant new use, undergo section 5 review. After the proposed rule is in effect, no person could process for a nonexempt commercial purpose a substance previously manufactured (or imported in bulk or as part of a mixture) for an exempt purpose, unless the person had submitted a notice in accordance with TSCA section 5. This requirement would supplement, but in no way supplant, the basic requirement under section 5(a)(1) that persons who intend to manufacture or import a new chemical substance for a nonexempt commercial purpose must submit a notice. The proposed processor notification requirement would apply only to those chemicals to be processed for a nonexempt commercial purpose which were previously manufactured or imported for an exempt purpose or were manufactured or imported only before January 1, 1975 and not processed after that date. The rule would apply both to processors who originally manufactured or imported the substance and to processors other than the original manufacturer or importer.

The proposed rule would cover nonexempt commercial processing of exempt substances domestically manufactured or imported in bulk or as part of a mixture. The Agency has not determined whether to apply section 5 requirements to new substances imported as part of an article and for the present will continue its current policy and not mandate notices for these substances. The Agency requests comments on whether it should require notification for the nonexempt commercial processing of chemical substances originally imported as part of an article.

The Agency proposes this processor notification rule to close a gap in its regulatory scheme which would allow "exempt" chemical substances to be processed for a TSCA commercial purpose without section 5 review. Without such a rule, persons could process for a TSCA commercial purpose an exempt substance, such as a byproduct or research and development (R&D) chemical, which was not on the Inventory and had never been reviewed for its risk to humans or the environment. Persons could also process exempt substances, such as pesticides and food additives, for a TSCA commercial purpose without prior health or environmental review of the specific exposures resulting from the proposed new uses. This rule would require a notice before the substance could be processed, thus ensuring that the Agency can evaluate the health and environmental risks of the substance.

The Agency does not intend to impose notice requirements on persons who process exempt substances for nonexempt commerical purposes either for research and development or for test marketing pursuant to TSCA section 5(h)(1) or (3). For example, if a person intended to process a byproduct which was not on the Inventory for commercial research and development or test marketing as a cleanser, he would not be required to submit a section 5 notice. Instead, a person in this situation would merely be required to follow EPA's proposed requirements for chemical substances undergoing research and development or test marketing (see proposed §§ 720.14 and 720.15; 44 FR 2242, 2267). Appropriate changes will be made in the proposed requirements to relieve persons of the responsibility for a section 5 notice when they process exempt substances for nonexempt commercial purposes either for R&D or for test marketing.

B. Effective Date

The processor notification rule is expected to be promulgated with the final section 5 rules in fall 1980. The exact date that it will become effective has yet to be determined, but EPA will give advance notice to the public as soon as the date is known.

Processor notification as outlined in this proposed rule will not be mandatory until the final rule is promulgated. However, because the Revised Inventory reporting period will close before processor notification is mandatory, there will be a short period during which persons who process exempt substances for a nonexempt commercial purpose cannot report these substances for the Revised Inventory and are not required to submit section 5 notices under a final processor notification rule. Processors who wish to process exempt substances for nonexempt purposes during this period should contact the manufacturers of these substances to allow the manufacturers to submit section 5 notices. Of course, a processor may submit a notice for the manufacturer if both sign the required certification statement. Any section 5 submitted prior to the promulgation of the section 5 rules are to be submitted in accordance with the guidelines outlined by the Agency on May 15, 1979 (44 FR 28564).

In any event, persons will be required to submit section 5 notices if they intend to process exempt substances for nonexempt commercial purposes after the promulgation of the section 5 rules. EPA will provide sufficient advance notice of the effective dates of mandatory processor notice submittal. Appropriate instructions will be issued to permit notice submittal in advance of the effective date of the requirements to accommodate persons who wish to commence processing shortly after the effective date of the notification requirement. This is necessary because under this scheme TSCA would prohibit persons from processing a substance within the 90–day period after the submittal of a section 5 notice. Accordingly, if a processor were not allowed to submit a notice until the effective date of the requirement, he would not be able to commercialize the substance for a TSCA commercial purpose between the effective date and at least 90 days after the effective date of the rule.

EPA requests comments on this effective date proposal.

C. Statutory Authority

This rule is proposed under sections 5(a)(1) and 5(a)(2) of TSCA. Section 5(a)(1)(A) requires submission of a notice at least 90 days before the manufacture or importation of a new chemical substance for nonexempt commercial purposes. Section 5(a)(1)(B) imposes a similar notice requirement prior to the manufacturing, importing, or processing of any chemical substance for a "significant new use." Section 5(a)(2) states that EPA may determine by rule that a use is a significant new use upon consideration of all relevant factors, including: (1) the projected volume of manufacturing and processing, (2) the extent to which a use

changes the type or form of exposure to humans or the environment, (3) the extent to which a use increases the magnitude and duration of exposure, and (4) the reasonably anticipated manner and methods of manufacturing, processing, distribution in commerce, and disposal under TSCA sections 5(a)(2)(A) through (D) of TSCA.

EPA believes that sections 5(a)(1)(A) and (B) and section 5(a)(2) authorize the reporting requirements for processors who also manufacture or import the chemical substances that they intend to process. EPA interprets these sections to require submittal of a notice if a person initially manufactures a substance for an exempt purpose, but later intends either to process the substance for a nonexempt purpose, or to distribute it to another person who he knows intends to process it for a nonexempt commercial purpose. The Agency has determined that nonexempt commercial processing of exempt substances is a significant new use of these substances (see discussion below). Therefore under the provisions of premanufacture reporting and significant new use rules, EPA is authorized to require notices from manufacturers or importers who either process exempt substances for nonexempt purposes or knowingly distribute exempt substances to other persons for nonexempt processing. EPA believes that Congress intended nonexempt commercial processing of exempt substances to be reviewed by the Agency under section 5. In §720.10(a)(3) and (b)(2) of the January proposal, EPA proposed that manufacturers and importers of R&D or test marketing substances must submit notices before undertaking distribution in commerce or use for nonexempt commercial purposes. None of the commenters offered negative comments on this provision.

EPA believes that sections 5(a)(1)(B) and 5(a)(2) authorize the reporting requirements for persons who did not manufacture or import the chemical substances they intend to process. EPA has evaluated the nonexempt commercial processing of exempt substances and has determined that, based upon an assessment of the factors set forth in section 5(a)(2), the transition of chemicals from exempt manufacture or import to nonexempt commercial processing is a "significant new use" under TSCA.

According to section 5(a)(2)(A), EPA must consider the projected volume of manufacturing and processing of a chemical substance before deciding that a use of that substance is a significant new use. When an exempt substance is to be processed for the first time for nonexempt purposes, the volume of manufacturing and processing of the chemical substance for uses subject to TSCA will by definition increase. In addition, the total volume of manufacturing and processing for nonexempt and exempt purposes will increase unless manufacture and processing for exempt purposes declines as processing for nonexempt purposes increases.

Sections 5(a)(2)(B) and (C) require EPA to consider the type, form, magnitude, and duration of exposure related to significant new uses. Processing for a nonexempt purpose also may significantly increase the type, form, magnitude, or duration of exposure to the substance. Many chemicals manufactured for exempt purposes are regulated under other statutes or are used in controlled situations in which exposures are restricted or closely monitored. For example, chemicals used in foods, food additives, drugs, cosmetics, or devices are subject to specific use restrictions and warning labels under the Federal Food, Drug, and Cosmetic Act. Pesticide products are registered and approved for particular uses and with appropriate restrictions under the Federal Insecticide, Fungicide, and Rodenticide Act. Further, some pesticide products are used by or under the control of persons who are required to be specially trained in their use and disposal.

Other exempt chemicals are manufactured only in small quantities solely for purposes of research and development. To be exempt, these chemicals must be used under the supervision of technically qualified individuals under EPA's proposed definition (40 CFR 720.2, 44 FR 2265). Moreover, under TSCA section 5(h)(3), persons engaged in experimentation, research, or analysis of the exempt R&D chemical substance must be notified of any risks to health that the manufacturer, processor, or EPA has reason to believe may be associated with the product. Finally, commercial processing of chemicals manufactured only prior to January 1, 1975 may increase the magnitude or duration of exposure of the chemical to humans or the environment. This exposure may increase because the chemical probably will not have been the subject of recent commercial activity.

The restrictions that are imposed upon many of the chemical substances manufactured and processed for exempt purposes do not apply when the chemicals are processed for nonexempt commercial purposes. Thus when these substances are processed for nonexempt purposes, often they are not subject to any restrictions upon the type, form, magnitude, or duration of exposure, and there may be no requirement that the products be labeled or used according to instructions designed to mitigate risks to health or the environment. In addition, persons who process, distribute, or use the substances (or products containing them) may have no reason to suspect that they should limit exposures to the substances.

Section 5(a)(2)(D) requires EPA to consider the reasonably anticipated manner and methods of manufacturing, processing, distribution in commerce, and disposal of chemical substances related to a significant new use. EPA believes that the reasonably anticipated manner and methods of processing, distribution in commerce, and disposal of substances may change when they are processed for nonexempt commercial purposes and placed in commerce. This is because processing may no longer be subject to established restrictions under other laws; the substances may be distributed to a significantly larger number and variety of persons; and disposal of the particular substance or products containing them may be unregulated.

For all these reasons, EPA has determined that the change from a TSCA-exempt use to a TSCA use constitutes a "significant new use." In passing section 5, Congress intended for EPA to review new chemical substances before they result in exposure to humans and the environment. Consistent with this intent, the notification requirements should apply to chemical substances originally manufactured for exempt purposes before they are processed for nonexempt commercial purposes.

D. Processor Reporting

In the January 10, 1979 proposed section 5 rules, EPA recognized that a substance initially manufactured or imported for a purpose exempt from TSCA could be distributed in commerce or used by the original manufacturer or importer for a purpose which fell within the scope of TSCA and the section 5 notification program. The Agency believed that such an activity should be preceded by the filing of a section 5 notice and that the original manufacturer of the substance was the appropriate person to file such a notice. In January 1979 EPA proposed that manufacturers or importers be required to submit notices before they either distributed in commerce or used an R&D or test marketing substance in a manner inconsistent with the exemption. (Proposed 40 CFR 720.10(a)(3) and (b)(2) (44 FR 2242, 2266) and Support Document: Premanufacture Notification Requirements and Review Procedures, pp. 15–19 (January 1979)). The preamble noted that EPA was exploring various reporting requirements for those exempt substances processed for the first time for nonexempt commercial purposes after the expiration of the Revised Inventory reporting period. One alternative mentioned was the development of significant new use rules under section 5(a)(2) to require reporting by manufacturers, importers, and processors (44 FR 2246). The rule proposed in this notice would replace proposed § 720.10(a)(3) and (b)(2).

Section 720.11 of the January proposal would have provided that persons who only processed such substances would not be subject to the notification requirement; further, as was noted in § 720.11, the filing of a notice by a person other than the manufacturer or importer would have been invalid (44 FR 2242, 2266). The proposed rule would change this approach to allow processor reporting as outlined in this proposal.

EPA proposed in January that, if the manufacturer or importer requested, the processor could prepare and submit the form to EPA as the agent of the manufacturer or importer under proposed § 720.11 (44 FR 2242, 2266). However, EPA also recognized that in some cases the manufacturer or importer would not know whether a customer intended to process his product for a TSCA use and that the processor would not want others to be aware of his commercial processing under TSCA. The proposal did not suggest any mechanism for the processor to file a notice independent of the manufacturer or importer. It did state that EPA was exploring the use of section 5(a)(2) to provide for processor reporting and that it was attempting to define the responsibilities of a processor who did not also manufacture or import the substance (44 FR 2242, 2246).

Comments on the January proposal from a number of industry and environmental groups took strong exception to EPA's proposal not to allow processors to submit section 5 notices. Commenters argued that there was no basis in the statutory framework for denying processors the right to file a notice on their own behalf. All commenters on this subject urged processor section 5 notification, and a majority pointed out a particular need for such notification when an exempt substance was processed for a nonexempt commercial purpose.

EPA's proposal to rely primarily upon manufacturers and importers to report new substances was based on its belief that the manufacturer or importer in many cases would have more complete knowledge of the necessary information, including the health and environmental effects of the substance and the range of possible uses. As a general rule, the processor would have better knowledge of his own processing techniques and perhaps his end uses of the substance, but he might have significantly less complete knowledge of its health and environmental effects and possibly its specific chemical identity.

EPA still believes that manufacturer or importer reporting is preferable to processor reporting. As planned, the proposed rules will continue to require the submittal of a notice by the manufacturer or importer prior to manufacture or import of a new chemical substance. Filing of a section 5 notice by processors is proposed only where the manufacturer or importer of an exempt substance, at the time of distribution of a particular quantity of the chemical, did not know that the chemical was to be processed for a nonexempt commercial purpose. The Agency is proposing this reporting because it now believes that it has adequate mechanisms to fill any data gaps in processor notices. First, EPA can use a variety of means to obtain additional information on the substance from the manufacturer or importer who will be identified on the notice. EPA invites comments on impacts on confidentiality if EPA contacts manufacturers or importers. Second, when EPA has specific concerns about certain uses of the substance, or lacks sufficient information, it can require further reporting on the substance under sections 8(a) or 8(d) or section 5(a)(2) to obtain information on other uses and exposures as they occur.

E. Alternatives to Processor Notices

EPA has considered several alternatives to the section 5 processor requirement described in this proposal. These alternatives were considered primarily for the reduced reporting burden they impose on industry.

First, EPA could require processor reports under section 8(a) rather than under sections 5(a)(1) and 5(a)(2). Such a rule would require submission of a notice on commencement of nonexempt commercial processing. Section 8 notices could require significantly less information. Section 8 notices might require only company name, contact person, chemical identity, amount processed, an estimate of consumer and worker exposure, a description of the categories of use, any health and safety data, and the name of the supplier of the substance. EPA would not add the substance to the Inventory when processing began but might impose a significant new use rule that would require notices from those who would process the substance at a greater volume or for purposes other than the use proposed in the processor notice. The alternative of section 8(a) notices would also reduce the number of persons affected by such a rule as a section 8(a) requirement may not be applied to a "small processor." This alternative is therefore less costly to industry than the alternative proposed.

However, if a notice were submitted under section 8(a), EPA could not take action under sections 5(e) and 5(f) during the review period. It is more difficult to take actions under TSCA sections 6 and 7 than under sections 5(e) or 5(f). A section 8(a) requirement could therefore reduce the number of persons subject to the rule, limit information requirements, provide little advance notice, and restrict EPA's ability to act on the chemical. Chemicals reported under such a rule would not be added to the TSCA Inventory until a section 5 notice was submitted by a manufacturer or importer of the substance.

Second, the Agency could require section 5 notification for substances of special concern and section 8(a) notification (as outlined under alternative 1) for the remainder of exempt substances which are processed for a nonexempt commerical purpose. This approach would employ the alternative of section 8 notification for the nonexempt commercial processing of the majority of exempt substances. EPA would also require section 5(a)(2) notification for the nonexempt commercial processing of certain exempt chemicals based on particular concerns over the toxicity or exposures caused by nonexempt commercial processing. The significant new use rule would designate chemicals by categories based on toxicity or exposure and would establish which processors would report and when they would report. Information requirements for chemicals subject to the significant new use rule would be very similar to the data requirements proposed in October 1979 for section 5 notices.

This alternative would place very significant burdens on EPA resources. To attempt a rulemaking on each category of chemicals would be very time consuming, to say nothing of the task of selecting which chemicals and categories would be subject to significant new use notification. The Agency believes that resource constraints make this alternative impracticable. Moreover, chemicals in

V 45 A G 15 80 UMI

the designated categories might never be used for TSCA purposes, and this would render the exercise useless. Again, because EPA would receive little information on the majority of chemicals reported, risk assessment would necessarily be limited.

Third, the Agency has considered the option of not requiring reporting prior to processing of an exempt substance for a nonexempt commercial purpose. No processor notices would be submitted under this alternative. However, EPA would attempt to prohibit the processing of exempt substances for a nonexempt commercial purpose. Under this approach, EPA would rely on the terms of section 5(a)(1)(A) and the prohibitions of section 15(2) to restrict the nonexempt processing of substances that were exempt from notice requirements at the time of manufacture or import.

EPA does not favor this approach for several reasons. As stated above, EPA believes that Congress did not intend exempt substances not on the Inventory to be processed for nonexempt commercial purposes prior to EPA review. Allowing such a gap to exist would be contrary to the stated purposes of the Act.

Enforcement of TSCA in this area would be very complex without a processor reporting rule. Section 15(1) states that it is unlawful to fail or refuse to comply with any requirement prescribed by section 5 or any rule promulgated thereunder. Without a processor notification rule promulgated under section 5, persons who process exempt substances for nonexempt commercial purposes would be under no compulsion to notify the agency of their processing and could not be penalized for doing so without EPA notification.

Section 15(2) makes it unlawful for a person to use for a commercial purpose a chemical substance that he knew or had reason to know was manufactured or processed in violation of section 5. The nonexempt commercial processing of an exempt substance without EPA notification does not violate section 5 if there is no separate processor rule. In addition, because the chemical may be processed and sold several times before it reaches the user, it may be very difficult to ascertain whether the user was aware of any earlier TSCA violation. Therefore, this alternative is fraught with enforcement difficulties.

Even if nonexempt commercial processing of chemicals manufactured for exempt purposes were not subject to EPA notification under TSCA, it would be in the best interests of manufacturers, importers, and processors to submit section 5 notices for the commercial processing of exempt substances. Where the manufacturer or importer processes an exempt substance for a nonexempt commercial purpose and later decides to manufacture or import the substance for a nonexempt commercial purpose, he would have to submit a notice before manufacture or import. By submitting a notice before nonexempt commercial processing, the manufacturer or importer could proceed to manufacture or import the substance for nonexempt purposes after it clears section 5 review without the potential delay of a later notice submittal. If the processor is not the manufacturer or importer and the manufacturer becomes aware of the intended nonexempt commercial processing, the manufacturer would be required to halt distribution for the nonexempt purpose and submit a notice. Finally, by filing a section 5 notice for the chemical at the time of initial processing, the processor will be able to avoid future interruptions in supply and possible shutdown at a later stage in the commercialization of the chemical if the manufacturer learns of the processing and fails to submit a notice.

The EPA encourages comment on these and other alternatives.

F. One-time Processing of R&D and Test Marketing Substances for Nonexempt Commercial Purposes

As proposed, the rule would require a section 5 processing notice for all exempt substances that are processed for a nonexempt commercial purpose, including those initially manufactured or imported solely in small quantities for research and development or for test marketing. EPA is considering whether to exclude from processor notification those substances manufactured or imported for R&D or test marketing that a person intends to process and use up on a one-time or limited basis solely as an alternative to disposal.

In various contacts with EPA, manufacturers and processors have inquired how the Agency might treat the following situation: A substance is manufactured in small quantities for R&D, or under a test marketing exemption. At a later time a person in possession of a quantity of the substance (either the original manufacturer or another to whom it was distributed) determines that the substance does not have characteristics that justify further manufacture, import, processing, or distribution in commerce. In some cases, the substance may be useless for any commercial purpose and would be disposed of. In other cases, however, the substance may have a nonexempt commercial use which allows the person to recover all or part of the costs for the substance. It is this one-time processing with which EPA is concerned.

EPA believes that substances manufactured solely in small quantities for R&D or for test marketing may belong in a separate category from other exempt substances. Other exempt substances will almost always have their former exempt use as an alternative to disposal and will not be subject to the economic pressures forcing one-time processing. For example, a substance manufactured as a pesticide, food, or drug may fail in a nonexempt commercial use, but will still have its primary use as a pesticide, food, or drug as an alternative. Byproducts, on the other hand, because they are already produced without a commercial intent per se during the manufacture of another substance, will not be under the same economic pressures which make one-time processing desirable. For these substances, it is unlikely that there will be any one-time processing for a nonexempt commercial purpose. However, a substance manufactured or imported for R&D or for test marketing may have a nonexempt commercial use as the sole alternative to disposal, and processing on a one-time or limited basis to "use up" the substance is much more likely to occur.

The question EPA must answer is whether this "using up" of a substance for which the manufacturer, importer, or processor does not intend a long-range, commercial future should be subject to any notification, or notification under TSCA section 5, or the more limited reporting requirements of section 8(a). EPA recognizes that if section 5 notification costs are too high, the potential processor may choose disposal. This would serve neither EPA's nor industry's purposes.

Several arguments can be made for allowing processing for this use without EPA notification. First, use of the substance may be more beneficial to the environment than disposal. Second, if notification costs are greater than the benefits of one-time processing, the processor may suffer an increase in overall costs. Third, it may not be desirable to add a substance to the Inventory if it will immediately lose its commercial status. Rather, if other TSCA uses are later discovered by the current manufacturer or others, it may be more appropriate for EPA to review the substance at that time, when more information is available.

However, there is a strong argument for mandatory EPA notification. The "using up" of the substance may involve significant exposure to humans and the environment. EPA is therefore considering limited section 8 reporting only for those substances that (1) were manufactured or imported for R&D or test marketing and (2) are processed for a nonexempt commercial purpose in quantities over 500 pounds solely as an alternative to disposal because the substances have no long range commercial future. Commercial processing of these substances in amounts of less than 500 pounds would have no notification requirements. Substances might be said to have no long range commercial future when it would not be economically practicable at the time of processing to purchase or manufacture the substance again for any use.

Reporting under this scheme would be pursuant to section 8, rather than section 5, and would require only minimal data. For these substances, EPA is considering requiring company name, contact person, chemical identity, amount processed, estimated number of consumers or workers exposed, a description of the categories of use, and name of the supplier of the substance. Persons processing substances for R&D pursuant to proposed § 720.14 (44 FR 2242, 2267) and who have received information on health risks from the manufacturer or importer under proposed § 720.14 would submit such data with the notice. The notice would be submitted 90 days before processing could begin. Because these substances are processed on a one-time basis, EPA believes it would be inappropriate to add these substances to the Inventory.

Comments are invited on all aspects of this possible requirement. The Agency requests information on the factual situations in which this notification requirement would apply. Comments should identify as many examples as possible from the commenter's commercial experience. The Agency particularly requests comments on the appropriateness of 500 pounds as the cutoff. Commenters should address the necessity of a 500-pound limit as opposed to a larger or smaller cutoff and provide support for any alternatives suggested.

Comments are also solicited on the content and phrasing of the requirement that these substances have "no long range commercial future." They should focus on the number of R&D and test marketing substances that fit this category. Comments should state in detail the criteria used by industry to determine that a substance has no long range commercial future which would justify further manufacture or purchase. Each commenter should include specific examples from company history.

G. Integration of Processor Reporting with the Resource Conservation and Recovery Act

There may be some processors of byproducts (a chemical substance produced with no commercial purpose) for a nonexempt commercial purpose who also will be subject to regulation under Subtitle C ("Hazardous Waste Management") of the Resource Conservation and Recovery Act of 1976 (RCRA) (42 U.S.C. sec. 6901 et seq.). For the processing of a substance to be covered both by this proposed processor notification rule and by Subtitle C, a number of conditions would have to be met. First, the substance would have to be produced originally without a commercial purpose and could not be on the TSCA Inventory. It also would have to be intended for processing for a commercial purpose (as defined under TSCA) and this processing would have to involve "treatment" (as defined by section 1004(34) of RCRA). Finally, the substance would have to be a "hazardous waste" as defined in 40 CFR 261.3.

In the final RCRA regulations published on May 19, 1980 (45 FR 33065), EPA has chosen not to apply RCRA requirements to the actual use, reuse, recycling or recovery of hazardous wastes. RCRA requirements do apply to the transportation and storage of sludges as defined in 40 CFR 260.10(a)(63), and wastes listed in 40 CFR §§ 260.31 and 260.32 which are destined for use, re-use, recycling or recovery. See 40 CFR 261.6. If this policy is retained, there would be no dual coverage of these activities under RCRA and TSCA. However, the Agency may later decide to apply RCRA requirements to these activities (45 FR 33094). If the Agency finds that it would be undesirable to require persons conducting these activities to report under TSCA, it may wish to exempt them from reporting. The following discussion addresses the issues that may be raised by dual coverage if the Agency extends RCRA to cover these processors of byproducts.

There are two scenarios in which a facility treating a byproduct which is a hazardous waste under RCRA may fall under TSCA. First, if such a facility treats a byproduct containing a new chemical substance and the facility extracts the new chemical substance for sale in commerce, it would be processing the exempt substance (the byproduct) for a nonexempt commercial purpose. However, in this case the facility also would be the manufacturer of the new chemical substance and thus would be required to submit a notice under TSCA section 5(a)(1)(A) (even if there is no processor notification rule). Second, if the facility treats a byproduct containing a new chemical substance and processes the byproduct to produce another chemical (not a new substance) for distribution in commerce, it would be required to notify EPA under this proposed rule as a processor. Although EPA believes that the number of substances in this category probably is quite small, the Agency is not sure whether it should require this second category of processors to submit notices under this rule.

TSCA coverage of these RCRA facilities may be troublesome. Requiring section 5 notices 90 days prior to commencement of processing may be a disincentive to the recycling of byproducts. It also may be difficult to identify the chemical constituents of byproducts or to determine whether new chemical substances are present. However, this problem may be present with regard to all byproducts. Facilities which recycle or recover byproducts which are hazardous wastes may in the future be subject to facility and permit requirements under section 3004 and 3005 of RCRA. See 40 CFR 261.6 and 45 FR 33094. The types of requirements which facilities may have to meet are set forth in 40 CFR Parts 122, 124, 264 and 265.

On the other hand, TSCA gives EPA a broad spectrum of powers and responsibilities. The Agency has significant responsibility to protect both humans and the environment from "unreasonable risks" and to protect both workers and members of the general public who are exposed to chemical substances. In particular, section 5 notification permits EPA to review new chemical substances in a way that is not authorized by RCRA. Also, application of TSCA in these situations appears to be consistent with EPA's duties under both section 9 of TSCA and section 1006 of RCRA, which require the Agency to avoid duplication and to coordinate its implementation of the various statutes that it administers. The notice required by TSCA will not require resubmission of any information already submitted to the Agency under RCRA or any other Act it administers.

As proposed, this processor notification rule would require reporting by facilities treating hazardous wastes when the wastes they treat are byproducts and are processed for a nonexempt commercial purpose. The Agency solicits comments on the implications of requiring these treaters of hazardous wastes under RCRA to submit section 5 notices under TSCA.

III. Processor Notification Procedures

III. Processor Notification Procedures

A. Determination of Reporting Responsibilities

1. *Chemical identity known.* If a person wishes to process for a nonexempt commercial purpose a substance manufactured for an exempt purpose, he may do so without submitting a section 5 notice if the substance appears on the TSCA Inventory. A person may ascertain whether a chemical is on the Inventory by examining the Inventory and, through a "bona fide" search, ask EPA whether a generic name covering the chemical appears in the confidential section of the Inventory under proposed § 720.12(b) (44 FR 2242, 2286). If the chemical is not on the Inventory, a notice would be required before nonexempt commercial processing of an exempt substance could occur.

If the manufacturer or importer of an exempt substance wishes to process the substance for a nonexempt purpose, he would be required to submit the notice. If the manufacturer or importer of an exempt substance provides the substance to another person who he knows at the time of distribution will commercially process the substance for a nonexempt purpose, the manufacturer or importer would be required to submit a notice.

The processor who did not manufacture or import the substance would be required to submit the section 5 notice himself unless the manufacturer or importer submits it or the processor submits a notice jointly with the manufacturer or importer. EPA believes the second alternative of manufacturer submission would ensure a more complete notice because the manufacturer has greater experience with the chemical. Of course, a notice with little or no data might make supplemental reporting and followup more probable. In a joint submission, manufacturers and processors could send their sections directly to EPA to preserve confidentiality. The Agency invites comments on the validity of EPA's assumption that manufacturers' or importers' knowledge about these chemicals is greater than processors'.

A somewhat special case arises for those processors who do not find the chemical they wish to process on the Inventory and are unable to determine that the chemical was manufactured or imported for an exempt purpose. The Agency proposes that these persons report and provide an explanation of any basis for a belief that the substance was manufactured or imported for an exempt purpose. Comment is invited on this potential requirement. Processors would not be allowed to knowingly report substances which did not appear on the Inventory because the manufacturer or importer failed to report the substances in violation of TSCA sections 5 or 8.

In any event, the processor could not begin nonexempt commercial processing unless and until the substance had completed section 5 review. If nonexempt commercial processing took place prior to completion of the review process, this would constitute a violation of TSCA section 15, subjecting the violator to the penalties detailed in section 16.

2. *Chemical identity unknown.* EPA assumes that cases will arise in which the processor does not know the specific chemical identity of the substance he intends to process but knows that it is an exempt substance not on the inventory. In these cases, EPA proposes that the processor obtain the specific chemical identity from the manufacturer or supplier and submit it to EPA in the processor notice. The Agency requests comments on the extent to which such contacts by themselves may reveal confidential information to the manufacturer or supplier. When the manufacturer or supplier does not wish to reveal the specific chemical identity to the processor, EPA proposes that the manufacturer report the specific chemical identity directly to the Agency in conjunction with the processor's notice. EPA solicits comments on the desirability of joint reporting for specific chemical identity or for any other notice information and how condifentiality could be handled. If the manufacturer or importer refuses to cooperate, the Agency would require reporting of the identity through its supplemental reporting authority under proposed § 720.50(b) (44 FR 2242, 2277).

If the potential processor is unaware of both the chemical identity and whether the chemical appears on the Inventory, the processor would obtain the chemical identity from the manufacturer or importer as outlined above. If the manufacturer or importer refused to assist the processor, EPA would use section 8 to require reporting of the chemcial identity and would inform the processor whether a processor notice was required. Of course, submitting a joint notice is one alternative that will always be available.

If these persons are also unable to determine whether the substance was originally manufactured or imported for an exempt purpose, EPA is considering having such persons report any basis for a belief that the chemical was manufactured or imported for an exempt purpose when they request EPA assistance in reporting chemical identity. The Agency is also considering how it might aid processors by requiring the manufacturer or importer to inform processors that the chemcial they are providing was manufactured or imported for an exempt purpose. EPA solicits comments addressing the authority for a requirement of this type, how it might be implemented, and how it might be framed so as not to reveal confidential data.

The Agency requests estimates of the number of cases in which processors do not know the chemical identity of the substance they are processing. Any estimate should identify the data on which it is based.

B. Information Required To Be Submitted

EPA is proposing that processor notices contain the information proposed for section 5 notices on January 10, 1979 as modified by the proposal of October 16, 1979.

In addition to these requirements, the processor would be required to submit the following information:

(1) The name of the supplier of the substance (i.e., the person who manufactured, imported, or sold the substance, if different from the submitter).

(2) The names of future suppliers of the substance (e.g., the original supplier, other manufacturers or importers, or future manufacturers of importers of the substance).

(3) Where the submitter was not the manufacturer but intends to manufacture the substance, descriptions of the intended manufacturing process, to the extent it is known or reasonably ascertainable.

(4) The amount of the chemical to be processed.

(5) If the chemical substance was manufactured for R&D under proposed § 720.14, any information on health or environmental risks which the submitter received under § 720.14(a)(2) or evaluated under § 720.14(c).

These additional requirements would give EPA information comparable to what it would have under a manufacturer's notice submission. The requirements are authorized by TSCA sections 5(d) and 8(a) (2) and are necesary to estimate the total amount to be processed and the number of individuals who are or will be exposed. Such information will also enable EPA to gather other relevant information when necessary. The Agency does not believe these additional requirements are burdensome or costly.

It should be noted that where data have already been sumbitted on the substance to EPA or any other government agency, the submitter may merely reference these data rather than resubmit them under proposed § 720.23(c)(2) (44 FR 2242, 2272). The Agency believes this may be particularly helpful for submissions on chemicals previously manufactured as pesticides, foods, food additives, drugs, cosmetics, devices, or specified nuclear materials.

The Agency believes that a processor notice form may be necessary to simplify reporting by persons subject to this rule. This form would be based on the proposed manufacturer's notice form published in the **Federal Register** of October 16, 1979 (44 FR 59764, 59788), and modified to reflect the information requirements proposed above. The certification statement would also be recorded to apply to processors. Comments are requested on the necessity for a separate form and on the portions of the form that will need to be changed for processors.

When the final section 5 reporting rule is promulgated, EPA will clarity any minor differences between requirements for processors and for other persons who submit section 5 notices. Persons are invited to submit comments on the portions of the section 5 rules as proposed in January and October which should be modified to cover processors' notices.

C. EPA Review of Processor Notices

EPA intends to review a processor notice submitted under this proposed rule in the same manner as a notice submitted under section 5(a)(1)(A) within the 90-day period provided by TSCA. EPA would begin by reviewing the information submitted in the notice. In some cases, the Agency would request the supplemental reporting of information from the manufacturer under proposed § 720.50 (44 FR 59764, 59784).

This information may be important for the following reasons. First, the manufacturer may have additional health and safety studies on the substance. Second, the manufacturer may possess additional information on other commercial uses subject to TSCA. Third, EPA may need information on the method of manufacture and on exposures that might occur during manufacture. Persons are referred to EPA's proposed rules on supplemental reporting under proposed 40 CFR 720.50 and 720.51 (44 FR 59764, 59785–87). Comments are invited on any changes that should be made to these sections to cover supplmental reporting by these manufacturers.

EPA will review the substance according to section 5, may extend the notice period under section 5(c), and may regulate the substance during the notice period under sections 5(e) or 5(f). EPA may also take followup action for the substance through a reporting requirement under sections 5(a)(2) or 8.

Under section 5(g) of TSCA, if EPA does not take action under TSCA sections 5, 6, or 7 on a notice submitted under section 5(a)(1)(B), the Agency must publish a **Federal Register** notice before the expiration of the review period stating the reasons why it did not take action. EPA is proposing this processor reporting rule under the joint authority of sections 5(a)(1)(A), 5(a)(1)(B), and 5(a)(2). Because processor notices will be very similar to notices submitted under section 5(a)(1) prior to initial manufacture or import, EPA is considering whether a 5(g) notice should be issued and, if so, what it should contain. The Agency invites comments on how section 5(g) should apply to these processor notices.

After the review period expires, the submitter may commence processing unless EPA has taken affirmative action to prohibit it. Under this proposal the processor would submit a notice to EPA when he began to process, analogous to the notice of commencement of manufacture; EPA would then add the substance to the Inventory. EPA may impose followup reporting requirements so as to be informed of changes in use and exposure that might be of concern to the Agency. EPA also is considering followup requdirements under a significant new use rule or section 8 authority that would require the processor-submitter or other persons to report changes from the uses and exposures reported in the processor notice. The Agency requests comments regarding the need for such followup and how it might be implemented.

IV. Enforcement Policy

EPA's basic policy concerning enforcement of the Inventory reporting and section 5 notification requirements was originally stated in 40 CFR 710.3 of the Inventory rules (42 64572, 64577), and discussed further in EPA's proposed section 5 rules (44 FR 2242) and the May 15, 1979 notice concerning publication of the Initial Inventory (44 FR 28558). This policy addresses when and against whom the Agency will take enforcement action under sections 15(1) and 15(2) of TSCA. TSCA section 15(1) makes it unlawful for a person to fail or refuse to comply with the notification requirements of section 5, while section 15(2) makes it unlawful for a person to use for a commercial purpose any substance that he knew or had reason to know was manufactured, processed, or distributed in commerce in violation of section 5.

Promulgation of the processor notification rule will not affect the previously stated enforcement policy as it relates to manufacturers and importers of chemical substances. That policy remains as follows:

(1) The notification requirements of TSCA section 5(a)(1)(A) for manufacturers and importers in bulk of new chemical substances began on July 1, 1979, 30 days after publication of the Initial Inventory. These requirements apply to all chemical substances not on the Initial Inventory.

(2) The notification requirements of TSCA section 5(a)(1)(A) will not be applied to importers of chemical substances as part of a mixture until 30 days after publication of the Revised Inventory.

After these deadlines, manufacturers and importers of substances not in compliance with section 5 will be held in violation of TSCA section 15(1) and subject to appropriate enforcement action under TSCA sections 16 and 17.

EPA intends to permit continued importation of substances as part of an article without Agency review. Prior to the publication of the Revised Inventory, EPA also does not intend to apply section 15(2) to processors or users.

The processor notification rule does, however, affect the Agency's enforcement policy as it relates to processors and users of chemical substances beginning 30 days after publication of the Revised Inventory. After this date, section 15(2) will be applied to any person who processes a *nonexempt* chemical substance for a *nonexempt* commercial purpose.

After the effective date of the final processor notification rule, EPA will also apply sections 15(1) and 15(2) to processors of *exempt* substances for *nonexempt* commerical purposes. To be processed in compliance with TSCA after the effective date, such a substance must have undergone section 5 review. EPA will give sufficient advance notice of the effective date to ensure that industry is aware of its TSCA responsibilities.

The final processor rules will be promulgated after the Revised Inventory reporting period has ended. There is therefore an interim period during which persons who process exempt substances for a nonexempt commercial purpose cannot report these substances for the Revised Inventory and are not required to submit section 5 notices under a final

processor notification rule. Processors of

manufacturer or importer submit the

disclosed that 617 or 82.7 percent of the

The estimated costs include the costs

including confidentiality costs, the total

v. Importance of confidentiality for the

processor notification rule. Processors of these substances should contact the manufacturers of the exempt substances, so that the manufacturers can submit section 5 notices according to the guidelines issued by the Agency published in the **Federal Register** of May 15, 1979 (44 FR 28564). By having manufacturers submit section 5 notices before the effective date of the processor reporting rule, processors face minimal interruption of commercial activity. Upon promulgation of the final rule, EPA will strictly enforce the prohibition against processing until review of the section 5 notices has been completed.

As noted above, persons who only use chemical substances for a commercial purpose and do not process or manufacture them are not themselves subject to the section 5 premanufacture notification requirement. However, 30 days after publication of the Revised Inventory, and prior to promulgation of the final processor notification rule, EPA will apply TSCA section 15(2) to users of chemical substances *manufactured* for a *nonexempt* commercial purpose. (If this nonexempt substance were processed before use, the Agency would still apply section 15(2) to the users.) After promulgation of the final processor notification rule, EPA also will apply TSCA section 15(2) to users of chemcial substances that were initially manufactured for an *exempt* purpose and then later processed for a *nonexempt* purpose.

V. Economic Impact Analysis

A. Persons Who Must Submit Notices

Any person who intends to process for a nonexempt commercial purpose a new chemical substance that was originally manufactured or imported for an exempt commercial purpose will be required to ensure that a section 5 notice has been submitted at least 90 days before he intends to begin processing. The term "exempt substance" has been defined previously in this notice to include chemicals manufactured or imported as pesticides, foods, food additives, drugs, cosmetics, devices, byproducts, chemicals manufactured or imported before January 1, 1975, or chemicals manufactured for R&D or test marketing. If the substance is processed other than for these purposes, a notice must be submitted, and it is proposed that the processor ensure that a section 5 notice is submitted.

The requirement that a section 5 notice be submitted does not necessarily mean that processors will always submit the notice. As outlined above, the processor also could have the manufacturer or importer submit the notice or submit a joint notice with the manufacturer or importer. Thus, the requirement of notification will not always fall on processors, but may be split or fall solely on the manufacturer or importer. Further, the requirement of submitting this section 5 notice only falls once and subsequent processors, manufacturers, or importers will not be required to submit such a notice again for the same chemical.

Arthur D. Little, Inc. has estimated that over 50 percent of the chemical firms in the U.S. only process or formulate chemicals and do not manufacture chemicals. (*Impact of TSCA Proposed Premanufacturing Notification Requirements,* December 1978 (p. II–2).) However, EPA does not assume that firms that only process will bear the burden of complying with the proposed section 5 requirements. First, some manufacturers or importers will process their own exempt chemicals for a nonexempt commercial purpose. Second, only select groups of processors may be affected by the requirement to any significant degree. It may be expected, for example, that R&D and pesticide substances will be processed more frequently for nonexempt commercial purposes than other types of exempt substances.

The Agency solicits comment on how it might be able to better identify the persons who will be subject to reporting under this proposed rule.

B. Number of Chemical Substances Subject to Notification

The number of chemical substances that will be subject to notification each year under this proposed rule is difficult to estimate. To determine this number, one would have to know the number of chemicals manufactured for the exempt purposes enumerated under the rule, and how many of these chemicals are processed for a nonexempt commercial purpose each year before they are manufactured or imported for a nonexempt commercial purpose. It is reasonable to assume that the number of exempt substances processed for a nonexempt commercial purpose is less than the total number of exempt substances.

One indication of the number of substances that might be subject to notification under this rule is provided by comparing lists of exempt chemicals with substances reported for the TSCA Inventory. A comparison of a list of 1,452 active pesticide ingredients with the TSCA Inventory revealed that 688 or 47.4 percent of the ingredients are listed on the Inventory. A similar comparison of a list of 734 inert pesticide ingredients disclosed that 617 or 82.7 percent of the substances appear on the Inventory.

R&D and test marketing substances are also expected to be subject to notification under the proposed rule with some degree of frequency. When a chemical is to be commercially marketed, quantities manufactured or imported for R&D may well be processed for a nonexempt commercial purpose before the chemical is imported or manufactured for a nonexempt commercial purpose. It is also estimated that 1,000 to 2,000 new R&D chemicals are manufactured each year, although the number that are commercially marketed for nonexempt purposes is apparently smaller.

Substances manufactured for foods, food additives, drugs, or cosmetics are not likely to be processed frequently for TSCA purposes, due to their specialized application and chemical formulas. The same is likely to be true for chemicals manufactured as source materials, special nuclear materials, or byproduct materials as defined by the Atomic Energy Act of 1954. There are no lists of chemical substances used for FFDCA or nuclear purposes that are both readily computer searchable and compatible with the TSCA Inventory. There are no lists of chemical substances manufactured solely as byproducts or manufactured or imported only prior to January 1, 1975. It is difficult to predict how often these exempt substances might be processed for a nonexempt commercial purpose.

Overall this processor requirement will probably reduce the number of notices submitted by manufacturers and importers. A number of substances manufactured or imported for exempt purposes will eventually be manufactured or imported for nonexempt commercial purposes and thereby subject to section 5 notification. If these substances are processed for nonexempt commercial purposes and reported to EPA, they will appear on the Inventory and no notification would be required when they are subsequently manufactured for nonexempt commercial purposes.

C. Costs of Proposed Option

As part of the effort to evaluate the economic effects of the Agency's general section 5 notice requirements, EPA had a contractor, Arthur D. Little, Inc. (ADL) prepare unit costs for completing and submitting the section 5 form proposed on October 16, 1979 (EPA Contract No. 68–01–4717). The rule being proposed here will require processors to use a similar form; therefore, the unit costs of preparing and submitting the processor form should be very similar.

The estimated costs include the costs of preparing the section 5 form and the attachments (except for voluntary attachments), but do not include the costs of responding to supplemental reporting requirements that may be incurred for some section 5 submissions. The report of the contractor's findings, entitled "Estimated Costs of Preparation and Submission of Reproposed Premanufacture Notice Form" (EPA 560/12–79–005) is a part of the record for this present rulemaking and is available from EPA's Industry Assistance Office.

1. *Cost estimation methodolgy.* For developing the unit cost estimates, the contractor did the following:

(1) Identified specific information elements required by the forms.

(2) Designed worksheets based on these information elements to obtain estimates of time requirements.

(3) Completed these worksheets using contractor personnel with experience in chemical engineering, chemistry, data analysis, and toxicology.

(4) Assimilated the information from worksheets; developed estimated ranges of time required to complete the forms.

(5) Multiplied these time estimates by estimated labor rates to obtain total direct labor costs.

(6) Interviewed selected chemical companies to obtain their time and cost estimates for completing the forms.

(7) Compared the chemical companies' estimates for time and cost with the contractor's estimates.

2. *Estimated costs.* The estimated cost range for the form, not including the costs of asserting and substantiating claims of confidentiality, is $1,155 to $8,925 per chemical substance. EPA believes this cost range will apply to most substances submitted for section 5 review whether submitted by a chemical manufacturer or processor; however, it is conceivable that certain chemicals, for example very low or high volume substances, will fall below or above the range. Thus, the cost range should not be regarded as reflecting the absolute cost limits for a section 5 submission.

The major cost elements in making a section 5 submission appear to be the requirements to retrieve, organize, and submit health and safety data and the requirement to submit a block diagram. The cost of submitting this information is discussed in more detail later in this section.

The costs of asserting and substantiating claims of confidentiality, if claims are made, are estimated to range from $900 to $6,400. EPA does not regard the $900 figure as an absolute lower limit and expects that many companies will be able to comply with the requirements for much less. Thus, including confidentiality costs, the total cost of a section 5 submission is estimated from $2,000 to $15,300.

The cost of asserting and substantiating claims of confidentiality is presented separated from the costs of completing and submitting the section 5 form because to a certain extent, they are not affected by the form per se. Rather, confidentiality costs are determined largely by provisions in TSCA itself, the Freedom of Information Act (FOIA), and EPA's general rules regarding the treatment of confidential information under 40 CFR Part 2.

3. *Breakdown of section 5 form costs.* The following Table I is a detailed breakdown of the costs estimated by ADL.

Table I.—*Total Cost Estimates for Completion of Section 5 Form*

Component	Cost
Part I: General Information	$275–$2,100
Part II: Human exposure and environmental releases:	
Sec. A: Industrial sites controlled submitter	275–2,100
Sec. B: Industrial sites controlled by others	0–1,200
Sec. C: Consumer exposure	0–800
Part II Total	275–4,100
Part III: List of Attachments:	
Sec. A: Physical/chemical properties	150–600
Sec. B: Health and environmental effects data	300–1,400
Part III Total	450–2,000
Part IV: Federal Register Notice	75–300
Clerical Costs—All Sections	80–400
Total	1,155–8,925

4. *Variables influencing costs of section 5 submissions.* The cost ranges for completing and submitting the section 5 form are wide, reflecting the extreme variations in the types of companies and chemicals which may be subjected to these requirements. In developing these unit cost estimates the contractor assumed that the range is a function of the following variables:

Company-Related Variables

i. Company size.
ii. Degree of diversification.
iii. Organizational style.
iv. Level of technical resources.
v. Importance of confidentiality to company's new product development strategy.

Chemical Substance-Related Variables

i. Apparent toxicity.
ii. Anticipated distribution, use, exposure.
iii. Complexity of production process.
iv. Complexity of composition of chemical substances.
v. Importance of confidentiality for the substances in question.

The Agency invites comments on the cost estimates presented in this report, as well as on the methodology and assumptions used.

D. Costs of Alternatives

In developing this proposed rule, EPA considered three other alternatives. As stated above, these are: (1) section 8(a) reporting with a reduced reporting requirement; (2) section 8(a) reporting for most substances and section 5 notification for special categories of substances; and (3) no processor reporting.

Using the methodological foundation developed by ADL in its preliminary study of the economic impacts of proposed PMN regulations and notice requirements, EPA's contractor for the in-depth study of these regulations, ICF, Inc., performed a preliminary cost analysis of these three alternatives.

The costing methodology used by ADL in its analysis of the PMN form proposed on October, 16, 1979 was used as a basis for costing these alternatives. This methodology was outlined in section C(1) above. In summary, in order to estimate the cost of completing these alternatives, estimates were first made of the number of hours necessary to complete such requirements. It is expected that complying with these alternatives will involve clerical, technical, and managerial personnel. To estimate the total cost of completing a notice under these alternatives, average hourly wage rates by labor category were mutliplied by the respective number of hours needed to complete the required notice. The cost of asserting and substantiating claims of confidentiality may be a separate cost of complying with each of these alternatives, and is estimated in section V.C.2. of this notice. A support document containing the costing methodology for these alternatives entitled "Cost Estimations of Alternative Processor Notification Requirements" is available on request from EPA. Contact the Industry Assistance Office, whose address is listed at the beginning of this notice.

It should be noted that these cost estimates are preliminary. The complete methodology and complete explanation of how the final cost estimates were derived will be provided when the economic impact of the processor rule and the section 5 proposal are proposed in the summer of 1980.

1. *Section 8(a) reporting for processors.* Under this alternative, processors would provide EPA with the company name, contact person,

chemical identity, amount processed, chemical properties data and health and

note (1) the timing of each activity, (2)

(1) USEPA—OPTS. "Proposed

(1) For a purpose excluded from the

when it imposes a requirement to report

chemical identity, amount processed, information on consumer and worker exposure, a description of the categories of use, and name of the supplier of the substance, as well as physical and chemical properties data and health and safety data. Table II provides the estimated hours and the average wage rate as well as the estimated cost of complying with this alternative.

Table II.—*Cost of Submitting a Section 8(a) Notice*

Labor category	Estimated hours to complete alternative 1 notice		Average wage rate	Estimated cost of complying with alternative 1	
	Minimum	Maximum		Minimum	Maximum
Clerical	4.87	19.97	$10	$48.70	$199.70
Technical	18.50	133.00	25	462.50	3,325.00
Managerial	4.25	18.50	50	212.50	925.00
Total cost				723.70	4,449.70

The total cost of submitting a section 8(a) notice as outlined here ranges from $723.70 to $4,449.70

2. *Section 8(a) reporting and section 5 reporting.* This alternative involve either section 8(a) notification, as outlined under alternative 1, or section 5 notification depending on EPA's categorization of the substance. Section 5 notification requirements would be reserved for substances of particular concern based on toxicity or exposure.

The cost of complying with these options has been presented above. The cost of filing a section 8(a) notice would range from $723.70 to $4,449.70. The cost of filing a section 5 notice ranges from $1,155 to $8,925. For a breakdown of the estimated hours and wage rates for completing each type of notice, see Tables I and II above.

3. *No processor reporting.* Because this alternative does not require processors to submit notices prior to the nonexempt commercial processing of exempt substances, there is no cost to industry for submitting notices.

E. Economic Impacts and Conclusion

The economic impacts of this proposed rule will depend on how many processors will be covered, and how many notices they will submit. Data or data estimates, in both areas are not currently available. However, the Agency is performing an economic impact analysis of all premanufacture notification rules and forms, including the requirement for processor notification.

In its economic impact analysis, ICF, Inc., the economics contractor, will discuss the tradeoffs between alternative processor notification rules. The alternatives are analyzed in terms of the following categories:

1. *Out-of-pocket expenditures.* This category includes the direct cost of filling out the form and the cost of contacting a supplier for additional information on a substance.

2. *Time delays.* ICF will estimate the significance of the expected delay in getting a processed substance into commerce.

3. *Disclosure.* This category involves the risk of disclosing processing intentions and depends to a large extent on conclusions regarding confidentiality.

4. *Risk of adverse determinations.* This category is related to the amount of regulatory authority granted under each alternative. A processor, faced with the possibility of having his substance heavily regulated, may be discouraged from processing, and this would represent an added burden to industry.

5. *Uncertainty.* Relative uncertainty regarding EPA discretion in implementing a processor rule is evaluated across the alternatives.

The final assessment of the economic impacts of a processor reporting rule hinges on the impacts of other section 5 provisions, i.e., confidentiality, supplemental reporting, etc. Therefore, the economic impacts of a processor reporting rule will be assessed as part of the analysis of the general section 5 rulemaking. This analysis should be completed by summer of 1980.

VI. Comments and Public Meetings

The Agency requests that each commenter identify any chemicals which would have required notification under this proposed rule. Although this is obviously not a prerequisite to the submission of comments, it will provide an important information base so that EPA can better assess the impacts of the proposed rule. A brief history of the R&D, manufacturing, and processing of each chemical listed should be included as well as a description of the persons (manufacturer, processor) involved at each stage. This brief history should note (1) the timing of each activity, (2) the amounts of the chemical involved, (3) the type of exempt chemical involved, and (4) any subsequent commercial manufacture of the chemical subject to TSCA.

EPA also invites estimates on the number of such notices that would be received per year under this rule. Any estimate should be accompanied by a full explanation of the methodology and of the assumptions, variables, and data on which it is based.

Because this proposal is based in part on the January 10, 1979 proposal, and because the Agency has received many comments on aspects of this proposal covered by the January and October proposals, EPA is allowing a 60-day comment period. Do not resubmit comments on the January 10 and October 16, 1979 proposed rules and forms. When EPA promulgates the final rules, the comments on this notice will be evaluated with the comments on the January and October proposals.

After written comments are submitted, EPA officials responsible for developing this proposal will be available to meet upon request with persons interested in discussing specific issues raised by the proposal. These public meetings-by-request will be held on Wednesday, October 22 and Thursday, October 23, 1–5 p.m., in room 2126 at EPA, Waterside Mall, 401 M Street, S.W., Washington, D.C. Persons interested in participating should call the Industry Assistance Office (800–424–9065 or, in Washington, 554–1404). All meetings will be transcribed and entered in the official public record.

VII. Public Record

EPA has established a public record for this rulemaking (docket number OPTS 050002) that is available for inspection in the OPTS Reading Room from 9:00 a.m. to 5:00 p.m., on working days (Room 447E, 401 M Street, S.W., Washington, D.C. 20460). This record includes all of the information considered by the Agency in developing this proposal. The Agency will supplement the record with additional information as it is received. The record includes all of the categories of information listed in the January 10, 1979 Notice of Proposed Rulemaking (44 FR 2263) and the October 16, 1979 Notice of Proposed Rulemaking (44 FR 59764). In particular, the record has been supplemented with the following documents:

(1) USEPA—OPTS. "Proposed Processor Requirements: Notice of Proposed Rulemaking."

(2) USEPA—OPTS. [Cost Estimations of Alternative Processor Notification Requirements: Contract No. 68–01–1878.]

The docket of the record that details its specific contents to date is available in the OPTS Reading Room. EPA welcomes comments on any additional material that should be part of the record to date. EPA will identify the complete rulemaking record on or before the date of promulgation of these requirements, as prescribed by TSCA section 19(a)(3).

Note.—Under Executive Order 12044, Improving Government Regulations, EPA must determine whether a proposed regulation is "significant" and therefore subject to the requirements of the order. On May 29, 1979, EPA published a report on how it will implement the order (44 FR 30988). Consistent with the order and EPA's report, the Agency has reviewed the proposed Premanufacture Notification Requirements and Review Procedures (44 FR 2242, January 10, 1979) and the rules that are proposed in this **Federal Register** notice. EPA has determined that they are "major significant" regulations, as that term is defined in the Agency's report (44 FR 30989–90). EPA will issue them in accordance with the requirements of the report concerning internal Agency development and review, public participation, economic analysis, and consideration of other regulatory impacts and alternatives.

EPA intends to evaluate the benefits and costs of this processor notification rule within 5 years after its promulgation, as part of its evaluation plan for the larger section 5 rule. (Secs. 5, 8, and 14 of the Toxic Substances Control Act (15 U.S.C. 1604, 2607, and 2613.))

Dated: August 5, 1980.

Douglas M. Costle,

Administrator.

It is proposed that proposed Part 720 be amended as follows:

1. In proposed § 720.10 by further proposing to revoke and reserve paragraphs (a)(3) and (b)(2) and add a new paragraph (c) to read as follows:

§ 720.10 Persons who must report.

(a) * * *

(3) [Reserved]

* * * * *

(b) * * *

(2) [Reserved]

* * * * *

(c) Pursuant to the authority of TSCA section 5(a)(1) and (2), persons must admit a notice under the provisions of this Part if they intend to process for a commercial purpose a new chemical substance that was originally manufactured or imported in bulk or as part of a mixture.

(1) For a purpose excluded from the definition of chemical substance under TSCA section 3(2) (including use as a pesticide; tobacco or any tobacco product; specified nuclear material; food, food additive, drug, cosmetic, or device); or

(2) Under any exemption of TSCA section 5(h), or §§ 720.14 or 720.15; or

(3) Only prior January 1, 1975; or

(4) As a byproduct as defined in § 720.2.

2. In proposed § 720.11(b) by further proposing to revise paragraph (b) and the "Note" at the end of the section to read as follows:

§ 720.11 Persons not subject to premanufacture notification requirements.

* * * * *

(b) Except as provided by § 720.10(c), any person who intends only to process or use a new chemical substance for commercial purposes.

Note.—Unless the notice is filed by a processor under § 720.10(c), a notice is invalid under § 720.34(b) if filed by a person other than a manufacturer or importer.

3. In proposed § 720.12 by further proposing to add paragraphs (b)(3) and (c) to read as follows:

§ 720.12 Chemical substances for which premanufacture notice must be submitted.

* * * * * * *

(b) * * *

(3) A person who wishes to establish a bona fide intent to process a chemical substance and who does not possess the data specified in paragraph (b)(2) (iii) or (iv) of this section must submit (i) a statement certifying that he does not possess these data and (ii) an explanation of why he does not possess these data.

(c)(1) If a person proposes to process a chemical substance as provided in § 720.10(c) and wishes to ascertain whether the chemical substance is on the inventory, but does not know the chemical identity of the substance he proposes to process, the person must attempt to obtain the chemical identity directly from the manufacturer, importer, processor, supplier, and anyone from whom he received the substance.

(2) If the person who proposes to process the substance is unable to obtain the chemical identity of the substance from these persons, he should comply with § 720.12(b)(1) through (3) and supply evidence of his attempts to ascertain the chemical identity. EPA may issue a reporting requirement under section 8(a) of the Act to obtain the chemical identity from a manufacturer, importer, or processor. EPA will follow the procedures outlined in § 720.50(b) when it imposes a requirement to report chemical identity.

(3) When the manufacturer, importer, or processor informs EPA of the chemical identity of the substance under paragraph (c)(2) of this section, EPA will provide the chemical identity to the person who proposes to process the substance unless the person providing the chemical identity claims the chemical identity confidential pursuant to this Part. If the chemical identity is claimed confidential by the person providing the chemical identity to EPA, EPA will follow the procedures under § 720.12(b) (4) through (7). EPA will provide a final response to an inquiry under these procedures within 45 days after the Agency's receipt of the chemical identify under paragraph (c) of this section.

4. In proposed § 720.20 by further proposing to add paragraph (f)(5) to read as follows:

§ 720.20 General provisions.

* * * * *

(f) * * *

(5) If EPA receives a notice which does no include the chemical identity of the substance from a person who intends to process the substance, and the notice indicates that the submitter has attempted without success to obtain the chemical identity, EPA may issue a supplemental reporting requirement under § 720.50(b) to obtain this information from the manufacturer, importer, or processor of the chemical substance. In such cases, the notification period will begin when EPA is able to identify the new substance.

* * * * *

5. By proposing to add a new § 720.24 to read as follows:

§ 720.24 Chemical substances processed for a commercial purpose.

(a) The provisions of this subpart C apply to each person who is required to submit a notice under § 720.10(c).

(b) A person subject to § 720.10(c) must use the Processor Notice Form. He must provide the information described in § 720.22 and requested in the form and not designated "optional," insofar as such information is known to or reasonably ascertainable by him. In addition, in accordance with § 720.23, the processor must append to the form any test data in his possession or control and descriptions of other data concerning the environmental and health effects of the substance.

(c) In addition, persons who are required to submit notices under § 720.10(c) must submit the following data:

V 45 AG 15 80 UMI

(1) The name of the person(s) who manufactured or imported the substance (if different from the submitter).

(2) Future sources of the substance, if any.

(3) Where the submitter intends to manufacture the substance and descriptions of the intended manufacturing process, to the extent it is known to or reasonably ascertainable.

(4) The amount of the chemical to be processed.

(5) All information in the possession or control of the submitter pursuant to § 720.14(a)(2) or (d).

6. In proposed § 720.34 by revising paragraph (b)(1)(vii) to read as follows:

§ 720.34 Deficiencies in the premanufacture notice.

* * * * *

(b) Invalid notice.[1] * * *

(vii) Except as specifically authorized by § 720.10(c), submittal of a premanufacture notice by someone other than the person who intends to manufacture or import the chemical substance, or his designated agent;

* * * * *

7. In proposed § 720.50 by revising paragraph (b) to redesignate the existing proposed text of paragraph (b) as paragraph (b)(1) and adding a new paragraph (b)(2) to read as follows:

§ 720.50 Reporting requirements under section 8(a) and section 5 of the act.

* * * * *

(b) Manufacturer or importer of an unknown reactant.

(1) If EPA receives a premanufacture notice from a person who identifies the new chemical substance as a product of a reaction which includes at least one unknown reactant, and if the person demonstrates that he has attempted to obtain information concerning the identity of the reactant from the manufacturer or importer of the reactant, EPA may require the manufacturer or importer of the unknown reactant(s) to report its identity or composition to EPA.

(2) If EPA receives a notice pursuant to § 720.10(c) that does not contain the chemical identity, and if the person demonstrates that he has attempted to obtain information concerning the chemical identity from the manufacturer, importer, or processor of the substance, EPA may require the manufacturer, importer, or processor of the chemical substance to report its identity to EPA.

Part V

Department of Labor

Mine Safety and Health Administration

Pattern of Violations

V 45 A G 15 80 UMI

DEPARTMENT OF LABOR

Mine Safety and Health Administration

30 CFR Part 104

Pattern of Violations

AGENCY: Mine Safety and Health Administration (MSHA), Department of Labor.

ACTION: Proposed rule.

SUMMARY: This proposed rule sets forth criteria for identifying mines which have a pattern of violations of mandatory health or safety standards which are of such nature as could have significantly and substantially contributed to the cause and effect of mine health or safety hazards pursuant to § 104(e) of the Federal Mine Safety and Health Act of 1977. Under section 104(e), the Secretary of Labor is directed to make such rules as he deems necessary to establish such criteria. This proposed rule also sets forth the procedures MSHA would follow to issue a notice to an operator that such a pattern exists at its mine.

DATES: Comments must be received by October 14, 1980.

ADDRESS: Send comments to the Department of Labor, Mine Safety and Health Administration, Office of Standards, Regulations and Variances, Room 631, Ballston Tower No. 3, 4015 Wilson Boulevard, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Frank A. White, Mine Safety and Health Administration, Office of Standards, Regulations and Variances, 4015 Wilson Boulevard, Arlington, Virginia 22203, Telephone (703) 235–1910.

SUPPLEMENTARY INFORMATION:

Rulemaking Authority

Section 104(e) of the Federal Mine Safety and Health Act of 1977 directs the Secretary of Labor to issue a notice to an operator if it has a pattern of violations of mandatory health or safety standards in coal or other mine which are of such nature as could have significantly and substantially contributed to the cause and effect of coal or other mine health or safety hazards (hereinafter "pattern of violations"). Section 104(e)(4) directs the Secretary of Labor to make such rules as he deems necessary to establish criteria for determining when such a pattern of violations exists.

Section 508 of the Act authorizes the Secretary of Labor to issue such regulations as he "deems appropriate to carry out any provision of this Act."

Pursuant to sections 104(e) and 508, the Secretary of Labor is commencing rulemaking by the publication of this proposed rule and a solicitation for public comment.

Legislative History and Purpose

When Congress strengthened existing mine safety and health protection by enacting the Federal Mine Safety and Health Act of 1977, Pub. L. 91–173 as amended by Pub. L. 95–164 (Act), it was particularly concerned about the problem of the mine operator who has a history of persistent violations of mandatory health and safety standards. The enforcement mechanisms of the Mine Act's predecessor legislation (the Federal Coal Mine Health and Safety Act of 1969 and the Metal and Nonmetallic Mine Safety Act of 1966) had not always been effective in dealing with these situations. Correcting the larger underlying problems which were evidenced by recurrent individual violations was a major concern of Congress when it passed the new legislation. As one means to address these problems, Congress added a new section (104(e)), which authorized the Department of Labor to deal with mines that have developed a "pattern of violations." In adding the pattern of violations provision Congress explicitly expressed its intent in the Senate Committee Report, which states:

> The Committee's intention is to provide an effective enforcement tool to protect miners when the operator demonstrates his disregard for the health and safety of miners through an established pattern of violations. S. Rep. No. 181, 95th Cong., 1st Sess. 32 (1977).

The Senate Committee recognized that numerous mining disasters in both the coal and the metal/nonmetal industries demonstrated an inadequacy in existing law and existing mine safety and health programs.

The legislative history emphasizes in the committee reports and floor debates that section 104(e) is primarily designed as an enforcement mechanism to be used against serious and repeat offenders, particularly those habitual violators who have not responded to other efforts to bring their mines into compliance with health and safety standards.

Although section 104(e) does not define "pattern of violations," the legislative history gives some general guidance on the kinds of situations to which the provision should apply. The Senate Committee stated its intent that:

> A pattern may be established by violations of different standards, as well as by violations of a particular standard. Moreover, while the Committee considers that a pattern is more than an isolated violation, a pattern does not necessarily mean a prescribed number of violations of predetermined standards nor does it presuppose any element of intent or state of mind of the operator. S. Rep. No. 181, 95th Cong., 1st Sess. 33 (1977).

After setting forth this general guidance, Congress authorized the Secretary of Labor to formulate specific criteria which would be broad enough to encompass the varied mining activities within the Act's coverage. The Secretary was granted wide discretion in establishing these criteria, and Congress further recognized that since the pattern of violations provision was new and still untried, that the criteria might need to be modified as experience with the provision increased.

Criteria For Determining a Pattern of Violations

Under the proposed rule, available data which reflect each mine's overall safety and health record during a review period would be compiled from inspection records and other relevant sources. These data are already being used to implement other provisions of the Federal Mine Safety and Health Act and would be adapted to implement section 104(e). Data would be reviewed as often as necessary but no less frequently than once each year. A notice that a pattern of violations exists may be issued whenever circumstances warrant.

Typically, a pattern of violations would be exemplified either by an unusually large number of violations which are of such nature as could have significantly and substantially contributed to the cause and effect of a mine safety or health hazard (hereinafter "significant and substantial violations") and little or no indication of improved compliance after a period of time, or by a worsening trend of significant and substantial violations which indicates a greater than normal risk of either a disaster or individual accidents, injuries or illnesses. Under the proposed rule, the pattern of violations may include violations of many unrelated safety and health standards or it may involve violations of one standard or a few particular categories of safety and health standards (for example, ventilation, roof control, haulage, noise, etc.). In many cases where a pattern of violations would be found to exist, there would be a history of withdrawal orders for significant and substantial violations which have not induced the mine operator to improve safety and health practices.

Congress intended for the criteria to be flexible. Although under the proposed rule a pattern would be based on a mine's record of "significant and substantial" violations, factors other than the mere number of such violations would be considered. The proposed criteria, therefore, include both quantitative and qualitative factors. The factors set out in the proposed regulation to be considered in applying the criteria would serve as guidelines, but would not prevent MSHA from applying a particular criterion on the basis of other factors. Additionally, depending on the individual situation, the weight given to a particular criterion or factor may vary. The determination that a pattern exists at a particular mine would not be made mechanically, but would be a documented judgment based on the relevant facts and circumstances, including the enforcement history and overall safety and health conditions at the mine. Each determination would be in writing and would set forth the reasoning used to arrive at the determination.

Procedures

If a pattern notice is issued to an operator, any subsequent inspection which reveals another significant and substantial violation will result in the issuance of a withdrawal order until the violation is abated. There will be a sequence of withdrawal orders upon the subsequent finding of any significant and substantial violation until a complete inspection of the mine reveals no significant and substantial violation.

Although a pattern of violations notice which is subsequently followed by withdrawal orders would provide a strong incentive for the affected operator to correct an already existing pattern, it is clear that Congress intended for this sanction, insofar as possible, to prevent such a critical situation. Realizing that a pattern of violations will lead to severe consequences, chronic violators would be induced to comply with the spirit as well as the letter of the law. The thrust of the entire Act is to protect the health and safety of miners, which is most effectively accomplished when serious underlying problems are addressed before they reach crisis proportions.

Initial screening procedures, which would include examination of inspection records, would be used to identify mines which may be developing a pattern of violations. Although not required by the proposed rule, MSHA may as a matter of policy, alert affected mine operators that this initial screening has identified that operator's mine as a potential recipient of a pattern notice, which may be issued unless the mine's compliance record is adequately improved before the District Manager makes a determination to issue a notice that a pattern of violations exists at the mine.

After the initial screening, the criteria would be applied to each of the mines which has been so identified. If this further analysis indicates that a pattern of violations exists at any of the mines under consideration, MSHA would send to the affected operator and miners' representative a letter stating MSHA's intent to issue a pattern notice. This letter of intent would specify the basis for MSHA's proposed action and would give the operator 15 calendar days to review the documents upon which the determination is based, to submit additional information and to submit a written request to confer with the District Manager. If the operator submits such a request, issuance of the pattern notice may be stayed for a reasonable period of time, to be determined by the District Manager, to allow for this informal review and conference.

If the operator does not respond within the alloted time, a pattern notice would be issued promptly. If the operator responds, but the additional information does not indicate a valid reason to defer the issuance of a pattern notice, the notice would be issued. However, if the additional information indicates that a pattern notice should not be issued at this time, the operator would be so notified. In each of these cases, the notification would state the specific reasons and data supporting whatever determination was made.

Executive Order 12044

It has been determined that this document does not contain a major proposal requiring the preparation of a regulatory analysis under Executive Order 12044 and the Department of Labor's final guidelines implementing the Executive Order (44 FR 5570, January 28, 1979).

Drafting Information

The principal persons responsible for drafting this document are: Vernon R. Denton, James R. Horton, Nancy S. Hyde, and Inga A. Watkins.

Dated: August 11, 1980.

Robert B. Lagather,

Assistant Secretary for Mine Safety and Health.

1. It is proposed to add a new Subchapter Q, Part 104 to Chapter I, Title 30 Code of Federal Regulations as set forth below:

SUBCHAPTER Q—PATTERN OF VIOLATIONS

PART 104— PATTERN OF VIOLATIONS

Sec.

104.1 Scope and purpose.
104.2 Definitions.
104.3 Identification of mines developing a potential pattern of violations.
104.4 Criteria for determining when a pattern of violations exist.
104.5 Procedures for issuance of notice.

Authority: Secs. 104(e) and 508 of the Federal Mine Safety and Health Act of 1977, Pub. L. 91–173, 83 Stat. 803 as amended by Pub. L. 95–164, 91 Stat. 1301, 1299 (30 U.S.C. 814(e), and 957).

§ 104.1 Scope and purpose.

This part sets forth the criteria and procedures the Mine Safety and Health Administration (MSHA) will follow in making a determination as to whether there is a pattern of violations of mandatory health or safety standards in a mine which are of such nature as could have significantly and substantially contributed to the cause and effect of mine health or safety hazards (pattern of violations). In making a determination, MSHA will only consider violations occurring after March 8, 1978.

§ 104.2 Definitions.

As used in this Part:

(a) "MSHA" means the United States Department of Labor, Mine Safety and Health Administration.

(b) "Significant and substantial violations" means violations of mandatory health or safety standards which are of such a nature as could have significantly and substantially contributed to the cause of effect of mine safety or health hazards. Only violations for which a citation or withdrawal order was issued and which have become final before the Federal Mine Safety and Health Review Commission shall be considered in the application of the criteria.

(c) "Pattern of violations" means a pattern of violations of mandatory health or safety standards in a coal or other mine which are of such nature as could have significantly and substantially contributed to the cause and effect of coal or other mine health or safety hazards.

(d) "Review period." A review period for all underground mines shall consist of at least three months. A review period for surface mines shall consist of at least six months.

(e) "Similar size" means classified by MSHA to be within the same category with respect to the annual hours worked at metal/nonmetal mines and the annual tonnage of coal mines as set forth below.

(1) Size of metal/nonmetal mine.

Annual hours worked at mine:

10,000 and under
Over 10,000 to 20,000
Over 20,000 to 30,000

Over 30,000 to 60,000
Over 60,000 to 100,000
Over 100,000 to 200,000
Over 200,000 to 300,000
Over 300,000 to 500,000
Over 500,000 to 700,000
Over 700,000 to 1 million
Over 1 million

(2) Size of coal mine.

Annual tonnage of mine:

15,000 and under
Over 15,000 to 30,000
Over 30,000 to 50,000
Over 50,000 to 100,000
Over 100,000 to 200,000
Over 200,000 to 300,000
Over 300,000 to 500,000
Over 500,000 to 800,000
Over 800,000 to 1.1 million
Over 1.1 million to 2 million
Over 2 million

As used in paragraphs (e) (1) and (2) of this section, the terms "annual tonnage" and " annual hours worked" means tonnage produced and hours worked in the previous calendar year or in the case of a mine opened or owned less than one full calendar year the tonnage and hours worked prorated to an annual basis.

(f) "Similar type" means mines which are classified by MSHA to be within the same category with respect to the type of operation as set forth below:

Metal and Nonmetallic Types of Operations

Open pit
Other surface (sand, gravel)
Crushed stone (and dimension)
Dredge
Mills
Underground

Coal Mines—Types of Operations

Underground
Surface
Preparation plants not part of underground or surface operations

(g) "Related standards" means mandatory safety or health standards which are within the same subpart of section of the Code of Federal Regulations or which are designed to protect miners from the same or a similar hazard.

§ 104.3 Identification of mines developing a potential pattern of violations.

(a) MSHA will compile objective data to document the operator's overall safety and health record, including violations of mandatory safety and health standards. The data will be classified into categories which collectively reflect both the enforcement activity and management practices at each mine during three-month periods for underground mines and six-month periods for surface mines as set forth below:

(1) Total number of Section 104(a) citations for significant and substantial violations.

(2) Comparative number of significant and substantial violations in successive inspections.

(3) Total number of Section 104(d) citations and orders for unwarrantable failure violations.

(4) Total number of Section 104(b) withdrawal order for failure to obate significant and substantial violations.

(5) Total number of Section 107(a) imminent danger orders which resulted from significant and substantial violations.

(6) Total number of recurring significant and substantial violations of the same or related standards.

(7) Total number of violations of regulations concerning the submittal of reports or plans, examinations, and training of personnel.

(8) Operator's accident/injury/illness/fatality incidence rate.

(9) Inspector's statements for citations and orders involving significant and substantial violations.

(10) Total number of inspection days.

(b) The data will be reviewed as often as necessary but no less frequently than once each year and will be used to bring to the District Manager's attention those mines which warrant consideration to determine whether a pattern of violations exists or is developing. The information from any one or any combination of the above categories may be sufficient to bring a particular mine to the attention of the District Manager. The data will undergo further screening and analysis, including review by a committee appointed by the District Manager which shall be called the District Review Committee. The District Review Committee shall consist of a minimum of three persons selected by the District Manager, at least one of whom shall be a Subdistrict Manager or senior level supervisor and the remainder of whom shall be representatives of the Secretary of Labor with no less than 2 years of experience. The District Review Committee will consider both quantitative and qualitative factors as set forth in the criteria in § 104.4 of this part to make a recommendation to the District Manager as to whether a pattern of violations exists at a particular mine.

(c) Each criterion shall be evaluated both individually and in relation to the others to determine if there is a pattern of violations at a mine. A determination that a pattern of significant and substantial violations exists at a mine may be made on the basis of affirmative findings with respect to any one or any combination of the criteria or upon consideration of all of the criteria as a whole. The weight to be given to a particular criterion may vary with the individual facts and circumstances of each case.

§ 104.4 Criteria for determining when a pattern of violations exist.

To determine whether a pattern of violations exists at a particular mine, MSHA shall consider the following criteria:

(a) There has been a chronic recurrence of significant and substantial violations at the mine during one or more review periods. Generally, in applying this criterion, MSHA shall consider but is not limited to the following factors:

(1) Whether the average number of significant and substantial violations cited per inspection day was at or above the 90th percentile for all mines of similar size and type. This factor shall be applied as follows: All the mines in a particular size and type category shall be ranked numerically, based on each mine's average number of significant and substantial violations cited per inspection day. The mines with the highest numbers in this ranking have the most significant and substantial violations cited per inspection day, compared to other mines of similar size and type. If a mine is within the highest 10 percent of all the mines of similar size and type when ranked according to average number of significant and substantial violations cited per inspection day, this mine may be considered to have a chronic recurrence of significant and substantial violations during the review period.

(2) Whether the average number of significant and substantial violations cited per inspection day was at or above the 75th percentile for all mines of similar size and type and has increased since a previous review period. This factor shall be applied as follows: All mines in a particular size and type category shall be ranked numerically based on each mine's average number of significant and substantial violations cited per inspection day. If a mine is within the highest 25 percent of all the mines of similar size and type when ranked in this manner, and the average number of significant and substantial violations cited per inspection day has increased since a previous review period, this mine may be considered to have a chronic recurrence of significant and substantial violations during the review period.

(3) Whether a disproportionate number of the significant and substantial violations cited per inspection day were violations of the same or a related standard. The number may be considered disproportionate if more than 25 percent of the significant and substantial violations are violations of the same or a related standard.

(b) Enforcement mechanisms of the Federal Mine Safety and Health Act of 1977 other than section 104(a) citations have been utilized during one or more review periods at the mine to address the safety or health hazards that could have been created by significant and substantial violations cited during a review period. Generally, in applying this criterion, MSHA shall consider, but is not limited to the following factors:

(1) Whether any withdrawal orders were issued pursuant to section 104(d)(1) of the Federal Mine Safety and Health Act of 1977 and whether any section 104(d)(2) orders were issued.

(2) Whether there were any § 107 imminent danger orders issued which resulted from violations of the same or related standard as any of the significant and substantial violations cited during a review period.

(c) The history of accidents, injuries, illnesses and fatalities at the mine during one or more review periods indicates that the significant and substantial violations cited at the mine have had an impact on the overall safety and health of the miners. Generally, in evaluating this criterion, MSHA shall consider but is not limited to the following factors:

(1) Whether the incident rate or severity measure has been above the national average.

(2) Whether there were any accidents, injuries, illnesses or fatalities of the type which the violated standards were designed to prevent.

(d) The management at the mine has demonstrated poor safety or health practices or a lack of a general commitment to effectively protecting the safety and health of the miners during one or more review periods. Generally, in evaluating this criterion, MSHA shall consider, but is not limited to the following factors:

(1) The degree of good faith the operator demonstrated in attempting to achieve rapid compliance after receiving the citations for the significant and substantial violations as evidenced by such things as:

(i) Extraordinary efforts to achieve abatement of the violation within the time given; or

(ii) Utilization of all available resources and personnel to abate the violation as rapidly as possible; or

(iii) Utilization of a method of abatement which was likely to prevent the recurrence of the violation.

(2) The gravity of the significant and substantial violations as evidenced by such things as:

(i) The probability of occurrence of the events the cited standards were directed against; or

(ii) The types of injuries or illnesses that could be expected to result from the events the cited standards were directed against; or

(iii) The number of people who would be affected if the events occurred.

(3) The degree of negligence of the operator with respect to the significant and substantial violations.

(4) Whether there have been recurrent violations of standards or regulations concerning requirements for the submittal of reports or plans, the conduct of preshift or on shift examinations or qualifications and training of personnel.

(5) Whether there were any citations changed to withdrawal orders for failure to abate significant and substantial violations.

(6) What resources the operator devoted to mine safety and health.

(e) There were no extenuating circumstances at the mine beyond the management's control during the review periods which strongly mitigate affirmative findings with respect to any of the above criteria.

§ 104.5 Procedures for issuance of notice.

(a) When the District Manager makes a preliminary determination that a particular mine has a pattern of violations, the District Manager shall inform the operator and the miner's representative in writing (certified mail, return receipt requested or personal service) of MSHA's intent to issue a notice that a pattern of violations exists at that mine. The letter of intent shall specify the basis for the determination and shall give the operator and representative of miners 15 calendar days after receipt of the letter of intent to provide additional information for consideration, review all documents upon which the determination is based, and submit a written request for a conference with the District Manager.

(b) Upon written request by the operator or representative of miners during the 15-calendar-day period, the District Manager shall arrange for a conference to be held as expeditiously as possible. The operator and representative of miners shall be invited to attend any conference held pursuant to this section.

(c) After a conference is held or additional information is submitted, the District Manager will notify the operator in writing either (1) that a pattern of violations exists, or (2) that a notice of pattern will not be issued at this time. In either case, the District Manager will state the reasons for the determination, which shall be the final determination of MSHA.

(d) If the operator does not make a request to review the documents, submit additional information or have a conference within the allotted time, the operator shall be notified in writing, pursuant to section 104(e) of the Act, that a pattern of violations exists at its mine effective immediately upon receipt of notification.

(e) The operator shall post all letters of intent and notices on the mine bulletin board.

Department of Energy

Economic Regulatory Administration

Obtaining Crude Oil for the Strategic Petroleum Reserve by Exchange of Naval Petroleum Reserves Crude Oil and Other Means

DEPARTMENT OF ENERGY

Regulatory Administration, Room B210,

B. Alternative Proposal No. 2: Adding the

capacities at the Bryan Mound, Texas,

rate of at least 100,000 B/D beginning in

due to the possibility that, pursuant to

DEPARTMENT OF ENERGY

Economic Regulatory Administration

10 CFR Part 211

[Docket No. ERA-R-80-23]

Obtaining Crude Oil for the Strategic Petroleum Reserve by Exchange of Naval Petroleum Reserves Crude Oil and Other Means

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of proposed rulemaking and public hearing.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) is proposing alternative amendments to the Mandatory Petroleum Allocation Regulations, 10 CFR Part 211, to establish procedures for obtaining crude oil for storage in the Strategic Petroleum Reserve (SPR) by exchange of Naval Petroleum Reserves (NPR) crude oil and other means. The first alternative proposal would establish a new provision in the allocation regulations authorizing DOE to require the fifteen so-called major refiners and other refiners with refining capacities in excess of 175,000 barrels per day to supply crude oil for storage in the SPR in exchange for NPR crude oil. This proposal also would authorize DOE to compensate the refiner delivering oil to the SPR in cash.

The second proposal would amend the current crude oil Buy/Sell Program regulations to add the United States Government to the Buy/Sell List as a buyer of crude oil to be stored in the SPR, thereby increasing the total sales obligations of the refiner-sellers for an allocation period. Each refiner-seller would have the option of discharging its sales obligation by a sale to the SPR only, to small refiners only, or to both. Under this alternative DOE would elect to compensate a refiner-seller delivering oil to the SPR by exchanging a quantity of NPR oil or by making a cash payment to the refiner-seller. Additional provisions relating to these general alternatives are also proposed.

DATES: Written comments are due by September 15, 1980, 4:30 p.m. Hearing Dates: Los Angeles hearing, August 27, 1980; Washington, D.C. hearing, September 4, 1980. Requests to speak by 4:30 p.m., August 20, 1980, for the Los Angeles hearing; August 28, 1980, for the Washington, D.C. hearing.

ADDRESSES: Requests to speak at the Washington, D.C. hearing, and all comments should be sent to Office of Public Hearing Management, Economic Regulatory Administration, Room B210, Docket No. ERA-R-80-23, 2000 M Street, N.W., Washington, D.C. 20461. Requests to speak at the Los Angeles hearing should be sent to Department of Energy, Region IX, Attn: Carey Osborn, 333 Market Street, San Francisco, California 94111, (415) 764-7029.

HEARING LOCATIONS: Washington, D.C. hearing: Room 2105, 2000 M Street, N.W., Washington, D.C. Los Angeles hearing: Room 207, Los Angeles Convention Center, 1201 Figuero, Los Angeles, California.

I. Background

A. Strategic Petroleum Reserve

The Energy Policy and Conservation Act (EPCA), Pub. L. 94-163, 42 U.S.C. section 6231 *et seq.*, signed into law on December 22, 1975, authorized the creation of the SPR. The objective of the SPR is to provide for the storage of substantial quantities of petroleum in order to diminish U.S. vulnerability to the effects of a severe energy supply interruption, and to permit the U.S. to carry out its obligations under the Agreement on an International Energy Program.

An SPR Plan, which includes detailed proposals for development of the SPR, was transmitted to the Congress as Energy Action No. 10 on February 16, 1977, and became effective on April 18, 1977. Subsequently, to accelerate the development schedule, Plan Amendment No. 1 was transmitted to the Congress by the Federal Energy Administration (FEA), a predecessor agency of the Department of Energy, as Energy Action No. 12 on May 25, 1977, and became effective on June 20, 1977. Plan Amendment No. 2, which authorized expansion of the SPR to one billion barrels, was transmitted to the Congress by the DOE as Energy Action DOE No. 2 on May 18, 1978, and became effective on June 13, 1978. Plan Amendment No. 3, setting forth the method of withdrawal and distribution of the SPR oil, was transmitted to the Congress as Energy Action DOE No. 5 on October 21, 1979, and became effective on November 15, 1979.

The SPR's storage facilities are being developed and filled in three phases. Phase I involves the construction of facilities to utilize existing storage capacity of approximately 248 million barrels (MMB) at five salt dome sites located in the Gulf Coast areas of Louisiana and Texas. Phase I construction is now essentially complete. Phase II construction goals include the expansion of the storage

capacities at the Bryan Mound, Texas, and West Hackberry and Bayou Choctaw, Louisiana, sites by a total of 290 MMB. This expansion, which is still under development, will create new caverns through the process of solution mining ("leaching"). The new leached caverns will result in an additional 160 MMB of capacity at West Hackberry and an additional 120 MMB of capacity at Bryan Mound; an existing 10 MMB cavern will be acquired at Bayou Choctaw. Facilities installed at the West Hackberry and Bryan Mound sites during Phase I will be modified and used for the solution mining of the additional underground storage capacity. Phase III, which currently is unfunded, will involve development of additional storage capacity of approximately 200 MMB, although the sites to be developed have not yet been selected.

DOE began filling the SPR storage facilities in 1977. Some 91.7 MMB of crude oil now are stored at three SPR sites: West Hackberry (2.9 MMB of sweet crude oil and 27.0 MMB of sour crude oil); Bayou Choctaw (28.5 MMB of sour crude oil); and Bryan Mound (31.8 MMB of sweet crude oil). Another 1.5 MMB are in pipelines or terminals. By the end of September 1979, the SPR had an operational capability to withdraw oil from these three sites for distribution at a rate of approximately one million barrels per day (MMB/D). Upon the complete filling of the storage capacity developed in Phases I and II, the withdrawal ("drawdown") and distribution capability at the five SPR storage sites will increase to about 3.5 MMB/D.

Amendment No. 1 to the SPR Plan called for storage of 500 MMB by December 22, 1980. Oil acquisition for the SPR was suspended in 1979, however, to avoid placing excessive upward pressures on oil prices or disrupting domestic crude oil supply availability in a period of unstable world oil market conditions. Consequently, the SPR's current crude oil inventory would serve only as a limited response to a near term supply interruption.

Congressional concern that the amount of crude oil currently stored in the SPR is inadequate was recently expressed in Title VIII of the Energy Security Act (ESA), Public Law 96-294 (June 30, 1980). Section 801 of the ESA amended section 160 of the EPCA by directing the President to immediately undertake and continue crude oil acquisition, transportation, and oil injection activities at a level sufficient to assure that crude oil storage in the SPR will be increased at a minimum average rate of at least 100,000 B/D beginning in fiscal year 1981. No further amendment to the SPR Plan is necessary to implement this mandated resumption of fill of the SPR, regardless of the type or source (foreign or domestic) of oil acquired for storage. This requirement to fill the SPR will cease when the storage level reaches the amount set forth in the SPR Plan. That level, which presently is set by the terms of the SPR Plan at one billion barrels, may be changed by an amendment to the plan in accordance with the procedures of the EPCA.

B. Naval Petroleum Reserves

The Naval Petroleum Reserves (NPR) were established by executive order between 1912 and 1924. There are three Reserves which currently produce crude oil: Elk Hills and Buena Vista, both in Kern County, California, and Teapot Dome, Natrona County, Wyoming. The Elk Hills Reserve is by far the largest, with proven reserves in excess of one billion barrels of crude oil. Until 1976 the Reserves were used almost exclusively for Department of Defense activities. Production from the Reserves, with the exception of a brief period during World War II, was minimal, being limited to that necessary to test, conserve, and maintain the fields. Production was temporarily increased, pursuant to a Congressional joint resolution, to 65,000 barrels per day (B/D) for a limited period in 1944-1945 for the purpose of meeting crucial petroleum needs for our war effort.

Upon passage of the Naval Petroleum Reserves Production Act of 1976 (NPR Act), Pub. L. 94-258 (10 U.S.C. section 7420 *et seq.)*, the NPR was required to produce crude oil at the maximum efficient rate for at last six years (until April 5, 1982) at these three locations. By following this Congressional requirement, the Federal Government's share of production from the NPR has increased to approximately 132,000 B/D.

The largest portion of the NPR production, at the Elk Hills Reserve, has been sold by the Government through competitive bidding since 1976. Most of this production is currently marketed and refined on the West Coast. For the current contract period, February 1 to August 1, 1980, the Elk Hills crude oil was sold to ten "small" refiners,[1] five other refiners, and three trading companies.

It is estimated that from 99,000-132,000 B/D will be available from the NPR for filling the SPR. The variance is due to the possibility that, pursuant to the NPR Act, DOE may continue to set aside 25 percent of the Government's share of NPR production for purchase by small refiners (those without adequate sources of crude oil and whose refineries have a refining capacity of under 45,000 B/D).

C. Use of NPR Crude Oil in the Strategic Petroleum Reserve

The SPR Plan originally concluded that use of NPR oil to fill the SPR would not offer advantages over the competitive procurement of imported and domestic oil. At that time it was anticipated that sufficient crude oil for the SPR could be most efficiently obtained through competitive procurement. Today, however, considering the uncertain world crude oil market and the rapid escalation of world oil prices, the expenses and administrative complexities of utilizing the NPR oil for the SPR are less significant when compared to the current costs of competitively procuring imported crude oil. In addition, the Federal Government's share of NPR oil could now provide, in this period of uncertain and increasingly expensive crude oil supplies, an assured and continuous source of crude oil for a large portion of the SPR fill requirements.

The statutory basis for use of NPR oil for filling the SPR, either by means of direct transportation and storage or through exchange, is contained in the EPCA, as amended by the ESA, and the NPR Act, also amended by the ESA.

Section 160(a) of the EPCA as originally enacted provided in part as follows:

> The Secretary is authorized, for the purposes of implementing the Strategic Petroleum Reserve Plan * * * to place in storage, transport, or exchange (1) crude oil produced from Federal lands, including crude oil produced from the Naval Petroleum Reserves to the extent that such production is authorized by law. * * *

Section 802 of the ESA added a new subsection (d) to section 160 of the EPCA requiring that unless the SPR storage activities are maintained at an average rate of 100,000 B/D, the Government may not sell or otherwise dispose of its share of crude oil from the Elk Hills Reserve except to fill the SPR directly or by exchange for other oil, with certain specified exceptions. The exceptions are: (1) amounts of production set aside for small refiners as provided under the existing provisions of the NPR Act (10 U.S.C. 7430(d)), (2) minimal amounts necessary for reservoir protection, and (3) production for national defense requirements under the NPR Act (10 U.S.C. 7422(b)(2)),

[1] For purposes of NPR sales contracts, a "small" refiner is one which has a refining capacity of 45,000 B/D or less. Under the EPAA, however, a "small" refiner is one which has a refining capacity of 175,000 B/D or less.

limited to a period of no more than nine

34,000 barrels a day. Even though there

mitigate any market distortions which

limited to a period of no more than nine months. Additionally, the ESA further provides that the President would be relieved of these requirements to continue storage of oil in the SPR and to use NPR oil for purposes of SPR storage, during certain emergency situations. First, a temporary exemption from these requirements is provided in the event of a drawdown of the SPR, as permitted under section 161 of the EPCA. Second, the President is given discretion to request an exemption from the fill requirements if he finds that compliance with those requirements significantly impairs the ability of the United States to respond to a severe energy supply interruption or to meet the obligations of the United States under the International Energy Program.

Section 201(11) of the NPR Act, 10 U.S.C. 7430(k), as amended by the ESA, states the following regarding use of NPR oil in the SPR:

(k)(1) With respect to all or any part of the United States share of petroleum produced from the naval petroleum reserves, the President may direct that the Secretary—

(a) place that petroleum in the Strategic Petroleum reserve as authorized by sections 151 through 166 of the Energy Policy and Conservation Act (42 U.S.C. 6231–6246); or

(b) exchange, directly or indirectly, that petroleum for other petroleum to be placed in the Strategic Petroleum Reserve under such terms and conditions and by such methods as the Secretary determines to be appropriate, without regard to otherwise applicable Federal procurement statutes and regulations.

(2) The requirements of section 159 of the Energy Policy and Conservation Act (42 U.S.C. 6239) do not apply to actions taken under this subsection.

In light of these authorities the NPR crude oil may be used to fill the SPR in two ways: (1) direct physical transportation of the crude oil production from the NPR sites to the SPR sites, or (2) exchange of the NPR crude oil for other crude oil which would be delivered to the SPR sites.

However, the first option, the direct physical transportation of NPR oil to the SPR, is not considered viable to any substantial degree at this time. Great difficulties are involved in the direct transportation of NPR crude oil form Elk Hills, California (where more than 95% of NPR production originates) to the SPR storage facilities on the Gulf Coast. Facilities generally do not exist on the West Coast to accommodate the shipment of substantial quantities of NPR oil to docks and then by tanker to the Gulf Coast. There also is inadequate common carrier pipeline capacity to handle shipments of this oil to the Gulf Coast. The estimated maximum capacity of existing common carrier pipelines to ship from Elk Hills to the Gulf Coast is 34,000 barrels a day. Even though there are plans to expand the pipeline capacity to approximately 40,000 barrels a day, it is estimated that no more than 20,000 barrels a day of excess capacity could be available for shipment of NPR oil to the Gulf Coast, and that use of the pipeline for shipping NPR oil might require displacing other shipments.

The second option, obtaining crude oil for the SPR by exchanging NPR crude oil, therefore is the more practicable alternative. The Defense Fuel Supply Center (DFSC) of the Department of Defense is preparing, on behalf of DOE, a solicitation for competitively-conducted exchanges of NPR oil for oil be delivered to the SPR. However, because the efforts of the DFSC may not produce satisfactory offers of sufficient volumes of crude oil, we have determined that an amendment to the petroleum allocation regulations is needed to authorize DOE to provide for the exchange of NPR crude oil to assure the filling of the SPR at the optimum rate.

Statutory support for requiring refiners to deliver crude oil to the SPR in exchange for NPR crude oil is contained in the Emergency Petroleum Allocation Act of 1973 (EPAA), Pub. L. 93–159, as amended, 15 U.S.C. section 751 *et seq.* The President has the authority under the EPAA to allocate all crude oil or refined products produced in or imported into the United States, in specified amounts and at specified prices, in furtherance of the EPAA objectives. Section 4(b)(1)(F) of the EPAA states that one of the objectives of the EPAA is the "equitable distribution of crude oil, residual fuel oil, and refined petroleum products at equitable prices . . . among all users." Permitting the SPR to receive its equitable share of U.S. oil, domestic as well as imported, serves this objective.

As discussed above, the objective of the SPR is to provide for the storage of substantial quantities of petroleum in order to diminish the United States' vulnerability to the effects of a severe supply interruption. Thus, resumption of filling of the SPR clearly would further the EPAA objective of protecting public health, safety and welfare, and the national defense. See EPAA section 4(b)(1)(A).

Further, storage in the SPR of crude oil obtained by means of exchange for NPR crude oil would assure continued filling of the SPR during a period of uncertainty in the world market, while avoiding pressures on world oil prices which might result from exclusive reliance on Government purchases of crude oil for the SPR directly in the world market. Thus, such exchanges, which could mitigate any market distortions which might result from competitive bidding for NPR oil, would be consistent with the objective, recognized both in EPAA section 4(b)(1)(I) and in EPCA section 160(b)(4), of minimizing the impact of Government interference on market forces.

II. Alternative Proposed Amendments

A. Alternative Proposal No. 1: Allocation of Crude Oil for the Strategic Petroleum Reserve Through Exchange of Naval Petroleum Reserves Crude Oil or Regulated Sale

1. Refiners required to supply oil to the Strategic Petroleum Reserve
2. Determination of exchange/sale obligations
3. Methods of discharging exchange/sale obligations
4. Credit for oil supplied to the Strategic Petroleum Reserve outside the regulatory program
5. Exchange notices
6. Crude oil types required for the Strategic Petroleum Reserve

1. Refiners Required To Supply Oil to the Strategic Petroleum Reserve

This proposed amendment would establish a new section 211.68 in Part 211 to require specified refiners (termed "exchange partners") to supply crude oil suitable for storage in the SPR in exchange for NPR crude oil. As discussed in more detail below, in lieu of delivering NPR crude oil to an exchange partner, the DOE could elect to compensate an exchange partner in cash. The group of refiners to be designated as exchange partners would consist of the fifteen so-called major integrated refiners that are currently classified as refiner-sellers (as defined in § 211.62) for the Buy/Sell Program and other refiners with refining capacity in excess of 175,000 B/D (the so-called large independent refiners).

We believe this group of refiners is best suited to act as exchange partners with the United States Government to ensure that sufficient quantities of suitable crude oil are made available for filling the SPR. In contrast to small refiners, these refiners generally have access to many diverse sources of crude oil supplies and the experience in purchasing, trading and transporting large quantities of crude oil which would enable them to efficiently furnish suitable crude oil for the SPR and receive NPR crude oil in exchange. Moreover, to the extent that the proposed regulation provides for the *exchange* of approximately equal volumes of crude oil, and given the ability of these refiners to obtain crude supplies, the net crude oil supply

position of the participating refiners should not be adversely affected, as long as crude oil supply exceeds crude oil consumption. Thus, the provision would not conflict with the EPAA objective of protecting the crude oil supply and competitive viability of independent refiners. Finally, we are not proposing to include small refiners or resellers in the class of exchange partners because we believe that to expand the number of exchange partners further would affect our ability to consummate the exchange/sale transactions efficiently.

We will consider limiting the group of exchange partners to the 15 major refiners, or to only the 15 major refiners and certain large independent refiners, provided that the comments submitted during this proposed rulemaking and other information available to us demonstrate that some or all of the large independent refiners would be adversely affected if they were included as exchange partners. Comments on this issue might include data regarding such refiners' relative access to foreign and domestic crude oil supplies, ability to refine or exchange NPR oil, or sufficiency of access to pipelines, tankers, or other modes of transportation for the purpose of delivering crude oil to the SPR facilities.

2. Determination of Exchange/Sale Obligations

We are proposing that each exchange partner's exchange/sale obligation would be equal to its proportionate share of all designated exchange partners' total runs to stills during the period August 1979 through July 1980. This base period should be of sufficient duration to eliminate any short-term aberrations in the runs to stills data, and yet recent enough to provide an accurate indication of present relative access to crude oil supplies and, thus, ability to enter into exchange transactions. We will consider alternative methods of calculating exchange partners' exchange/sale obligations, including the use of a different fixed base period or a 12-month rolling base period. Comments are requested as to whether any of these alternative proposed methods of prorating exchange/sale obligations among the designated exchange partners would be preferable.

3. Methods for Discharging Exchange/Sale Obligations

The proposed regulation specifies several methods by which the exchange partners could be required, at the option of DOE, to discharge their exchange/sale obligations. These methods include a voluntary or mandatory exchange of NPR crude oil,[1] and a mandatory sale. One or more of these methods could be selected by DOE for any exchange period. Each Exchange Notice would specify which method or methods DOE had selected to impose for that exchange period.

a. *Voluntary Exchange Offers*

One method for discharging obligations that DOE could elect for any exchange period would provide a period during which voluntary exchange offers would be entertained by DOE. The Exchange Notice for that period would specify that for the 15 days following publication of the Notice, any of the refiners designated in the Notice as exchange partners could submit an exchange offer to DOE. Such an offer would, at a minimum, specify the type or types of crude oil offered to the SPR, the respective volumes of each type of crude oil offered, a proposed delivery schedule, and a ratio for determining the volume of NPR oil that the offeror would be given in exchange. DOE could accept any such exchange offer during the 30 days following the publication of the Exchange Notice. If an exchange offer were accepted by DOE, and a contract were executed, the exchange partner would be considered as having discharged its exchange/sale obligation for that exchange period to the extent of the volume of oil actually delivered to the SPR.[2]

In the event voluntary exchange offers are permitted for an exchange period, but such offers do not result in DOE acceptances of crude oil of sufficient quality or quantity, then each exchange partner would be given notice to that effect, and the mandatory exchange or sale provisions of the proposed regulation, as discussed below, would apply.

b. *Mandatory Exchange or Sale*

If voluntary exchange offers are not permitted for any exchange period, or if such offers result in insufficient exchanges, then each exchange partner would be required to deliver to the SPR the quantity of crude oil equal to its exchange/sale obligation for that period. In exchange for crude oil delivered to the SPR, each exchange partner would receive a volume of NPR crude oil determined by the ratio provided in the allocation regulations.

Due to potential logistical problems during some exchange periods, including temporary pipeline space limitations and inadequate access to dock and terminal facilities, it may not always be practicable for all exchange partners to deliver their exchange/sale obligations in a timely fashion, especially since some exchange partner's obligations may be quite small. Moreover, if competitive exchange or sale transactions are successful in acquiring a large volume of oil for the SPR, the additional volume of oil needed for the SPR through mandatory exchange or sale transactions, when divided among the remaining exchange partners, may be so small as to make it infeasible to accept separate deliveries. Therefore, we are proposing alternative authority for DOE to direct certain exchange partners to deliver suitable crude oil in specified quantities, whether such quantities would be equal to or more or less than the exchange partner's exchange/sale obligation for that period. In directing a particular exchange partner to deliver oil to the SPR, DOE would consider which exchange partner or partners would be best able to consummate delivery of the type of oil needed. In the event a particular exchange partner were directed to deliver a quantity of oil to the SPR in any exchange period in excess of its exchange/sale obligation for that period, the exchange partner would receive a credit in that amount against its exchange/sale obligation for the next exchange period. Conversely, if an exchange partner were not directed to deliver oil to the SPR in an exchange period, its unsatisfied obligation would be added to its obligation for the next exchange period. As an alternative to carrying forward such debits and credits into succeeding exchange periods, we are proposing that the regulation should simply require exchange partners that were not directed to deliver oil to the SPR during an exchange period to reimburse the exchange partners that delivered oil to the SPR by sales or trades of crude oil in the volumes owed by the non-delivery exchange partner.

As an alternative to exchanging NPR oil, we are also proposing that DOE could elect to compensate an exchange

[1] The volume of NPR crude oil available for regulated exchange (whether voluntary or mandatory) during an exchange period should be equal to the volume of the Federal Government's share of NPR production for the period, reduced by the volume (if any) of crude oil set aside for small refiners for that period, and further reduced by the volume of NPR crude oil previously committed to exchanges negotiated for that period as a result of DFSC solicitations.

[2] Moreover, so as to assure there is no disincentive for refiners to enter into exchanges or sales pursuant to the forthcoming DFSC solicitation, we are proposing with respect to each of the alternatives under consideration that refiners that have entered into exchanges or sales for delivery of oil to the SPR other than pursuant to the proposed rule shall be considered to have discharged any obligation under a regulation adopted in this proceeding to the extent of the volume of oil actually delivered to the SPR.

partner by making a cash payment for the oil delivered to the SPR equal to the weighted average landed cost of the exchange partner's crude oil imports in the month of delivery.[3] Due to the two-month delay in the reporting of crude oil costs to ERA, such cost would have to be estimated at the time of the exchange and adjusted to the actual cost in the second month following the month of delivery. We specifically request comments on, and would adopt if supported by the record, alternative methods for establishing the compensation in a regulated sale. For example, would it be appropriate to provide that the compensation would be equal to the weighted average landed cost of *all* exchange partner's crude oil imports during the exchange period, or the weighted average delivered cost to all refiners of uncontrolled *domestic* crude oil during the exchange period? Under each of these alternatives, should the period for establishing the compensation be the entire exchange period or only the month in which the transaction occurs? Finally, should the Government pay the actual cost of the crude oil delivered to the SPR?

Under any of these options, any exchange partner would be allowed to trade its exchange/sale obligations with any firm (including a non-exchange partner) prior to the beginning of or during the exchange period with the approval of DOE. However, the proposed regulation provides that such transactions would not relieve the exchange partner of its obligation in the event the other firm fails to perform.

It is anticipated that at times additional minor adjustments might be necessary to equalize a particular exchange transaction. For example, under a mandatory exchange the exchange ratio might be based partially on estimated costs or values, with appropriate adjustment to reflect actual costs or values not able to be made until after deliveries have been completed. In such cases, we are proposing that DOE could make such adjustments by means of a cash payment to the exchange partner or by directing the exchange partner to make a cash payment to DOE, if DOE determines that it is impracticable to make such adjustments by delivering or receiving additional quantities of crude oil.

4. Credit for Oil Supplied to the SPR Outside the Regulatory Program

We also are proposing that any exchange partner that delivers oil to the SPR after July 1, 1980, in a sale or exchange, other than pursuant to this rule would receive a barrel-for-barrel credit against any exchange/sale obligation it might have under the regulatory program proposed in this notice. If a delivery takes place before the first exchange period begins, the credit would be applied first against the exchange/sale obligation of that first exchange period. If a delivery takes place during an exchange period, then the credit would be applied first against the exchange/sale obligation of that exchange period. In either case, any unused credit would be applied to the succeeding exchange period(s).

5. Exchange Notices

In general, the proposed regulation provides that DOE may issue periodic Exchange Notices requiring the refiners described above to deliver crude oil to the SPR. An Exchange Notice would be published in the **Federal Register** at least 20 days prior to the beginning of the exchange period and would remain in effect until the end of the exchange period, unless amended by the publication of a Supplemental Exchange Notice. The Exchange Notice would specify the quality and total quantity of crude oil to be delivered to the SPR storage sites during the "exchange period," the exchange ratio for the NPR crude oil, special terms and conditions applicable to the exchange transactions, the "exchange/sale obligation" of each exchange partner, and the method or methods by which the exchange/sale obligations must be discharged.

The proposed regulation contemplates an exchange period of six months. We specifically request comments, however, as to whether the exchange period should be longer or shorter. If the comments submitted during this rulemaking and other information available to us indicate that the exchange period should be of a different duration, then we will adopt such a period in the final rule.

To facilitate the scheduling of crude oil deliveries to the SPR under a mandatory exchange, we are proposing that each exchange partner that is required to deliver oil to the SPR submit a proposed delivery schedule no later than 15 days after publication of the Exchange Notice. If, however, DOE will be entertaining voluntary exchange offers for an exchange period, then the proposed delivery schedule need not be submitted to DOE until 15 days after DOE has notified the exchange partners that the voluntary exchanges will be insufficient for the SPR's needs and that mandatory exchange or sale transactions will be required. Comments are specifically requested as to whether a 15-day period is sufficient to prepare and submit a proposed delivery schedule. The proposed delivery schedule would list, for each proposed delivery date, the types of oil to be delivered, the relative volumes of each oil type, and the preferred DOE terminal [4] be preferred for delivery. DOE will consider submissions of proposed delivery schedules on a "first-come, first-served" basis. All ship nomination and acceptance procedures must be in accordance with then-current port manuals of the SPR receiving terminals. Exchange partners will be notified by DOE within five days of DOE's receipt of their proposed schedules, whether the proposed schedules have been accepted or rejected in whole or in part. If a proposed schedule is unacceptable, in whole or in part, whether because of prior commitments for the date selected or because of other incompatibilities, DOE will explain the reasons for the rejection, and in some cases, will also suggest alternative dates, volumes, and/or types of oil for delivery.

[3] The maximum volume of NPR oil that would be available for exchange in any allocation period would be 132,000 B/D. However, in order to fulfill the mandate of the recently-enacted ESA, or to achieve other policy objectives, the SPR fill requirements may exceed the volume of NPR oil available for exchanges. Thus, to the extent that the Government is not able to purchase this excess volume of oil in competitive procurement, the volume of crude allocated to the SPR would exceed the volume of NPR oil available for exchanges, and the Government would compensate refiners for these additional volumes in cash.

[4] DOE currently has access to three marine terminals for purposes of receiving tanker deliveries for the SPR. The locations, types of oils accepted, and specifications are as follows:

Tanker discharge terminals	Terminal storage (MBbl)	Draft (ft)	LOA (ft)	Beam (ft)	Maximum (Dwt)
Sunoco Terminals, Inc., Nederland, Tex. (Type I—Sour) (Type II Through V—Sweet)	1,200	39½ [1] 36	1,000	144	130,000
Seaway Terminal, Freeport, Tex. (Type II through V—Sweet)	800	37	750	107	[5] 63,000
DOE Terminal, St. James, La. (Type I—Sour)	1,600	[2] [6] 41 [1] 53	940	[3]	100,000

[1] Airdraft.
[2] Terminal permission required for less than 32M Dwt; maximum at Dock No. 1 is 50,000 Dwt.
[3] Fresh.
[4] Subject to possible further draft limitation at Mississippi River entrance, which is dependent on flood and silting conditions.

When DOE has notified the exchange partner that its proposed delivery schedule is acceptable, the exchange partner will become obligated to make delivery as set forth in that schedule. Timely delivery will be within a five-day "window"; that is, delivery taking place as much as two days before or two days after the date specified in the delivery schedule will be considered timely.

Every ninety days an accounting will be made to ensure that each exchange partner has not received a volume of NPR crude oil in excess of that volume (as adjusted by the exchange ratio) of oil which it has delivered to the SPR. Each exchange partner will have the responsibility of coordinating its deliveries of oil to the SPR with its receipts of NPR oil to achieve a balance at least every ninety days.

6. Crude Oil Types Required for the SPR

We anticipate that one or more of five different types of crude oil would be required for delivery to the SPR. These types, and their gravity and sulfur characteristics, are as follows:

Type	API Gravity (°API)	Total Sulfur (wt. %) Max.
I	30–36	1.99
II	40–45	.25
III	30–36	.50
IV	34–40	.25
V	36–41	.50

A sixth type, with a gravity in the range of 26–30 °API and with a maximum acceptable sulfur content of 1.25%, currently is not expected to be required. The only crude oil currently meeting the specifications of the sixth type is Alaska North Slope crude oil. Comments are invited, however, as to what quantities, if any, of Alaska North Slope crude oil might be offered for delivery to the SPR. The actual types and relative volumes of each type of crude oil to be delivered to the SPR, as well as the storage sites to which the oil is to be delivered, would be announced for each exchange period in the Exchange Notice for that period.

Because we anticipate that the value of the NPR oil will not always be the same as the value of the oil delivered to the SPR in exchange, an exact barrel-for-barrel exchange will not always be possible. Therefore, we are proposing alternative exchange ratios to be used to determine the volume of NPR crude oil which will be deemed equivalent in value to one barrel of each type of crude oil delivered to the SPR. A discussion of proposed alternative exchange ratios is set forth below.

B. Alternative Proposal No. 2: Adding the Strategic Petroleum Reserve As A Buyer to the Crude Oil Buy/Sell List

Under this alternative proposal, we would amend the definition of refiner-buyer in section 211.62 and add a new paragraph to the current Buy/Sell Program regulations set forth in section 211.65 to provide that the Strategic Petroleum Reserve would be added to the Buy/Sell List as an eligible buyer of allocated crude oil for storage in the SPR. The total sales obligation of the refiner-sellers for each six-month allocation period would be increased by the volume of crude oil allocated on the Buy/Sell List for the SPR. Thus, each refiner-seller's sales obligation under the Program would consist of a portion of the total "purchase opportunity" of the SPR. A refiner-seller could satisfy its sales obligation by selling oil to the SPR, to small refiners, or to both. A refiner-seller delivering oil to the SPR could be compensated in cash, as compensation is currently provided for under the Buy/Sell Program regulations, or alternatively, by delivery of NPR crude oil in exchange.

As is the case currently under the Buy/Sell Program regulations, DOE (as a "buyer") would negotiate with refiner-sellers during the twenty-day period following publication of the Buy/Sell Notice. As a result of such negotiations, DOE might obtain part or all of its allocation for that period, and would compensate the refiner-seller in cash or in NPR oil. If, however, at the end of that 20-day period DOE had not negotiated crude oil purchases or exchanges sufficient to satisfy its total allocation, then DOE could direct a refiner-seller to deliver oil to the SPR under § 211.65(j)(3) of the current Buy/Sell Program regulations. In such a directed transaction, any refiner-seller not compensated in cash in accordance with the current Buy/Sell price rule would be compensated by a delivery of NPR crude oil in a volume determined in accordance with the exchange ratio proposed in this rulemaking.

Under the amendments being proposed, the Buy/Sell Notice would include, in addition to the items currently published in the Notice, several new provisions relating to the SPR. The Buy/Sell Notice would specify the relative volumes of the SPR's total allocation for which compensation would be made in cash and in kind (by delivery of NPR crude oil). The Notice would also specify the exchange ratio for the NPR crude oil applicable to directed deliveries, special terms and conditions applicable to the exchange transactions, and the types and relative quantities of crude oil required for the SPR.

The different types of crude oil expected to be required for the SPR and the proposed alternative ratios to be used in exchanges of NPR crude oil are discussed in Parts II–A(6) and II–C, respectively.

For the reasons discussed under the first alternative proposal, we are also proposing under this alternative that any refiner-seller that delivers crude oil to the SPR after July 1, 1980, in a sale or exchange, other than pursuant to this rule, will receive a barrel-for-barrel credit against its total allocation obligation for the applicable allocation period in which crude oil is allocated to the SPR.

C. Exchange Ratio for NPR Crude Oil

The alternative proposals contemplate exchange transactions involving the exchange of NPR crude oil for other crude oil delivered to the SPR. As previously mentioned, we anticipate that the quality, and hence the value, of the oils exchanged will not always be equal. Therefore, we are proposing three alternative methods of calculating the exchange ratio for determining the number of barrels of a given type of NPR crude oil the Government would deliver to a refiner in exchange for each barrel of a given type of crude oil delivered to the SPR.

The first alternative method proposed would define the exchange ratio in terms of refiners' actual acquisition costs for crude oil that is similar in quality to the crude oils being exchanged. The numerator of the ratio under this proposed method would be the estimated weighted average delivered cost to all refiners in the month of the exchange of all generic imported and uncontrolled domestic crude oils that meet the specifications of the type of oil being delivered to the SPR. We request comments on whether we should use the estimated average delivered cost of such crude oils to the refiner who is supplying the oil for the SPR rather than the cost to all refiners. In either case, the ratio would be adjusted before the end of the second month following the month of the exchange to reflect any differences

it would be appropriate to provide

V. Request for Additional Comments

he submitted by 4:30 p.m. September 5

between the actual and the estimated costs.

We request comments on whether we should adopt the average landed cost of crude oil in the Gulf Coast to determine the numerator of the exchange ratio. One concern we have is with the effect of transportation costs on the accuracy of the exchange ratio. Average landed costs in the Gulf Coast might be the most accurate estimate of the cost to refiners of oil delivered to the SPR. On the other hand, this information is not currently collected by DOE. We request comments on the availability of such data and how important transportation costs are.

The denominator of the ratio would be the average of the two highest posted prices for uncontrolled crude oil similar to the NPR oil being exchanged. No posted price would be used in computing the average unless an actual purchase had been consummated at that price. The prices used would be those in effect at the time the NPR oil is to be delivered to the exchange partner. However, if subsequent to the delivery of the NPR oil a price is posted having a retroactive effect to the date of delivery, and if that price would be one of the two highest posted prices, then that price would be used in the computation of the ratio and appropriate adjustments would be made. For the Elk Hills and Buena Vista oil, DOE would designate at least three fields in which oil of like quality is produced, and then compute an average of the two highest posted prices in each of these fields. For the Teapot Dome oil, DOE would compute an average of the two highest posted prices produced in the State of Wyoming. This distinction is proposed due to the fact that comparable postings are more numerous for Elk Hills and Buena Vista oil than for Teapot Dome oil.

The second alternative method proposed would basically result in barrel-for-barrel exchanges of NPR oil for oil delivered to the SPR, with certain adjustments for quality (based on sulfur and gravity differences). Generally speaking, sulfur and gravity are indicative of crude oil worth and value. Therefore, we are proposing under this alternative that adjustments be made for differences in sulfur and gravity between the NPR crude oil and the crude delivered to the SPR. We are proposing that differentials of $0.05 per barrel per 0.1 (one-tenth) degree API gravity and $0.10 per barrel per 0.1 (one-tenth) percent sulfur be established as adjustment factors. Comments are specifically requested as to whether the differentials proposed here properly account for quality differences in crude oils. We will consider adopting other differentials, including formulas for computing differentials, and will consider permitting differential factors to be negotiated between the Government and exchange partners.

Comments are also requested as to whether we should adjust the barrel-for-barrel exchanges for differences in transportation or location of the NPR crude oil and the crude oil delivered to the SPR. We will consider adopting transportation and location adjustment factors, if supported by the record.

Under this proposal, the Government could elect to effect sulfur and gravity differential adjustments by transfer of crude oil instead of by cash payments. If the Government elects to deliver additional crude oil to an exchange partner to account for higher quality crude oil delivered to the SPR (lower sulfur or higher API gravity), in lieu of a cash payment, the quantity of the additional delivery would be based upon the total value of the differential adjustments for sulfur and gravity, divided by the value of NPR crude oil. We are proposing that the value of NPR crude oil be based upon the average of the two highest posted prices for uncontrolled crude oil similar to the NPR oil being exchanged, as described in alternative 1 above.

If the Government elects to accept additional crude oil from an exchange partner to account for lower quality crude oil delivered to the SPR (higher sulfur or lower API gravity), in lieu of a cash payment, the quantity of the additional crude oil will be based upon the total value of the differential adjustments for sulfur and gravity, divided by the value of the crude oil delivered to the SPR. We are proposing that the value of the crude delivered to the SPR be calculated according to one of the methods described in alternative 1 above, with respect to the numerator of the exchange ratio.

We request comments on the advisability of using other values for the NPR crude oil or crude oil delivered to the SPR in the formulas for computing additional quantities to be transferred to account for quality differentials. We will consider adopting in the final rule alternative methods for computing these values or for computing the additional quantities involved.

The third alternative method proposed would define the exchange ratio in terms of relative crude oil values imputed from refinery product yield and wholesale product price data in a given base period. The numerator of the ratio would be the imputed value of the crude oil type being delivered to the SPR. This value would be computed by multiplying the average yield of various products (naphtha, distillate, gas oil, and residuum) from that crude type, expressed as a volumetric percentage, times the average wholesale price for each product. The denominator of the ratio would be the imputed value of the NPR crude oil type being exchanged. This value would be computed in the same manner as the value of the crude oil delivered to the SPR. Under this alternative, we propose using a rolling base period for determining the yield and price data. The base period would be the month in the previous year corresponding to the month of delivery. However, we will consider adopting in the final rule a fixed base period or a provision for periodically changing the base period.

III. Proposed Special Temporary Relief for Refiners Dependent Upon NPR Crude Oil

If most of the NPR crude oil from the Elk Hills Reserve is exchanged for purposes of acquiring oil for the SPR, certain small refiners located in California might experience a supply loss which they might not be able to replace. Our preliminary review of runs to stills data reported under the Entitlements Program indicates that approximately 50 percent of NPR production in 1978 and 1979 was processed by single-refinery small refiners located in the Elk Hills vicinity. These data further indicate that NPR oil constituted approximately 30 percent of these small refiners' runs to stills during 1978 and 1979.

This Entitlements Program data, however, does not provide a completely accurate picture of these small refiners' dependence on NPR oil. Because of a provision in the Entitlements Program regulations (10 CFR section 211.67(g)), applicable to exchanges involving domestic crude oil, generally speaking, a refiner is deemed to retain any domestic crude oil given up in exchange. For example, if a refiner purchased NPR crude oil but traded it to another refiner for imported crude oil, the original owner of the NPR oil would report it for the purposes of the Entitlements Program, even though the second refiner actually ran the imported crude oil received in the trade. Therefore, we are unable to determine exactly how much NPR crude oil has been physically run in these small refiner refineries. In addition, we do not know the extent to which these small refiners might have access to crude oil supplies other than the NPR crude oil.

However, on the basis of the available data, we have tentatively concluded that it would be appropriate to provide temporary relief through the Buy/Sell Program to these firms that incur a supply loss due to the withdrawal by the Government of NPR oil from the market. Accordingly, we are proposing to add a new subparagraph (c)(2)(iv) to the Buy/Sell Program regulations in section 211.65, which provides for allocations to any small refiner which is able to demonstrate that: (1) its refinery has processed an amount of NPR crude oil in excess of five percent of that refinery's runs to stills during the preceding allocation period; (2) its refinery has incurred or will incur at least a fifty percent loss of its supply of such crude oil due to the Government's crude oil acquisition program for the SPR; (3) it has exhausted any opportunity to obtain NPR crude oil under the NPR Act small refiner set-aside for the period for which an allocation is sought; (4) its refinery cannot reasonably be expected to replace its lost supplies of NPR oil; and (5) its projected runs to stills for its refinery will be less than ERA's estimate of the national utilization rate for all refiners.

We specifically request detailed comments that provide evidence of special hardship, if any, that would arise in the event most NPR oil is exchanged to acquire oil for the SPR. If we are not convinced of the need for special relief, firmly supported by detailed evidence of dependence on NPR oil and lack of access to other crude oil supplies, then we will not adopt in our final rule the proposed provision for temporary relief.

IV. The Entitlements Program

In the SPR Plan, the Federal Energy Administration (FEA), a predecessor agency of DOE, stated its intention to allow the Federal Government to obtain the entitlements benefits for using imported crude oil to fill the SPR to the same extent that refiners receive such benefits for processing imported crude oil. Accordingly, FEA amended its regulations under the EPAA to provide that suppliers of imported crude oil to the SPR would be paid partly in entitlements, thus reducing the Government's cost for the imported crude oil stored in the SPR to the weighted average cost of all crude oil to refiners. *See* 42 FR 21761 (April 29, 1977).

Section 805 of the ESA discussed above directs the President to amend the Entitlements Program regulations, no later than August 29, 1980, so as effectively to allocate lower tier crude oil to the Government for purposes of acquiring oil to store in the SPR. We will soon issue a final rule amending the Entitlements Program to implement these provisions of the ESA.

V. Request for Additional Comments

A. Delivery of Naval Petroleum Reserves Crude Oil To Participating Refiners

Under either of the alternative proposals, the Government would have to apportion in some manner deliveries of the NPR production among those refiners participating in exchange transactions. Such an apportionment could take the form of a daily delivery of NPR oil to each participating firm. It might be operationally more practicable, however, to plan the apportionment over a longer period of time so that all or a major part of NPR production in a given day or period of days would be delivered to a single participating firm or a small number of firms.

We anticipate that refiners participating in exchanges with the Government for NPR oil would be permitted to exchange, trade or sell any NPR crude oil that it receives in an exchange. In the case of such third party transactions it may be most practicable for the Government to deliver the NPR oil directly to the third party rather than to the participating refiner. It is expected, however, that before delivery to such third party could be effected, the Director, Naval Petroleum Reserves in California, would have to receive notice from the participating refiner of the specifics of the transaction at least ten days before the date of delivery.

Comments are specifically invited on the manner in which NPR crude oil should be distributed among the participating refiners, special features which the Government should implement to facilitate delivery of NPR oil to refiners participating in exchanges and, in particular, procedures to facilitate exchanges between refiners participating in exchanges governed by the regulations proposed in this rulemaking and other firms.

B. Legal Issues

Potentially affected refiners are invited to comment on any legal issues or problems they foresee in the proposal. Such comments should be clearly labelled as comments on legal matters and separable from other comments so as to expedite their review by the Office of General Counsel.

VI. Written Comment and Public Hearing Procedures

A. Written Comments

You are invited to participate in this proceeding by submitting data, views or arguments with respect to the proposals set forth in this notice of proposed rulemaking. Written comments should be submitted by 4:30 p.m., September 5, 1980, to the address indicated in the "Addresses" section of this notice and should be identified on the outside envelope and on the document with the docket number and the designation, "Allocation of Crude Oil for the SPR." Fifteen copies should be submitted. All comments received will be available for public inspection in the DOE Freedom of Information Reading Room, 5B–138, Forrestal Building, 1000 Independence Avenue, S.W., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday.

Any information or data submitted which you consider to be confidential must be so identified and submitted in writing, one copy only. We reserve the right to determine the confidential status of such information or data and to treat it according to our determination.

B. Public Hearings

1. *Procedure for Request to Make Oral Presentation.* The dates and places for the hearings are indicated in the "Dates" and "Addresses" sections of this preamble. All hearings will convene at 9:30 a.m. If necessary to present all testimony, a hearing will be continued to 9:30 a.m. of the next business day following the first day of the hearing.

If you have any interest in the proposals in this notice, or represent a group or class of persons that has an interest, you may make a written request for an opportunity to make oral presentation at a hearing by 4:30 p.m. on the dates indicated in the "Dates" section of this preamble, and to the addresses indicated in the "Addresses" section of this preamble. You should be prepared to describe the interest concerned; if appropriate, to state why you are a proper representative of a group or class of persons that has such an interest; and to give a concise summary of the proposed oral presentation. You should also provide a phone number where you may be contacted through the day before the hearing.

If you are selected to be heard, you will be so notified before 4:30 p.m. on August 22, 1980, for the Los Angeles hearing, and before September 1, 1980, for the Washington, D.C. hearing. You will be required to bring one hundred copies of your statement to the address indicated in the "Addresses" section of this preamble for requests to speak at the hearing concerned before 4:30 p.m., August 26, 1980, for the Los Angeles hearing, and September 3, 1980, for the Washington, D.C. hearing.

2. *Conduct of the Hearings.* We reserve the right to select the persons to be heard at the hearings, to schedule

B. Section 7 of the FEA Act

provide for the storage of substantial

V 45 AG 15 80 UMI

their respective presentations, and to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An ERA official will be designated to preside at each of the hearings. They will not be judicial or evidentiary-type hearings. Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

You may submit questions to be asked of any person making a statement at a hearing to the address indicated above for requests to speak at that hearing before 4:30 p.m. on the day before the hearing. If you wish to ask a question at a hearing, you may submit the question, in writing, to the presiding officer. The ERA or, if the question is submitted at a hearing, the presiding officer will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of a hearing will be announced by the presiding officer.

Transcripts of the hearings will be made and the entire record of each of the hearings, including the transcripts, will be retained by the ERA and made available for inspection at the DOE Freedom of Information Reading Room, Room 5B–138, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. You may purchase a copy of the transcript of a hearing from the reporter.

VI. Procedural Requirements

A. Section 404 of the DOE Act

Pursuant to the requirements of Section 404(a) of the Department of Energy Organization Act (DOE Act, 42 U.S.C. 7101 *et seq.*, Pub. L. 95–91, as amended), we are referring this rule to the Federal Energy Regulatory Commisison (FERC) for a determination as to whether the proposed rule would significantly affect any matter within the Commission's jurisdiction. The Commission has until the close of the public comment period to make that determination.

B. Section 7 of the FEA Act

Under section 7(a) of the Federal Energy Administration Act of 1974 (15 U.S.C. 787 *et seq.*, Pub. L. 93–275, as amended), the requirements of which remain in effect under section 501(a) of the DOE Act, the delegate of the Secretary of Energy shall, before promulgating proposed rules, regulations, or policies affecting the quality of the environment, provide a period of not less than five working days during which the administrator of the Environmental Protection Agency (EPA) may provide written comments concerning the impact of such rules, regulations, or policies on the quality of the environment. Such comments shall be published together with publication of notice of the proposed action.

A copy of this notice was sent to the EPA that he does not foresee the proposed rule as having unfavorable impacts on the quality of the environment beyond those addressed in the Environmental Impact Statements prepared to date on the SPR. The EPA Administrator has reserve the right to make additional comments in accordance with the EPA's duties and responsibilities under section 309 of the Clean Air Act.

C. National Environmental Policy Act

On June 6, 1980, the Assistant Secrtary for Environment determined after consultation with the Office of General Counsel that today's proposals if adopted would not significantly affect the quality of the human environment within the meaning of the National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et. seq.*)

D. Executive Order 12044

Executive Order 12044 "Improving Government Regulaitons" (43 FR 12661, March 24, 1978) requires agencies subject to it to publish all proposed "significant" regulations for public comment for a minimum of 60 days. In section 2(c), the ORder recognizes that there are some instances where an agency may appropriately determine that it is necessary to provide for a shorter time period. In accordance with paragraph 12 of DOE's implementing procedures, DOE Order 2030.1 "Procedures for the Development and Analysis of Regulations, Standards, and Guidelines" (44 FR 1032, January 3, 1979), the 60–day comment period has been waived by the Secretary in light of the following public interest considerations and short-term statutory deadline.

As previously discussed in this preamble, the objective of the SPR is to provide for the storage of substantial quantities of petroleum in order to diminish the United States' vulnerability to the effects of a severe supply interruption, including the danger to national security and the Nation's freedom of action in world affairs. Acquisition of crude oil for storage in the SPR clearly must be resumed in order to fulfill this objective. Moreover, Congress has recently mandated in the Energy Security Act that crude oil acquisition for the SPR be immediately resumed so that oil is stored in the SPR at a rate of at least 100,000 B/D by October 1, 1980. Considering the uncertain world oil market and the rapid escalation of world oil prices, the use of NPR oil to acquire oil for the SPR appears to be the most practicable and expeditious method of achieving the SPR objective and meeting the statutory deadline, while at the same time avoiding undue pressures on the world oil market. Inasmuch as competitively-conducted exchanges of NPR oil for oil to be delivered to the SPR may not produce satisfactory offers of sufficient volumes of oil, an amendment to the petroleum allocation regulations is needed to provide DOE with the requisite authority to require such exchanges.

Since it is in the public interest to resume the filling of the SPR at the earliest possible time and Congress has directed that a storage rate of 100,000 B/D be achieved by October 1, 1980, the Secretary has determined that adherence to the normal 60-day public comment period would result in unacceptable days in acquisition of oil for the SPR. We are, however, providing for a 30-day period for public comment, which period is consistent with the minimum public comment period required by section 501(b) of the DOE Act.

The Executive Order also requires that a regulatory analysis be prepared for all significant regulations which are likely to have a major impact. For the reasons supporting the waiver of the 60-day comment period, the Secretary has waived the requirement for a regulatory analysis.

(Emergency Petroleum Allocation Act of 1973, 15 U.S.C. § 751 *et seq.*, Pub. L. 93–159, as amended, Pub. L. 93–511, Pub. L. 94–99, Pub. L. 94–133, Pub. L. 94–163, and Pub. L. 94–385; Federal Energy aDministration Act of 1974, 15 U.S.C. § 787 *et seq.*, Pub. L. 93–275, as amended, Pub. L. 94–332, Pub. L. 94–385, Pub. L. 95–70, and Pub. L. 95–91; Energy Policy and Conservation Act, 42 U.S.C. § 6201 *et seq.*, Pub. L. 94–163, as amended, Pub. L. 94–385, and Pub. L. 95–70, Pub. L. 95–619, and Pub. L. 96–30; Department of Energy Organization Act, 42 U.S.C. § 7101 *et seq.*, Pub. L. 95–91, Pub. L. 95–509, Pub. L. 95–619, Pub. L. 95–620, and Pub. L. 95–621; E.O. 11790, 39 FR 23185; E.O. 12009, 42 FR 46267)

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal REgulations, is proposed to be amended as set forth below.

Issued in Washington, D.C., August 8, 1980.

Hazel R. Rollins,

Administrator, Economic Regulatory Administration.

Alternative Proposal No. 1: Acquisition of Crude Oil for the Strategic Petroleum Reserve By Exchange of Naval Petroleum Reserves Crude Oil and Other Means.

§ 211.62 [Amended]

1. Section 211.62 is amended by adding the definitions of "Naval Petroleum Reserves (NPR)" and "NPR crude oil" in proper alphabetical order to read as follows:

* * * * *

"Naval Petroleum Reserves (NPR)" means Naval Petroleum Reserve Number 1 (Elk Hills), located in Kern County, California, established by Executive Order of the President, dated September 2, 1912; Naval Petroleum Reserve Number 2 (Buena Vista), located in Kern County, California, established by Executive Order of the President, dated December 13, 1912; Naval Petroleum Reserve Number 3 (Teapot Dome), located in Natrona County, Wyoming, established by Executive Order of the President, dated April 30, 1915.

"NPR crude oil" means crude oil produced from the Naval Petroleum Reserves.

* * * * *

2. Part 211 is amended by adding a new section 211.68 to read as follows:

§ 211.68 Allocation of Crude Oil for the Strategic Petroleum Reserve Through Exchange of NPR crude oil and other means.

(a) *Definitions.* For purposes of this section, the following definitions apply:

"Exchange partner" means any refiner that is a refinerseller as defined in § 211.62 of this chapter and any other refiner that is not a small refiner as defined in § 211.62 of this chapter.

"Exchange period" means a consecutive six-month calendar period. The first exchange period shall be established by DOE in the first exchange notice.

(b) *Required delivery of crude oil to the Strategic Petroleum Reserve.* For the purpose of meeting the storage needs of the Strategic Petroleum Reserve, DOE may direct one or more exchange partners to deliver to the Strategic Petroleum Reserve crude oil of one or more suitable types in quantities determined in accordance with paragraph (e) of this section, in exchange for NPR crude oil, *Provided, however,* That in lieu of delivering NPR crude oil to the exchange partner, DOE may compensate any such partner in cash in accordance with paragraph (c)(2)(iii) of this section.

(c) *Discharge of exchange/sale obligations.* The DOE may specify in the Exchange Notice one or more of the methods set forth in paragraphs (c)(1) and (c)(2) of this section for discharging exchange/sale obligations for each exchange period:

(1) *Voluntary exchange offers.*—(i) *Submission of exchange offers.* If so stated in the Exchange Notice for any exchange period, during the 15 days following the publication of the Exchange Notice any exchange partner may submit an exchange offer to DOE. Such an exchange offer shall specify the type or types of crude oil offered to be delivered to the Strategic Petroleum Reserve, the respective volumes of each type of crude oil offered, the week or weeks during which such crude oil is offerd to be delivered, the terminal or terminals of the Strategic Petroleum Reserve to which such crude oil is to be delivered, and the ratio for determining the volume of NPR crude oil that the offeror would receive in exchange.

(ii) *Acceptance of exchange offers.* At any time during the 30 days following the publication of the Exchange Notice, DOE may accept any voluntary exchange offer submitted in accordance with paragraph (c)(1)(i) of this section. The exchange/sale obligation of any exchange partner whose offer is accepted by DOE shall be reduced to the extent of the volume of oil actually delivered to the Strategic Petroleum Reserve pursuant to such offer.

(iii) *Voluntary exchanges insufficient.* In the event voluntary exchange offers of crude oil of sufficient quality and quantity are not accepted for any exchange period, then DOE shall so notify the exchange partners and the exchange/sale obligations shall be discharged in accordance with paragraph (c)(2) of this section.

(2) *Mandatory exchange or sale.*—(i) *Delivery of oil to the Strategic Petroleum Reserve.* Each exchange partner shall deliver to the Strategic Petroleum Reserve the quantity of crude oil equal to its exchange/sale obligation for that period; *Provided, however,* That DOE may direct certain exchange partners to deliver suitable crude oil to the Strategic Petroleum Reserve in specified quantities, whether such quantities are equal to or more or less than the exchange partner's exchange/sale obligation for that period. In directing an exchange partner to deliver crude oil to the Strategic Petroleum Reserve, DOE shall consider the factors specified in paragraph (h)(2) of this section and the relative capabilities of the exchange partners to consummate delivery of the type of oil needed.

(ii) *Direct exchange for NPR oil.* Each exchange partner making delivery of oil to the Strategic Petroleum Reserve under paragraph (c)(2) of this section shall be entitled to receive at the lease automatic custody transfer units a volume of NPR crude oil in exchange determined by multiplying the volume of crude oil delivered to the Strategic Petroleum Reserve by the exchange ratio specified in paragraph (f) of this section, unless DOE elects to compensate any such exchange partner under paragraph (c)(2)(iii) of this section.

(iii) *Compensation by means other than direct exchange for NPR oil.* For any exchange period DOE may make a cash payment to any exchange partner making delivery of oil to the Strategic Petroleum Reserve under paragraph (c)(2)(i) of this section, in an amount equal to the estimated weighted average landed cost of [that exchange partner's] [all exchange partners'] [imported crude oil] [domistic crude oil the first sale of which is exempt from the provisions of Part 212 of this Chapter] for the month in which the exchange occurs, such estimated cost to be adjusted to the actual cost in the second month following the month in which the exchange occurs, in lieu of a direct exchange for NPR crude oil under paragraph (c)(2)(ii) of this section.

(d) *Exchange Notices.* Whenever the DOE determines to allocate crude oil for the Strategic Petroleum Reserve under this section, the DOE shall issue an Exchange Notice at least 20 days prior to the beginning of the exchange period. The Exchange Notice shall specify the total quantity of crude oil to be delivered to the Strategic Petreoleum Reserve; the relative quantities of each type of crude oil and the specifications of each such type; the exchange/sale obligation of each exchange partner; the exchange ratio for NPR crude oil; which method or methods of discharging exchange/sale obligations will be required for that exchange period under paragraph (c) of this section; and any other special terms or conditions applicable to exchange transactions for that exchange period.

(e) *Exchange partners' exchange/sale obligations.*—(1) *Total exchange obligation.* The total exchange/sale obligation for each exchange period shall be that quantity of crude oil which the DOE determines should be acquired

for the Strategic Petroleum Reserve for that exchange period by means of the regulated exchange or sale transactions provided for in this section. The total exchange/sale obligation shall be published in the Exchange Notice for each exchange period.

(2) *Calculation of exchange/sale obligation of each exchange partner.* (i) The DOE shall compute an exchange/sale obligation for each exchange partner for each exchange period as provided in paragraph (e)(3) of this section.

(ii) With DOE's approval part or all of any exchange partner's exchange/sale obligation may be traded to any other firm any time prior to the beginning of or during the exchange period. Any such trade, however, shall not relieve the exchange partner of its obligation in the event the other firm fails to perform.

(3) *Computation of exchange/sale obligation.* (i) The exchange/sale obligation for each exchange partner shall consist of that exchange partner's fixed percentage share as calculated under paragraph (e)(3)(ii) of this section multiplied by the total exchange/sale obligation for all exchange partners.

(ii) An exchange partner's fixed percentage share is its proportionate shre of the total runds to stills of all exchange partners reported during the period from August 1, 1979 through July 31, 1980.

(4) *Credit for oil supplied through non-regulated exchange or sale.* For each barrel of crude oil an exchange partner delivers to the Strategic Petroleum Reserve after July 1, 1980, in a sale or exchange other than pursuant to this rule, the exhange partner shall receive a one-barrel credit against its excnange/sale obligation for the first or current exchange period. Any unused credit shall be applied to the next exchange period.

(5) [Alternative 1: *Carryover adjustments.* To the extent the volume of crude oil actually delivered to the Stategic Petroleum Reserve by any exchange partner in any exchange period is more or less than the volume of that partner's exchange/sale obligation for that period, that exchange partner's exchange/sale obligation for the succeeding exchange period shall be increased or decreased.]

[Alternative 2: *Adjustments among exchange partners.* If any exchange partner is directed to supply crude oil to the Strategic Petroleum Reserve in any exchange period under paragraph (c)(2)(i) of this section in an amount in excess of its exchange/sale obligation for that period then such exchange partner shall be reimbursed in the amount of such excess by means of sales or trades of crude oil by those exchange partners that have not been directed to fully satisfy their exchange/sale obligations for that period.]

(f) *Exchange ratio for NPR crude oil defined.*

[Alternative Proposal 1: (1) *Numerator.* The numerator of the ratio shall be the estimated weighted average delivered cost, to all refiners for the month in which the NPR crude oil is to be delivered to the exchange partner, of all generic imported crude oils and domestic crude oils the first sale of which is exempt from the ceiling price limitations of Part 212 of this chapter meeting the specifications of the type of crude oil being delivered to the Strategic Petroleum Reserve, such estimated cost to be adjusted to the actual cost in the second month following the month in which the exchange occurs.

(2) *Denominator.* (1) For purposes of an exchange of NPR crude oil from Reserve Number 3 (Teapot Dome), the denominator of the ratio shall be the average of the two highest posted prices for domestic crude oil the first sale of which is exempt from the ceiling price limitations of Part 212 of this Chapter of like quality produced in the State of Wyoming.

(ii) For the purposes of an exchange of NPR crude oil from Reserves Number 1 (Elk Hills) or Number 2 (Buena Vista), the denominator of the ratio shall be the average of the two highest posted prices for domestic crude oil the first sale of which is exempt from the ceiling price limitations of Part 212 of this Chapter of like quality produced from each of at least three fields to be designated by DOE.

(iii) The posted prices used shall be those in effect at the time the NPR crude oil is to be delivered to the exchange partner. However, if subsequent to the delivery of the NPR crude oil any price is posted having a retroactive effective date encompassing the delivery date, then the exchange ratio shall be adjsuted accordingly. No posted price shall be used in the computation unless an actual purchase has been completed at that price.]

[Alternative Proposal 2: (1) *Barrel-for-barrel exchange.* Crude oil delivered to the Strategic Petroleum Reserves shall be exchanged barrel-for-barrel with NPR crude oil.

(i) An adjustment shall be made for differences in API gravity between the crude oil delivered to the Strategic Petrolieum Reserve and the NPR crude oil. For each 0.1 (one-tenth) degree API gravity that crude delivered to the Strategic Petroleum Reserve is below or above the API gravity of the NPR crude oil being exchanged, a cash payment equal to five cents per barrel shall be made to or from the DOE, respectively.

(ii) An adjustment shall be made for differences in sulfur content between the crude oil delivered to the Strategic petroleum Reserve and the NPR crude oil. For each 0.1 (one-tenth) percent sulfur content that crude oil delivered to the Strategic Petroleum Reserve is above or below the sulfur content of the NPR crude oil being exchanged, a cash payment equal to ten cents per barrel shall be made to or from the DOE, respectively.

(iii) Additional adjustments to account for differences in location and transportation of crude oil delivered to the Strategic Petroleum Reserve and NPR crude oil being exchanged may be made.

(2) *Payment in kind.* The DOE may require that payment for adjustments be made in crude oil of equal value in lieu of cash payments. For crude oil payments, the quantity of crude oil to be transferred to or from the DOE shall be based upon the total value of all adjustments, divided by the value of a barrel of crude oil delivered to the Strategic Petroleum Reserve (for payments made to the DOE), or the value of a barrel of NPR crude oil being exchanged (for payments made by the DOE).

(i) For purposes of computing the value of crude oil delivered to the SPR, the value shall be the estimated weighted average delivered cost, to all refiners for the month in which the NPR crude oil is to be delivered to the exchange partner, of all generic imported crude oils and domestic crude oils the first sale of which is exempt from the ceiling price limitations of part 212 of this chapter meeting the specifications of the type of crude oil being delivered to the Strategic Petroleum Reserve, such estimated cost to be adjusted to the actual cost in the second month following the month in which the exchange occurs.

(ii) For purposes of computing the value of NPR crude oil being exchanged:

(A) For purposes of an exchange of NPR crude oil from Reserve Number 3 (Teapot Dome), the value shall be the average of the two highest posted prices for domestic crude oil the first sale of which is exempt from the ceiling price limitations of Part 212 of this Chapter from the ceiling price limitations of Part 212 of this Chapter of like quality produced in the State of Wyoming.

(B) For the purposes of an exchange of NPR crude oil from Reserves Number 1 (Elk Hills) or Number 2, (Buena Vista), the value shall be the average of the two highest posted prices for domestic crude oil the first sale of which is exempt from the ceiling price limitations of Part 212 of this Chapter of like quality produced from each of at least three fields to be designated by DOE.

(iii) The posted prices used shall be those in effect at the time the NPR crude oil is to be delivered to the exchange partner. However, if subsequent to the delivery of the NPR crude oil any price is posted having a retroactive effective date encompassing the delivery date, then the exhange ratio shall be adjusted accordingly. No posted price shall be used in the computation unless an actual purchase has been completed at that price.]

[Alternative Propsal 3: The numerator of the ratio shall be computed by multiplying, for the oil type delivered to the Strategic Petroleum Reserve, the average percentage yield per volume of naphtha, distillate, gas oil, and residuum times the wholesale price for each such product during the month of the previous year corresponding to the month of delivery. The denominator of the ratio shall be computed by multiplying, for the NPR oil type being exchanged, the average percentage yield per volum of naphtha, distillate, gas oil, and residuum ties the average wholesale price for each such product during the month of the previous year corresponding to the month of delivery.]

(g) *Post-delivery adjustments.* In any exchange transaction, if, subsequent to the time deliveries are completed, adjustments to the volumes of crude oil received and delivered by DOE are necessary to equalize the transaction, and DOE finds it impracticable to deliver or receive additional crude oil, DOE may provide such adjustments by making a cash payment to the exchange partner or by directing the exchange partner to make a cash payment to DOE.

(h) *Delivery of oil to the Strategic Petroleum Reserve.* (1) When exchange/sale obligations are required to be discharged in accordance with paragraph (c)(2) of this section, each exchange partner (unless DOE directs certain exchange partners to deliver schedule to DOE at the address specified in the Exchange Notice as soon as practicable, but no later than 15 days after publication of the Exchange Notice. If, however, the Exchange Notice permits the submission of voluntary exchange offers for that exchange period under paragraph (c)(1) of this section, then the proposed delivery schedule shall be submitted no later than 15 days after DOE has notified the exchange partners that voluntary exchanges are insufficient and that exchange/sale obligations are to be discharged by means of mandatory exchange/sale transactions, in accordance with paragraph (c)(2) of this section. The proposed delivery schedule shall list, for each proposed delivery date, the types of oil to be delivered, the relative volumes of each oil type, and the exchange partner's preference regarding the terminal to which the oil is proposed to be delivered.

(2) DOE shall consider each proposed delivery schedule submitted under paragraph (h)(1) of this section in the order received and shall notify each exchange partner within five days of receipt of the proposed schedule whether the proposed schedule has been accepted or rejected in whole or in part. All ship nomination and acceptance procedures shall be in accordance with any then-current port manual of the relevant receiving terminal of the Strategic Petroleum Reserve. In determining whether to accept or reject a proposed delivery schedule, DOE shall consider the Strategic Petroleum Reserve's dock and terminal availability and capacity and prior delivery commitments. In its notice rejecting a proposed schedule in whole or in part DOE shall explain its reasons for the rejection and may propose alternative dates, volumes, and/or types of oil which would be appropriate for delivery. To account for daily receipt capabilities at the various terminals, DOE shall in all cases specify the terminal to which a particular shipment shall be delivered.

(3) Upon notice by DOE of acceptance of an exchange partner's delivery schedule, the exchange partner shall be obligated to make delivery of the type and volume of crude oil scheduled on the date scheduled, plus or minus two days. Within five days of receipt of a DOE notice rejecting an exchange partner's delivery schedule, the exchange partner shall submit an alternative proposed delivery schedule to DOE. If such proposed delivery schedule is unacceptable, DOE may specify the delivery schedule.

(4) Each exchange partner shall coordinate its deliveries of oil to the Strategic Petroleum Reserve with its receipts from the NPR in a manner such that at the end of the first 90 days of each exchange period, and again at the end of each exchange period, the exchange partner has not received a volume of NPR crude oil that is greater, multiplied times the exchange ratio, than the volume of crude oil it has delivered to the Strategic Petroleum Reserve.

Alternative Proposal No. 2: Amendments to the Crude Oil Buy/Sell Program to Required Exchange of Naval Petroleum Reserves Crude Oil for Crude Oil to be Stored in the Strategic Petroleum Reserve

§ 211.62 [Amended]

1. Section 211.62 is amended by revising the definition of "refiner-buyer" and by adding the definitions of "Naval Petroleum Reserves" and "NPR crude oil" in proper alphabetical order to read as follows:

* * * * *

"Naval Petroleum reserves (NPR)" means Naval Petroleum Reserve Number 1 (Elk Hills), located in Kern County, California, established by Executive Order of the President, dated September 2, 1912; Naval Petroleum Reseve Number 2, (Buena Vista), located in Kern County, California, established by Executive Order of the President, dated December 13, 1912; Naval Petroleum Reserve Number 3 (Teapot Dome), located in Natrona County, Wyoming, established by Executive Order of the President, dated April 30, 1915.

"NPR crude oil" means crude oil produced from the Naval Petroleum Reserves.

* * * * *

"Refiner-buyer" means any small refiner which is determined to be eligible for an allocation of crude oil pursuant to § 211.65 of this subpart. Refiner-buyer shall also mean the United States Government when crude oil is allocated for the Strategic Petroleum Reserve pursuant to § 211.65(1) of this subpart.

2. Section 211.65 is amended by adding a new paragraph (1) to read as follows:

§ 211.65 Method of allocation.

* * * * *

(l) *Special provisions governing allocation of crude oil for the Strategic Petroleum Reserve and exchanges of NPR crude oil.*—

(1) *Provisions applicable to allocations of oil for the Stategic Petroleum Reserve.* Except as otherwise provided in this paragraph (1), only the provisons of paragraphs (e) through (h), (i)(2) through i(5), and (j)(3) of this section shall apply to the allocation of crude oil for the Strategic Petroleum Reserve.

(2) *Allocation of crude oil for the Strategic Petroleum Reserve.* For any allocation period the Strategic Petroleum Reserve may be assigned an allocation of suitable grade and quality crude oil in such quantities as DOE determines should be acquired for

V 45 AG 15 80 UMI

storage in the Strategic Petroleum Reserve for that allocation period by means of the regulated exchange or sale transactions provided for in this section.

(3) *Buy/Sell notice.* The buy/sell notice specified in paragraph (g) of this section shall also specify the relative volumes of crude oil allocated to the Strategic Petroleum Reserve for which DOE will compensate refiner-sellers by cash payments in accordance with paragraph (i)(4) of this section and by exchange of NPR oil; the relative quantities of each type of crude oil to be delivered to the Strategic Petroleum Reserve and the specifications of each such type; the exchange ratio for NPR crude oil applicable to directed deliveries; and any other special terms or conditions applicable to sale or exchange transactions with the Strategic Petroleum Reserve for that allocation period.

(4) *Discharge of allocation obligations to the Strategic Petroleum Reserve and method of payment*—(i) *Negotiated transactions.* In negotiated transactions specified in paragraph (g)(1) of this section, DOE may compensate any refiner-seller who delivers oil to the Strategic Petroleum Reserve by means of a negotiated exchange of NPR oil, in lieu of cash payment as provided in paragraph (i)(4) of this section.

(ii) *Directed transactions.* Each refiner-seller directed to deliver oil to the Strategic Petroleum Reserve under paragraph (j)(3) of this section that is not compensated in cash under paragraph (i)(4) of this section shall receive a volume of NPR crude oil in exchange determined by multiplying the volume of crude oil delivered to the Strategic Petroleum Reserve by the exchange ratio provided in paragraph (1)(5) of this section.

(iii) *Credit for oil supplied through competitive exchange or sale.* Any refiner-seller which delivers crude oil to the Strategic Petroleum Reserve after July 1, 1980, in a sale or exchange other than pursuant to this rule, shall receive a barrel-for-barrel credit against its total allocation obligation for the first or current allocation period in which crude oil is allocated to the Strategic Petroleum Reserve. Any unused credit shall be applied against the allocation obligation in the next allocation period in which crude oil is allocated to the Strategic Petroleum Reserve.

(5) *Exchange ratio for NPR crude oil defined.*

[Alternative Proposal 1: (A) *Numerator.* The numerator of the ratio shall be the estimated weighted average delivered cost, to all refiners for the month in which the NPR crude oil is to be delivered to the refiner-seller, of all generic imported crude oils and domestic crude oils the first sale of which is exempt from the ceiling price limitations of Part 212 of this chapter meeting the specifications of the type of crude oil being delivered to the Strategic Petroleum Reserve. In the second month following the month in which the exchange occurs, such estimated costs shall be adjusted to the actual costs.

(B) *Denominator.* (*1*) For purposes of an exchange of NPR crude oil from Reserve Number 3 (Teapot Dome), the denominator of the ratio shall be the average of the two highest posted prices for domestic crude oil the first sale of which is exempt from the ceiling price limitations of Part 212 of this chapter of like quality produced in the State of Wyoming.

(*2*) For the purposes of an exchange of NPR crude oil from Reserves Number 1 (Elk Hills) or Number 2 (Buena Vista), the denominator of the ratio shall be the average of the two highest posted prices for domestic crude oil the first sale of which is exempt from the ceiling price limitations of Part 212 of this chapter of like quality produced from each of at least three fields to be designated by DOE.

(*3*) The posted prices used shall be those in effect at the time the NPR crude oil is to be delivered to the refiner-seller. However, if subsequent to the delivery of the NPR crude oil any price is posted having a retroactive effective date encompassing the delivery date, then the computation of the exchange ratio shall be adjusted accordingly. No posted price shall be used in the computation unless an actual purchase has been completed at that price.]

[Alternative Proposal 2: (A) *Barrel-for-barrel exchange.* Crude oil delivered to the Strategic Petroleum Reserve shall be exchanged barrel-for-barrel with NPR crude oil.

(*1*) An adjustment shall be made for differences in API gravity between the crude oil delivered to the Strategic Petroleum Reserve and the NPR crude oil. For each 0.1 (one-tenth) degree API gravity that crude oil delivered to the Strategic Petroleum Reserve is below or above the API gravity of the NPR crude oil being exchanged, a cash payment equal to five cents per barrel shall be made to or from the DOE, respectively.

(*2*) An adjustment shall be made for differences in sulfur content between the crude oil delivered to the Strategic Petroleum Reserve and the NPR crude oil. For each 0.1 (one-tenth) percent sulfur content that crude oil delivered to the Strategic Petroleum Reserve is above or below the sulfur content of the NPR crude oil being exchanged, a cash payment equal to ten cents per barrel shall be made to or from the DOE, respectively.

(*3*) Additional adjustments to account for differences in location and transportation of crude oil delivered to the Strategic Petroleum Reserve and NPR crude oil being exchanged may be made.

(B) *Payment in kind.* The DOE may require that payment for adjustments be made in crude oil of equal value in lieu of cash payments. For crude oil payments, the quantity of crude oil to be transferred to or from the DOE shall be based upon the total value of all adjustments, divided by the value of a barrel of crude oil delivered to the Strategic Petroleum Reserve (for payments made to the DOE, or the value of a barrel of NPR crude oil being exchanged for payments made by the DOE).

(*1*) For purposes of computing the value of crude oil delivered to the Strategic Petroleum Reserve. The value shall be the estimated weighted average delivered cost, to all refiners for the month in which the NPR crude oil is to be delivered to the refiner-seller, of all generic imported crude oils and domestic crude oils the first sale of which is exempt from the ceiling price limitations of Part 212 of this chapter meeting the specifications of the type of crude oil being delivered to the Strategic Petroleum Reserve, such estimated cost to be adjusted to the actual cost in the second month following the month in which the exchange occurs.

(*2*) For purposes of computing the value of NPR crude oil being exchanges:

(*i*) For purposes of an exchange of NPR crude oil from Reserve Number 3 (Teapot Dome), the value shall be the average of the two highest posted prices for domestic crude oil the first sale of which is exempt from the ceiling price limitations of Part 212 of this Chapter of like quality produced in the State of Wyoming.

(*ii*) For the purposes of an exchange of NPR crude from Reserve Number 1 (Elk Hills) or Number 2 (Buena Vista), the value shall be the average of the two highest posted prices for domestic crude oil the first sale of which is exempt from the ceiling price limitations of Part 212 of this Chapter of like quality produced from each of at least three fields to be designated by DOE.

(*3*) The posted prices used shall be those in effect at the time the NPR crude oil is to be delivered to the refiner-seller. However, if subsequent to the delivery of the NPR crude oil any price is posted having a retroactive effective date encompassing the delivery date, then the exchange ratio shall be adjusted accordingly. [No posted price shall be used in the computation unless an actual purchase has been completed at that price.]

[Alternative Proposal 3: The Numerator of the ratio shall be computed by multiplying, for the crude oil type delivered to the Strategic Petroleum Reserve, the average percentage yield per volume of naphtha, distillate, gas oil, and residuum times the wholesale price for each such product during the month of the previous year corresponding to the month of delivery. The denominator of the ratio shall be computed by multiplying, for the NPR crude oil type being exchanged, the average percentage yield per volume of naphtha, distillate, gas oil, and residuum times the average wholesale price for each such product during the month of the previous year corresponding to the month of delivery.]

Additional Proposal: Amendments to the Crude Oil Buy/Sell Program To Provide for a Special Allocation of Crude Oil to Refiners Experiencing a Loss of NPR Crude Oil

Section 21.65 is amended by adding a new subsection (iv) to paragraph (c)(2) to read as follows:

§ 211.65 Method of allocation.

* * * * * *

(c) *Review of eligibility for allocations, adjustments to purchase opportunities, and emergency allocations.*

(2) *Emergency allocations.* (i) * * *

(iv) *Special allocation due to loss of supply of NPR crude oil.*—(A) *Eligibility.* Any small refiner may apply to ERA for a special allocation of crude oil with respect to one or more of its refineries if: (*1*) the refiner has processed in the refinery for which an allocation is sought a volume of NPR crude oil in excess of five percent of such refinery's crude oil runs to stills during the allocation period prior to the period for which an allocation is sought: (*2*) the refinery has incurred or will incur, during the period for which an allocation is sought, at least a fifty percent loss of its supply of NPR crude oil for such refinery due to the exchange of such NPR oil for oil delivered to the Strategic Petroleum Reserve; (*3*) the refiner has exhausted any opportunity to obtain NPR crude oil under 10 U.S.C. 7430(d), during the period for which an allocation is sought; (*4*) the refinery as a result of the loss of its supply of NPR crude oil projects that the crude oil runs to stills for such refinery during the period for which an allocation is sought will be less than the national utilization rate (as used in paragraph (c)(2)(iii) of this section) for all refiners during the second month prior to the period for which an allocation is sought; and (*5*) the refiner cannot reasonably be expected to replace its lost supplies through its own efforts.

(B) *Allocation.* In the event ERA determines that a small refiner is eligible for a special allocation with respect to one or more of its refineries, ERA may assign a maximum allocation for the eligible refinery or refineries for one or more months equal to the volume of NPR crude oil which has been lost for that period, except that no small refiner may receive a special allocation of crude oil for any of its refineries for more than two allocation periods.

Part VII

Department of the Interior

Fish and Wildlife Service

Leon Springs Pupfish, Listing as Endangered With Critical Habitat; McKittrick Pennyroyal, Proposed Determination as a Threatened Species and Determination of Critical Habitat; Review on 18 Species of Foreign Reptiles

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Listing of Leon Springs Pupfish as Endangered With Critical Habitat

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines the Leon Springs pupfish (*Cyprinodon bovinus*), to be Endangered with Critical Habitat in Diamond Y Spring and its outflow stream Leon Creek in Pecos County, Texas. This is the only known wild population of this species. This action is being taken due to the decline of the population and alteration of its habitat. Decline in the population has resulted from the hybridization with a closely related species of pupfish (*Cyprinodon variegatus*) which was introduced into Leon Creek. This rule provides the full protection of the Endangered Species Act, as amended to the Leon Springs pupfish.

DATES: This rule becomes effective on September 15, 1980.

ADDRESSES: Questions concerning this action may be addressed to: Director, (OES), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240. Comments and materials relating to the rule are available for public inspection by appointment during normal business hours at the Service's Office of Endangered Species Suite 500, 1000 N. Glebe Road, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Spinks, Jr., Chief, Office of Endangered Species, U.S. Fish and Wildlife, Washington, D.C. (703/235–2771).

SUPPLEMENTARY INFORMATION:

Background

The Leon Springs pupfish was proposed as Endangered with Critical Habitat on August 15, 1978. Subsequently, Congress passed the Endangered Species Act Amendments of 1978, which substantially modified the procedures the Service must follow when designating Critical Habitat. In order to bring the Service in compliance with the amendments, the Critical Habitat portion of the original proposal was withdrawn March 6, 1979 (FR 44 12382–12384). Critical Habitat for the Leon Springs pupfish was reproposed on May 16, 1980 (FR 45 32350–32353). A public meeting was held in Fort Stockton, Texas, on June 13, 1980.

The Leon Springs pupfish was discovered in 1851 from Leon Springs, approximately 8 miles west of Fort Stockton, Texas. Since that time, Leon Springs has been radically modified (diverted, dammed, and poisoned) and ceased flowing in 1958 due to excessive groundwater removal. The pupfish disappeared from this locality prior to 1938 and was thought to be extinct. In 1965 the species was rediscovered by W. L. Minckley and W. E. Barber from Diamond Y Spring, located approximately 9 miles north of Fort Stockton, Texas.

The species is a small (1.5 inches in length) robust fish varying in body color from dusky gray to iridescent blue. Sexes can be readily distinguished by shape, color, and lateral markings. The Leon Springs pupfish inhabits highly saline habitat preferring quiet waters near the edges of shallow pools with a minimal growth of vegetation. Male pupfish guard small territories in shallow waters, where the females are attracted by courtship behaviors, spawning takes place, and eggs are deposited. Pupfish do much of their feeding from the bottom mud or from vegetation consuming invertebrates, detritus, diatoms, and vascular plants. The population of Leon Springs pupfish existing in Diamond Y Spring and its outflow stream seems to be in good condition with summer densities reaching more than 3 fish per square yard in shallow open habitats.

Much of the original habitat of this species was destroyed by diversion of water for irrigation, impoundment construction, and the desiccation of spring flows caused by excessive pumping of the underground aquifer. Currently, the single remaining pupfish habitat is threatened by oil pollution, diminishing spring flows, and the release of harmful exotic fishes.

Section 4(a) of the Act (16 U.S.C. 1531 et seq.) states: "General—(1) The Secretary shall by regulation determine whether any species is an endangered species or a threatened species because of any of the following factors:

(1) The present or threatened destruction, modification or curtailment of its habitat or range;
(2) Overutilization for commercial, sporting, scientific, or educational purposes;
(3) Disease or predation;
(4) the inadequacy of existing regulatory mechanisms; or
(5) other natural or man-made factors affecting its continued existence."

This authority has been delegated to the Director.

Summary of Factors Affecting the Species

The Leon Springs pupfish was historically known only from Leon Springs, Leon Creek, and Diamond Y Spring, located west and north of Fort Stockton, Texas. The diversion of spring waters for irrigation and the excessive removal of ground water was responsible for the drying of Leon Springs and the upper portion of Leon Creek. Presently, this species is limited to Diamond Y Spring and its outflow into Leon Creek, approximately a 4 mile stretch of permanent aquatic habitat, which is threatened by several habitat and environmental disturbances.

The findings from recent studies and available literature and summarized herein under each of the five criteria of Section 4(a) of the Act. These factors, and their application to the Leon Springs pupfish, are as follows:

1. *The present or threatened destruction, modification, or curtailment of its habitat or range.* The present habitat of the Leon Springs pupfish is surrounded by an active oil and gas field. A refinery is located approximately 500 yards upstream of the main spring head that supplies permanent water to the pupfish habitat. In the past oil spills have occurred in this area and have caused considerable fish mortality. Although oil companies have taken actions to minimize leakage of petroleum and waste products into Diamond Y Spring and Leon Creek, the potential for substantial oil spills still exist.

The pumping of groundwater in Pecos County, Texas, has resulted in the desiccation of several springs and has reduced the discharge from Diamond Y and associated springs supporting Leon Creek. If underground water supplies continue to be removed at excessive rates or are otherwise altered, the wild Leon Springs pupfish population and its essential natural habitat could be destroyed.

2. *Overutilization for commercial, sporting, scientific, or educational purposes.* Not applicable.

3. *Disease or predation.* Not applicable.

4. *The inadequacy of existing regulatory mechanisms.* State laws concerning endangered species of Texas prohibit the taking of this pupfish, but do not provide mechanisms to encourage habitat protection. Listing the Leon Spring pupfish would require Federal agencies to review their actions prior to the commitment of resources to assure that their proposals would either conserve listed species or are not likely to jeopardize the continued existence of listed species or both.

5. *Other natural of man-made factors affecting its continued existence.* The sheepshead minnow (*Cyprinodon variegatus*), which is closely related to the Leon Springs pupfish, was released into Leon Creek in 1974. This introduction resulted in the widespread hybridization between *Cyprinodon variegatus* and *Cyprinodon bovinus*, threatening the genetic purity of the Leon Springs pupfish. A carefully supervised fish poisoning program and intensive selective seining efforts successfully removed all exotic sheepshead minnows and hybrids from Diamond Y Spring and Leon Creek by August of 1978. Although the present Leon Springs pupfish population seems to be genetically pure, many areas of its habitat are readily accessible and still vulnerable to the release of harmful exotics.

Summary of Comments and Recommendations

Section 4(b)(1)(C) of the Act requires that a summary of all comments and recommendations received be published in the **Federal Register** prior to adding any species to the list of Endangered and Threatened Wildlife and Plants. Comments received on the original proposal and the reproposal of Critical Habitat are summarized below. A total of six comments were received, three from the State of Texas, two from conservation organizations, and one from the Rio Grande Fishes Recovery Team.

The Texas Department of Highways and Public Transportation recommended that the state-owned right-of-way plus 400 feet on each side of Texas Highway 18 be excluded so as not to jeopardize the possible future widening or reconstruction of Texas Highway 18 with Federal funds. The Texas Department of Water Resources requested a copy of the environmental assessment and expressed their reservations concerning the proposed actions and requested no action be taken until appropriate State agencies had commented on the environmental assessment. They felt that no action should be taken until they have assurances that the proposed designations do not adversely affect water use. The Texas Parks and Wildlife Department responded for Governor Brisco and agreed with the proposal for the Leon Springs pupfish. Two conservation organizations, the Lone Star Chapter of the Sierra Club and the New York Zoological Society supported the Endangered status and Critical Habitat for the Leon Springs pupfish. The Rio Grande Fishes Recovery Team supported the listing for the Leon Springs pupfish and Critical Habitat as proposed.

Discussion and Conclusions

The concern expressed by the Texas Department of Highways and Public Transportation and the Texas Department of Water Resources addresses the Designation of Critical Habitat on their activities. The Service foresees no significantly impact on their activities. Actually, there may be many kinds of actions which can be carried out within the Critical Habitat of the Leon Springs pupfish which would not be expected to adversely affect the species. Indeed, no activity is automatically excluded. This point is poorly understood by much of the public. There is widespread and erroneous belief that a Critical Habitat designation is somewhat akin to the establishment of a wildlife refuge and automatically closes an area to most uses. A Critical Haibitat designation applies only to Federal agencies, and is an official notification to these agencies that their responsibilities under section 7 of the Endangered Species Act are applicable in a certain area.

The Service wishes to emphasize that it will work in close cooperation with any agency to minimize impacts of the present rule on future developments in the Diamond Y Springs and Leon Creek area. No automatic limitations are imposed by a designation of Critical Habitat. It does, however, assist Federal agencies in insursing that their actions are not likely to jeopardize the continued existence of the species.

During the extensive public comment period and associated meeting, no Federal activities were pinpointed which would be affected by such a designation. In addition, Federal agencies which were contacted were unable to identify any adverse impacts.

After a thorough review and consideration of all the information available, the Director has determined that the Leon Springs pupfish is in danger of becoming extinct throughout all or a significant portion of its range due to one or more of the factors described in section 4(a) of the Act, as specified in the proposal of August 15, 1978 (FR 43 36117–36120). Listing as Endangered and determination of Critical Habitat will provide this species with necessary protection to ensure its survival.

Critical Habitat

The Act defines "critical habitat" as (i) the specific areas within the geographical area occupied by the species, at the time it is listed in accordance with the provisions of section 4 of this Act, on which are found those physical or biological features (I) essential to the conservation of the species and (II) which may require special management considerations or protection; and (ii) specific areas outside the geographic area occupied by the species at the time it is listed in accordance with the provisions of section 4 of this Act, upon a determination by the Secretary that such areas are essential for the conservation of the species.

The Service believes that the entire known range of the species under consideration should be designated as Critical Habitat. This species occupies an extremely restricted range, and is, therefore, highly susceptible to changes in habitat. The Critical Habitat area designated is an area on which are those evolutionary, ecological, behavioral, and physiological features essential to the conservation of the species. The physical and biological features of this habitat are such as to require special management considerations and protection.

Section 4(b)(4) of the Act requires the Service to consider economic and other impacts of specifying a particular area as Critical Habitat. The Service has prepared an impact analysis and believes that economic and other impacts of this action are not significant in the foreseeable future. The Service is notifying Federal agencies that may have jurisdiction over the land and water under consideration in this action.

Section 4(f)(4) of the Act requires, to the maximum extent practicable, that any rule which determines Critical Habitat be accompanied by a brief description and evaluation of those activities which in the opinion of the Director, may adversely modify such habitat if undertaken, or may be impacted by such designation. Such activities are identified below for these species.

The petroleum production operations in the vicinity of Diamond Y Spring and Leon Creek could potentially affect the Leon Springs pupfish through an accidental oil spill or indirect modification of the underground water supply. These potential adverse impacts can be eliminated or minimized by implementing appropriate preventive measures. Oil companies involved have been receptive to recommendtions concerning the protection of the Leon

V 45 AG 15 80 UMI

Springs pupfish habitat and the Service plans to encourage continued cooperation.

The land surrounding Diamond Y Spring and Leon Creek is also used for cattle grazing. However, the saline water from the springs is unsuitable for livestock consumption and the Leon Springs pupfish habitat is rarely disturbed by cattle. If it were to occur in the future excessive groundwater pumping in the vicinity of the proposed Critical Habitat for agriculture or other purposes could be detrimental to the pupfish by reducing or eliminating spring flow.

No Federal agency has jurisdiction in the Critical Habitat area, nor should any current or proposed Federal project affect the Leon Springs pupfish population.

Federal agencies (U.S. Department of Energy and Environmental Protection Agency) regulating the petroleum industry would be required to enter into section 7 consultation if an action they license or authorize might affect the Critical Habitat. At this time the petroleum companies are not planning to construct new gas pipelines or other developments that would require Federal permits.

The proposed Critical Habitat for the Leon Springs pupfish is as follows: Diamond Y Spring and its outflow stream, Leon Creek; from the head of Diamond Y Spring downstream in Leon Creek to a point 1 mile northeast of the Texas Highway 18 crossing, approximately 10 miles north of Fort Stockton, Texas. This watercourse is located in sections 506, 507, 508, 509, 552, and 553 of the Garcia, Montez, and Duran Land Grant in Pecos County, Texas.

Effect of the Rule

Section 7(a) of the Act provides: (1) The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of Endangered species and Threatened species listed pursuant to section 4 of this Act. (2) Each Federal agency shall, in consultation with and with the assistance of the Secretary, insure that any action authorized, funded, or carried out by such agency (hereinafter in this section referred to as an "agency action") is not likely to jeopardize the continued existence of any Endangered species or Threatened species or result in the destruction or adverse modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical, unless such agency has been granted an exemption for such action by the Committee pursuant Subsection (h) of this section. In fulfilling the requirements of this paragraph, each agency shall use the best scientific and commercial data available. (3) Each Federal agency shall confer with the Secretary on any agency action which is likely to jeopardize the continued existence of any species proposed to be listed under section 4 or result in the destruction or adverse modification of critical habitat proposed to be designated for such species.

Provisions for Interagency Cooperation are codified at 50 CFR Part 402. If published as a final rule this proposal would require Federal agencies not only to insure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of the Leon Springs pupfish, but also insure that their actions are not likely to result in the destruction or adverse modification of their Critical Habitat. Private activity will not be affected by the rule unless it involves a taking under section 9 of the Endangered Species Act. Other activities affecting the habitat will be impacted only if there is Federal involvement in those activities. No significant modifications to projects with Federal involvement are presently foreseen.

With respect to the Leon Springs pupfish all prohibitions of section 9(a)(1) of the Act, as implemented by 50 CFR 17.21 and 17.23, would apply. These prohibitions, in part, would make it illegal for any person subject to the jurisdiction of the United States to take, import or export, ship in interstate commerce in the course of a commercial activity, or sell or offer for sale these species in interstate or foreign commerce. It also would be illegal to possess, sell, deliver, carry, transport, or ship any such wildlife which was illegally taken. Certain exceptions would apply to agents of the Service and State conservation agencies.

Regulations published in the **Federal Register** of September 26, 1975 (40 FR 44412), codified at 50 CFR 17.22 and 17.23 and provide for the issuance of permits to carry out otherwise prohibited activities involving Endangered or Threatened species under certain circumstances. Such permits involving Endangered species are available for scientific purposes or to enhance the propagation or survival of the species. In some instances, permits may be issued during a specified period of time to relieve undue economic hardship which would be suffered if such relief were not available.

Effect Internationally

The Service will review the status of the Leon Springs pupfish to determine whether it should be proposed to the Secretariat of the Convention on International Trade in Endangered Species of Wild Fauna and Flora for placement upon the appropriate appendix to that Convention, and whether it should be considered under the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere, or other appropriate international agreements.

National Environmental Policy Act

A final environmental assessment has been prepared and is on file in the Service's Washington Office of Endangered Species. This assessment is the basis for a decision that this rule is not a major Federal action that significantly affects the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969.

The primary author of this rule is Dr. James D. Williams, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–1975).

Note.—The Department of the Interior has determined that this is not a significant rule and does not require preparation of a regulatory analysis under Executive Order 12044 and 43 CFR Part 14.

Regulations Promulgation

Accordingly, Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations, is amended as set forth below:

§ 17.11 [Amended]

1. Section 17.11 is amended by adding, in alphabetical order, the following to the list of animals.

Species		Historic range	Vertebrate population where endangered or threatened	Status	When listed	Critical habitat	Special rules
Common name	Scientific name						
Fishes:							
Pupfish, Leon Springs	*Cyprinodon bovinus*	U.S.A. (Texas)...	Entire	E		17.95(e)	NA

§ 17.95 [Amended]

2. Section 17.95(e), Fishes, is amended by adding Critical Habitat of the Leon Springs pupfish after that of the Alabama cavefish as follows:

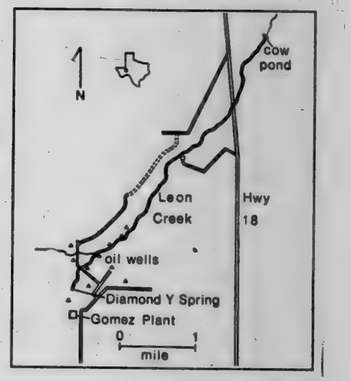
Leon Springs Pupfish

(Cyprindon bouinus)

Texas, Pecos County. Diamond Y Spring and its outflow stream, Loen Creek; from the head of Diamond Y Spring downstream in Leon Creek to a point 1 mile northeast of the Texas Highway 18 crossing, approximately 10 miles north of Fort Stockton.

Leon Springs Pupfish

Pecos County, Tex.



Dated: August 12, 1980.

Lynn A. Greenwalt,

Director, Fish and Wildlife Service.

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposed Rule To Determine Hedeoma apiculatum (McKittrick Pennyroyal) To Be a Threatened Species and To Determine Its Critical Habitat

AGENCY: U.S. Fish and Wildlife Service, Department of the Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to determine *Hedeoma apiculatum* W. S. Stewart (McKittrick Pennyroyal), a native plant of Texas and New Mexico, to be a Threatened species and to determine its Critical Habitat. The number of existing individuals of this species is estimated to be less than 950 and their reproductive potential appears to be low. The populations occurring on Federal lands are threatened by the gradual destruction of habitat through long-term overuse or through park development (trails, campsites, etc.). The single known population on private land is potentially threatened by any major change in land use. This proposal would allow some Federal protection provided by the Endangered Species Act of 1973, as amended. The Service seeks comment on this species.

DATE: Comments from the public must be received by November 13, 1980. Comments from the Governors of Texas and New Mexico must be received by November 13, 1980. A public meeting on this proposal will be held at the Carlsbad Public Library, Halaqueno Park, Carlsbad, New Mexico on August 27, 1980, at 7 p.m.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Spinks, Jr., Chief, Office of Endangered Species, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240, 703–235–2771.

ADDRESSES: Comments and materials concerning this proposal, preferably in triplicate, should be sent to the Director (FWS/OES), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240. Comments and materials received will be available for public inspection by appointment during normal business hours at the Service's Office of Endangered Species, 1000 N. Glebe Road, Fifth Floor, Arlington, Va.

SUPPLEMENTARY INFORMATION:

Hedeoma apiculatum W. S. Stewart (McKittrick Pennyroyal), a member of the mint family, was first collected in 1882, but remained undescribed until 1939. A long-lived perennial herb, this plant forms dense tufts of leaves from woody rootstocks and stands 10.0 to 15.0 cm in height. Its showy, pink flowers are solitary or in two to three flower clusters, two (2) cm in length, and as with most mints, the flowers are axillary and crowded towards the apex (Irving, in press).

Endemic to open, limestone rock surfaces and outcrops in canyons and along streamways in the Guadalupe Mountains of Texas and New Mexico at elevations above 1600 meters, this species is particularly vulnerable to disturbance (Riskin, 1974; Brown and Lowe, 1977). The surrounding vegetation is sparse and offers no protection. The substrate in which these plants are found consists mostly of sand caught in rock fissures and in weathered pockets of limestone (U.S.D.A., 1974), thus there exists no natural protection. The continued existence of this plant and the fragile habitat in which it occurs are being threatened by trampling, area development and other factors. This rule proposes to determine *Hedeoma apiculatum* to be Threatened and if made final would implement the protection provided by the Endangered Species Act of 1973, as amended. The following paragraphs further discuss the actions to date involving this plant, the threats to the plant, and effects of the proposed action.

Background

In the June 24, 1977, **Federal Register** (42 FR 32373–32381), the Service published a final rule under 50 CFR Part 17 detailing the regulations to protect Endangered and Threatened plant species. This rule established prohibitions and a permit procedure to grant exceptions, under certain circumstances, to be prohibitions. These regulations would offer protection to *Hedeoma apiculatum*.

The Department has determined that this is not a significant rule and does not require the preparation of a regulatory analysis under Executive Order 12044 and 43 CFR Part 14.

Summary of Factors Affecting the Species

Subsection 4(a) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) states that the Secretary of Interior shall determine whether any species is an Endangered species or a Threatened species due to one or more of the five factors described in that subsection. These factors and their application to *Hedeoma apiculatum* (McKittrick Pennyroyal) are as follows:

Hedeoma Apiculatum

Populations of *H. apiculatum* in Guadalupe National Park and adjacent Lincoln National Forest are relatively well protected from major modification or destruction of habitat. The administration of Guadalupe National Park recognizes the fragile nature of the park's plant and animal communities (U.S. Department of Interior, 1973) and has implemented some protective management strategies. Moreover, a U.S. House of Representatives committee report recommended that there be close cooperation between the Forest Service and the National Park Service in preserving the environmental resources of the North McKittrick Canyon and other canyons in the Lincoln National Forest (U.S. Department of Interior, 1973). Yet, the populations of *H. apiculatum* are potentially threatened. Existing trails allow access to most of the localities of *H. apiculatum* and as trail users increase there is the danger of destruction of the local habitat. The plants are easily dislodged and the cummulative impact of hikers leaving the trail and climbing over the ledges and boulders that support colonies of *H. apiculatum* could be devastating to the small and slowly reproducing populations. Moreover, the showy and distinctive plants of *H. apiculatum* are highly visible from the trails and could be subject to increasing pressures from taking.

A number of new trail alignments are planned within the range of *H. apiculatum*. these do not appear to threaten the known localities and may actually reduce visitor pressure in some areas. However, Guadalupe National Park is a relatively new park and in all likelihood will attract an increasing number of visitors in the years ahead. During 1979 the park experienced approximately 29,000 backcountry user days compared to 26,258 user days in 1978. Trail counts of hikers into the South McKittrick biological area, a locality of *H. apiculatum*, totaled 323 in 1978 and more than 520 in 1979. Future increases, as well as the contruction of additional trails, shelters or camping areas to accomodate them, could potentially threaten the survival of *H. apiculatum*.

Dr. Robert Irving, a botanist at the University of Nebraska at Omaha, has noted that some small populations in the South McKittrick fork have disappeared since the late 1960's. This could be due to human disturbance, flooding or a combination of both threats.

The population on private ranch land could potentially be threatened by increased grazing or major changes in land use.

1. *Overutilization for commercial, sporting, scientific or educational purposes.* Although no evidence exists, there is the potential of taking this

showing species for cultivation in rock gardens or for other purposes.

2. *Disease or predation (including grazing).* Grazing has occurred on the privately.owned site for this species. This grazing does not appear to threaten the species.

3. *Inadequacy of existing regulatory mechanisms. Hedeoma apiculatum* is not protected by State law. Existing Federal Regualtions in 36 CFR 2.25 and 36 CFR 261.9 prohibit takings of this species in the Lincoln National Forest and the Guadalupe Mountains National Park, however, these regulations are difficult to enforce in a comprehensive fashion. guadalupe Mountains National Park recognizes the fragile nature of this plant and its habitat and has implemented some protective management strategies. The endangered Species Act will offer added protection for the species.

4. *Other natural or manmade factors affecting its continued existence.* Any human pressure on this species may exaggerate the possibility of small populations going extinct through natural population fluctuations. The restricted distribution of *Hedeoma apiculatum* and the small numbers of known individuals will intensify any adverse impacts. In addition to man-induced threats, field work between 1966 and 1979 indicates that periodic and severe floods can reduce the populations of *H. apiculatum* in streambeds. Any potential disturbance is likely to have a severe impact on this species; reproductive potential is low and few young plants have been observed in the wild.

Critical Habitat

The Act defines "Critical Habitat" as (i) the specific areas within the geographical area occupied by the species, at the time it is listed in accordance with the provisions of Section 4 of this Act, on which are found those physical or biological features (I) essential to the conservation of the species and (II) which may require special management considerations or protection; and (ii) specific areas outside the geographic area occupied by the species at the time it is listed in accordance with the provisions of section 4 of this Act, upon a determination by the Secretary that such areas are essential for the conservation of the species.

Subsection 4(f)(4) of the Act requires, to the maximum extent practicable that any proposal to determine Critical Habitat be accompanied by a brief description and evaluation of those activities which, in the opinion of the Secretary, may adversely modify such habitat if undertaken, or may be impacted by such designation.

Any activity which would result in increased trampling or disturbance of the fragile substrate where *Hedeoma apiculatum* occurs would probably adversely modify the Critical Habitat. The long term solution on how to best protect *Hedeoma apiculatum* may be to greatly reduce the human traffic in the area where this plant occurs. In this respect, Critical Habitat designation may effect Federal activities by prohibiting the development of new trails in areas where the plant occura, relocating old trails, or other steps by the National Park Service and the Forest Service to protect this species.

Critical Habitat for *Hedeoma apiculatum* is being determined to include the three areas in Texas where the three largest and best known populations of this species occur. Critical Habitat is not being proposed for the smallest population in Guadalupe Mountains National Park, the population in Lincoln National Forest or for the population located on private land. These three populations were not included in Critical Habitat at this time because they are very small populations which are not well studied or understood at the present, in contrast to the three larger populations which are being proposed as Critical Habitat. These populations maybe proposed as Critical Habitat when they are better known. Therefore, the Critical Habitat delineated does not necessarily include the entire area necessary for the survival of *Hedeoma apiculatum* throughout its range, and modifications of this Critical Habitat may be proposed in the future.

The Endangered Species Act Amendments of 1978 added the following provision to subsection 4(a)(1) of the Endangered Species Act of 1973:

At the time any such regulations (to determine whether a species is endangered or threatened) is proposed, the Secretary shall also by regualtion, to the maximum extent prudent; specify any habitat of such species which is then considered to be Critical Habitat.

In addition, the section 4 regulations of February 27, 1980, (45 FR 13007–13026) state that:

If the Director determines that the designation of Critical Habitat is not prudent, he will state the reasons for such determination in the proposed and final rules listing a species.

There are fewer than 10 individuals in the population at Pine Top in Guadalupe Mountains National Park. The population in Lincoln National Forest is located on a fragile talus slope which could be destabilized by foot traffic. If the exact locality of these populations were published in the **Federal Register** and in local newspapers, *Hedeoma apiculatum* might be additionally threatened by taking and vandalism. The population in Eddy County, New Mexico, is located on private property and is afforded no current Federal protection. Section 9 of the Endangered Species Act does not restrict the taking of Endangered or Threatened plants and publication of Critical Habitat maps may make these populations more vulnerable. After management and recovery plans have been developed for this plant and after these populations are better known, Critical Habitat may be beneficial and may also be proposed for these three additional populations.

Subsection 4(b)(4) of the Act requires the Service to consider economic and other impacts of specifying a particular area as Critical Habitat. The Service has prepared a draft impact analysis and believes that economic and other impacts of this action are not significant in the foreseeable future. As previously stated, only minimal impacts upon the National Park Service and the Forest Service are expected. The Fish and Wildlife Service has notified and is working with the U.S. Forest Service and the National Service, the two agencies which have jurisdiction over the land and water under consideration in this proposed action. The U.S. Forest Service, National Park Service, other Federal agencies, and other interesed or organizations were requested to submit information on economic or other impacts of the proposed action and this information was utilized in completing this analysis. The Service will prepare a final impact analysis prior to the time of final rulemaking. The Service's draft economic impact analysis was used as part of the bais for the Service's decision as to whether or not to exclude any areas from Critical Habitat for *Hedeoma apiculatum*.

Effects of this Proposal

In addition to the effects discussed above, the effects of this proposal would include, but would not necessarily be limited to, those mentioned below.

Subsection 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species which is proposed or listed as Endangered or Threatened. This proposed rule requires Federal agencies to satisfy their statutory obligations with respect to this species, that is, as a proposed Threatened Species, agencies are required under section 7(a)(3) to confer with the Service on any action that is likely to jeopardize the species. If

published as a final rule, this action would require Federal agencies to insure concerned governmental agencies, the scientific community, industry, private North Glebe Road, Arlington, Virginia, and may be examined by appointment

2. Also, the Service proposes to

SUMMARY: Notice is hereby given that

published as a final rule, this action would require Federal agencies to insure that activities they authorize, fund or carry out are not likely to jeopardize the continued existence of this species, and to insure that their actions are not likely to result in the destruction or adverse modification of its Critical Habitat which has been determined by the Secretary.

The Act and implementing regulations published in the June 24, 1977, Federal Register set forth a series of general trade prohibitions and exceptions which apply to all endangered plant species. All of those prohibitions and exceptions also apply to any Threatened plant species, excluding seeds of cultivated plants treated as Threatened, unless a special rule pertaining to that Threatened species has been published and indicates otherwise. The regulations which pertain to Threatened plants are found at 50 CFR 17.71 and are summarized below.

With respect to *Hedoeoma apiculatum* all prohibitions of section 9(a)(2) of the Act, as implemented by 50 CFR 17.71, would apply except for certain exemptions with respect to seeds. These prohibitions, in part, would make it illegal for any persons subject to the jurisdiction of the United States to import or export, transport in interstate of foreign commerce in the course of a commercial activity, or sell or offer for sale this species in interstate or foreign commerce. Certain exceptions would apply to agents of the Service and State conservation agencies. The Act of 50 CFR 17.72 also provides for the issuance of permits to carry out otherwise prohibited activities involving Threatened species, under certain circumstances.

If listed as Threatened under the Act, the Service will review this species to determine whether it shoudl be considered for the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere for placement upon its Annex, and whether it should be considered for other appropriate international agreements.

Public Comments Solicited

The Director intends that the rule finally adopted will be as accurate and effective as possible in the conservation of any Endangered or Threatened species. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, private interests, or any other interested party concerning any aspect of these proposed rules are hereby solicited. Comments particularly are sought concerning:

1. Biological or other relevant data concerning any threat (or the lack thereof) to the species included in this proposal.
2. The location of any other populations of *Hedeoma apiculatum* and the reasons why any habitat of this species should or should not be deermined to by Critical Habitat as provided for by the Act.
3. Additional information concerning the range and distribution of this species.
4. Current or planned activities in the subject and the probable impacts of such activities on the area designated as Critical Habitat.
5. The foreseeable economic and other impacts of the Critical Habitat designation on Federal activities.

Final promulgation of this rule on *Hedeoma apiculatum* will take into consideration the comments and any additional informaation received by the Director, and such communications may lead him to adopt a final rule that differs from this proposal.

Public Meeting

The Service hereby announces that a public meeting will be held on this proposed rule. The public in invited to attend this meeting and to present opinions and information on this proposed rule. Specific information to the public meeting is set out below:

Place: Carlsbad Public Library, Halaqueno Park, Carlsbad, New Mexico.
Date: August 27, 1980.
Time: 7:00 p.m.
Subject: Threatened Status, for *Hedeoma apiculatum.*

National Environmental Policy Act

A draft environmental assessment has been prepared in conjunction with this proposal. It is on file in the Service's Office of Endangered Species, 1000 North Glebe Road, Arlington, Virginia, and may be examined by appointment during regular business hours. A determination will be made at the time of final rule whether this is a major Federal action which would significantly affect the quality of the human environment within the meaning of Section 102(2)(C) of the National Envrionmental Policy Act of 1969 (40 CFR Parts 1500–1508).

This proposal is being published under the authority contained in the endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.;* 87 Stat. 884, 92 Stat. 3751, 93 Stat. 1225). The authors of this proposed rule are Barry S. Mulder and Ms. Rosemary Carey, Washington Office of Endangered Species (703–235–2760). Dr. Robert s. Irving, University of Nebraska, Omaha, Nebraska, prepared the status report on this species.

Regulations Promulgation

Accordingly, it is hereby proposed to amend Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations, as set forth below:

1. It is proposed to amend § 17.12 by adding, in alphabetical order, the following to the list of plants:

§ 17.12 Endangered and threatened plants.

Species		Historic range	Status	When listed	Critical habitat	Special rules
Scientific name	Common name					
Labiatae-Mint family:						
Hedeoma apiculatum	McKittrick pennyroyal.	U.S.A. (TX, NM)	T		17.96(a)	NA

2. Also, the Service proposes to amend 17.96(a) by adding the Critical Habitat of *Hedeoma apiculatum* after that of the Erysimum capitatum var. angustatum (Contra Costa wallflower) as follows:

Species

Hedeoma apiculatum

McKittrick Pennyroyal

Texas, Culberson County; 3 areas in Guadalupe Mountains National Park; 85 acres in Devil's Den Canyon; 60 acres above Turtle Rock on McKittrick Ridge and 180 acres in South McKittrick Canyon.

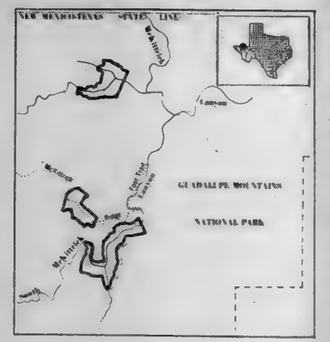
1. Devil's Den Canyon: from the 5,400 foot contour on the canyon floor (1.1 KM n.w. of Pratt Lodge) and along the sides of the canyon south-westward following the 6,000′ contour on the north side of the canyon (beginning at Texas coordinates 19,892 m E., 39,169 m N.) and the 6,200′ contour on the south side (beginning at Texas coordinates 19,699 m E., 38,651 m N.) to approximately the 6,000′ elevation point of the canyon floor.

2. Above Turtle Rock on McKittrick Ridge: high ridge surrounding unnamed peak 2.65 km southwest of Pratt Lodge and located 19,073 m E., 36,439 m N. on the Texas coordinate system. The boundaries defined approximately by the 6,800′ contour on the southeast, southwest, and northeast and by the 7,400′ contour on the northeast. The 7,400′ contour connected to the 6,800′ contour by a line passing through Texas coordinates 18,699 m E., 36,530 m N., and 18,781 m E., 36,854 m N. on the southwest and coordinates 19,145 m E., 36,819 m N., and 19,000 m E., 36,952 m N. on the northeast.

3. South McKittrick Canyon: from the 5,400′ on the canyon floor (2.2 km southwest of Pratt Lodge) and along the sides of the canyon southwesterly following the 5,800′ contour on the northside of the canyon (beginning at Texas coordinates 20,169 m E., 36,434 m N.) and the 6,200′ contour on the south side of the canyon (beginning at Texas coordinates 20,289 m E., 36,121 m N.) to the 5,800′ elevation point of the canyon floor.

McKittrick Pennyroyal

Culberson, Texas



Dated: August 12, 1980.
Lynn A. Greenwalt,
Director, Fish and Wildlife Service.

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Notice of Review of 18 Species of Foreign Reptiles

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of review.

SUMMARY: Notice is hereby given that the U.S. Fish and Wildlife Service has evidence on hand to warrant a review of the status of 18 species of foreign reptiles to determine whether they should be proposed for listing as Endangered or Threatened species under provisions of the Endangered Species Act of 1973, as amended. The common and scientific names, and ranges, are provided in the table below. The threats which are believed to be causing declines of these species are: habitat destruction, the introduction of non native predators, exploitation as a source of human food (mainly local), and overcollection; these threats are briefly discussed below.

DATES: Comments and materials relating to the status of these species should be submitted by November 13, 1980.

ADDRESSES: Interested persons or organizations are requested to submit comments to Director (OES), U.S. Fish and Wildlife Service, Department of the Interior, Washingtong, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Spinks, Jr. Chief, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–2771).

SUPPLEMENTARY INFORMATION:

Background

The species which are included in this notice of review are:

Common name	Scientific name	Range
Serpent Island gecko	*Cyrtodactylus serpensinsula*	Mauritius.
Acklins ground iguana	*Cyclura nlevi nuchalis*	Bahamas.
Allen's Cay iguana	*Cyclura cychlura inornata*	Bahamas.
Andros Island ground iguana	*Cyclura cychlura cychlura*	Bahamas.
Cuban ground iguana	*Cyclura nubila*	Cuba, Cayman Islands.
Exuma Island iguana	*Cyclura-cychlura figginsi*	Bahamas.
Jamaican iguana	*Cyclura collei*	Jamaica.
Mayaguana iguana	*Cyclura carinata-bartschi*	Bahamas.
Turks and Caicos iguana	*Cyclura carinata-carinata*	Turks and Caicos Islands.
Watling Island ground iguana	*Cyclura nlevi nlevi*	Bahamas.
White Cay ground iguana	*Cyclura nlevi cristata*	Bahamas.
Gray's monitor lizard	*Varanus grayi*	Philippines.
Hierro giant lizard	*Gallotia simonyi*	Canary Islands.
Aruba island rattlesnake	*Crotalus unicolor*	Venezuela.
Asiatic box turtle	*Cuora trifasciata*	Hong Kong, People's Republic of China.
Central American river turtle	*Dermatemys mawei*	Belize, Mexico, Guatemala.
Chinese big-headed turtle	*Platysternon megacephalum*	Hong Kong, People's Republic of China.
Lar Valley Viper	*Vipera latifi*	Iran.

A brief description of these species and their problems is as follows:

Serpent Island gecko: This lizard is restricted to Round Island where it is rare and Serpent Island where it is considered very rare; both islands are near Mauritius. Predation from feral animals and habitat destruction are the chief causes of its decline (Honegger, 1979).

Bahama species of Cyclura: All these species are listed in the International Union for the Conservation of Nature and Natural Resources (IUCN) Red Data Book as being of concern (Honegger, 1979). The main threats to their continued survival include habitat destruction for resort development and the introduction of feral animals, particularly mongooses and dogs, which prey upon the iguanas, especially the young and juveniles, and destroy nests. Introduced goats may compete for food (these species are vegetarian) and humans kill them for food or malicious "sport". Nearly all these iguanas have very small ranges; many are limited to a single island. Discussions of the threats to these species are contained in Honegger (1979), Carey (1975), and Auffenberg (1975, 1976a).

Cuban ground iguana: This species occurs on Cuba and Isla de Pinos and in the Cayman Islands. There are 3 subspecies: *C.n. caymanensis* (only one colony on Cyaman Brac), *C.n. lewisi* (less than 50 individuals on Grand Cayman Island, and *C.n. nubila* in Cuba and adjacent islands and cays. The threats to these iguanas are similar to those of the Bahama *Cyclura* (Honegger, 1979).

Turks and Caicos Iguana: The same threats which apply to the Bahama *Cyclura* also apparently apply to this species (Honegger, 1979). It is found on most of the islands in the Turks and Caicos group.

Jamaican iguana: The following is taken from Woodley (1980) who has reviewed the history and status of this species:

> For a hundred years, they were only known to survive on the Goat Islands but, after the introduction of the mongoose and the interference consequent on the Second World War, that population became extinct in about 1948. But iguanas had, after all, survived on the mainland; in the Hellshire Hills. Hog-hunters have been catching occasional specimens up to 1978 and one of these, killed in 1969, was obtained by the author and positively identified. It is unlikely that the Jamaican Iguana, already very rare, will survive the proposed development of the Hellshire Hills.

Gray's monitor lizard: The following is from Auffenberg (1979a) who has reviewed the history and status of this species:

> Until 1976 Gray's monitor lizard was known to science only by two museum specimens, neither of which gave any data more precise than "Luzon". In 1975 the author discovered a third which identified an area on Luzon, and in 1976 he went to the Philippines and found this large monitor, which some scientists had thought might be extinct, widely distributed in forests in southern Luzon. But large areas of these forests have been and continue to be destroyed, and with them go the monitor's habitat. Also local people hunt it for meat. The author discusses the ecology and distribution of the monitor and urges that a new national park be created.

Additional information on this lizard may be found in Auffenberg (1979b, 1976b).

Hierro giant lizard: This species is known only from the Canary islands (Hierro Island; extinct on Salmor Rock). Not more than 50 individuals are believed to remain. Predation and overcollection by scientists have been implicated in its decline (Honegger, 1978). In addition, a stone breaking plant had been proposed near the last known population (in 1979).

Aruba island rattlesnake: According to Honegger (1979), the habitat of this rattlesnake is shrinking as a result of increasing human activity. Collection may also be contributing to its decline.

Asiatic box turtle and Chinese big-headed turtle: These species are consumed in China where they are believed to enhance sexual performance; prices in Hong Kong markets may reach U.S. $100 for a large specimen. Habitat destruction may be impacting these species in the People's Republic of China (information supplied by Mr. George R. Campbell).

Lar Valley viper: Andren and Nilson (1979) have reviewed the biology of this species and state:

> *Vipera latifii* Mertens, Darevsky & Klemmer, a recently described viper from northern Iran, is in severe need of conservation. Its range is restricted to unique, alpine Lar Valley, which in a few years will be used as a huge water reservoir. Observations on the biology of *Vipera latifii* are given. Sympatric amphibians and reptiles show ecotypic adaptations.

Central American river turtle: This large river turtle is found only in the coastal lowlands of southern Mexico, northern Guatemala, and Belize. It is hunted extensively for its meat and has been seriously depleted throughout much of its range. According to Alvarez del Toro et al. (1979), this exploitation could lead to its extinction. Additional information on its biology is contained in Smith and Smith (1979) and Iverson and Mittermeier (1980).

Because of the information outlined above, the U.S. Fish and Wildlife Service believes that there are sufficient data to conduct a review of the status of these foreign reptiles to determine whether protection under provisions of the Endangered Species Act of 1973, as amended, may be warranted. The Service is therefore soliciting any additional information, reports, or published literature which may aid in this decision.

This notice of review was prepared by Dr. C. Kenneth Dodd, Jr., Office of Endangered Species (703/235–1975).

10 CFR Part 212

[Docket No. ERA-R-80-25]

Mandatory Petroleum Price Regulations; Amendments to Tertiary Incentive Program

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of proposed rulemaking and public hearing.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) is proposing several changes to the Tertiary Incentive Program ("incentive program") set forth at 10 CFR 212.78 of the Mandatory Petroleum Price Regulations. One proposal would change the definition of "recoupable allowed expenses" to permit recovery of "inhouse" expenses otherwise allowed by the regulation so long as such expenses do not exceed the price that would have been paid in an arm's-length transaction. Currently, expenses are recoverable only if they are incurred in an arm's-length transaction and for fair market value. Another proposal would require producers to report "prepaid expenses." A third proposal would revise the requirement that producers submit an annual opinion concerning the accuracy of their monthly producer and project reports. The final proposal would exclude injected hydrocarbons as an allowed expense for miscible fluid flooding projects.

DATES: Comments by October 10, 1980, 4:30 p.m.; Requests to speak at hearing by September 9, 1980, 4:30 p.m.; Hearing date: September 16, 1980, 9:30 a.m.

ADDRESSES: All comments to Office of Public Hearings Management, Economic Regulatory Administration, Room B-210, Docket No. ERA-R-80-*25*, 2000 M Street, N.W., Washington, D.C. 20461. Requests to speak to Economic Regulatory Administration, Office of Public Hearings Management, Room B-210, Docket No. ERA-R-80-*25*, 2000 M Street, N.W., Washington, D.C. 20461, Attn: Karene Walker.

Hearing Location: Room 2105, 2000 M Street, N.W., Washington, D.C.

B. *Prepaid Expenses*
C. *Annual CPA Opinion*
D. *Injected Hydrocarbons*
III. *Comment Procedures*
IV. *Procedural Requirements*

I. Introduction

On August 21, 1979, we amended 10 CFR 212.78 to establish the incentive program under which producers presently can recover some of the cost they incur as a result of their participation in enhanced oil recovery ("EOR") projects, (44 FR 51148, August 30, 1979) This program permits producers to sell at market prices crude oil that would otherwise be subject to lower tier or upper tier ceiling price limitations. However, the "tertiary incentive revenue" (that is, the additional revenue that results from selling crude oil at the market price) from such sales may not exceed seventy-five percent of the money that a producer has spent on certain expenses associated with EOR projects.

We recently adopted a number of changes to the incentive program. On June 6 we issued a final rule to exclude from the calculation of a producer's tertiary incentive revenue the amount of windfall profit tax attributable to the additional revenue that a producer receives as a result in the incentive program. (45 FR 40106, June 13, 1980) In the preamble to that rule we also discussed the issue of "prepaid expenses", that is, expenses for goods or services which will not be used in connection with an EOR project until sometime after payment is made. In a final rule issued July 7, 1980, we simplified the reporting requirements with respect to qualified producers that have an interest in only one EOR project and recover their recoupable allowed expenses only from sales of crude oil produced from the property on which that EOR project is located. (45 FR 47622, July 15, 1980)

In this rulemaking, we are proposing to modify several of the limitations that apply to the recovery of allowed expenses. We recognize that today's proposals, along with the recent amendments discussed above, may cause some producers to conclude that the incentive program will be subject to frequent change and further limitation. We also recognize that there must be a relatively high degree of certainty in the incentive program to encourage the type of commitment necessary for EOR projects. We wish to assure producers that they can rely on the basic framework of the incentive program and that we do not intend to propose further changes to the program. In this regard, we do not view the proposals discussed below as major revisions or limitations of the incentive program.

II. Proposals

A. *In-House Expenses.* The current definition of recoupable allowed expenses provides that a producer must incur an expense in an arm's-length transaction and for fair market value in order to recover that expense under the incentive program. The purposes behind these requiements were to prevent the recovery of artifically inflated expenses and to facilitate the auditing of EOR projects. We understand, however, that frequently it is more efficient and economical for the producer to use "in-house" goods and services (that is, goods and services provided from within the firm) rather than obtaining such goods and services from outside sources. Thus, the arms-length transaction requirement may actually be working to increase the amount of expenses that a producer recovers under the program.

We have reviewed this aspect of the incentive program and have determined that a producer should be permitted to recover the cost of an "in-house" good or service if that cost is no greater than the price that the producer would pay an outside source for the same good or service. Accordingly, we are proposing to amend the definition of recoupable allowed expenses to permit the recovery of such "in-house" costs. We also are proposing to delete the reference to fair market value since we believe this concept to be an integral part of an arm's-length transaction. To ensure that this proposed modification does not unduly complicate our auditing efforts, we also are proposing to amend the

incentive program's reporting and recordkeeping requirements to require the identificaion of any "in-house" expenses and the maintenance of records as to what the price of the good or service associated with that expense would have been in an arms-length transaction.

B. *Prepaid Expenses.* In the preamble to the June 6 final rule we stated that the incentive program does not prohibit the recovery of prepaid expenses. At the same time, however, we noted that use of a good or service in connection with an EOR project is a condition subsequent to the recovery of its expense. To have effective enforcement of this condition we need to have a general overview of a producer's situation with respect to prepaid expenses. Accordingly, we are proposing that a producer file an annual report concerning its prepaid expenses.

This annual prepaid expenses report would require a producer to identify which of the allowed expenses that it reported previously in the monthly producer report, were prepaid. For purposes of this report, prepaid expenses would be defined as the expenses for any injectant or fuel which is used after September 30, 1981, the expenses for any item for which federal tax deduction (including depreciation) would be properly allocable to the period after September 30, 1981, or the expenses (in the aggregate) for all other items that are to be used after September 30, 1981. We are proposing this definition of prepaid expenses since it is essentially the same as the definition of prepaid expenses for purposes of the Windfall Profit Tax and, thus, should reduce the administrative burden on producers that must comply with the requirements of both the incentive program and the Windfall Profit Tax. A producer also would be required to identify any good or service for which it reported a prepaid expense, the date on which it intended to use that good or service, and the date on which it actually used that good or service. We specifically request comments on the appropriateness of the proposed definition of, and the level of reporting on, prepaid expenses. A producer would continue to file these annual reports until it had reported the actual use of all the goods or services for which it had reported prepaid expenses. In addition, the producer would be required to maintain a copy of the contract for, or documentary proof of the purchase of, any goods or services for which it had reported prepaid expenses.

C. *Annual CPA Opinions.* The incentive program requires annual opinions by certified public accountants concerning the accuracy of the monthly producer and project reports. These opinions currently must be submitted by January 31 of each year. We have been informed that in many instances it will be impossible for a certified public accountant to issue such an opinion by January 31 due to the timing of the audit for a particular producer or project. Accordingly, we are proposing to require the submission of the annual CPA opinions within 120 days of the close of the fiscal year for the producer or project to which it relates.

D. *Injected Hydrocarbons.* Currently, the incentive program does not prohibit a producer engaged in a miscible fluid flooding project from recovering as an allowed expense the cost of injected hydrocarbons, such as natural gas and liquefied petroleum gases. We do not believe that injected hydrocarbons should be an allowed expense since the producer usually can recover the cost therefor by recovering the injected hydrocarbons from the oil bearing formation and selling them. Accordingly, we are proposing to amend the Appendix to § 212.78 to exclude injected hydrocarbons from the allowed expenses for miscible-fluid flooding projects. This change would be applicable to any expenses incurred or paid on or after the issusance of this notice. Of course, a producer still could request an order from ERA designating injected hydrocargons as an additional allowed expense pursuant to § 212.78(e)(3).

III. Comment Procedures

A. *Written Comments.* You are invited to participate in this proceeding by submitting data, views or arguments with respect to the proposals set forth in this notice of proposed rulemaking. Comments should be submitted by 4:30 p.m., October 10, 1980, to the address indicated in the "Addresses" section of this notice and should be identified on the outside envelope and on the document with the docket number and the designation: "Amendments to the Incentive Program". Fifteen copies should be submitted. All comments received will be available for public inspection in the DOE Reading Room, GA-152, Forrestal Building, 1000 Independence Avenue, S.W., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday.

Any information or data submitted which you consider to be confidential must be so identified and submitted in writing, one copy only. We reserve the right to determine the confidential status of such information or data and to treat it according to our determination.

B. *Public Hearings.* 1. *Procedure for Request to Make Oral Presentation.* The times and places for the hearings are indicated in the "Dates" and "Addresses" sections of this preamble. If necessary to present all testimony, a hearing will be continued to 9:30 a.m. of the next business day following the first day of the hearing.

If you have any interest in the proposals in this notice, or represent a group or class of persons that has an interest, you may make a written request for an opportunity to make oral presentation at a hearing by 4:30 p.m., September 9, 1980. You should be prepared to describe the interest concerned; if appropriate, to state why you are a proper representative of a group or class of persons that has such an interest; and to give a concise summary of the proposed oral presentation. You should also provide a phone number where you may be contacted through the day before the hearing.

If you are selected to be heard, you will be so notified before 4:30 p.m., September 12, 1980. You will be required to bring one hundred copies of your statement to the address indicated in the "Addresses" section of this preamble for requests to speak at the hearing concerned before 4:30 p.m. on the day before the hearing.

2. *Conduct of the Hearings.* We reserve the right to select the persons to be heard at the hearings, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An ERA official will be designated to preside at each of the hearings. They will not be judicial or evidentiary-type hearings. Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity to make a rebuttal statement. The rebuttal statements will be given the order in which the initial statements were made and will be subject to time limitations.

You may submit questions to be asked of any peson making a statement at a hearing to the address indicated above for requests to speak at that hearing before 4:30 p.m. on the day before the hearing. If you wish to ask a question at a hearing, you may submit the question, in writing, to the presiding officer. The ERA or, if the question is submitted at a hearing, the presiding officer will

determine whether the question is

1032, January 3, 1979) require that a

with subsection (h)(1)(i) of this section

subsections (h)(1)(i) and (h)(2)(i) of this

determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of a hearing will be announced by the presiding officer.

Transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by the ERA and made available for inspection at the DOE Freedom of Information Office, Room 5B–180, 1000 Independence Avenue SW, Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. You may purchase a copy of the transcript of the hearing from the reporter.

IV. Procedural Requirements

A. *Section 404 of the DOE Act.* Pursuant to the requirements of Section 404(a) of the Department of Energy Organization Act (DOE Act, 42 U.S.C. 7101 *et seq.*, Pub. L. 95–91, as amended), we are referring this rule to the Federal Energy Regulatory Commission (FERC) for a determination as to whether the proposed rule would significantly affect any matter within the Commission's jurisdiction. The Commission has until the close of the public comment period to make that determination.

B. *Section 7 of the FEA Act.* Under section 7(a) of the Federal Energy Administration Act of 1974 (15 U.S.C. 785 *et seq.*, Pub. L. 93–275, as amended), the requirements of which remain in effect under section 501(a) of the DOE Act, the delegate of the Secretary of Energy shall, before promulgating proposed rules, regulations, or policies affecting the quality of the environment, provide a period of not less than five working days during which the Administrator of the Environmental Protection Agency (EPA) may provide written comments concerning the impact of such rules, regulations, or policies on the quality of the environment. Such comments shall be published together with publication of notice of the proposed action.

A copy of this notice was sent to the EPA Administrator. The EPA Administrator informed the ERA that he does not foresee as the result of the implementation of today's proposed actions an unfavorable impact on the quality of the environment as related to the duties and responsibilities of the EPA.

C. *Executive Order 12044.* Executive Order 12044 (43 FR 12661, March 23, 1978) and DOE's implementing procedures in DOE Order 2030 (44 FR 1032, January 3, 1979) require that a regulatory analysis be prepared for all significant regulations which are likely to have a major impact. We have determined that on the basis of the criteria set forth in these orders today's proposals will not have a major impact. Accordingly, no regulatory analysis has been proposed for these proposals.

(Emergency Petroleum Allocation Act of 1973, 15 U.S.C. 751 *et seq.*, Pub. L. 93–159, as amended, Pub. L. 93–511, Pub. L. 94–99, Pub. L. 94–133, Pub. L. 94–163, and Pub. L. 94–385; Federal Energy Administration Act of 1974, 15 U.S.C. 787 *et seq.*, Pub. L. 93–275, as amended, Pub. L. 94–332, Pub. L. 94–385, Pub. L. 95–70, and Pub. L. 95–91; Energy Policy and Conservation Act, 42 U.S.C. 6201 *et seq.*, Pub. L. 94–163, as amended, Pub. L. 94–385, and Pub. L. 95–70; Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.*, Pub. L. 95–91; E.O. 11790, 39 FR 23185; E.O. 12009, 42 FR 46267.)

In consideration of the foregoing, Part 212 of Chapter II, Title 10 of the Code of Federal Regulations, is proposed to be amended as set forth below.

Issued in Washington, D.C., August 8, 1980.

Hazel R. Rollins,

Administrator, Economic Regulatory Administration.

§ 212.78 [Amended]

1. 10 CFR 212.78(c) is amended by revising the definition of "recoupable allowed expenses" to read as follows:

"Recoupable allowed expenses" means, with respect to a particular producer, the allowed expenses that are attributable to that producer; provided that such expenses are incurred in an arm's-length transaction or do not exceed the price that the producer would have paid in an arm's-length transaction and further provided that such expenses have been paid and reported pursuant to subsction (h) of this section.

2. 10 CFR 212.78(h)(1)(ii) is revised to read as follows:

* * * * *

(h)* * *

(1)* * *

(ii) *Annual CPA opinion.* Within 120 days of the close of each fiscal year that ends after December 31, 1980, of a particular qualified producer, such qualified producer shall submit to DOE an opinion by a certified public accountant attesting that during the course of his annual audit nothing has come to his attention that cause him to believe that the reports submitted by such qualified producer in accordance with subsection (h)(1)(i) of this section are inaccurate.

* * * * *

(h)* * *

(2)* * *

(ii) *Annual CPA opinion.* Within 120 days of the close of each fiscal year that ends after Dedember 31, 1980 for a particular prooject, the quaoified producers with respect to such project shall submit to DOE an opinion by a certified public accountant attesting that during the course of his annual audit nothing has come to his attention that causes him to believe that the reports with respect to that project submitted during the prior calendar year in accordance with subsection (h)(2)(ii) of this section are inaccurate.

4. 10 CFR 212.78(h) is amended by the addition of a new subparagraph (5) to read as follows:

* * * * *

(h)* * *

(5)(i) *Annual prepaid expenses report.* By January 31 of each year after 1980, a qualified producer shall file with DOE a report in which the producer shall certify to DOE (A) which of the expenses that it had reported previously to DOE pursuant to subsction (h)(1)(i) of this section were prepaid expenses; (B) the goods or services for which it incurred and paid such prepaid expenses; (C) the dates on which it intends to use goods or services; and (D) the dates on which it actually uses such goods or services. A producer shall file an annual prepaid expenses report each year until it has reported that it has actually used all the goods and services for which it incurred and paid a prepaid expense. For purposes of this subsection, a prepaid expense is (—) an expense for any injectant or fuel used after September 30, 1981, (*2*) an expense for any item for which IRS would allocate the deductions (including depreceiation) to the period after September 30, 1981, or (*3*) the expenses (in the aggregate) for all other items that are to be used after September 30, 1981.

(ii) *Recordkeeping requirements.* A qualified producer must maintain records that contain a copy of any contract for, or documentary evidence of the purchase of, any good or service for which the producer has reported a prepaid expense.

5. 10 CFR 212.78(h) is amended by the addition of a new subparagraph (6) to read:

* * * * *

(h) * * *

(6) *In-house expenses.* In complying with the reporting requirements of subsections (h)(1)(i) and (h)(2)(i) of this section, a qualified producer shall indicate whether an expense is incurred in an arm's-length transaction. If an expense is not incurred in an arm's-length transaction, the producer must prepare and maintain records that contain information concerning what the price of the good or service associated with that expense would have been in an arm's-lenth transaction and the basis for that information.

6. Paragraph 4.a of the Appendix to 10 CFR 212.78 is revised to read:

4. *Miscible Fluid Flooding.*—a. The costs of injected fluids (excluding hydrocarbons) and additives for use at the project site.

DEPARTMENT OF ENERGY
Economic Regulatory Administration
10 CFR Part 212
[Docket No. ERA-R-80-26]

Maximum Lawful Selling Price for Unleaded Gasoline

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Further notice of proposed rulemaking and public hearing.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) proposes alternative amendments and a public hearing regarding several methods for imputing the May 15, 1973 selling price for unleaded gasoline. Specifically, DOE propose a uniform imputed selling price for 87 octane (R+M)/2 unleaded gasoline. In addition, DOE proposes several alternative methods of pricing unleaded gasoline with higher than 87 octane (R+M)/2. One proposal is to allow refiners to treat all grades of gasoline as separate product categories and, therefore, allocate increased costs between the grades as the refiner deems appropriate. Another proposal is to allow an octane adjustment for octane higher than 87 octane (R+M)/2.

Finally, a technical amendment, to the unleaded gasoline production incentive is proposed.

DATES: Written comments due October 14, 1980.

Hearing dates: Los Angeles, California, September 5, 1980; Washington, D.C., September 11, 1980.

Requests to speak by 4:30 p.m., August 29, 1980, for Los Angeles hearing; September 3, 1980, for Washington, D.C. hearing.

ADDRESSES: All comments and requests to speak at the Washington, D.C. hearing should be submitted to the Economic Regulatory Administration, Office of Public Hearing Management, Docket No. ERA-R-80-*26*, Department of Energy, Room 2313, 2000 "M" Street, NW, Washington, D.C. 20461, (202) 653-3751.

Requests to speak at Los Angeles hearing to Terry Osborn, 333 Market Street, Region IX, San Francisco, California 94105, (415) 764-7027.

Hearing locations: Los Angeles hearing: Los Angeles, Convention Center, 1201 South Figueroa Street, Room 202, Los Angeles, California 90015; Washington, D.C. hearing: Room 2105, 2000 "M" Street, NW, Washington, D.C. 20461.

SUPPLEMENTARY INFORMATION:

I. Background
II. Proposed Amendments
III. Written Comments and Public Hearings Procedures
IV. Procedural Requirements

I. Background

Generally, under the current price regulations the maximum lawful price refiners may charge for unleaded gasoline is the May 15, 1973 selling price of unleaded gasoline plus increased product and non-produce costs. In addition, refiners are permitted to recoup additional increased costs on gasoline pursuant to the gasoline "tilt" rule in § 212.83(c) and the unleaded gasoline production incentive in § 212.83(j).

If a refiner did not sell unleaded gasoline on May 15, 1973, or 30 days prior thereto, as was the case for most refiners, the maximum lawful selling price for unleaded gasoline is calculated using an imputed May 15, 1973 selling price determined pursuant to § 212.112(b)(1). This imputed selling price is the weighted average selling price charged for leaded gasoline on May 15, 1973 of the same or nearest octane as the unleaded gasoline currently sold, plus one cent. The additional one cent is intended to reflect the additional cost associated with producing unleaded gasoline.

Pursuant to § 212.83(c)(1)(i)(B) refiners may designate different types and grades of gasoline as separate categories within the product category gasoline, provided such types and grades have consistently and historically been designated as such by the refiner and not disapproved by the DOE. In some instances, DOE has not disallowed refiners treating new grades of unleaded gasoline as separate product categories.

The current rules permit each individual refiner to allocate increased costs to specific categories of gasoline as the refiner deems appropriate. Thus, a refiner, which treats a single grade unleaded gasoline with an octane rating of 90 (R+M)/2 as a separate product category has the pricing flexibility under the present rules to allocate as much increased costs to the 90 octane (R+M)/2 unleaded gasoline as the refiner believes the market will allow.

In addition, refiners are permitted to increase the amount of costs which may be passed through in gasoline price increases to reflect increased production of unleaded gasoline (44 FR 69594, Dec. 3, 1979). The increased costs are permitted refiners which produce more unleaded gasoline than the national average or than they refined in the corresponding month in 1978.

On June 4, 1979, DOE issued a notice of proposed rulemaking (44 FR 32622, June 6, 1979) regarding the price rules for unleaded gasoline. In the Notice DOE proposed to amend § 212.112(b)(1) to delete the "same or nearest octane number" provision and to require that the imputed May 15, 1973 selling price for unleaded gasoline be computed using the weighted average price charged for all types and grades of leaded gasoline. After evaluating the comments received concerning this issue, DOE continued the rulemaking with respect to this rule. For a discussion of the comments see 44 FR 69595, December 3, 1979.

The purpose of this Notice is to propose various amendments to the unleaded gasoline pricing rules intended to encourage the increased production of unleaded gasoline with efficient octane ratings. DOE believes the current rules may encourage refiners to produce unleaded gasoline with a higher octane rating than is necessary for operating the current automobile fleet, which results in the use of more crude oil and other petroleum feedstocks than would otherwise be necessary. This is because the "same or nearest octane number" provision used in imputing the May 15, 1973 selling price for higher priced unleaded gasoline encourages refiners to produce gasoline with an octane number "closer" to the octane of the leaded premium gasoline they sold on May 15, 1973 than to the lower priced regular leaded gasoline they sold on that date. Accordingly, unleaded octane ratings tend to be higher than necessary. A second anomaly caused by the "same or nearest octane" rule occurs when firms produced only a subregular grade leaded gasoline on May 15, 1973, and are required to use the May 15, 1973 selling price of that subregular grade to impute unleaded May 15, 1973 selling prices. Thus, the "same or nearest octane" rule is wasteful of refining capacity and is a misuse of petroleum resources. Accordingly, DOE proposes to remove these anomolies and to encourage production of unleaded gasoline with the most efficient octane ratings for the current automobile fleet and discourage the production of unleaded gasoline with octane ratings that are not efficient.

Because the primary purpose of this rulemaking proceeding is to ascertain what changes, if any, are needed to the DOE price rules to encourage the production of unleaded gasoline with octane ratings most appropriate for the American automobile fleet, commenters should address which parts, if any, of the alternative amendments proposed they support and which they oppose. DOE reserves the right to adopt all or parts of any of the various proposed amendments.

There is a fundamental distinction between the primary proposals described in Part II. The establishment of separate product categories for new grades of gasoline is a method of allocating allowable increased costs. The imputed May 15, 1973 selling price and octane adjustment proposals, however, do not have to be justified on the basis of refiners' actual costs. Thus, the proposals to establish the May 15, 1973 selling price and octane adjustment on the basis of octane ratings could result in a change in refiners' current margins. For example, under the current rules the unleaded margin is the margin of the "same or nearest octane" leaded gasoline sold on May 15, 1973 plus one cent. The proposed rules would base the unleaded margin for 87 octane (R+M)/2 unleaded gasoline on the margin for 89 octane (R+M)/2 leaded gasoline sold on May 15, 1973 and would increase the margin for higher grades. Conversely, permitting refiners to change their product categories to reflect new grades of gasoline is a method of allocating increased costs already incurred by the refiner and in itself would not change refiners' margins.

DOE believes its proposal to change the margin (*i.e.*, imputed May 15, 1973 selling price) for desirable grades of unleaded gasoline will provide refiners an economic incentive to produce gasoline of such octane levels. In addition, by deleting the "same or nearest octane" provision in the current rules, refiners will not be encouraged to produce unleaded gasoline with octane ratings "closer" to their historic premium leaded gasoline sold in May 15, 1973, in order to benefit from the higher margin recouped on it on May 15, 1973. Also, refiners which sold only a subregular grade of leaded gasoline on May 15, 1973, will not be required to use that selling price to impute a May 15, 1973 selling price for unleaded gasoline.

The proposal to allow refiners to treat new grades of unleaded gasoline as separate product categories will increase refiners' pricing flexibility between various grades of gasoline and thus increase competition for various grades of unleaded gasoline. Accordingly, DOE believes if refiners are permitted to allocate increased cost to grades of unleaded as they deem appropriate, refiners will increase their production of grades of unleaded gasoline more compatible with motorists' needs.

II. Proposed Amendments

A. Optional Calculation of Imputing a May 15, 1973, Selling Price

DOE proposes to amend the price rules to give all refiners the option of imputing a May 15, 1973 selling price and octane adjustment for unleaded gasoline as described in Section B below. By treating all refiners in a similar manner, whether or not they sold unleaded gasoline on May 15, 1973, all refiners will have the same economic incentives to produce unleaded gasoline.

Specifically, DOE is proposing that beginning on the date of the final rules, if any, are adopted, firms which sold unleaded gasoline on May 15, 1973 selling price for unleaded gasoline pursuant to the rules set forth in Section 212.112(b). In the alternative DOE is proposing that such refiners be required to impute the May 15, 1973 selling price for unleaded gasoline.

DOE solicits comments on whether refiners will elect to impute a May 15, 1973 selling price for unleaded gasoline under the various alternative methods proposed or continue to use the actual selling price. Specifically, refiners, which sold unleaded gasoline in May 1973, should submit data documenting what the May 15, 1973 selling price would be under the proposed methods of imputing the May 15, 1973 unleaded selling price. Comments are requested on the suitability of these options for refiners that intend to change octane levels.

B. Methods of Imputing the May 15, 1973, Selling Price for All Grades of Unleaded Gasoline

Currently refiners impute the May 15, 1973 selling price for unleaded gasoline using the May 15, 1973 weighted average selling price of leaded gasoline of the "same or nearest octane," plus one cent. DOE believes the current rule may be encouraging the production of unleaded premium gasoline with unduly high octane ratings in order to use leaded premium prices charged on May 15, 1973 to impute the May 15, 1973 selling price. Conversely, the production of unleaded gasoline with octane ratings only slightly higher than regular leaded gasoline is discouraged because the current rule requires that the imputed selling price for such unleaded gasoline be calculated on the basis of the lower octane regular leaded gasoline. Also, firms that produced a subregular leaded gasoline are at a price disadvantage compared to other unleaded refiners.

1. Imputed May 15, 1973, Selling Price for 87 Octane (R+M)/2 Unleaded Gasoline

DOE proposes that the imputed May 15, 1973 selling price for the EPA minimum specification 87 octane (R+M)/2 unleaded gasoline be based on the May 15, 1973 selling price for 89 octane (R+M)/2 leaded gasoline sold by the refiner on May 15, 1973, plus the current allowable one cent markup. DOE believes most refiners sold 89 octane (R+M)/2 leaded gasoline on May 15, 1973 and, therefore, it would be an appropriate base price for imputing minimum octane unleaded base prices. DOE solicits comments on the advisability of permitting firms to use the May 15, 1973 selling price of 89 octane (R+M)/2 leaded gasoline as the selling price for 87 octane (R+M)/2 unleaded gasoline.

Refiners that did not sell 89 octane (R+M)/2 leaded gasoline on May 15, 1973 would use the May 15, 1973 selling price of the leaded gasoline of the nearest octasne to 89 sold by the refiner, plus one cent, and adjust it upwards or downwards by one half cent an octane to reach 89 octane (R+M)/2 to impute the May 15, 1973 unleaded selling price for 87 octane (R+M)/2 unleaded gasoline. For example, a firm that only sold 86 octane (R+M)/2 leaded gasoline for 33 cents on May 15, 1973, would impute a May 15, 1973 selling price of 35.5 cents for 87 octane (R+M)/2 unleaded gasoline.

a. (89 (R+M)/2 − 86 (R+M)/2 = 3 octane ratings).

b. (3 octane ratings times .5 cent = 1.5 cents).

c. (33 cents + 1 cent + 1.5 cents = 35.5 cents).

Conversely, a firm that only sold 90 octane (R+M)/2 leaded gasoline for 36 cents on May 15, 1973, would impute a May 15, 1973 selling price of 36.5 cents for 87 octane (R+M)/2 unleaded gasoline.

a. (90 (R+M)/2 − 89 (R+M)/2 = 1 octane ratings).

b. (1 octane rating times .5 cent = .5 cent).

c. (36 cents + 1 cent − .5 cent = 36.5 cents).

DOE requests comments on what grades of leaded gasoline were sold by refiners on May 15, 1973.

2. *Octane Adjustment For Unleaded Gasoline Greater Than 87 Octane (R+M)/2.*

DOE proposes the following alternative methods of computing the adjustment to the imputed May 15, 1973 selling price of 87 octane (R+M)/2 unleaded gasoline to impute the May 15, 1973 selling price of higher octane unleaded gasoline. Generally, each proposal permits refiners an octane adjustment for each octane rating the unleaded gasoline is greater than 87 octane (R+M)/2. Refiners which sell an unleaded gasoline with an octane rating less than 87 octane (R+M)/2 will receive no increment or decrement. The octane rating of unleaded gasoline with a fractional octane rating of .5 or less shall be rounded to the lower whole number while fractions above .5 may be rounded to the next whole octane.

With respect to each of the octane adjustment proposals, DOE proposes that firms not be permitted an adjustment for octane improvements above 91 octane (R+M)/2. Thus, a refiner which sells 93 octane (R+M)/2 unleaded gasoline would only be permitted an adjustment equal to that permitted for 91 octane (R+M)/2. DOE solicits comments on the advisability of limiting the octane adjustment to octane increases between 87 and 91 octanes (R+M)/2 and, specifically, whether an unleaded gasoline with an octane higher than 91 octane (R+M)/2 is necessary for the current automobile fleet.

Primary Proposal: The adjustment would equal one half cent (.5 cent) for each octane rating (R+M)/2 the unleaded gasoline is greater than 87 octane (R+M)/2.[1] This adjustment is based on the estimated increased cost of producing higher grades of unleaded gasoline. For example, a refiner which sold 89 octane (R+M)/2 leaded gasoline on May 15, 1973 for 35 cents per gallon and currently sells unleaded gasoline with an octane rating of 91 (R+M)/2 would impute a May 15, 1973 selling price for unleaded gasoline of 38 cents per gallon.

a. (91 (R+M)/2 − 87 (R+M)/2 = 4 octane ratings).

b. (.5 cent x 4 octane ratings = 2 cents).

c. (35 cents + 1 cent + 2 cents = 38 cents).

DOE solicits comments on the advisability of requiring firms that sell unleaded gasoline with less than 87 octane (R+M)/2 rating to reduce the base price by .5 cent times each octane rating the unleaded gasoline is less than 87 octane (R+M)/2.

DOE invites comments, documented with financial data, regarding the appropriateness of using a one half cent increment to reflect increased unleaded octane ratings greater than 87 octane (R+M)/2. Moreover, DOE seeks information regarding the octane ratings of unleaded gasoline firms would sell, or foresee selling, if these amendments are adopted or if the regulation remains unchanged.

Alternative 1: The cents per gallon adjustment for octane ratings greater than 87 octane (R+M)/2 would equal the difference between the May 15, 1973 selling price of the highest and lowest octane leaded gasoline divided by the difference between the octane rating (R+M)/2 of the highest and lowest octane leaded gasoline sold by the individual refiner on May 15, 1973 to a class of purchaser. In most instances on May 15, 1973, leaded premium gasoline was 93 octane (R+M)/2 and the price spread between regular and premium gasoline was 2 cents at wholesale and 4 cents at retail. For example, a refiner that sold regular (89 octane) and premium (93 octane) leaded gasoline at retail at 35 cents and 39 cents, respectively, on May 15, 1973, would impute a May 15, 1973 retail selling price of 40.0 cents per gallon for unleaded gasoline with a 91 octane rating.

a. (93 (R+M)/2 − 89 (R+M)/2 = 1 octane ratings).

b. (39 cents − 35 cents = 4 cents).

c. (4 cents/4 octane ratings = 1.0 cent per octane rating).

d. (91 (R+M)/2 − 87 (R+M)/2 = 4 octane ratings).

e. (4 octane ratings x 1.0 cent = 4.0 cents).

f. (35 cents + 1 cent + 4.0 cents = 40.0 cents).

As an option within this alternative, DOE proposes that the leaded prices at one specific level of distribution, such as retail or the refinery gate, or the weighted average price of all sales, instead of for each class of purchaser, be used to calculate the adjustment. Thus, in lieu of computing the increment for each class of purchaser only one calculation would be made and that amount would be used to impute the May 15, 1973 unleaded selling price for every class of purchaser. For instance, in the above example, the imputed May 15, 1973 selling price to each class of purchaser would be the selling price of 89 octane (R+M)/2 leaded gasoline on May 15, 1973 to that class of purchaser, plus 1 cent, plus 4.0 cents. Rather than calculating the adjustment separately for each class of purchaser purchasing unleaded gasoline higher than 87 octane (R+M)/2, a single adjustment would be used.

Alternative 2: The adjustment would be based on a graduated scale with the fixed cents per gallon for each additional octane rating increasing as the octane rating increases over 87 octane (R+M)/2. That is, the fixed cents per gallon increase would be permitted to reflect each specific octane rating greater than 87 octane (R+M)/2. A graduated scale such as the following would be adopted. This would more truly reflect actual nonlinear costs to increase unleaded octane, but ignores the counterproductive effect of unnecessarily increasing the octane of unleaded gasoline beyond the point of automotive needs.[2]

	Incremental increase for each octane greater than 87 (R+M)/2 (in cents)	Total cents permitted for octane increases at corresponding amount
Total octane increase:		
1	.50	.50
2	.55	1.05
3	.60	1.65
4	.65	2.30
5	.70	3.00

Thus, a refiner that sold 89 octane (R+M)/2 leaded gasoline for 35 cents on May 15, 1973, would impute a May 15, 1973 selling price of 38.3 cents per gallon for 91 octane unleaded gasoline.

a. (91 (R+M)/2−87 (R+M)/2=4 octane ratings)

b. (4 octane ratings=2.30 cents)

c. (35 cents+1 cent+2.3 cents=38.3 cents)

DOE solicits comments, documented with financial data, on what the incremental cents per gallon per octane rating should be and if at some point the cents per gallon octane rating should become constant or decrease. In other words, DOE wants to know the exact cost of making each octane improvement in unleaded gasoline.

C. New Grades of Unleaded Gasoline

The provision in § 212.83(c)(1)(i)(B) which permits refiners to treat separate types and grades of gasoline as distinct products is based on the refiners' having "consistently and historically" done so and on notification of DOE. Consequently, there is a disincentive for refiners to introduce new grades of unleaded gasoline because refiners may not automatically treat such grades of unleaded gasoline as separate product categories. Thus, refiners are denied the pricing flexibility that results from being allowed to treat new grades of gasoline as separate product categories and, thereby, apportion increased costs to the new grade of gasoline as they deem appropriate.

DOE proposes to amend § 212.83(c)(1)(i)(B) to delete the "consistently and historically differentiated by the refiner" clause and the notification provision. In the alternative, DOE proposes to amend the provision and permit new categories to be established for new grades of unleaded gasoline with octane ratings above 87 octane (R+M)/2.

DOE believes either proposal will encourage the production of unleaded gasoline with more efficient octane ratings. This is because firms that introduce new grades of unleaded gasoline will automatically be permitted the pricing flexibility to apportion increased costs to the new grades as the refiner deems appropriate.

D. Unleaded Gasoline Production Incentive

Pursuant to § 212.83(j) refiners are currently permitted to increase the amount of costs which may be allocated to gasoline to reflect increases in unleaded gasoline production. The rule, "unleaded gasoline production incentive," which was adopted effective December 1, 1979, (44 FR 69594, December 3, 1979), is intended to encourage the production of unleaded gasoline. The provisions of the rule which establish the incentive, however, do not refer to the "bankability" or "sequence of recoupment" of increased costs derived from the incentive. Currently, the pass-through of the incentive is included in the "H" factor. Therefore, to clarify that recouped increased costs derived from the incentive may be "banked" and the exact order of recoupment, DOE proposes to amend the price formula to include the incentive in the "A" factor. By removing the incentive from the "H" factor, where its "bankability" and "sequence of recoupment" are not clear, and adding it to the "A" factor, DOE believes many uncertainties regarding the treatment of the incentive will be resolved.

III. Written Comments and Public Hearing Procedures

A. Written Comments

You are invited to participate in this proceeding by submitting data, views or arguments with respect to any matters relevant to this notice. Comments should be submitted by the date indicated in the "Dates" section of this notice and should be identified on the outside envelope and on the document with the docket number ERA–R–80–*26* and the designation: "Price Rules for Unleaded Gasoline." Ten copies should be submitted.

Any information or data submitted which you consider to be confidential must be so identified and submitted in writing, one copy only. We reserve the right to determine the confidential status of such information or data and to treat it according to our determination.

B. Public Hearing

1. *Procedure for Request to Make Oral Presentation*—If you have any interest in the matters discussed in this notice, or represent a group or class of persons that has an interest, you may request an opportunity to make an oral presentation by 4:30 p.m. on August 29, 1980, for the Los Angeles hearing and September 9, 1980, for the Washington, D.C. hearing. You should also provide a phone number where you may be contacted through the day before the hearing.

If you are selected to be heard, you will be notified before 4:30 p.m. on September 4, 1980, for the Los Angeles hearing and September 10, 1980, for the Washington, D.C. hearing, and are requested to submit one hundred copies of your statement to the hearing location by 8:30 on the morning of the hearing.

2. *Conduct of the Hearing*—We reserve the right to select the persons to be heard at the hearing, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. The length of each presentation may be limited, based on the number of persons requesting to be heard.

A DOE official will be designated to preside at the hearing. This will not be a judicial-type hearing. Questions may be asked only by those conducting the hearing. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

If you wish to ask a question at the hearing, you may submit the question, in writing, to the presiding officer. The DOE or, if the question is submitted at a hearing, the presiding officer will determine whether the question is relevant, and whether time limitations permit it to be presented for answer. The question will be asked of the witness by the presiding officer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by the DOE and made available for inspection at the DOE Freedom of Information Office, Room GA–152, James Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. You may purchase a copy of the transcript of the hearing from the reporter.

In the event that it becomes necessary for us to cancel the hearing, we will make every effort to publish advance notice in the **Federal Register** of such cancellation. Moreover, we will give actual notice to all persons scheduled to testify at the hearing. However, it is not possible to give actual notice of a cancellation or changes to persons not identified to us as participants. Accordingly, persons desiring to attend the hearing are advised to contact the DOE on the last working day preceding the date of the hearing to confirm that it will be held as scheduled.

IV. Procedural Requirements

A. Section 7 of the FEA Act

As required by section 7(a) of the Federal Energy Administration Act of 1974 (15 U.S.C. 787 *et seq.*, Pub. L. 93–275, as amended), a copy of this notice has been submitted to the Administrator of the Environmental Protection Agency (EPA) for his comments concerning the impact of this proposal on the quality of the environment. The Administrator requested that certain questions be asked of commenters and those questions are incorporated in this preamble. In addition, the Administrator commented that:

"While we are encouraged that DOE is reviewing this aspect of the pricing rules, we ae concerned that DOE has never followed through on the commitment to regulate the retail price differential between leaded and unleaded gasoline. Differentials have steadily been rising, with the self-service differential currently over five cents. Spot market wholesale prices appear to be reflecting adequate relative supplies of unleaded to leaded, and hence low spot wholesale differentials. This may be due in part to the success of the unleaded production incentive. Yet retail marketing practices are still creating high differentials, which can lead to fuel switching and the loss of billions of dollars invested in emission controls."

[1] See *Regulatory Analysis* for discussion of the one half cent adjustment.

[2] See *Regulatory Analysis* for discussion of the graduated scale.

V. 45 A. G. 15 80 UMI

After reviewing the proposal to which the Administrator refers, DOE determined that the economic impact of establishing a maximum retail price differential between leaded and unleaded gasoline could cause supply disruptions and adversely affect market conditions. Moreover, DOE does not believe, and EPA does not suggest, that retail price differentials are caused by or result from DOE's regulations. Rather EPA suggests that retail marketing practices create the differentials even in an adequate supply environment. Lundberg explains this phenomenon as resulting from retail price competition using regular leaded gasoline as the "fighting" grade. Lundberg suggests, however, that, as has already occurred on the West Coast, as unleaded gasoline becomes the dominant gasoline, it will become the "fighting" grade, lowering the differential. *See, Lundberg Letter,* July 18, 1980. In light of our commitment to phased decontrol, we believe it would be inappropriate to create a new retail price differential regulation with little more than a year remaining of our authority for such a regulation.

B. Section 404 of the DOE Act

Pursuant to the requirements of section 404(a) of the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*, Pub. L. 95–91), we have referred this proposed rule, concurrently with the issuance hereof to the Federal Energy Regulatory Commission for a determination as to whether the proposed rule would significantly affect any matter within the Commission's jurisdiction. The Commission will have until the scheduled close of the public comment period on the proposal to make such a determination.

C. Executive Order No. 12044

A regulatory analysis as required for proposed rulemakings pursuant to Executive Order 12044 entitled "Improving Government Regulations" (43 FR 12861, March 24, 1978) and DOE's implementing procedures, is being prepared by DOE. The proposed regulatory analysis is available at DOE's Office of Public Information, Room B–210, 2000 "M" Street, N.W., Washington, D.C. You are invited to comment on the proposed regulatory analysis. A summary of the proposed regulatory analysis is set forth below.

1. *Summary of Regulatory Analysis*—Most authorities agree that the optimal mix of unleaded gasoline would be two grades, with one of the grades at 3 octanes above the minimum grade required by the Environmental Protection Agency (EPA). Estimates are that, if 25 percent of unleaded gasoline were produced at the higher octane level, this mix would satisfy the needs of that portion of the unleaded automobile fleet that is perceived as performing unsatisfactorily using regular unleaded gasoline (87 octane (R+M)/2).

Relatively few refiners were selling unleaded gasoline on May 15, 1973, which was adopted as the base price date for gasoline. Thus, all other refiners must impute a selling price for unleaded gasoline using the May 15, 1973 selling price of leaded gasoline with the same or nearest octane, plus one cent. The maximum allowable price is then derived by adding increased costs allocated to all gasoline to the unleaded grade.

Most refiners imputing a selling price for unleaded gasoline produced a regular leaded grade of gasoline rated at 89 octane (R+M)/2, which for purposes of the DOE price regulations is closest in octane to the 87 octane (R+M)/2 unleaded grade required by EPA. However, a few refiners were marketing a leaded grade with a lower octane than 89 octane (R+M)/2, which is commonly referred to as "subregular," and that price was required to be the basis for imputing a base price for the minimum octane unleaded grade. We are aware of one refiner that was marketing only a premium leaded grade in May 1973 and, therefore, was able to impute a selling price from that higher priced product.

One of the proposed changes to the regulations would either allow or require all refiners, including those with May 15, 1973 actual base prices, to impute a selling price for a minimum grade of 87 octane (R+M)/2 unleaded gasoline using the base price of 89 octane (R+M)/2 leaded gasoline, plus one cent. This would remove any disparities caused because some refiners are required to impute unleaded gasoline May 15, 1973 selling prices while others use their actual May 15, 1973 selling prices. Although DOE has been informed of the existence of price disparities caused by the current regulations, we do not have sufficient data to calculate the effect of this proposal for purposes of the Draft Regulatory Analysis.

A second proposal also would permit refiners to impute a price for 87 octane (R+M)/2 unleaded gasoline equal to the May 15, 1973 selling price of 89 octane (R+M)/2 leaded gasoline but would include, in addition, a fixed or sliding octane adjustment to allow for increases in octane of unleaded gasoline above the EPA required minimum grade. Each of the options under this proposal would increase the refiner's margin for producing an unleaded gasoline with a higher octane than the minimum grade. However, each of the proposed options would cause potential price increases that are less than those that would occur if refiners produced a high octane unleaded gasoline solely to achieve a base price imputed from the May 15, 1973 selling price of premium leaded gasoline. The production by all refiners of an unnecessarily high octane unleaded gasoline to take advantage of the present "same or nearest octane" provision would result both in increased costs, due to greater production costs associated with higher octane unleaded, and a possible reduction in the overall supply of unleaded gasoline because of the loss of unleaded gallonage that results from the reforming necessary to achieve the higher octane.

A third proposal would allow refiners to allocate increased costs to different types and grades of gasoline whether or not they historically marketed the grades or priced them differently. This amendment would permit refiners to assign increased costs from the total increased cost pool, which includes costs associated with increasing the octane of unleaded gasoline, as they deem appropriate. Since there would be no increase in the refiner's margin or total profit if this proposal were to be selected, there is no additional cost to the consumer. The proposal does allow refiners to apply more increased costs to one type or grade of unleaded gasoline than to another. It is possible that a large portion of these costs would be allocated to the higher octane unleaded.

D. National Environmental Policy Act

At present the environmental consequences, if any, of the proposals in this Notice are being evaluated. The requirements of the National Environmental Policy Act will be satisfied before any final rules are issued pursuant to this Notice.

(Emergency Petroleum Allocation Act of 1973, (15 U.S.C. 751 *et seq.*), Pub. L. 93–159, as amended, Pub. L. 93–511, Pub. L. 94–99, Pub. L. 94–133, Pub. L. 94–163, and Pub. L. 94–385; Federal Energy Administration Act of 1974, (15 U.S.C. 787 *et seq.*), Pub. L. 93–275, as amended, Pub. L. 94–332, Pub. L. 94–385, Pub. L. 95–70, and Pub. L. 95–91; Energy Policy and Conservation Act, (42 U.S.C. 6201 *et seq.*), Pub. L. 94–163, as amended, Pub. L. 94–385, and Pub. L. 95–70; Department of Energy Organization Act, (42 U.S.C. 7101 *et seq.*), Pub. L. 95–91; E.O. 11790, 39 FR 23185; E.O. 12009, 42 FR 46267)

In consideration of the foregoing, DOE proposes to amend Part 212 of Chapter II, Title 10 of the Code of Federal Regulations, as set forth below:

Issued in Washington, D.C., August 8, 1980.

Hazel R. Rollins,

Administrator, Economic Regulatory Administration.

Primary Proposal

1a. Section 212.83(c)(1)(i)(B) is revised to read as follows:

§ 212.83 Price rule.

* * * * *

(c) *Allocation of increased costs.*

* * *

(1) Allocation of increased costs incurred in the period "t"—

* * * * *

(i) * * *

(B) Notwithstanding any other provision of this Subpart, for purposes of this section, a refiner may designate as categories within the product gasoline different types (unleaded gasoline as differentiated from leaded gasoline) and grades (differentiated by octane number) of gasoline. In apportioning the total amount of increased costs allocable to gasoline among categories of gasoline, a refiner may apportion amounts of increased costs to a particular category of gasoline in whatever amounts it deems appropriate.

* * * * *

Alternative Proposal

1b. Section 212.83(c)(1)(i)(B) is revised to read as follows:

§ 212.83 Price rule.

* * * * *

(c) *Allocation of increased costs.* * * *

(1) Allocation of increased costs incurred in the period "t"—

* * * * *

(i) * * *

(B) Notwithstanding any other provision of this Subpart, for purposes of this section, a refiner may designate as categories within the product gasoline different types (unleaded gasoline as differentiated from leaded gasoline) and grades (differentiated by octane number), if the categories so designated by the refiner represent discrete gasoline types and grades that have been consistently and historically differentiated by that refiner. Beginning ————, 1980, all grades of unleaded gasoline [Alternative: add clause "with octane (R+M)/2 greater than 87 (R+M)/2") may be designated as separate categories. In apportioning the total amount of increased costs allocable to gasoline among categories of gasoline, a refiner may apportion amounts of increased costs to a particular category of gasoline in whatever amounts it deems appropriate.

* * * * *

Primary Proposal

2a. Section 212.83(c)(2)(iii)(C) *The "A" factor* is revised in the definition of "A_i" to read as follows:

§ 212.83 Price rule.

* * * * *

(c) *Allocation of increased costs.*

* * *

(2) *Formulae.* * * *

(iii) *Definitions.* * * *

(C) *The "A" factor.* * * *

"A_i" is, for i=1, i=2, i=3, and i=4, the sum of the increased costs of crude oil attributable to the specific covered product or products of the type "i" purchased or landed on or after January 1, 1976 and prior to or during the period "s" and not recovered in sales of that product through the period "t" and the increased costs of crude oil attributable to the specific covered product or products of the type "i" purchased or landed on or after January 1, 1976 in the period "t." "A_i" also includes the increased costs of crude oil and purchased products attributable to the covered product or products of the type "i" incurred through December 31, 1975 and not passed through as of January 31, 1976, and not recovered in sales of that product through the period "t." Notwithstanding the foregoing provisions of this paragraph, beginning March 1, 1979, for the product i=3, "A_i" shall be at least 100% (one hundred percent) of "A_i^T," plus the sum of "A_i^S," and "A_i^R,"; but may, at the option of the refiner concerned, be up to 110% (one hundred ten percent) of "A_i^T," plus the sum of "A_i^S," and "A_i^R." Beginning December 1, 1979, (Alternative: Beginning ————, 1980) "A_i" shall include the unleaded gasoline production incentive found in § 212.83(j).

* * * * * * *

Primary Proposal

3a. Section 212.83(c)(2)(iii)(G) *The "H" factor* is revised to read as follows:

§ 212.83 Price rule.

* * * * *

(c) *Allocation of increased costs.* * * *

(2) *Formulae.* * * *

(iii) *Definitions.* * * *

(G) *The "H" Factor.*

H_i^u= For i=1, i=2, and i=4, the portion, if any, of the total dollar amount available in the period "u" for inclusion in price adjustments to the product of the type "i" that pursuant to paragraphs (d) or (e) of this section the refiner elects to include in prices of gasoline for the period "u" (in which case "H_i" shall be subracted); for "i"=3, the portion, if any, of the total dollar amount available in the period "u" for inclusion in price adjustments to No. 2 oils, aviation jet fuel, or general refinery products that pursuant to paragraphs (d) or (e) of this section the refiner elects to include in the price of gasoline for the period "u" (in which case "H_i" shall be added).

FEDERAL TRADE COMMISSION

16 CFR Part 460

Trade Regulation Rule; Labeling and Advertising of Home Insulation

AGENCY: Federal Trade Commission.

ACTION: Notice of effective date of rule, and of a stay of the effect of the representative thickness testing and television advertising disclosure requirements of the rule.

SUMMARY: The Federal Trade Commission has announced the effective date of a final rule concerning the labeling and advertising of home insulation (16 CFR Part 460). At the same time, the Commission has temporarily stayed the effective date of § 460.6 of the rule, which requires that insulation R-values be determined by "representative thickness" testing, until such time as thick calibration materials for such testing are made available from the National Bureau of Standards. The Commission also has temporarily stayed §§ 460.10, 460.18, 460.19 and Appendix B of the rule, which specify requirements for insulation advertising, insofar as they apply to television advertisements, pending the initiation and completion of further rulemaking proceedings concerning affirmative disclosure requirements for television advertisements.

EFFECTIVE DATE: September 29, 1980.

FOR FURTHER INFORMATION CONTACT: Kent C. Howerton, 202–724–1514, Attorney, Division of Energy and Product Information, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580.

SUPPLEMENTARY INFORMATION:

I. Background

A. *History.* On August 31, 1979, the Commission promulgated a trade regulation rule on the labeling and advertising of home insulation.[1] The Commission announced in that notice that the effective date of the rule would be November 30, 1979.[2]

On November 7, 1979, the Commission announced its determination to delay the effective date until December 31, 1979.[3] Thereafter, on December 17, 1979, the Commission announced that the rule would not become effective before at least March 16, 1980.[4] That announcement was occasioned by Congressional action on November 16, 1979, which barred any trade regulation rules promulgated by the Commission after August 30, 1979, from becoming effective until March 16, 1980, unless authorizing legislation for the Commission was enacted before that date.[5] Through a series of additional continuing resolutions passed by the Congress after November 16, 1979, the restrictions on implementation of Commission trade regulation rules were extended through May 31, 1980. At that time, the restriction on implementation of the home insulation rule was rescinded.

The Commission's prior announcements postponing the effective date of the rule were also occasioned by the following series of events.

On August 31, 1979, several members of the mineral wool insulation industry filed a petition for review of the rule in the United States Court of Appeals for the Tenth Circuit.[6] On September 28, 1979, these manufacturers also filed a petition with the Commission for a stay of the representative thickness testing and television advertising disclosure provisions of the rule pending appeal.[7] Following these filings, the Commission's staff became engaged in consultations with various parties, including industry representatives and the National Bureau of Standards (NBS), in an attempt to achieve a fair and workable resolution of the representative thickness testing issue. The stay of the rule which was announced by the Commission on November 7, 1979 was designed to provide the staff with an opportunity to complete the on-going consultations on representative thickness testing.[8]

Following these consultations, NBS proposed an enforcement bulletin in which it recommended that manufacturers of mineral wool batts and blankets be allowed to test thin product samples until thick calibration samples, designed for representative thickness testing, are available from NBS.[9] NBS made this recommendation after it consulted with interested industry members and reviewed available literature—including recent results of testing under the Department of Commerce's National Voluntary Laboratory Accreditation program (NVLAP)—concerning the effects of thin-sample testing and the present feasibility of representative thickness testing of mineral wool batts and blankets. The NBS enforcement bulletin, related correspondence between NBS and the Commission, and other material relevant to representative thickness testing developed after the rulemaking record of this proceeding closed on September 22, 1978, were placed on the record of this proposed stay proceeding[10] and made available for review by the public during a comment period concerning a proposal made by the Commission to stay the representative thickness testing requirement. This other material includes, *inter alia,* technical information provided by the mineral wool manufacturers and other interested parties, relevant portions of the transcript of the Congressional hearings in which questions were raised concerning representative thickness testing, and correspondence between the Commission and members of the industry, the public, and the Congress relating to the issue of representative thickness testing.[11]

Following this process of consultation on the representative thickness testing issue, the Commission and the mineral wool manufacturers agreed to ask the Tenth Circuit to remand the rule to the Commission. On January 4, 1980, the Court approved the joint stipulation of the mineral wool petitioners and the Commission, and remanded the rule to the Commission for further proceedings.[12]

Under the Court's order remanding the rule, the Commission must reconsider issues relating to the representative thickness testing and television advertising disclosure requirements of the rule. The Commission must provide all interested parties with notice and an opportunity for hearings, submissions, and presentations, including cross-examination and rebuttal, in accordance with Sections 1.7–1.20 of the Commission's Rules of Practice, concerning:[13] (1) whether representative thickness testing of mineral wool batts and blankets is feasible at this time, absent standard

calibration materials for such testing; (2) whether present thin-sample testing of mineral wool batts and blankets produces an unfair or deceptive overstatement of their claimed R-values; (3) the disclosure requirements of the rule as they apply to television advertising; and (4) such other matters as the Commission deems appropriate.

B. *Issues.*

1. *Representative Thickness Testing.* With respect to the issue of representative thickness testing, paragraph 2 of the stipulation provides that the Commission can dispense with hearings, submissions, and presentations, including cross-examination and rebuttal, if it decides to allow testing of mineral wool batts and blankets pursuant to the enforcement bulletin issued by NBS, or one agreeable to petitioners.[14] The NBS enforcement bulletin would allow testing of samples at 150 percent of the present one-inch NBS primary standards, or, for materials of 1.5 inch thickness or less, at the full thickness, until NBS has made available thick standard calibration samples designed for representative thickness testing.[15] The National Bureau of Standards has recently reaffirmed its commitment to make these thick standard calibration samples available by January of 1981.[16]

In proposing to stay the representative thickness testing requirement, the Commission carefully considered NBS's findings and recommendations concerning the effects of thin-sample testing and the present feasibility of representative thickness testing. The Commission also weighed the prospects for attempting to resolve the representative thickness testing issue through further rulemaking. Under the terms of the Court's remand order, the Commission may not implement the representative thickness testing requirement before NBS calibration materials are available without first conducting further rulemaking under the Commission's trade regulation rulemaking requirements [16 CFR 1.7–1.20] to consider both the effects of thin-sample testing and the feasibility of representative thickness testing in the absence of thick standard calibration materials.[17]

Despite the evidentiary basis for representative thickness testing found in the rulemaking record and relied upon by the Commission in promulgating a representative thickness testing requirement last August, the Commission stated that it had become increasingly clear since promulgation of the rule that the question of representative thickness testing raises extraordinarily complex, and controversial, technical and scientific issues.[18] It also had become clear that the insulation industry, the thermal testing community, and relevant governmental agencies are still conducting research in this area and could not themselves yet agree on the essentially technical questions of the effects of thin-sample testing and the present feasibility of representative thickness testing.[19] In these circumstances, the Commission was uncertain whether further rulemaking proceedings could satisfactorily resolve these issues. In addition, such rulemaking would be time-consuming and might not be completed before the time that standard calibration materials are available from NBS for representative thickness testing. In that event, further rulemaking would provide little, if any, benefit to the consuming public.

For these reasons, the Commission tentatively decided not to propose further rulemaking on the representative thickness testing controversy at this time. Instead, the Commission proposed that the representative thickness testing requirement be stayed temporarily until standard calibration materials are available from NBS.[20]

Although the remand order of the Court covers the testing requirements of the rule only as they apply to mineral wool batts and blankets,[21] the Commission believed that, in the interests of fairness and uniformity, all products should be subject to the same standard. Therefore, the Commission proposed to stay the representative thickness testing requirements on an industrywide basis.[22] During the period of the stay, testing of samples could be performed either at representative thickness or at the thickness(es) allowed under the ASTM R-value test procedures referenced in the rule. The Commission stated that it would rescind the stay when thick calibration samples designed for representative thickness testing become commercially available to the industry.

The Commission determined that the representative thickness testing requirement is severable under the rule. Further, the Commission stated its belief that it has the inherent discretion to issue a temporary stay of the representative thickness testing requirement of the rule. However, the Commission also believed that it would benefit from the views of interested parties on whether a temporary stay of the representative thickness testing requirement is in the public interest before making a final decision on this proposed stay.[23]

2. *Television Advertising Disclosures.* The rule requires, among other things, that insulation advertisers make certain affirmative disclosures in any advertisement or other promotional material which contains claims relating to R-value, price, thickness, product comparison, or energy savings. The rule also requires that the prescribed affirmative disclosures be made clearly and conspicuously, and defines the meaning of clear and conspicuous disclosure in the context of television advertisements.

The Tenth Circuit's order remanding the rule to the Commission requires the Commission to reopen the rulemaking record concerning the television advertising disclosure requirements.[24] The Court's order states that the Commission must provide an opportunity for full hearing and presentations, including cross-examination and rebuttal, in the reopening of the rulemaking record. Therefore, in light of the remand order, the Commission proposed to conduct further rulemaking proceedings on the television advertising disclosure requirements of the rule.[25]

The Commission determined that these requirements are severable under the rule. Further, the Commission stated its belief that it has the inherent discretion to issue a temporary stay of the television advertising disclosure requirements of the rule, pending completion of the rulemaking proceedings. However, the Commission also believed that it would benefit from the views of interested parties before

[14] *Id.* The petitioners and the Commission have filed with the Tenth Circuit an agreement stating that the proposed temporary stay of § 460.6 is equivalent to issuance of the NBS enforcement bulletin and satisfies the requirements of Paragraph 2 of the Stipulation.
[15] *Id.* NBS may not actually be making available what are known as "standard reference materials," but, in any event, it will make available a material that will permit industry members to perform representative thickness testing in an accurate manner.

making a final decision on this proposed stay.[26]

C. *Public Comments on Proposed Stays.* The Commission invited written public comments on its proposals to stay the representative thickness testing requirement, pending the availability of thick standard calibration samples, and to stay the television advertising disclosure requirements, pending completion of further rulemaking proceedings. In the invitation to comment, the Commission announced that, upon review of the comments received, it would determine whether to make the proposed stays effective. The Commission further announced that, if it decided to stay the representative thickness testing and the television advertising disclosure requirements of the rule, it would make effective all other portions of the rule, following reasonable advance notice, if Congressional restrictions on implementation of pending Commission rules were not in effect at that time. In that event, the Commission stated that the effective date would be published in the **Federal Register** with sufficient advance notice to all industry members who have compliance obligations under the rule.[27]

II. Analysis of the Comments

A total of twenty-six (26) comments were submitted. Several of the commenters addressed issues that are not relevant to the proposed stays. They requested exemptions from coverage of the rule,[28] or raised other arguments about various requirements in the rule.[29] Only twenty-one (21) comments directly addressed the proposed stays.

A. The Representative Thickness Testing Requirement

In requiring representative thickness testing, the Commission relied on record evidence that R-values derived from thin-sample testing are misleading because they fail to reflect the non-linear relationship between thickness and R-values,[30] and that the margin of testing error associated with representative thickness testing is within acceptable limits despite the unavailability of standard calibration materials from NBS.[31]

In proposing the stay, the Commission tentatively concluded that the most appropriate course of action would be to implement the rule without requiring representative thickness testing until calibration materials become available. This conclusion was based on new evidence submitted by NBS, evidence which cast doubt on the magnitude of the thickness effect and of the testing error associated with representative thickness testing. NBS reviewed data and literature not available during the rulemaking proceeding, and concluded that the thickness effect ranges between 2 and 10 percent, and that the testing error associated with representative thickness testing is as high as 6 percent.[32] Thus, according to NBS, the overstatement of R-value caused by extrapolation from the results of thin-sample testing is of approximately the same magnitude as the testing error associated with testing thick samples without calibration materials.

The only trade association that commented was the Society of the Plastics Industry, Inc., representing sellers of cellular plastics insulation products. Trade associations for other industry segments did not submit comments. These other segments include sellers of insulation products such as cellulose, urea formaldehyde foam, aluminum foil, mineral wool, perlite and vermiculite.

Eight (8) comments supported the need for the Commission to implement the rule now even without requiring representative thickness testing.[33] These comments represented the views of five (5) mineral wool companies, three (3) cellulose companies, the Environmental Group, and the U.S. Department of Energy.

A few commenters disputed the contention that representative thickness testing could not be conducted without standard calibration materials from NBS.[34] Lastly, several commenters argued that the Commission should not make the rule effective without the representative thickness testing requirement for one or more of the following reasons: (1) thin-sample testing yields misleading R-values;[35] (2) to do so would unfairly discriminate against products which do not exhibit a thickness effect;[36] (3) it would destroy

[31] *Id.* at 50228. However, the Commission acknowledged the lack of standard calibration materials as a shortcoming, and encouraged their rapid development. *Id.*

[32] Letter of November 19, 1979, to Chairman Pertschuk from Dr. Ernest Ambler, Director, National Bureau of Standards, W–35.

[33] Environmental Group, W–132; Johns-Manville Corp., CertainTeed Corp., and Rockwool Industries, Inc., W–133; Owens-Corning Fiberglas Corp., W–134; Thermo Products of Florida, Inc., W–135; Rock Wool Manufacturing Co., W–137; Rhode Island Energy Corp., W–139; Cellin Manufacturing, Inc., W–141; and U.S. Department of Energy, W–143.

The Environmental Group suggested that, if the Commission implements the rule while staying the representative thickness testing requirement, it will be necessary for it also to stay other provisions which prohibit extrapolation of R-values. One such provision prohibits installers from multiplying the R-value by the number of inches installed to determine the total R-value. Environmental Group, W–132. The Commission does not believe that it is necessary for it to stay these additional provisions. The installer should base the total R-value disclosure on the R-values listed on the label, so it is not necessary to stay that provision. The only additional such provision in the rule is the prohibition against making per inch R-value claims. The Commission believes that it should not stay that provision because such claims will perpetuate the consumer's belief that R-values are linear, and thus would interfere with the effectiveness of the rule after the stay of the representative thickness testing requirement is lifted.

[34] Ganey Industries, Inc., W–120; Roy & Sons, Inc., W–123; Geoscience, Ltd., W–125; Alfol, Inc., W–138. However, these commenters offered no additional evidence to dispute the NBS conclusions that standard calibration materials are necessary to calibrate equipment used to conduct tests according to ASTM C–518 and to verify results of tests conducted according to ASTM C–177 or ASTM C–236 so that testing error can be eliminated. In fact, the only technical data submitted to the Commission which was not reviewed by NBS was a report recently prepared by Oak Ridge National Laboratory. *Infra*, note 39. That report draws no conclusions concerning the magnitude of thick sample testing error in general. It does conclude that the thick sample testing error of the Dynatech guarded hot plate used in the study was plus or minus 3 percent. *Id.* at 20, 49.

[35] Applegate Insulation Systems, Inc., W–124 (without representative thickness testing, Commission legitimizes false R-value claims); Geoscience, Ltd., W–125 (old procedures result in excessive R-value claims); National Association of Home Builders, W–127 (Commission has already found that R-values based on thin-sample tests are false). *But cf.* Environmental Group, W–132 (far better to give consumers information based on thin-sample testing than to give them no information at all); Johns-Manville Corp., CertainTeed Corp., and Rockwool Industries, Inc., W–133 (representative thickness testing without calibration materials is unreliable and would mislead public); Owens-Corning Fiberglas Corp., W–134 (representative thickness testing without calibration samples would deceive public); Rockwool Manufacturing Co., W–137 (consumer needs the protection of the provisions of the rule not being stayed.)

[36] The Monticello Group, W–121 (not in their interests to stay representative thickness testing because expanded polystyrene has nearly linear R-value); Geoscience Ltd., W–125 (old procedure of claiming excessive R-values stifles competition); Monsanto Company, W–129 (proposed stays discriminate in favor of manufacturers who cannot comply with stayed provisions); Alfol, Inc., W–138 (proposed stay unfair to multi-panel foil manufacturers who must test under ASTM C–236). *But cf.* The Celotex Corp., W–119 (there is a strong need for early implementation of the rule even without representative thickness testing);

Footnotes continued on next page

the impetus to promptly resolve the technical problems associated with representative thickness testing;[37] (4) it would unfairly discriminate against products, like multi-panel foil insulations, which must be tested at greater thicknesses.[38]

It is important to note, however, that none of the commenters submitted additional data which disputes the NBS conclusions. The only additional technical information submitted to the Commission was a report recently issued by Oak Ridge National Laboratory (ORNL).[39] The report was prepared for the Department of Energy, based on a study ORNL conducted to obtain and evaluate full-thickness thermal performance data on mineral fiber batt insulation. ORNL reported that it had measured a thickness effect of approximately eight (8) percent in the R–11 fiberglass batts it tested and of approximately seven (7) percent in the R–19 fiberglass batts it tested.[40] However, the report recommends that a further study should be undertaken to confirm the results of its study that R-values obtained by extrapolation from thermal resistance measurements on thin samples of insulation are greater than R-values obtained by full-thickness testing,[41] thus conceding that further research is necessary to substantiate this preliminary finding.

The Commission has given serious consideration to each of the comments received, and believes that it should implement the rule while staying the representative thickness testing requirement, for the following reasons.

First, in regard to the argument that thin sample testing will yield misleading R-values, the Commission now believes, based on new evidence, including the NBS analysis and comments received, that the thickness effect may not be as great as the evidence on the rulemaking record indicated. The best evidence now available indicates that the thickness effect may range from two (2) to ten (10) percent. It also indicates that the testing error associated with testing at representative thickness without thick standard calibration materials may be plus or minus six (6) percent, significantly greater than was indicated on the rulemaking record.[42] This testing error for representative thickness testing is of approximately the same magnitude as the error caused by extrapolation of R-values from the results of thin-sample testing.[43]

Second, in response to the argument that a stay would unfairly discriminate against those products which do not exhibit a thickness effect, the Commission notes that the stay of the representative thickness testing requirement will apply to all types of insulation. All low density insulations exhibit some thickness effect; the difference in thickness effects between different insulation products is a matter of degree.[44]

The Commission recognizes that a stay of the representative thickness testing requirement will leave temporarily unremedied one source of competitive injury. Sellers of those types of insulation that demonstrate the largest thickness effect will be permitted to continue overrating the R-value of their products to a limited degree. However, in light of the remand order, the only alternative to a stay of the representative thickness testing requirement would be to delay indefinitely the implementation of the entire rule. This latter action would, in the Commission's view, have competitive effects much more serious than those associated with a stay of representative thickness testing. Without the rule, responsible industry members, who presently base their R-value claims on recognized tests and follow sound quality control procedures, would be forced to compete with less responsible firms, who could inflate their R-value claims or fail to test for R-value. Similarly, without any rule, industry members would be under no obligation to make R-value claims that account for factors that are known to affect R-value.[45] Further, insulation industry members would be able to make exaggerated claims of fuel savings to be gained from insulation purchases, without any reasonable basis for the claims. Thus, while a stay of the representative thickness testing requirement does not eliminate the competitive injury caused by current thin-sample testing practices, implementation of the remainder of the rule will call a halt to numerous other practices that produce serious

---

Footnotes continued from last page

Environmental Group W–132 (further delay of the rule harms achievement of national energy policy goals, limits the extent to which energy use reduction takes place, and perpetuates consumer ignorance and waste); Thermo Products of Florida, Inc., W–135 (consumer and insulation industry drastically need the rule even without representative thickness testing); Cellin Manufacturing Inc., W–141 (although stay of representative thickness testing benefits mineral fiber producers over small businessmen, consumers and nation's energy conservation effort, rest of rule should be implemented for the benefit of the common good).

[37] The Society of the Plastics Industry, Inc., W–131.

[38] Alfol, Inc., W–138. However, unlike mass insulations, the thermal resistance of reflective foil insulations is not provided by the material itself. Rather, the insulating ability is provided by installing the foil adjacent to an air space, significantly increasing the thermal resistance of the airspace. *Supra*, note 30 at 50219. The only manner in which the R-value of multi-panel foil insulations can be measured is by tests of the actual multi-panel foil system conducted under ASTM C–236. For this reason, a stay of the representative thickness testing requirement does not affect the testing requirement for multi-panel foil systems.

Tye *et al.*, "An Experimental Study of Thermal Resistance Values (R-Values) of Low-Density Mineral-Fiber Building Insulation Batts Commercially Available in 1977," ORNL/TM–7286, published April, 1980. W–27. A copy of this report was placed on the stay record and was available for public inspection during the comment period.

[40] *Id.* at 47.

[41] *Id.* at 51. One of the authors of the report has submitted a comment on the proposed stay of the representative thickness testing requirement. He explains that Oak Ridge National Laboratory has developed a mathematical model, based on thermal performance tests, which might be used to calculate accurately the R-values of thick insulation from results of tests conducted on only one to two inch samples. Although he concedes that the model needs verification, he suggests that, if the model proves to be valid, it could be used as an alternative to representative thickness testing. Oak Ridge National Laboratory, W–126.

[42] Round robin test results on thick samples using representative thickness testing techniques varied by only 3 or 4 percent. Statement of Basis and Purpose, *supra* note 30, at 50226. That amount is much less than the range of 12 percent which NBS has now concluded exists.

[43] *See* text accompanying notes 32, 39–41, *supra*. Examples of the interaction between the thickness effect and the testing error on mineral wool batts and blankets at R–11 and R–19 are set forth for purposes of illustration.

For an R–11 batt with a 5% thickness effect, the actual R-value will be 10.5. Factoring in the testing error of plus or minus 6%, the tested R-value could range between 9.8 and 11.1.

For an R–19 batt with a thickness effect of 5%, the actual R-value, taking account of the thickness effect, will be 18.1. Factoring in a testing error of plus or minus 6%, the tested R-value could range between 17 and 19.1.

[44] *E.g.*, Tye, M/809; "Discussion on Experiments to Separate the 'Effect of Thickness' from Systematic Equipment Errors in Thermal Transmission Measurements," by C. M. Pelanne, Johns-Manville Research & Development Center, presented at the ASTM C.16.00 Thermal Insulation Conference, October 22–25, 1978, Tampa, Florida, W–21; "Experimental Determination of the Thickness Effect in Fibrous Insulations," by Marion Hollingsworth, Jr., Scientist, Research & Development Division, Building Research Laboratory, Owens-Corning Fiberglas Corporation, presented at the ASTM Thermal Insulation Conference, October 22–25, 1978, Tampa, Florida, W–24; Letter of October 15, 1979, to Sen. Wendell Ford, Chairman Consumer Subcommittee of Senate Committee on Commerce Sciences Transportation, from R. P. Tye, Senior Scientist Materials and Systems Evaluation, Dynatech R/D Co., plus attached comments on MIMA statements, W–75.

[45] For example, urea-based foam insulation manufacturers could make inflated R-value claims that do not reflect the substantial adverse effect that shrinkage has on that product's R-value, and unfairly compete against manufacturers of other products on the basis of those claims. Likewise, manufacturers of loose-fill products would be able to make R-value claims that do not reflect the adverse effect of settling on those product R-values.

V 45 A G 15 80 UMI

competitive inequities in the home insulation market.[46]

Third, the argument that implementation of the rule in the absence of the representative thickness testing requirement will destroy the impetus to promptly resolve the technical problems associated with representative thickness testing is not persuasive. The Commission is convinced, in light of repeated public commitments from NBS,[47] that the stay of the representative thickness requirement of the rule will be short and that NBS will meet its January 1981 schedule for making thick standard calibration materials available. In fact, the Commission believes that implementation of the rule will provide additional impetus to NBS to meet the promised January, 1981 deadline.

Fourth, the Commission believes that a stay of the representative thickness testing requirement will not unfairly discriminate against products like multi-panel foil insulations, which must be tested at their full system thickness. Manufacturers of multi-panel foil insulations will have to test their products under ASTM C–236 as they are actually used, regardless of the Commission's decision regarding the representative thickness testing requirement. That type of testing is the only manner in which the R-value of that multi-panel foil insulation can be determined.[48]

Although the Commission still is committed to representative thickness testing as the best and most accurate measure of the R-value of home insulation, it believes that it is in the public interest to implement the rule while temporarily staying the representative thickness testing requirement. Notwithstanding the fact that thin-sample testing may result in some consumers being misled to a limited degree regarding the insulating ability of a particular product, the Commission has concluded that the potential deception that may occur due to a limited overstatement of R-values is clearly outweighed by the consumers' need for the best information now available to enable them to compare products and make the most cost-effective purchases of home insulation.

Moreover, the Commission believes, and many commenters recognized, that consumers will reap substantial benefits from immediate implementation of the other requirements of the rule. The rule will ensure that all manufacturers conduct R-value tests on their products, using standardized test procedures. It will ensure that claimed R-values are reduced to take into consideration factors, such as shrinkage and settling, which affect R-value, and that disclosure of R-value is made in a manner which is understandable and useful to consumers. In the absence of the rule, consumers will continue to be denied access to R-value information that is disclosed in a uniform manner based on standardized tests. Disclosure of R-value information through labeling, fact sheets, advertisements and other promotional material will allow consumers to begin to understand how insulation works and how to purchase insulation, and thus, to purchase insulation based on R-value rather than on thickness. The rule will ensure that savings claims are substantiated and that consumers will be properly informed of factors which can affect the amount of savings they may realize.[49] These protections are especially necessary during this period of tax credits and other government sponsored incentives [50] presently operative in the insulation market. These incentives can be fairly characterized as spurring consumer purchases in this market as well as inducing consumer confidence in the performance of insulation products.

The Commission now believes that the thickness effect may be significantly smaller and that the testing error may be larger than was indicated by the rulemaking record. The Commission recognizes that the factual issues of the precise magnitudes of the thickness effect and testing error are unresolved at this time. However, the Commission continues to believe that these issues cannot be resolved prior to the time when the thick calibration materials become available from NBS and moot the controversy.

After carefully weighing the strong benefits to consumers and competitors from prompt implementation of the rule against the limited potential overstatement of R-value that may occur in the absence of a representative thickness testing requirement, the Commission concludes that the public interest is best served by implementation of the rule while temporarily staying the representative thickness testing provision.

B. The Television Advertising Disclosure Requirements

None of the commenters opposed the stay of the television advertising disclosure requirements. the few who addressed the issue argued that it was important that consumers have the benefits and protection of the other provisions of the rule as quickly as possible.[51]

The Commission believes that a temporary stay of the television advertising disclosure requirements will not seriously affect the effectiveness of the rule or the benefits to consumers from early implementation of the other provisons of the rule. Additionally, the disclosures required on labels, in fact sheets and in other types of advertisements will provide consumers with essential pre-purchase information which will allow them to make cost effective insulation purchases during the period of time when further rulemaking proceedings consider the television advertising disclosure requirements.

III. Conclusion

In accordance with the foregoing, the Commission hereby stays Section 460.6 of the rule, which requires that R-values be determined by representative thickness testing, until such time as thick calibration materials for such testing are made available by NBS. The Commission also stays Sections 460.10, 460.18, 460.19 and Appendix B of the rule, which specify requirements for insulation advertising, insofar as they apply to television advertisements, pending the initiation and completion of further rulemaking proceedings concerning the affirmative disclosure requirements for television advertisements. All other provisions of 16 CFR Part 460 will take effect on September 29, 1980.

By direction of the Commission.

James A. Tobin,

Acting Secretary.

Part XI

Nuclear Regulatory Commission

Functional Criteria for Emergency Response Facilities; Request for Comments and Notice of Workshops

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

Functional Criteria for Emergency Response Facilities

AGENCY: Nuclear Regulatory Commission.

ACTION: Request for comments.

SUMMARY: The NRC staff is developing guidance for an acceptable method for providing the emergency response facilities needed to implement the plans for coping with emergencies that are required by § 50.34 and Appendix E of 10 CFR Part 50. Development of this guidance is motivated by the experience from the accident at the Three Mile Island nuclear power plant and the recommendations resulting from the investigations of the accident. The proposed functional criteria of the four elements of the emergency response facilities, the Safety Parameter Display (SPDS), the Technical Support Center (TSC), the Emergency Operations Facility (EOF), and the Nuclear Data Link (NDL) are contained in the document NUREG–0696, "Functional Criteria for Emergency Response Facilities." The staff is now soliciting public comment on these functional criteria and the schedule for implementation discussed below.

DATES: Comment period expires: September 29, 1980.

ADDRESSES: Written comments or suggestions should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch. Copies of comments received may be examined at the Commission's Public Document Room at 1717 H Street, NW, Washington, D.C. A copy of the functional criteria (NUREG–0696, "Functional Criteria for Emergency Response Facilities") is also available for inspection at the same address. Requests for single copies at no cost should be made in writing to the Division of Technical Information and Document Control, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (Phone 301–492–9530).

FOR FURTHER INFORMATION CONTACT: Mr. Warren Minners, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (Phone 301–492–7581).

SUPPLEMENTARY INFORMATION: The investigations of the accident at the Three Mile Island Unit 2 nuclear power plant identified the need for extensive improvements in emergency preparedness at nuclear power plants. Areas identified as deficient and in need of improvement included the organization of personnel to control, manage, assess, support and coordinate activities both on and off the site during emergency situations; the facilities for these personnel; the availability of information needed to assess and manage the reactor, other sources of radioactivity and the actual and potential radiological consequences; and the provisions for disseminating accurate and timely information, warnings and instructions to local and state agencies, the affected population and the public in general. An acceptable method of providing emergency response facilities is proposed in NUREG–0696, "Functional Criteria for Emergency Response Facilities." These proposed facilities include a Technical Support Center (TSC) and an Emergency Operations Facility (EOF) which are dedicated areas for the management, assessment, support and coordination of accident situations. Also included with these facilities is a Safety Parameter Display which monitors the safety status of the plant and the Nuclear Data Link which transmits critical plant variables to the NRC headquarters.

Background

The current requirements for emergency preparedness are contained in Appendix E to 10 CFR Part 50, "Emergency Plans for Production and Utilization Facilities," which was published in December 1970 and amended in January 1973. In conjunction with this rule, the Commission developed a document entitled "Guide to the Preparation of Emergency Plans for Production and Utilization Facilities," to help applicants establish adequate emergency plans. More complete guidance for an acceptable method for complying with this regulation, including general guidance for emergency facilities, is contained in Revision 1 of Regulatory Guide 1.101 "Emergency Planning for Nuclear Power Plants," published in March 1977.

As part of the responsibilities of the NRC and FEMA under the Atomic Energy Act, as amended, and the President's statement of December 7, 1979, the staffs of the two agencies have jointly prepared NUREG–0654 (FEMA–REP–1) "Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants" which was published in January 1980 for interim use and comment. The purpose of NUREG–0654 is to provide a common reference and interim guidance for state and local governments, nuclear facility operators, the NRC, FEMA, and other federal agencies in the development and review of state and local government and licensee emergency plans and preparedness, including emergency support facilities. The NRC also published (44 FR 75167) a proposed revision to its emergency planning regulations including Appendix E to 10 CFR Part 50. The proposed revision to the regulations includes a specific requirement for emergency support facilities. On June 16, 1980, the Commission issued a Statement of Policy (45 FR 41738) as further guidance to Boards and the staff that current operating license applications should be measured against the regulations as augmented by the requirements, including requirements for emergency support facilities, listed in NUREG–0694 "TMI-Related Requirements for New Operating Licensees."

Bases for the Functional Criteria

These proposed emergency facilites are needed because effective emergency response requires the establishment of dedicated areas for the management, assessment, support and coordination of potential or actual accident situations. To reduce congestion and confusion, the use of the control room should be limited to direct control of the plant. However, a nearby area designated as the Technical Support Center (TSC) is proposed to accommodate the technical personnel who support control room functions, evaluate and diagnose plant conditions and manage and coordinate other emergency response functions related to the plant. A second area, designated as the Emergency Operations Facility (EOF) is proposed to provide a planned, organized control focal-point for the coordination of onsite and offsite activities. The EOF is to be located offsite and equipped to function as the center for the licensee's management, control and assessment of all activities related to an emergency having potential or actual environment consequences. A primary function of the EOF would be the analysis of plant effluent, meteorological conditions, offsite radiation releases and offsite dose projections.

In addition to these facilities, two associated functions are proposed. The first is directed to the ability of the reactor operators to readily monitor the safety status of the plant. The investigators of the TMI accident criticized the design of nuclear power plant control rooms and questioned the ability of operators to quickly and correctly interpret the multitude of alarms, indicators, and other information that are currently installed in control rooms. As an aid to the operators in monitoring the status of the plant during normal operation transients and accident a Safety Parameter Display System (SPDS) is proposed which would provide a continuous concise display of critical plant variables. This display would be provided in the TSC and the EOF.

The second associated function is that of the NRC in accident situations. In addition to sending personnel to the site if an incident occurs, information is required by the NRC headquarters staff to monitor the licensee's actions, provide advice and be prepared, in extreme circumstances, to direct that some actions be taken. In order to accomplish this function, information concerning the status of the plant, radiation releases and meteorology would be required to be transmitted to the NRC. A proposed method of providing this information is through an acquisition, transmission, and display system designated as the Nuclear Data Link. The NDL would condition, process, and transmit a limited set of critical data from each plant for display at the NRC Operations Center in Bethesda, Maryland.

All of these elements of the emergency support facilities (the SPDS, TSC, EOF, and NDL) are interrelated and should be designed as an integrated system. The separate elements have some common and overlapping functions and all require information and data on the past or current status of the core, the plant, and the actual or potential release of radioactivity. The means of acquiring, processing, transmitting, and displaying this information and data is a major portion of the functional criteria that affects the design and integration of the individual elements. Therefore, the functional criteria for all elements have been provided in one document.

The staff also proposed the following implementation schedule. All licensees and applicants would submit to the NRC, by January 1, 1981, or prior to issuance of an operating license, whichever is later, a description of the design of the emergency response facilities; a schedule for the design, installation and construction of the facilities and proposed Technical Specifications for the Limiting Condition of Operation and Surveillance of these facilities. These emergency response facilities would be operational, but not necessarily meet the design criteria for associated instrumentation, by April 1, 1982, or prior to issuance of an operating license, whichever is later. The design criteria for associated instrumentation is specified in the proposed Revision 2 to Regulatory Guide 1.97, "Instrumentation for Light-Water-Cooled Nuclear Power Plants to Assess Plant and Environs Conditions During and Following an Accident." The emergency response facilities would meet the design criteria of Revision 2 to Regulatory Guide 1.97 as specified for the guide. The currently proposed implementation schedule for Revision 2 to Regulatory Guide 1.97 is that it will be applied to all plants issued operating licenses after June 1982 and to all other plants by June 1, 1983.

Dated at Bethesda, Md., this 11th day of August 1980.

For the Nuclear Regulatory Commission.

William J. Dircks,

Acting Executive Director for Operations.

Functional Criteria for Emergency Response Facilities; Workshops

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of workshops for review of proposed functional criteria for emergency response facilities.

SUMMARY: The NRC staff is developing guidance for an acceptable method for providing the emergency response facilities needed to implement the plans for coping with emergencies that are required by paragraph 50.34 and Appendix E of 10 CFR Part 50. The proposed functional criteria of the four elements of the emergency response facilities, the Safety Parameter Display (SPDS), the Technical Support Center (TSC), the Emergency Operations Facility (EOF), and the Nuclear Data Link (NDL) are contained in the document NUREG–0696, "Functional Criteria for Emergency Response Facilities." The staff is now soliciting public comment on these functional criteria and the schedule for their implementation and will hold three workshops to present, explain, and discuss the proposed criteria (For the solicitation of public comment, see another notice document published elsewhere in this issue).

DATES: August 19—Valley Forge, Pennsylvania. August 20—Chicago, Illinois. August 22—Atlanta, Georgia.

ADDRESSES: The workshops will be held from 8:30 a.m. to 5:00 p.m. at the following locations:

August 19—The Sheraton-Valley Forge, Valley Forge, Pennsylvania.
August 20—O'Hare Hilton, O'Hare Airport, Chicago, Illinois.
August 22—The Stadium Hotel, 450 Capitol Ave., SE., Atlanta, Georgia.

FOR FURTHER INFORMATION CONTACT: Mr. Warren Minners, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (Phone: 301/492–7581).

SUPPLEMENTARY INFORMATION: Agenda for Emergency Response Facility Workshop.

Introduction

Purpose and scope of the meeting
Background and basis for proposed criteria

Presentation of Proposed Emergency Response Facilities

Safety Parameter Display
Technical Support Center
Nuclear Data Link

Discussion, Questions and Comments

Location and habitability of the TSC and EOF
Reliability, surveillance and limiting conditions of operation
Separation and independence of data acquisition system Role of the NDL
Individual statements or comments by participants and public
Concluding Statement by NRC

Dated at Bethesda, Maryland this 6th day of August 1980.

Roger J. Mattson,

Director, Division of Safety Technology, U.S. Nuclear Regulatory Commission.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/FHWA	USDA/FSQS		DOT/FHWA	USDA/FSQS
DOT/FRA	USDA/REA		DOT/FRA	USDA/REA
DOT/NHTSA	MSPB/OPM		DOT/NHTSA	MSPB/OPM
DOT/RSPA	LABOR		DOT/RSPA	LABOR
DOT/SLSDC	HHS/FDA		DOT/SLSDC	HHS/FDA
DOT/UMTA			DOT/UMTA	
CSA			CSA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

Rules Going Into Effect Today

ENERGY DEPARTMENT

Economic Regulatory Administration—

47671 7–16–80 / Mandatory petroleum allocation level for mail hauling; assignments and adjustments to firms

FEDERAL COMMUNICATIONS COMMISSION

46409 7–10–80 / Stations on land in the maritime services and Alaska—public fixed stations and stations on shipboard in the maritime services; amending the Commission's rules to implement the provisions of Chapter 4 of the 1974 safety convention pertaining to radio equipment required on compulsorily fitted vessels

Rules Going Into Effect Saturday, August 16, 1980

INTERIOR DEPARTMENT

Fish and Wildlife Service—

47352 7–14–80 / Endangered and threatened wildlife and plants; endangered status for the black rhinoceros

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last Listing August 14, 1980

8–18–80
Vol. 45 No. 161
Pages 54711–55136

federal register

Monday
August 18, 1980

Highlights

55086 **Grant Requirements** OMB releases uniform requirements for grants to State and local governments; effective immediately (Part V of this issue)

54791 **Grant Programs—Energy** CSA contemplates funding 25 two-year grants for activities related to low-income and elderly energy consumer advocacy; proposals by 9–29–80

54867 **Grant Program—Health** HHS/HDSO announces availability of grant funds for Special Project Grant Programs, Projects of National Significance in Developmental Disabilities; apply by 9–5–80

55010 **Federal Buildings and Facilities** ATBCB proposes minimum standards for accessibility and usability of Federal and federally funded buildings by physically handicapped persons; comments by 10–17–80 (Part III of this issue)

54784 **Electronic Games** FCC amends computing device rules by clarifying which electronic games are exempt from certification

54778 **Broadcasting** FCC proposes inquiry relating to Radio Operator Licensing Program; comments by 11–14–80

CONTINUED INSIDE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Highlights

54741 **Natural Gas** DOE/FERC publishes order denying rehearing and revoking amendments made by Order No. 80, a rule to expand the scope of incremental pricing; effective 8–1–80

54733 **Natural Gas** DOE/FERC releases final regulations governing determination of alternative fuels for essential agricultural users; effective 8–11–80

55126 **Continental Shelf** Interior/GS revises certain requirements of Outer Continental Shelf Order Nos. 1, 2, 5, and 7 for the Gulf of Mexico, Pacific, Gulf of Alaska and the Atlantic; effective 9–15–80 (Part VIII of this issue)

54873 **Oil Shale Leasing Program** Interior/BLM calls for nominations of technologies; comments by 10–14–80

54938 **Chemicals** EPA request comments by 10–2–80 on presumption that N-trichloromethylthio-4-cyclohexene-1,2-dicarboximide (captan) exceeds certain risk criteria (Part II of this issue)

55066, 55083 **Air Pollution Control** EPA proposes to revise criteria upon which existing primary and secondary carbon monoxide standards are based; comments by 11–10–80; hearings on 10–2 and 10–10–80 (2 documents) (Part IV of this issue)

54773 **Air Pollution Control** EPA proposes to approve revisions to District of Columbia State Implementation Plan; comments by 9–17–80

54875 **Mount St. Helens' Eruptions** Interior/WPRS issues notice of possible deferment of construction payments

54757 **Medicare** HHS/HCFA clarifies definition and reimbursement of hospital intensive care type units; effective for provider cost reporting periods after 10–1–80

55134 **Gasoline** EPA publishes final rule on controls applicable to gasoline refiners by amending lead phase-down regulations; revocation of unleaded gasoline production requirement is effective on 8–6–80 (Part IX of this issue)

54935 **Sunsine Act Meetings**

Separate Parts of this Issue

Rules and Regulations

Federal Register
Vol. 45, No. 161
Monday, August 18, 1980

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Parts 401, 437

Canning and Freezing Sweet Corn Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: This rule prescribes procedures for insuring canning and freezing sweet corn effective with the 1981 crop year. This final rule combines provisions from previous regulations for insuring sweet corn in a shorter, clearer, simpler document which will make the program more effective administratively. This rule is promulgated under the authority of the Federal Crop Insurance Act, as amended.

EFFECTIVE DATE: August 18, 1980.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C., 20250, telephone 202–447–3325.

The Final Impact Statement describing the options considered in developing this final rule and the impact of implementing each option is available from the above-named individual.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Secretary's Memorandum No. 1955 (August 25, 1978), to implement Executive Order No. 12044 (March 23, 1978), and has been classified as "not significant."

The Federal Crop Insurance Corporation (FCIC) published a notice of proposed rulemaking in the **Federal Register** on Thursday, May 1, 1980 (45 FR 29056–29057), prescribing procedures for insuring canning and freezing sweet corn crops effective with the 1981 crop year. In the notice, FCIC, under the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), proposed that a new part 437 of Chapter IV in Title 7 of the Code of Federal Regulations be established to prescribe procedures for insuring sweet corn crops effective with the 1981 crop year to be known as 7 CFR Part 437 Canning and Freezing Sweet Corn Insurance.

All previous regulations applicable to insuring sweet corn crops, as found in 7 CFR 401.101–401.111, and 401.156 (as found at 43 FR 14638), will not be applicable to 1981 and succeeding canning and freezing sweet corn crops but will remain in effect for FCIC canning and freezing sweet corn insurance policies issued prior to 1981. It has been determined that combining all previous regulations for insuring canning and freezing sweet corn crops into one shortened, simplified, and clearer regulation would be more effective administratively.

In addition, 7 CFR Part 437 provides (1) for a premium adjustment table which provides up to 50 percent premium discount for good insuring experience and premium increases for unfavorable insuring experience, which replaces the present premium discount system, (2) that any premium not paid by the termination date will be increased by a 9 percent charge, with a 9 percent simple interest applying to any balance at the end of each subsequent 12-month period thereafter, (3) that the 15-day period for submitting a notice of damage or loss be changed to 30 days, and the 60-day period for filing a claim be eliminated, (4) that there be three coverage level options in each county, with the imposed level being provided on the actuarial table and the conversion level being the one closest to the present level for the county, and (5) that the termination date for indebtedness is March 31.

In addition, § 437.5 of the Canning and Freezing Sweet Corn Crop Insurance Regulations titled "Good Faith Reliance on Misrepresentation" increases the limitation from $5,000 to $20,000 in those cases involving good faith reliance on misrepresentation wherein the Manager of the Corporation (FCIC) is authorized to take action to grant relief.

The Canning and Freezing Sweet Corn Insurance Regulations provide a December 31 cancellation date for all canning and freezing sweet corn producing counties. These regulations, and any amendments thereto, must be placed on file in the Corporation's office for the county in which the insurance is available not later than 15 days prior to the cancellation date in order to afford farmers an opportunity to examine them before the cancellation date.

Under the provisions of Executive Order No. 12044, and the Administrative Procedure Act (5 U.S.C. 553 (b) and (c)), the public was given an opportunity to submit written comments, data, and views on the proposed regulations, but none were received. Therefore, with the exception of minor and nonsubstantive corrections to language, the regulations as contained in the proposed rule are hereby issued as a final rule to be in effect starting with the 1981 crop year.

In addition, there is hereby added to the final rule an Appendix "B" which lists the counties where canning and freezing sweet corn crop insurance is available in accordance with the provisions of 7 CFR 437.1, which states in part that before insurance is offered in any county there shall be published by appendix to this part the names of the counties where such insurance shall be offered.

In compliance with the Secretary's Memorandum No. 1955, the review of these regulations contained in 17 CFR 437.1 for need, currency, clarity, and effectiveness must be completed prior to the sunset date of June 1, 1985.

Final Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby deletes and reserves 7 CFR 401.156, with such regulations as are contained therein remaining in effect for FCIC sweet corn policies issued for crop years prior to 1981, and issues a new Part 437 in Chapter IV of Title 7 of the Code of Federal Regulations (7 CFR Part 437) to be known as the Canning and Freezing Sweet Corn Crop Insurance Regulations for the 1981 and Succeeding Crop Years, to read as follows:

PART 437—SWEET CORN CROP INSURANCE

Subpart—Regulations for the 1981 and Succeeding Crop Years

Sec.

437.1 Availability of Sweet Corn Insurance.
437.2 Premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed.
437.3 Public notice of indemnities paid.
437.4 Creditors.
437.5 Good faith reliance on misrepresentation.
437.6 The contract.
437.7 The application and policy.

Authority: Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended (7 U.S.C. 1506, 1516).

§ 437.1 Availability of Sweet Corn Insurance.

Insurance shall be offered under the provisions of this subpart on sweet corn in counties within limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act, as amended. The counties shall be designated by the Manager of the Corporation from those approved by the Board of Directors of the Corporation. Before insurance is offered in any county, there shall be published by appendix to this part the names of the counties in which sweet corn insurance will be offered.

§ 437.2 Premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed.

(a) The Manager shall establish premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed for sweet corn which shall be shown on the county actuarial table on file in the office for the county and may be changed from year to year.

(b) At the time the application for insurance is made, the applicant shall elect a coverage level and price at which indemnities shall be computed from among those levels and prices shown on the actuarial table for the crop year.

§ 437.3 Public notice of indemnities paid.

The Corporation shall provide for posting annually in each county at each county courthouse a listing of the indemnities paid in the county.

§ 437.4 Creditors.

An interest of a person in an insured crop existing by virtue of a lien, mortgage, garnishment, levy, execution, bankrupty, or an involuntary transfer shall not entitle the holder of the interest to any benefit under the contract except as provided in the policy.

§ 437.5 Good faith reliance on misrepresentation.

Notwithstanding any other provision of the sweet corn insurance contract, whenever (a) an insured person under a contract of crop insurance entered into under these regulations, as a result of a misrepresentation or other erroneous action or advice by an agent or employee of the Corporation, (1) is indebted to the Corporation for additional premiums, or (2) has suffered a loss to a crop which is not insured or for which the insured person is not entitled to an indemnity because of failure to comply with the terms of the insurance contract, but which the insured person believed to be insured, or believed the terms of the insurance contract to have been complied with or waived, and (b) the Board of Directors of the Corporation, or the Manager in cases involving not more than $20,000, finds (1) that an agent or employee of the corporation did in fact make such misrepresentation or take other erroneous action or give erroneous advice, (2) that said insured person relied thereon in good faith, and (3) that to require the payment of the additional premiums or to deny such insured's entitlement to the indemnity would not be fair and equitable, such insured person shall be granted relief the same as if otherwise entitled thereto.

§ 437.6 The contract.

The insurance contract shall become effective upon the acceptance by the Corporation of duly executed applications for insurance on a form prescribed by the Corporation. Such acceptance shall be effective upon the date the notice of acceptance is mailed to the applicant. The contract shall cover the sweet corn crop as provided in the policy. The contract shall consist of the application, the policy, the attached appendix, and the provisions of the county actuarial table. Any changes made in the contract shall not affect its continuity from year to year. Copies of forms referred to in the contract are available at the office for the county.

§ 437.7 The application and policy.

(a) Application for insurance on a form prescribed by the Corporation may be made by any person to cover such person's insurable share in the sweet corn crop as landlord, owner-operator, or tenant. The application shall be submitted to the Corporation at the office for the county on or before the applicable closing date on file in the office for the county.

(b) The Corporation reserves the right to discontinue the acceptance of applications in any county upon its determination that the insurance risk involved is excessive, and also, for the same reason, to reject any individual application. The Manager of the Corporation is authorized in any crop year to extend the closing date for submitting applications or contract changes in any county, by placing the extended date on file in the office for the county and publishing a notice in the **Federal Register** upon the Manager's determination that no adverse selectivity will result during the period of such extension: *Provided, however,* That if adverse conditions should develop during such period, the Corporation will immediately discontinue the acceptance of applications.

(c) In accordance with the provisions governing changes in the contract contained in policies issued under FCIC regulations for the 1978 and succeeding crop years, a contract in the form provided for under this subpart will come into effect as a continuation of a canning and freezing sweet corn contract issued under such prior regulations, without the filing of a new application.

(d) The provisions of the application and Sweet Corn Insurance Policy for the 1981 and succeeding crop years, and the Appendix to the Sweet Corn Insurance Policy are as follows:

U.S. Department of Agriculture

Federal Crop Insurance Corporation

Application for 19—— and Succeeding Crop Years

Sweet Corn Crop Insurance Contract

Contract Number———
Identification Number ———
Name and Address———
Zip Code ———
County ———
State ———
Type of Entity ———
Applicant is over 18 Yes—— No——

A. The applicant, subject to the provisions of the regulations of the Federal Crop Insurance Corporation (herein called "Corporation"), hereby applies to the Corporation for insurance on the applicant's share in the sweet corn planted on insurable acreage as shown on the county actuarial table for the above-stated county. The applicant elects from the actuarial table the coverage level and price at which indemnities shall be computed. THE PREMIUM RATES AND PRODUCTION GUARANTEES SHALL BE THOSE SHOWN ON THE APPLICABLE COUNTY ACTUARIAL TABLE FILED IN THE OFFICE FOR THE COUNTY FOR EACH CROP YEAR.
Level Election——— Price Election———

Example: For the 19—— Crop Year Only (100% Share)

Location farm No.	Guarantee per acre*	Premium per acre**	Practice

*Your guarantee will be on a unit basis (acres x per acre guarantee x share)
**Your premium is subject to adjustment in accordance with section 5(c) of the policy

B. WHEN NOTICE OF ACCEPTANCE OF THIS APPLICATION IS MAILED TO THE APPLICANT BY THE CORPORATION, the contract shall be in effect for the crop year specified above, unless the time for submitting applications has passed at the time this application is filed, AND SHALL CONTINUE FOR EACH SUCCEEDING CROP YEAR UNITL CANCELED OR TERMINATED as provided in the contract. This accepted application, the following sweet corn insurance policy, the attached appendix, and the provisions of the county actuarial table showing the production guarantees, coverage levels, premium rates, prices for computing indemnities, and insurable and uninsurable acreage shall constitute the contract. Additional information regarding contract provisions can be found in the county regulations folder on file in the office for the county. No term or condition of the contract shall be waived or changed except in writing by the Corporation.

Sweet Corn Insurance Policy

Terms and Conditions

Subject to the provisions in the attached appendix:

1. CAUSES OF LOSS. (a) Causes of loss insured against. The insurance provided is against unavoidable loss of production resulting from adverse weather conditions, insects, plant disease, wildlife, earthquake or fire occurring within the insurance period, subject to any exceptions, exclusions or limitations with respect to causes of loss shown on the actuarial table.

(b) Causes of loss not insured against. The contract shall not cover any loss of production, as determined by the Corporation, due to (1) the neglect or malfeasance of the insured, any member of the insured's household, the insured's tenants or employees, (2) failure to follow recognized good farming practices, (3) damage resulting from the backing up of water by any governmental or public utilities dam or reservoir project, or (4) any cause not specified as an insured cause in this policy as limited by the actuarial table.

(c) In addition to the causes of loss not insured against listed in section 1(b) above, the Corporation shall consider as uninsured any loss of production resulting solely from acreage not being timely harvested, unless the Corporation determines that, due to unusual weather conditions, a substantial percentage of contracted acreage in the area was ready for harvest at the same time. The uninsured loss of production resulting from failure to timely harvest will be appraised and counted as production by the Corporation as tons of sweet corn which were available for timely harvesting.

2. CROP AND ACREAGE INSURED. (a) The crop insured shall be canning and freezing sweet corn which is grown on insured acreage and for which the actuarial table shows a guarantee and premium rate per acre, and which is grown under a contract executed with a processor by the date established by the Corporation for reporting acreage: *Provided,* That an instrument in the form of a "lease" under which the insured grower retains possession of the land on which the sweet corn is grown and which provides for delivery of the sweet corn under certain conditions and at a stipulated price(s) shall, for the purpose of this contract, be treated as a processor contract under which the insured has the interest in the crop.

(b) The acreage insured for each crop year shall be that acreage planted to sweet corn on insurable acreage as shown on the actuarial table, and the insured's share therein as reported by the insured or as determined by the Corporation, whichever the Corporation shall elect: *Provided,* That insurance shall not attach or be considered to have attached, as determined by the Corporation, to any acreage (1) where premium rates are established by farming practices on the actuarial table, and the farming practices carried out on any acreage are not among those for which a premium rate has been established, (2) not reported for insurance as provided in section 3 if such acreage is irrigated and an irrigated practice is not provided for such acreage on the actuarial table, (3) which is destroyed and after such destruction it was practical to replant to sweet corn and such acreage was not replanted, (4) initially planted after the date on file in the office for the county which has been established by the Corporation as being too late to initially plant and expect a normal crop to be produced, (5) of volunteer sweet corn, (6) planted to a type or variety of sweet corn not established as adapted to the area or shown as noninsurable on the actuarial table, (7) planted with another crop, or (8) planted for the development or production of hybrid seed or for experimental purposes.

3. RESPONSIBILITY OF INSURED TO REPORT ACREAGE AND SHARE. The insured shall submit to the Corporation on a form prescribed by the Corporation, a report showing (a) all acreage of sweet corn planted in the county (including a designation of any acreage to which insurance does not attach) in which the insured has a share and (b) the insured's share therein at the time of planting. Such report shall be submitted each year not later than the acreage reporting date on file in the office for the county.

4. PRODUCTION GUARANTEES, COVERAGE LEVELS, AND PRICES FOR COMPUTING INDEMNITIES. (a) For each crop year of the contract, the production guarantees, coverage levels, and prices at which indemnities shall be computed shall be those shown on the actuarial table.

(b) The production guarantee per acre (ears and husks) shall be in tons as shown on the county actuarial table and the guarantee for any unharvested acreage shall be reduced 20 percent.

5. ANNUAL PREMIUM. (a) The annual premium is earned and payable at the time of planting and the amount thereof shall be determined by multiplying the insured acreage times the applicable premium per acre, times the insured's share at the time of planting, times the applicable premium adjustment percentage in subsection (c) of this section.

(b) For premium adjustment purposes, only the years during which premiums were earned shall be considered.

(c) The premium shall be adjusted as shown in the following table:

BILLING CODE 3410-08-M

(d) Any amount of premium for an insured
The Corporation reserves the right to provide
acreage for which consent has been given to

1/ Loss Ratio means the ratio of indemnity(ies) paid to premium(s) earned.

2/ Only the most recent 15 crop years will be used to determine the number of "Loss Years". (A crop year is determined to be a "Loss Year" when the amount of indemnity for the year exceeds the premium for the year.)

BILLING CODE 3410-08-C

(d) Any amount of premium for an insured crop which is unpaid on the day following the termination date for indebtedness for such crop shall be increased by a 9 percent service fee, which increased amount shall be the premium balance, and thereafter, at the end of each 12-month period, 9 percent simple interest shall attach to any amount of the premium balance which is unpaid: *Provided,* When notice of loss has been timely filed by the insured as provided in section 7 of this policy, the service fee will not be charged and the contract will remain in force if the premium is paid in full within 30 days after the date of approval or denial of the claim for indemnity: *however,* if any premium remains unpaid after such date, the contract will terminate and the amount of premium outstanding shall be increased by a 9 percent service fee, which increased amount shall be the premium balance. If such premium balance is not paid within 12 months immediately following the termination date, 9 percent simple interest shall apply from the termination date and each year thereafter to any unpaid premium balance.

(e) Any unpaid amount due the Corporation may be deducted from any indemnity payable to the insured by the Corporation or from any loan or payment to the insured under any Act of Congress or program administered by the U.S. Department of Agriculture, when not prohibited by law.

6. INSURANCE PERIOD. Insurance on insured acreage shall attach at the time the sweet corn is planted and shall cease upon the earliest of (a) final adjustment of a loss, (b) harvest, (c) September 20, or (d) total destruction of the insured sweet corn crop: *Provided, however,* That if any acreage is not timely harvested, insurance shall be deemed to have ceased when the acreage should have been harvested, as determined by the Corporation, *unless* the Corporation determines that, due to unusual weather conditions, a substantial percentage of contracted acreage in the area was ready for harvest at the same time.

7. NOTICE OF DAMAGE OR LOSS. (a) Any notice of damage or loss shall be given promptly in writing by the insured to the Corporation at the office for the county.

(b) Notice shall be given promptly if, during the period before harvest, the sweet corn on any unit is damaged to the extent that the insured does not expect to further care for the crop or harvest any part of it, or if the insured wants the consent of the Corporation to put the acreage to another use. No insured acreage shall be put to another use until the Corporation has made an appraisal of the potential production of such acreage and consents in writing to such other use. Such consent shall not be given until it is too late or impractical to replant to sweet corn. Notice shall also be given when such acreage has been put to another use.

(c) In addition to the notices required in subsection (b) of this section, if an indemnity is to be claimed on any unit, the insured shall give written notice thereof to the Corporation at the office for the county not later than *30 DAYS* after the earliest of (1) the date harvest is completed on the unit, (2) the calendar date for the end of the insurance period, or (3) the date the entire sweet corn crop on the unit is destroyed, as determined by the Corporation. The Corporation reserves the right to provide additional time if it determines there are extenuating circumstances.

(d) In addition to the notices of loss required in section 7, written notice shall be given the Corporation at the office for the county (1) no later than 48 hours after harvesting of the sweet corn has been discontinued on a unit, or (2) before harvest would normally start if any acreage on a unit is not to be harvested. If such notice is not given, the Corporation shall appraise the tons of unharvested production, and if there is insufficient evidence upon which to base an appraisal, the appraisal on such acreage shall be the production guarantee.

(e) Any insured acreage which is not to be harvested and upon which an indemnity is to be claimed shall be left intact until inspected by the Corporation.

(f) The Corporation may reject any claim for indemnity if any of the requirements of this section are not met.

8. CLAIM FOR INDEMNITY. (a) It shall be a condition precedent to the payment of any indemnity that the insured (1) establish the total production of sweet corn on the unit and that any loss of production was directly caused by one or more of the insured causes during the insurance period for the crop year for which the indemnity is claimed and (2) furnish any other information regarding the manner and extent of loss as may be required by the Corporation.

(b) Indemnities shall be determined separately for each unit. The amount of indemnity for any unit shall be determined by (1) multiplying the insured acreage of sweet corn on the unit by the applicable production guarantee per acre, which product shall be the production guarantee for the unit, (2) subtracting therefrom the total production of sweet corn to be counted for the unit, (3) multiplying the remainder by the applicable price for computing indemnities, and (4) multiplying the result obtained in step (3) by the insured share: *Provided,* That if the premium computed on the insured acreage and share is more than the premium computed on the reported acreage and share, the amount of indemnity shall be computed on the insured acreage and share and then reduced proportionately.

(c) The total production to be counted for a unit shall be determined by the Corporation and shall include all harvested and appraised production. Appraised production to be counted shall include: (1) the greater of the appraised production or 50 percent of the applicable guarantee for any acreage which, with the consent of the Corporation, is planted before harvest of sweet corn becomes general in the current crop year to any other crop insurable on such acreage (excluding small grains normally maturing for harvest in the following calendar year), (2) any appraisals by the Corporation for potential production on harvested acreage and for uninsured causes and poor farming practices, (3) not less than the applicable guarantee for any acreage which is abandoned or put to another use without prior written consent of the Corporation or damaged solely by an uninsured cause, and (4) only the appraisal in excess of 20 percent of the production guarantee for all other unharvested acreage.

(d) The appraised potential production for acreage for which consent has been given to be put to another use shall be counted as production in determining the amount of loss under the contract. *However,* if consent is given to put acreage to another use and the Corporation determines that any such acreage (1) is not put to another use before harvest of sweet corn becomes general in the county, (2) is harvested, or (3) is further damaged by an insured cause before the acreage is put to another use, the indemnity for the unit shall be determined without regard to such appraisal and consent.

9. MISREPRESENTATION AND FRAUD. The Corporation may void the contract without affecting the insured's liability for premiums or waiving any right, including the right to collect any unpaid premiums if, at any time, the insured has concealed or misrepresented any material fact or committed any fraud relating to the contract, and such voidance shall be effective as of the beginning of the crop year with respect to which such act or omission occurred.

10. TRANSFER OF INSURED SHARE. If the insured transfers any part of the insured share during the crop year, protection will continue to be provided according to the provisions of the contract to the transferee for such crop year on the transferred share, and the transferee shall have the same rights and responsibilities under the contract as the original insured for the current crop year. Any transfer shall be made on an approved form.

11. RECORDS AND ACCESS TO FARM. The insured shall keep or cause to be kept for two years after the time of loss, records of the harvesting, storage, shipments, sale or other disposition of all sweet corn produced on each unit including separate records showing the same information for production from any uninsured acreage. Any persons designated by the Corporation shall have access to such records and the farm for purposes related to the contract.

12. LIFE ON CONTRACT: CANCELLATION AND TERMINATION. (a) The contract shall be in effect for the crop year specified on the application and may not be canceled for such crop year. Thereafter, either party may cancel the insurance for any crop year by giving a signed notice to the other on or before the cancellation date preceding such crop year.

(b) Except as provided in section 5(d) of this policy, the contract will terminate as to any crop year if any amount due the Corporation under this contract is not paid on or before the termination date for indebtedness preceding such crop year: *Provided,* That the date of payment for premium (1) if deducted from an indemnity claim shall be the date the insured signs such claim or (2) if deducted from payment under another program administered by the U.S. Department of Agriculture shall be the date such payment was approved.

(c) Following are the cancellation and termination dates:

State	Cancellation Date	Termination Date for Indebtedness
All States	Dec. 31	Mar. 31

(d) In the absence of a notice from the insured to cancel, and subject to the

provisions of subsections (a), (b), and (c) of

corn crop on such land shall be considered as

provisions of subsections (a), (b), and (c) of this section, and section 7 of the Appendix, the contract shall continue in force for each succeeding crop year.

Appendix—

Additional Terms and Conditions

1. MEANING OF TERMS. For the purposes of sweet corn crop insurance:

(a) "Actual table" means the forms and related material for the crop year approved by the Corporation which are on file for public inspection in the office for the county, and which show the production guarantees, coverage levels, premium rates, prices for computing indemnities, insurable and uninsurable acreage, and related information regarding sweet corn insurance in the county.

(b) "County" means the county shown on the application and any additional land located in a local producing area bordering on the county, as shown on the actuarial table.

(c) "Crop year" means the period within which the sweet corn crop is normally grown and shall be designated by the calendar year in which the sweet corn crop is normally harvested.

(d) "Harvest" means the removal of the ears and husks from the stalks and the delivery thereof to the processor; sweet corn used for any purpose other than for canning and freezing shall be considered as unharvested.

(e) "Insurable acreage" means the land classified as insurable by the Corporation and shown as such on the county acturial table.

(f) "Insured" means the person who submitted the application accepted by the Corporation.

(g) "Office for the county" means the Corporation's office serving the county shown on the application for insurance or such office as may be designated by the Corporation.

(h) "Person" means an individual, partnership, association, corporation, estate, trust, or other business enterprise or legal entity, and wherever applicable, a State, a political subdivision of a State, or any agency thereof.

(i) "Share" means the interest of the insured as landlord, owner-operator, or tenant in the insured sweet corn crop at the time of planting as reported by the insured or as determined by the Corporation, whichever the Corporation shall elect, and no other share shall be deemed to be insured: *Provided,* That for the purpose of determining the amount of indemnity, the insured share shall not exceed the insured's share at the earliest of (1) the date of beginning of harvest on the unit, (2) the calendar date for the end of the insurance period, or (3) the date the entire crop on the unit is destroyed, as determined by the Corporation.

(j) "Tenant" means a person who rents land from another person for a share of the sweet corn crop or proceeds therefrom.

(k) "Unit" means all insurable acreage of sweet corn in the county on the date of planting for the crop year (1) in which the insured has a 100 percent share, or (2) which is owned by one entity and operated by another entity on a share basis. Land rented for cash, a fixed commodity payment, or any consideration other than a share in the sweet corn crop on such land shall be considered as owned by the lessee. Land which would otherwise be one unit may be divided according to applicable guidelines on file in the office for the county or by written agreement between the Corporation and the insured. The Corporation shall determine units as herein defined when adjusting a loss, notwithstanding what is shown on the acreage report, and has the right to consider any acreage and share reported by or for the insured's spouse or child or any member of the insured's household to be the bona fide share of the insured or any other person having the bona fide share.

2. ACREAGE INSURED. (a) The Corporation reserves the right to limit the insured acreage of sweet corn to any acreage limitations established under any Act of Congress, provided the insured is so notified in writing prior to the planting of sweet corn.

(b) If the insured does not submit an acreage report on or before the acreage reporting date on file in the office for the county, the Corporation may elect to determine by units the insured acreage and share or declare the insured acreage on any unit(s) to be "zero". If the insured does not have a share in any insured acreage in the county for any year, the insured shall submit a report so indicating. Any acreage report submitted by the insured may be revised only upon approval of the Corporation.

3. IRRIGATED ACREAGE. (a) Where the actuarial table provides for insurance on an irrigated practice, the insured shall report as irrigated only the acreage for which the insured has adequate facilities and water to carry out a good irrigation practice at the time of planting.

(b) Where irrigated acreage is insurable, any loss of production caused by failure to carry out a good irrigation practice, except failure of the water supply from an unavoidable cause occurring after the beginning of planting, as determined by the Corporation, shall be considered as due to an uninsured cause. The failure or breakdown of irrigation equipment or facilities shall not be considered as a failure of the water supply from an unavoidable cause.

4. ANNUAL PREMIUM. (a) If there is no break in the continuity of participation, any premium adjustment applicable under section 5 of the policy shall be transferred to (1) the contract of the insured's estate or surviving spouse in case of death of the insured, (2) the contract of the person who succeeds the insured if such person had previously participated in the farming operation, or (3) the contract of the same insured who stops farming in one county and starts farming in another county.

(b) If there is a break in the continuity of participation, any reduction in premium earned under section 5 of the policy shall not thereafter apply; *however,* any previous unfavorable insurance experience shall be considered in premium computation following a break in continuity.

5. CLAIM FOR AND PAYMENT OF INDEMNITY. (a) Any claim for indemnity on a unit shall be submitted to the Corporation on a form prescribed by the Corporation.

(b) In determining the total production to be counted for each unit, production from units on which the production has been commingled will be allocated to such units in proportion to the liability on each unit.

(c) There shall be no abandonment to the Corporation of any insured sweet corn acreage.

(d) In the event that any claim for indemnity under the provisions of the contract is denied by the Corporation, an action on such claim may be brought against the Corporation under the provisions of 7 U.S.C. 1508(c): *Provided,* That the same is brought within one year after the date notice of denial of the claim is mailed to and received by the insured.

(e) Any indemnity will be payable within 30 days after a claim for indemnity is approved by the Corporation. *However,* in no event shall the Corporation be liable for interest or damages in connection with any claim for indemnity whether such claim be approved or disapproved by the Corporation.

(f) If the insured is an individual who dies, disappears, or is judicially declared incompetent, or the insured is an entity other than an individual and such entity is dissolved after the sweet corn is planted for any crop year, any indemnity will be paid to the person(s) the Corporation determines to be beneficially entitled thereto.

(g) The Corporation reserves the right to reject any claim for indemnity if any of the requirements of this section or section 8 of the policy are not met and the Corporation determines that the amount of loss cannot be satisfactorily determined.

6. SUBROGATION. The Insured (including any assignee or transferee) assigns to the Corporation all rights of recovery against any person for loss or damage to the extent that payment hereunder is made by the Corporation. The Corporation thereafter shall execute all papers required and take appropriate action as may be necessary to secure such rights.

7. TERMINATION OF THE CONTRACT. (a) The contract shall terminate if no premium is earned for five consecutive years.

(b) If the insured is an individual who dies or is judicially declared incompetent, or the insured entity is other than an individual and such entity is dissolved, the contract shall terminate as of the date of death, judicial declaration, or dissolution; *however,* if such event occurs after insurance attaches for any crop year, the contract shall continue in force through such crop year and terminate at the end thereof. Death of a partner in a partnership shall dissolve the partnership unless the partnership agreement provides otherwise. If two or more persons having a joint interest are insured jointly, death of one of the persons shall dissolve the joint entity.

8. COVERAGE LEVEL AND PRICE ELECTION. (a) If the insured has not elected on the application a coverage level and price at which indemnities shall be computed from among those shown on the actuarial table, the coverage level and price election which shall be applicable under the contract, and which the insured shall be deemed to have elected, shall be as provided on the actuarial table for such purposes.

(b) The insured may, with the consent of the Corporation, change the coverage level and/or price election for any crop year on or before the closing date for submitting applications for that crop year.

9. ASSIGNMENT OF INDEMNITY. Upon approval of a form prescribed by the Corporation, the insured may assign to another party the right to an indemnity for the crop year and such assignee shall have the right to submit the loss notices and forms as required by the contract.

10. CONTRACT CHANGES. The Corporation reserves the right to change any terms and provisions of the contract from year to year. Any changes shall be mailed to the insured or placed on file and made available for public inspection in the office for the county at least 15 days prior to the cancellation date preceding the crop year for which the changes are to become effective, and such mailing or filing shall constitute notice to the insured. Acceptance of any changes will be conclusively presumed in the absence of any notice from the insured to cancel the contract as provided in section 12 of the policy.

Appendix "B"—

Counties Designated for Canning and Freezing Sweet Corn Insurance—7 CFR Part 437

In accordance with the provisions of 7 CFR 437.1, the following counties are designated for canning and freezing sweet corn crop insurance:

Minnesota: Renville

Wisconsin: Dodge, Fond du Lac, Green Lake, Waushara

Note.—The reporting requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942 and OMB Circular A–40.

This action will not have a significant impact specifically on area and community development; therefore, review as required by OMB Circular A–95 is inapplicable.

Approved by the Board of Directors on March 14, 1980.

Peter F. Cole,

Secretary, Federal Crop Insurance Corporation.

Dated: August 7, 1980.

Approved by:

Everett S. Sharp,

Acting Manager.

7 CFR Part 418

[Amdt. No. 2]

Wheat Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation.

ACTION: Interim final rule.

SUMMARY: This interim final rule amends the Wheat Crop Insurance Regulations by updating the list of counties approved by the Board of Directors of the Federal Crop Insurance Corporation for wheat crop insurance effective with the 1981 and succeeding crop years. This rule is promulgated under the authority contained in the Federal Crop Insurance Act, as amended.

EFFECTIVE DATES: This interim final rule is effective August 18, 1980. Comment Date: The Federal Crop Insurance Corporation, however, is soliciting public comment on the action for a period of 60 days following publication. Written comments, data, and opinions on this interim final rule must be submitted not later than October 17, 1980, to be sure of consideration.

ADDRESS: Written comments on this interim final rule should be sent to the Manager, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, telephone 202–447–3325.

Actions of this kind were anticipated under the provisions of 7 CFR 418.1, and were generally considered in the Final Impact Statement (FIS) prepared for that action. However, for actions related to the action covered by the original FIS, but which were not specifically covered in the analysis, an addendum has been added to cover the new issue.

Thus, the amended FIS describing the options considered in developing this interim final rule and the impact of implementing each option is available from the above-named individual.

SUPPLEMENTARY INFORMATION: This interim final rule has been reviewed under USDA procedures established in Secretary's Memorandum No. 1955 (August 25, 1978), to implement Executive Order No. 12044 (March 23, 1978), and has been classified as "not significant".

Everett S. Sharp, the Acting Manager, has determined that an emergency situation exists which warrants publication without opportunity for a public comment period on this interim final action because there is not sufficient time to conduct a public comment period before this amendment is required to be placed on file in the office for the county in order to be effective for the 1981 crop year.

Further, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this interim final action are impracticable and contrary to the public interest; and good cause is found for making this action effective less than 30 days after publication of this document in the **Federal Register.** Comments have been solicited for 60 days after publication of this document,

and this interim action will be scheduled for review so that a final document discussing comments received and any amendments required can be published in the Federal Register as soon as possible.

On Friday, June 1, 1979, the Federal Crop Insurance Corporation (FCIC) published the Wheat Crop Insurance Regulations (7 CFR Part 418) in the Federal Register at 44 FR 31599–31610.

In accordance with the provisions of 7 CFR 418.1 of such regulations, FCIC published by Amendment No. 1 to such regulations a listing of counties where wheat crop insurance is otherwise authorized to be offered (44 FR 72090, December 13, 1979) effective for the 1980 crop year as an Appendix "B" to these regulations.

Additional counties have been approved by the Board of Directors effective for the 1981 crop year, necessitating revision and reissuance of Appendix "B".

The Federal Crop Insurance Corporation hereby solicits public comments on this interim final rule for a period of 60 days.

All written submissions made pursuant to this notice will be available for public inspection in the Office of the Manager during regular business hours, 8:15 a.m. to 4:45 p.m., Monday through Friday.

The review date for this action has been established as October 22, 1980.

Final Rule

PART 418—WHEAT CROP INSURANCE

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby revises and reissues the Appendix "B" to 7 CFR Part 418 Wheat Crop Insurance Regulations effective with the 1981 and succeeding crop years, which supersedes Amendment No. 1 (44 FR 72090), to read as follows:

Appendix B

Counties Designated for Wheat Crop Insurance—7 CFR 418

In accordance with the provisions of 7 CFR 418.1, the following counties are designated for wheat crop insurance:

Alabama

Autauga, Lawrence, Marengo, Monroe, Mobile

Arizona

Cochise, Graham, Maricopa, Pinal, Yuma

Arkansas

Chicot, Clay, Craighead, Crittenden, Cross, Desha, Drew, Greene, Independence, Miller, Mississippi, Poinsett, Pulaski, St. Francis

California

Butte, Colusa, Fresno, Imperial, Glenn, Kern, Kings, Madera, Merced, Modoc, Sacramento, San Joaquin, Solano, Stanislaus, Sutter, Tulare, Yolo

Colorado

Adams, Arapahoe, Baca, Cheyenne, Elbert, Kit Carson, Larimer, Lincoln, Logan, Morgan, Phillips, Prowers, Sedgwick, Washington, Weld, Yuma

Florida

Burke, Jefferson, Macon, Okaloosa, Washington

7 CFR Part 419

[Amdt. No. 2]

Barley Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation.

ACTION: Interim final rule.

SUMMARY: This interim final rule amends the Barley Crop Insurance Regulations by updating the list of counties approved by the Board of Directors of the Federal Crop Insurance Corporation for barley crop insurance effective with the 1981 and succeeding crop years. This rule is promulgated under the authority contained in the Federal Crop Insurance Act, as amended.

EFFECTIVE DATE: This interim final rule is effective August 18, 1980. Comment date: The Federal Crop Insurance Corporation, however, is soliciting public comment on the action for a period of 60 days following publication. Written comments, data, and opinions on this interim final rule must be submitted not later than October 17, 1980, to be sure of consideration.

ADDRESS: Written comments on this interim final rule should be sent to the Manager, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C., 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C., 20250, telephone 202–447–3325.

Actions of this kind were anticipated under the provisions of 7 CFR § 419.1, and were generally considered in the Final Impact Statement (FIS) prepared for that action. However, for actions related to the action covered by the original FIS, but which were not specifically covered in the analysis, an addendum has been added to cover the new issue.

Thus, the amended FIS describing the options considered in developing this interim final rule and the impact of implementing each option is available from the above-named individual.

SUPPLEMENTARY INFORMATION: This interim final rule has been reviewed under USDA procedures established in Secretary's Memorandum No. 1955 (August 25, 1978), to implement Executive Order No. 12044 (March 23, 1978), and has been classified as "not significant".

Everett S. Sharp, the Acting Manager, has determined that an emergency situation exists which warrants publication without opportunity for a public comment period on this interim final action because there is not sufficient time to conduct a public comment period before this amendment is required to be placed on file in the office for the county in order to be effective for the 1981 crop year.

Further, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this interim final action are impracticable and contrary to the public interest; and good cause is found for making this action effective less than 30 days after publication of this document in the **Federal Register.** Comments have been solicited for 60 days after publication of this document, and this interim action will be scheduled for review so that a final document discussing comments received and any amendments required can be published in the **Federal Register** as soon as possible.

On Tuesday, June 19, 1979, the Federal Crop Insurance Corporation (FCIC) published the Barley Crop Insurance Regulations (7 CFR Part 419) in the **Federal Register** at 44 FR 35195.

In accordance with the provisions of 7 CFR 419.1 of such regulations, FCIC published by Amendment No. 1 to such regulations a listing of counties where barley crop insurance is otherwise authorized to be offered (44 FR 72093, December 13, 1979) effective for the 1980 crop year as an Appendix "B" to these regulations.

Additional counties have been approved by the Board of Directors effective for the 1981 crop year, necessitating revision and reissuance of Appendix "B."

The Federal Crop Insurance Corporation hereby solicits public comments on this interim final rule for a period of 60 days.

All written submissions made pursuant to this notice will be available for public inspection in the Office of the Manager during regular business hours, 8:15 a.m. to 4:45 p.m., Monday through Friday.

The review date for this action has been established as October 22, 1980.

Final Rule

PART 419—BARLEY CROP INSURANCE

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby revises and reissues the Appendix "B" to 7 CFR Part 419 Barley Crop Insurance Regulations effective with the 1981 and succeeding crop years, which supersedes Amendment No. 1 (44 F.R. 72093), to read as follows:

[Amdt. No. 2]

Oat Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: This final rule amends the Oat Crop Insurance Regulations effective with the 1981 crop year by changing the cancellation and termination for indeptedness dates in certain states to allow for the insuring of fall-seeded oats. The current regulations include cancellation and termination for indebtedness dates for spring-seeded oats only. This amendment will permit the insuring of both spring and fall-seeded oats in certain states and is promulgated under the authority contained in the Federal Crop Insurance Act, as amended.

EFFECTIVE DATE: August 18,1980.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, telephone 202–447–3325.

The Final Impact Statement describing options considered in developing this final rule and the impact of implementing each option is available from the above-named individual.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Secretary's Memorandum No. 1955 (August 25, 1978), to implement Executive Order No. 12044 (March 23, 1978), and has been classified as "not significant."

The Federal Crop Insurance Corporation (FCIC) published a notice of proposed rulemaking in the **Federal Register** on Thursday, May 8, 1980 (45 FR 30445–30446), prescribing procedures for-insuring fall-seeded oats in certain states by changing the cancellation and termination for indebtedness dates.

The current regulations for insuring oats include cancellation and termination dates applicable to insuring spring-seeded oats only. The Board of Directors of the Federal Crop Insurance Corporation has approved the addition of oats as an insurable crop in several counties where fall-seeded oats are produced. This amendment is necessary to allow the insuring of fall-seeded oats with the proper cancellation and termination for indeptedness dates.

Under the provisions of Executive Order No. 12044, and the Administrative Procedure Act (5 U.S.C. 553(b) and (c)), the public was given an opportunity to submit written comments, data, and views on the proposed amendment, but none were received. Therefore, the amendment as contained in the proposed rule is hereby issued as a final rule to be in effect starting with the 1981 crop year.

In compliance with the Secretary's Memorandum No. 1955, the review of these regulations contained in 7 CFR Part 427 for need, currency, clarity, and effectiveness must be completed prior to the sunset date of October 22, 1984.

Final Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby amends subsection 12(c) of 7 CFR § 427.7 of the Oat Crop Insurance Regulations, effective with the 1981 and succeeding crop years.

§ 427.7 The application and policy.

* * * * *

12. *Life of contract; Cancellation and terminations.* * * *

(c) Following are the cancellation and termination dates:

State and county	Cancellation date	Termination date for indebtedness
Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, and Tennessee.	June 30	Oct. 10.
California:		
Modoc and Siskiyou Counties.	Dec. 31	Mar. 31.
All other California counties.	June 30	Oct. 10.
Oklahoma and Texas	Apr. 30	Sept. 15.
All other States	Dec. 31	Mar. 31.

* * * * *

(Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended (7 U.S.C. 1506, 1516))

Note.—The reporting requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942 and OMB Circular A–40.

This action will not have a significant impact specifically on area and community development; therefore, review as required by OMB Circular A–95 is inapplicable.

Approved by the Board of Directors on March 14, 1980.

Approved by:

Everett S. Sharp,

Acting Manager.

Dated: August 7, 1980.

BILLING CODE 3410-08-M

7 CFR Part 430

[Amdt. No. 2]

Sugar Beet Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation.

ACTION: Interim final rule.

SUMMARY: This interim final rule amends the Sugar Beet Crop Insurance Regulations by updating the list of counties approved by the Board of Directors of the Federal Crop Insurance Corporation for sugar beet crop insurance effective with the 1981 and succeeding crop years. This rule is promulgated under the authority contained in the Federal Crop Insurance Act, as amended.

EFFECTIVE DATES: Date: This interim final rule is effective August 18, 1980. Comment date: The Federal Crop Insurance Corporation, however, is soliciting public comment on the action for a period of 60 days following publication. Written comments, data, and opinions on this interim final rule must be submitted not later than October 17, 1980, to be sure of consideration.

ADDRESS: Written comments on this interim final rule should be sent to the Manager, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, telephone 202–447–3325.

Actions of this kind were anticipated under the provisions of 7 CFR § 430.1, and were generally considered in the Final Impact Statement (FIS) prepared for that action. However, for actions related to the action covered by the original FIS, but which were not specifically covered in the analysis, an addendum has been added to cover the new issue.

Thus, the amended FIS describing the options considered in developing this interim final rule and the impact of implementing each option is available from the above-named individual.

SUPPLEMENTARY INFORMATION: This interim final rule has been reviewed under USDA procedures established in Secretary's Memorandum No. 1955 (August 25, 1978), to implement Executive Order No. 12044 (March 23, 1978), and has been classified as "not significant."

Everett S. Sharp, the Acting Manager, has determined that an emergency situation exists which warrants publication without opportunity for a public comment period on this interim final action because there is not sufficient time to conduct a public comment period before this amendment is required to be placed on file in the office for the county in order to be effective for the 1981 crop year.

Further, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this interim final action are impracticable and contrary to the public interest; and good cause is found for making this action effective less than 30 days after publication of this document in the **Federal Register.** Comments have been solicited for 60 days after publication of this document, and this interim action will be scheduled for review so that a final document discussing comments received and any amendments required can be published in the **Federal Register** as soon as possible.

On Tuesday, June 19, 1979, the Federal Crop Insurance Corporation (FCIC) published the Sugar Beet Crop Insurance Regulations (7 CFR part 430) in the **Federal Register** at 44 FR 35201.

In accordance with the provisions of 7 CFR 430.1 of such regulations, FCIC published by Amendment No. 1 to such regulations a listing of counties where sugar beet crop insurance is otherwise authorized to be offered (44 FR 72094, December 13, 1979) effective for the 1980 crop year as an Appendix "B" to these regulations.

Additional counties have been approved by the Board of Directors effective for the 1981 crop year, necessitating revision and reissuance of Appendix "B."

The Federal Crop Insurance Corporation hereby solicits public comments on this interim final rule for a period of 60 days.

All written submissions made pursuant to this notice will be available for public inspection in the Office of the Manager during regular business hours, 8:15 a.m. to 4:45 p.m., Monday through Friday.

The review date for this action has been established as October 22, 1980.

Final Rule

PART 430—SUGAR BEET CROP INSURANCE

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby revises and reissues the Appendix "B" to 7 CFR Part 430 Sugar Beet Crop Insurance Regulations

effective with the 1981 and succeeding crop years, which supersedes Amendment No. 1 [44 FR 72094], to read as follows:

Appendix "B"

Counties Designated for Sugar Beet Crop Insurance—7 CFR 430

In accordance with the provisions of 7 CFR 430.1, the following counties are designated for sugar beet crop insurance:

California

Butte	Monterey
Colusa	Sacramento
Fresno	San Benito
Glenn	San Joaquin
Imperial	Solano
Kern	Stanislaus
Kings	Sutter
Madera	Tulare
Merced	Yolo

Colorado

Adams	Morgan
Boulder	Phillips
Kit Carson	Sedgwick
Larimer	Weld
Logan	Yuma

Note.—The reporting requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942 and OMB Circular A-40.

This action will not have a significant effect specifically on area or community development; therefore, review as required by OMB Circular A-95 is inapplicable.

Approved by the Board of Directors on July 14, 1980.

Dated: August 6, 1980.

Peter F. Cole,

Secretary, Federal Crop Insurance Corporation.

Approved by:

Everett S. Sharp,

Acting Manager.

[FR Doc. 80-24800 Filed 8-15-80; 8:45 am]

BILLING CODE 3410-08-M

Agricultural Marketing Service

7 CFR Part 917

[Plum Reg. 16, Amdt. 2]

Fresh Pears, Plums, and Peaches Grown in California; Grade Requirements for Shipments

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment relaxes grade requirements for shipments of California plums during the period August 14, 1980, through May 31, 1981. Such shipments must grade U.S. No. 1, except that an additional tolerance of 17 percent is allowed for internal discoloration not considered serious. Such action recognizes the current and prospective marketing situation for California plums and is consistent with the composition of the crop.

EFFECTIVE DATE: August 14, 1980.

FOR FURTHER INFORMATION CONTACT: Malvin E. McGaha, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202-447-5975. The Final Impact Statement relative to this final rule is available on request from the above named individual.

SUPPLEMENTARY INFORMATION: *Findings.* This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified "not significant." This amendment is issued under the marketing agreement, as amended, and Order No. 917, as amended (7 CFR Part 917), regulating the handling of fresh pears, plums, and peaches grown in California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The action is based upon the recommendation and information submitted by the Plum Commodity Committee and upon other information. This action would tend to effectuate the declared policy of the act.

The committee reports that recent high temperatures caused some internal discoloration of plums grown in the production area. At the beginning of the season, the committee estimated the 1980-81 plum crop at slightly more than 12 million packages. The revised estimate indicates that the 1980-81 crop may now approximate 10.7 million packages. Approximately 90 percent of the 1980-81 plum crop has been packed. Therefore, the committee has recommended that the U.S. No. 1 grade requirement currently in effect be relaxed by permitting an additional tolerance of 17 percent for internal discoloration not considered serious.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date of this amendment until 30 days after publication in the **Federal Register** (5 U.S.C. 553) in that the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; and this amendment relieves restrictions on the handling of plums grown in California.

In § 917.453 (Plum Regulation 16; 45 FR 33596, 47115) paragraphs (a) and (b) are amended to read as follows:

§ 917.453 Plum Regulation 16.

(a) During the period August 14, 1980, through May 31, 1981, no handler shall ship any lot of packages or containers of any plums, other than the varieties named in paragraph (b) of this section, unless such plums grade U.S. No. 1 with an additional tolerance of 17 percent for internal discoloration not considered serious damage in addition to the tolerances permitted for defects by such grade: *Provided,* That maturity shall be determined by the application of color standards by variety or such other tests as determined to be proper by the Federal or Federal-State Inspection Service.

(b) During the period August 14, 1980, through May 31, 1981, no handler shall ship:

(1) Any lot of packages or containers of Tragedy or Kelsey plums unless such plums grade U.S. No. 1 with additional tolerances of 10 percent for defects, other than internal discoloration, not considered serious damage, and 17 percent for internal discoloration not considered serious damage,

(2) Any lot of packages or containers of Autumn Queen, Casselman, Empress, Grand Rosa, Improved Late Santa Rosa, King David, Late Santa Rosa, Linda Rosa, Red Rosa, Rosa Grande, Roysum, SW-1, Swali Rosa, and 42-26 (Freedom) plums unless such plums grade U.S. No. 1: *Provided,* That an additional tolerance of 17 percent is permitted for defects caused by internal discoloration not considered serious damage and: *Provided further,* That, healed cracks emanating from the stem end which do not cause serious damage shall not be considered as a grade defect with respect to such grade.

* * * * *

(Secs. 1-19, 48 Stat. 31, as amended; (7 U.S.C. 601-674))

Dated, August 13, 1980, to become effective August 14, 1980.

Charles R. Brader,

Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 80-25056 Filed 8-15-80; 8:45 am]

BILLING CODE 3410-02-M

7 CFR Part 993

Dried Prunes Produced in California; Expenses of the Prune Administrative Committee and Rate of Assessment for the 1980-81 Crop Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation authorizes expenses and a rate of assessment for the 1980-81 crop year to be collected from handlers to support activities of the Committee which locally administers the Federal marketing order covering California dried prunes.

EFFECTIVE DATES: August 1, 1980 through July 31, 1981.

FOR FURTHER INFORMATION CONTACT: J. S. Miller (202) 447-5053.

SUPPLEMENTARY INFORMATION: *Findings.* Pursuant to Marketing Order No. 993, as amended (7 CFR Part 993), regulating the handling of dried prunes produced in California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendation and information submitted by the Committee, established under this marketing order, and upon other information, it is found that the expenses and rate of assessment as hereinafter provided, will tend to effectuate the declared policy of the act.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking and postpone the effective date until 30 days after publication in the **Federal Register** (U.S.C. 553), as the order requires that the rate of assessment for a particular crop year shall apply to all assessable dried prunes handled from the beginning of such year which begins August 1. To enable the Committee to meet crop year obligations, approval of the expenses and assessment rate is necessary without delay. Handlers and other interested persons were given an opportunity to submit information and views on the expenses and assessment rate at an open meeting of the Committee. To effectuate the declared purposes of the act, it is necessary to make these provisions effective as specified.

Further, in accordance with procedures in Executive Order 12044, the emergency nature of this regulation warrants publication, without opportunity for further public comments. The regulation has not been classified "significant" under USDA criteria for implementing the Executive Order. An Impact Analysis is available from J. S. Miller (202) 447-5053.

The expenses and assessment rate for the 1980-81 crop year follow:

§ 993.331 Expenses and rate of assessment.

(a) Expenses that are reasonable and likely to be incurred by the Prune Administrative Committee during the 1980-81 crop year, will amount to $201,600.

(b) The rate of assessment for said year, payable by each handler in accordance with § 993.81, is fixed at $1.26 per ton of salable prunes.

(Secs. 1-19, 48 Stat. 31, as amended; (7 U.S.C. 601-674))

Dated: August 13, 1980.

Charles R. Brader,

Director, Fruit and Vegetable Division.

[FR Doc. 80-25057 Filed 8-15-80; 8:45 am]

BILLING CODE 3410-02-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 2

Procedural Assistance in Adjudicatory Licensing Proceedings; Correction

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Final Rule; Correction.

SUMMARY: The Commission corrects a typographic error in a document (45 FR 49535, July 25, 1980) amending 10 CFR Part 2, "Rules of Practice for Domestic Licensing Proceedings," which added a new paragraph (c) in § 2.750. The Commission corrects paragraph (c), page 49537, first column, by inserting the footnote indicator "1" after the last word in paragraph (c). (§ 2.750(c)).

EFFECTIVE DATE: July 25, 1980.

FOR FURTHER INFORMATION CONTACT: Thomas F. Dorian, Esq., Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (Telephone: (301)-492-8690).

Dated at Washington, DC this 12th day of August 1980.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 7590-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 75-CE-12-AD, Amdt. 39-3878]

Beech Model 18 Series Airplanes; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revises Airworthiness Directive (AD) 75-27-09, Amendments 39-2482 and 39-2591, applicable to wing structure of Beech 18 Series airplanes. This revision requires additional inspections and clarifies the AD in respects that have been questioned. This revision is necessary because cracking at previously unconsidered sites can jeopardize safety and because clarification will simplify future compliance effort.

EFFECTIVE DATE: August 21, 1980.

ADDRESSES: Beech Aircraft Corporation's Service Bulletins 64–15, 64–16, 64–17, and 66–10, applicable to this AD, may be obtained from Beech Aircraft Corporation, Commercial Service Department, 9709 East Central Wichita, Kansas 67201. Maintenance information published by manufacturers of wing reinforcement straps, applicable to this AD, may be obtained as follows:

Manufacturer	Instructions
Aerospace Products, Inc., 5536 Satsuma Ave., North Hollywood, CA 91601.	Number 1869, dated May 1980.
Airline Training, Inc., P.O. Box 22833, Ft. Lauderdale, Florida 33335.	Section 7, Document 7132, dated August 1974.
Canadian Aerocon, Ltd., Attn: Mr. Dave Saunders, 2450 Derry Road East, Mississauga, Ontario, Canada L5S1B2.	Maintenance Manual Supplement, dated July 1973.
The Dee Howard Company, P.O. Box 17300, San Antonio, TX 78217.	Service Bulletin SB 18–2, Rev. A dated July 1980.
Hamilton Aviation, P.O. Box 11746 Tucson, AZ 85734.	Document D4–74, dated July 1974.
Jourdan Aircraft, 11001 E. 59th Street, Raytown, MO 64133.	Service Bulletin SB 18–1, dated July 1980.

A copy of the above publications is contained in the Rules Docket, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106 and at Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: Ross R. Spencer, Aerospace, Engineer, Aircraft Certification Program, Room 238, Terminal Building 2299, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 942–4219, FTS 752–6683.

SUPPLEMENTARY INFORMATION: Existing AD 75–27–09, Amendments 39–2482 and 39–2591, requires certain inspections, replacements, repairs, and reports concerning wing structure of Beech "18" airplanes. Subsequent to the above AD issuance, questions arose concerning various aspects of this rather complex AD, and cracks where found at locations were inspection is not required.

A crack was detected at wing station (WS) 60 in the lower cap of the front wing spar of an airplane that was undergoing heavy maintenance, and there is an approximately equal likelihood for similar cracking at WS 62. While a Dee Howard strap was being removed for routine inspection of another airplane, a crack at about WS 38 grew until fracture of the strap occurred, and there is equal likelihood for such cracking anywhere along the entire length of the strap. Special inspections for cracks at the above locations in wing and strap components are necessary for safety. Accordingly, Paragraph (A) of the following revised AD will require such inspections within 75 hours time-in-service after August 22, 1980. In the same revised AD, the existing AD is clarified in respects that have been questioned.

An existing SD is ordinarily superseded by a new AD when changes like the foregoing are made. In this instance, numerous publications refer to AD 75–27–09 by that number, and the (approximetly 30) facilities which are authorized to perform the required X-ray inspections are identified. In view of the above factors, revision is deemed preferable to supersedure in this instance. Paragraphs (A), (B) and (C) of the existing AD show that straps must be installed by May 5, 1976, unless total time-in-service is extremely low or unless a program is started for repetitive replacement of wing structure components. The May 5, 1976, "deadline" was not fully observed, and a relaxatory October 1, 1980, deadline is now imposed. Time criteria are no longer given because all airplanes are believed to exceed the criteria. The repetitive replacement program is no longer mentioned because the airplane manufacturer has never provided related parts, and all owners will undoubtedly continue to prefer the less expensive strapping option. Resulting requirements concerning strap installations appear in Paragraph (F) of the following revised AD. Paragraph (D) of the existing AD requires incorporation of small or large provisions for inspection access, but only the large ones are suitable for inspection of the new WS 60 site. Additional access provisions have sometimes been found necessary during X-ray inspection. All needs concerning inspection access provisions are specified in Paragraph (B) of the following revised AD. Paragraphs (E), (F), (G) and (K) of the existing AD require repetitive inspections. These requirements are restated in Paragraph (C) of the following revised AD. The restatement includes additional sites as previously discussed, specific (rather than general) reference to strap maintenance publications, and clarification of criteria that have been questioned.

Paragraphs of the existing AD not mentioned above are restated without substantive change in the following revised AD.

The FAA has determined that there is an immediate need for a regulation to require inspections for cracking in wing structure and any repairs found necessary during inspection so as to assure safe operation of the affected airplanes.

Since a situation exists that requires immediate adoption of this regulation, notice and public procedure under 5 U.S.C. 553(b) is impracticable and contrary to the public interest and good cause exists for making the amendment effective in less than (30) days after the date of publication in the Federal Register.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Amendment 39–2482 (41 FR 1046 through 1053), AD 75–27–09 of § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as amended by Amendment 39–2591 (41 FR 17876 and 17877) is further amended by complete restatement as follows:

75–27–09 *Beech* Amendments 39–2482, 39–2591, and 39–3878. Applies to all Beech 18 series airplanes including military counterparts and other counterparts approved by Supplemental Type Certificates (STCs), regardless of the category or categories of airworthiness certification.

Compliance: Required as indicated. To prevent possible failure of wing structure, accomplish the following for the left and for the right sides of each affected airplane.

(A) Within 75 hours' time-in-service after August 22, 1980, either accomplish Subparagraphs (A)1. through (A)2., below, or accomplish Subparagraphs (C)2. through (C)9., below.

1. Unless previously accomplished, if Dee Howard STC SA832SW or SA1581SW center section strap is installed, inspect for cracking of the strap in accordance with Dee Howard Service Bulletin SB18–2, either "no" revision or Revision A. Alternatively, to inspect for said cracking, remove paint (other than zinc-chromate primer) from strap portions specified below, apply 68 foot-pounds torque to strap tensioning nuts, then load wings in accordance with Subparagraph (C)6., below, and then use penetrant materials as specified by Subparagraph (C)8., below. During the latter inspection, examine all portions of the underside, forward edge, and aft edge of the strap that are accessible while the strap is installed.

2. Unless previously accomplished or unless a crack detector is used as specified by Subparagraph (C)1., below, inspect for cracking of wing structure at wing station (WS) 60 and 62 sites in accordance with Paragraph (C), below, except that removal of steel straps is unnecessary if satisfactory results are achieved without said removal.

Note.—After one-time inspection(s) as specified above, the same sites must be repetitively inspected along with others as required by Paragraph (C), below.

(B) At the time of the next inspection of wing structure that is required by this directive, unless previously accomplished, incorporate inspection access provisions in accordance with Figure 2,[1] below, or a Federal Aviation Administration (FAA)-approved equivalent. If additional access provisions are necessary for inspection of sites specified by reports per Subparagraph (C)7., below, follow instructions from Beech Aircraft Corporation, and incorporate these provisions.

(C) Inspect wing structure and strap components as follows:

1. Conduct repetitive inspections at times which do not exceed the following:

Hours time-in-service			
Airplane configurations	Initial inspection	Inspection interval	Applicable subparagraphs
Strapped	At time strap is installed.	[1]1,800	(C)2 through (C)9.
Not strapped	1,500, total	500	(C)3 through (C)9.
		100	(C)8 at WS 73, 81, 90.

[1] Upon operator's request, FAA Maintenance Inspector may extend this interval (or 3,600-hour interval specified below) by not more than 100 hours to permit compliance at an inspection period established for the operator. If crack detector system is installed, maintained, and used as specified by STC SA1151CE through SA1155SCE or other STC which refers to this subparagraph, the 1,500-hours interval becomes 3,600 hours.

2. Temporarily remove steel straps and inspect strap components for corrosion, fretting, cracking, and other defects in accordance with the applicable STC holder's instructions as follows:

STC holder	Instructions
Aerospace Products, Inc., 5536 Satsuma Ave., North Hollywood, CA 91601.	Number 1869, dated May 1980.
Airline Training, Inc., P.O. Box 22833, Ft. Lauderdale, Florida 33335.	Section 7, Document 7132, dated August 1974.
Canadian Aerocon, Ltd., Attn: Mr. Dave Saunders, 2450 Derry Road East, Mississauga, Ontario, Canada L5S1B2.	Maintenance Manual Supplement, dated July 1973.
The Dee Howard Company, P.O. Box 17300, San Antonio, TX 78217.	Rev. A, Service Bulletin SB 18–2, dated July 1980.
Hamilton Aviation, P.O. Box 11746, Tucson, AZ 85734.	Document D4–74, dated July 1974.
Jourdan Aircraft, 11001 E. 59th Street, Raytown, MO 64133.	Service Bulletin SB 18–1, dated July 1980.

3. Inspect the front spar of the wing center section and outer wing panel at sites and by methods specified below.

[1] Figures 1–4 filed as part of the original document with the Office of the Federal Register.

Wing station (WS) and site [1]	Method [2]
32—Tip of welds at wing splice plate, fore and aft surfaces of cap.	Visual, X-ray and either magnetic particle or penetrant.
43 to 45—Tip of weld around cluster upper surface of cap.	Visual and either magnetic particle or penetrant.
46—Outboard ends of splice in cap, upper and lower surface of cap.	Visual, X-ray and either magnetic particle or penetrant.
57, 64, 63 and 81—Tips of welds at gussets upon surface of cap.	Do.
60 and 62—Tips of welds as shown in Figure 4.	X-ray.
61—Lower surface of spar cap below tube cluster, as seen from wheel well.	Visual and either magnetic particle or penetrant.
90—Tips of welds at clevis tangs, upper and lower surface.	Visual, X-ray and either magnetic particle or penetrant.
90U—.....do	Do. X-ray.
102 and 111—Tips of welds as shown in Figure 4.	

[1] 90U is in upper spar cap. All other sites are in lower spar cap. WS 57 and 64 need not be separately X-rayed if these sites are shown by WS 60 and 62 radiographs. Refer to figures of this AD for more detailed information.

[2] A tube (not isotope) source is required for X-raying unless otherwise requested and authorized under Paragraph (H), below.

4. Temporarily remove steel straps, inspection access covers and other equipment as necessary to eliminate interference with required inspections. Also, drain inboard fuel tanks prior to X-rays WS 60 and 62 sites.

5. Temporarily or permanently install metallic type, wire or "hose" clamps squarely around the spar cap (existing clamps, etc., may be used) as necessary to provide two X-ray beam alignment indicators near WS 32, 73, and 81 sites, and near WS 57, and 64 sites if the latter are to be separately X-rayed. Each indicator must be at least one inch from the nearest inspection site, at least two inches from the companion indicator, and perceptible in the related radiograph.

6. Taking only one radiograph at a time, accomplish X-ray inspection in accordance with MIL-STD-453 or 00453A and the following instructions:

(a) Use steel "MIL-STD" penetrameters of sizes specified by figures of this directive except at WS 90U and 62 sites where no penetrameter is required. Secure penetrameters to source-side surface of the spar cap, except film-side placement is permitted at WS 102 and 111 sites if access does not allow source-side placement.

(b) At each site, use GAF 800, DuPont NDT–65, Kodak AA, or equivalent film, sandwiched between lead screens of 0.005–inch thickness. Additionally, at WS 60, 62, and 111 sites, use a second film in multi-film technique which provides film speed ratio of Kodak M/Kodak AA. With each film pact, use small identification symbols for at least the site (e.g., LWS 81, RWS 90U, LWS 60A, ets.), date, and airplane registration number. Position each film pack close to the site, using figures of this directive for guidance. Note: It is advisable to secure a "back-up" lead plate of 0.12-inch thickness at all sites, especially where film is beneath the spar cap.

(c) Load the wing by applying an upward force at the junction of the number 10 wing rib and the lower forward spar cap of the outer wing panel. Use lumber or other material along and under the rib so as to distribute the force. Apply force equal to the sum of half of the weigth of any fuel in outboard wing tanks, plus the weight of fixtures such as lumber, plus 75 to 100 pounds.

(d) After the wing is loaded, ascertain that the X-ray source is secured against the upper wing skin for WS 60 and 62 sites and approximately 36 inches from the film at all other sites, at chordwise and spanwise angles specified by Figure 3 of this directive.

(e) Ascertain that neither the air plane nor the source will be moved by wind or other influences, and expose the film so as to obtain 1.5 to 2.8 radiographic density near inspection sites specified in Figure 4 of this directive. Use the same kinds of film and exposure time for WS 62 sites as for WS 60 sites.

(f) Retake any radiograph which evidences unsharpness, missed or obscured site, improper density, improper beam alignment, or in which at least two penetrameter holes are not perceptible.

Note.—Beam alignment indicators are either structural features such as top and bottom tangs, or indicators specially installed. The latter will appear as thin ellipses, the thinner being closest to the site.

7. Using a low power magnifying device, examine each radiograph under viewing conditions which show penetrameter holes. Look for evidence of corrosion pitting and transverse cracking in unwelded spar cap material. Pay particular attention to unwelded spar cap material adjacent to discontinuities such as screw holes, corrosion pits, and tips and edges of welds. Submit a report to maintenance facility accomplishing the AD showing the location of each indication of cracking and corrosion pitting in unwelded spar cap material.

8. After sites are cleaned, inspect by visual and either penetrant or magnetic particle methods, using materials and procedures as specified below. Inspect for cracking, external corrosion pitting, and holes through spar caps. Pay particular attention to locations specified by the X-ray report. Prior removal of original finish is not necessary, but paint applied in service must be removed unless it is a brittle finish.

(a) Conduct visual inspection while wing is flexed by applying and relieving a 75 to 100 pound upward force near the wing tip. Use flashlight or other illumination and low power magnifying device for visual inspection.

(b) Conduct penetrant inspection, if this method is used, while the wing is flexed as for visual inspection. Use materials shown by the penetrant manufacturer's publications to be eligible for detection of fatigue cracks in steel tubing. Strictly follow the penetrant manufacturer's instructions.

(c) Conduct magnetic inspection, if this method is used, while the wing is either flexed as for visual inspection or loaded as for X-ray inspection. Position Magnaflux Corporation Y–5 or YM–5 yoke or equivalent equipment so that magnetic flux will parallel

V 45 AG 18 80 UMI

the spanwise centerline of the spar cap. Strictly follow instructions published by the equipment manufacturer for detection of fatigue cracks in steel tubing.

9. Keep all radiographs at an accessible location apart from the airplane.

(D) Within three (3) days after discovery, send a written report to FAA on Form 8330-2, or equivalent, showing the length and location of each crack and the location of corrosion or other adverse condition discovered during inspections required by this directive. (Reporting approved by the Office of Management and Budget under OMB No. 04-R0174.)

(E) Obtain (unless previously done) and follow the cognizant (aircraft or strap, as appropriate) manufacturer's instructions for repair and/or cntinued service of each defect that is found during inspections required by this directive. If continued service with corroded wing structure has been previously authorized, field comparison of old and new radiographs must show that no subsequent deterioration has occurred, or remaining strength must be re-evaluated by the aircraft manufacturer.

(F) Within 200 hours' time-in-service after January 5, 1976, but prior to the next flight after October 1, 1980, unless previously accomplished, incorporate an STC-approved strap installation which reinforces the lower forward cap between at least left and right wing stations 181.

Note.—Eligible strap installations are SA643CE with SA1206CE, SA832SW with SA895SW, SA1581SW with SA1582SW, SA2000WE, SA982EA, SA814SO, SA1533WE with SA2737WE, SA1192WE with SA3229WE, SA3009WE, SA3010WE, SA3021WE, and any future STC that includes a notation that refers to this directive.

(G) Aircraft may be flown in accordance with FAR 21.197 to a location where alterations and inspections required by this directive can be performed.

(H) Alternate methods of compliance with this directive must be approved by the Chief, Aircraft Certification Program, Room 238, Terminal Building 2299, Mid-Continent Airport, Wichita, Kansas 67209 telephone (316) 942-4219.

(I) X-ray inspections herein required must be accomplished by:

1. A certificated repaired station holding a "limited airframe—Beech 18 series aircraft—wing and center section spar X-ray inspections" rating and

2. Either a certificated mechanic or repairman in the employ of the above repair station, who is currently authorized to accomplish said X-ray inspections pursuant to a letter of authorization issue by the FAA GADO or FSDO having certificate authority over that repair station.

(J) The authorized person performing any X-ray inspection required by this AD shall, in addition to the information required by FARs 43.9 and 91.173, list the date of the letter of authorization under which he performed said inspection in the aircraft maintenance records specified in FAR 91.173(a)(2).

Currently effective Beech Aircraft Corporation's Service Bulletin 64-15, 64-16, 64-17 and 66-10 and Strap STC-Holders' Publications consider this subject but this AD takes precedence in any conflicting detail.

This AD supersedes AD 64-1-01, Amdt. 810 of Part 507 and any other amendments applicable to said AD, AD 64-21-03 (Amdt. 812 of Part 507 and any other amendments applicable to said AD). Amdt. 64-21-03 (Amdt. 812 of Part 507 and any other amendments applicable to said AD, AD 73-18-04 (Amdt. 39-1708 and any other amendments applicable to said AD and AD 75-09-18 (Amdt. 39-2241 and any other amendments applicable to said AD).

Amendment 39-2462 became effective January 5, 1976.

Amendment 39-2591 became effective May 3, 1976.

This amendment becomes effective August 21, 1980.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); sec. 11.89, Federal Aviation Regulations (14 CFR Sec. 11.89)

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the final evaluation prepared for this document is contained in this docket. A copy may be obtained by writing to John L. Fitzgerald, Jr., Attorney, Office of the Regional Counsel, Room 1558, Federal Aviation Administration, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, telephone (816) 374-5446.

Issued in Kansas City, Missouri, on August 4, 1980.

John E. Shaw,

Acting Director, Central Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 17906; Amdt. 39-3891]

Airbus Industrie (AI) Type A300 Airplanes, All Models; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that requires periodic inspection for cracks in wing slat closing plate assemblies of Airbus Industrie (AI) Type A300 arirplanes, and modification or replacement thereof as appropriate. The AD is needed to prevent in-flight loss of a closing plate which could jeopardize persons and property on the ground, and safety of flight by interfering with proper operation of the airplane's high-lift devices.

DATE: Effective September 17, 1980. Compliance schedule—as prescribed in the body of the AD.

ADDRESSES: The applicable service bulletins may be obtained from: Airbus Support Division, Avenue Lucien Servanty, Boite Postale 33, 31700 Blagnac, France.

A copy of each service bulletin is contained in the Rules Docket, Room 916, FAA, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: A. Astorga, Acting Chief, Aircraft Certification Staff, AEU-100, Europe, Africa, and Middle East Office, FAA, c/o American Embassy, Brussels, Belgium, Telephone: 513.38.30, or C. Chapman, Chief, Policy Standards Section, AWS-111, FAA, 800 Independence Avenue, SW., Washington, D.C. 20591, Telephone: (202) 426-8192.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring periodic inspection for cracks in wing slat closing plate assemblies an Airbus Industrie (AI) Type A300 airplanes, all models, was published in the **Federal Register** at 43 FR 20818. The proposal was prompted by reports of cracks in hinges and spring strut attachment brackets of No. 1 L.H. and R.H. wing slat closing plates on Airbus Industrie Type A300 airplanes, and in-flight loss of one closing plate occurring. In-flight detachment of a slat closing could endanger persons and property on the ground, and could jeopardize safe operation of the airplane by interfering with normal operation of the airplane's high-lift devices. Since this condition is likely to exist or develop on other airplanes of the same type design, an AD is being issued which requires repetitive visual inspections, and modification as necessary, of No. 1 L.H. and R.H. wing slat closing plate assemblies on Airbus Industrie (AI) Type A300 airplanes, all models, until modified in accordance with AI Service Bulletin No. A300-57-065.

Interested persons have been afforded an opportunity to participate in the making of the amendment. One comment was received requesting that the repetitive inspection interval for closing plates found uncracked be increased from 800 cycles to 1,400 cycles. This request is based on low anticipated crack growth rates and the results of initial inspections already accomplished which have not revealed significant discrepancies. The larger inspection interval would also conform to a regularly scheduled maintenance period for these aircraft. The FAA agrees with this request and paragraph (a) of the AD is being revised accordingly. Also, paragraph (c)(3) has been reworded for ease of reading and a new paragraph has been added concerning an FAA-approved equivalent to the manufacturer's service instructions.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Airbus Industrie (AI). Applies to Type A300 airplanes, all models, certificated in all categories, not incorporating AI Modification No. 1909/AI Service Bulletin No. A300-57-065, dated December 15, 1977.

Compliance required as indicated, unless already accomplished.

To prevent in-flight loss of wing slat closing plates, accomplish the following: (a) Within the next 20 flights after the effective date of this AD, or prior to accumulation of 800 flights since new, whichever occurs later, and at intervals thereafter not exceeding 1,400 flights, except as provided in paragraph (b) of this AD, since the previous inspection, until modified in accordance with AI Service Bulletin No. A300-57-065, dated December 15, 1977, or an FAA-approved equivalent, visually inspect No. 1 L.H. and R.H. wing slat closing plate assemblies for cracks in the piano hinges, for failure of rivets, and for cracks or distortion at spring strut attachment lugs, in accordance with Accomplishment Instructions, subparagraph 2.A., Inspection, of AI Alert Service Bulletin No. A300-57-063, Revision No. 1, dated September 5, 1977, or an FAA-approved equivalent.

(b) If, during any inspection required by paragraph (a) of this AD, piano hinge cracks of less than 2.0 inches in length are found, verify that the pin of the piano hinge is complete and correctly installed and repeat the inspection required by paragraph (a) of this AD, within the next 600 flights and at intervals thereafter not exceeding 800 flights since the previous inspection, or, alternatively, proceed as prescribed in paragraph (c) of this AD.

(c) If, during any inspection required by this AD, hinge rivet failures, piano hinge cracks of 2.0 inches in length or greater, or cracks or distortion of the spring strut attachment brackets are found, before further flight, except that the airplane may be flown in accordance with FAR §§ 21.197 and 21.199 to a place where the work can be performed, accomplish the following: (1) Incorporate the modification specified in AI Service Bulletin No. A300-57-065, dated December 15, 1977, or an FAA-approved equivalent;

(2) For hinge rivet failures, and for hinge cracks of or greater than 2.0 inches in length, replace rivets or replace hinge, as appropriate, in accordance with subparagraph 2.C., Replacement of Cracked Hinges, of AI Service Bulletin No. A300-57-063, Revision No. 1, dated September 5, 1977, or an FAA-approved equivalent; and

(3) For cracks or distortion of the spring strut attachment brackets, replace the closing plate with a serviceable plate of the same part number in accordance with applicable portions of paragraph 2, Accomplishment Instructions, of AI Alert Service Bulletin No. A300-57-063, Revision 1, dated September 5, 1977, or an FAA-approved equivalent.

(d) For purposes of this AD, one flight is one takeoff and landing cycle.

(e) For purposes of this AD, an FAA-approved equivalent may be approved by the Chief, Aircraft Certification Staff, AEU-100, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, Brussels, Belgium.

This amendment becomes effective September 17, 1980.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); 14 CFR 11.89)

Note.—The FAA has determined that this document involves a regulation which is not considered to be significant under the provisions of Executive Order 12044, as implemented by the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

Issued in Washington, D.C., on August 8, 1980.

M. C. Beard,

Director of Airworthiness.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 20594, Amdt. 39-3892]

Mitsubishi Heavy Industries, Ltd., Model MU-2B Airplanes; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires repetitive inspection and replacement, as necessary, of critical components of the nose landing gear strut assemblies on certain Mitsubishi Heavy Industries, Ltd., Model MU-2B airplanes. This AD is needed to prevent fatigue damage and subsequent structural failure of the nose landing gear strut assembly.

DATE: Effective September 2, 1980. Compliance schedule—as indicated in the body of the AD.

ADDRESSES: The applicable service bulletin may be obtained from:

Mitsubishi Heavy Industries, Ltd., 10, Oye-Cho, Minato-ku, Nagoya, Japan or,

Mitsubishi Aircraft International, Inc., P.O. Box 3848, San Angelo, Texas 76901.

A copy of the service bulletin is contained in the Rules Docket, Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591. The document may also be examined in Room 7321, Federal Aviation Administration, Pacific-Asia Region, Engineering and Manufacturing District Office, 300 Ala Moana Boulevard, Honolulu, Hawaii 96850.

FOR FURTHER INFORMATION CONTACT: Gary K. Nakagawa, Chief, Engineering and Manufacturing District Office, APC-210, Pacific-Asia Region, Federal Aviation Administration, P.O. Box 50109, Honolulu, Hawaii 96850, Telephone: (808) 546-8650 or 546-8658, or C. Chapman, Acting Chief, Technical Standards Branch, AWS-110, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591, telephone: (202) 426-8374.

SUPPLEMENTARY INFORMATION: There have been reports of cracks on the nose landing gear strut assembly on the Mitsubishi Heavy Industries Model MU-2B-20 airplane which could cause structural failure of the nose landing gear. Since this condition is likely to exist or develop on other airplanes of the same type design, an airworthiness directive is being issued which requires magnetic particle inspection and replacement as necessary of the critical components of the nose landing gear strut assembly on certain Mitsubishi Heavy Industries Model MU-2B-20 airplanes.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Mitsubishi Heavy Industries, Ltd. Applies to Models MU-2B-10, -15, -20, -25, and -26, Serial Numbers 005 through 347 (except Serial Numbers 313 and 321) and Models MU-2B-30, -35, and -36, Serial Numbers 501 through 696 (except Serial Numbers 652 and 661), certificated in all categories. This AD does not apply to MU-2B series airplanes having serial numbers with the suffix "SA."

Compliance is required as indicated.

To prevent fatigue damage of the nose landing gear strut assembly, accomplish the following:

(a) Within the next 200 hours time in service after the effective date of this AD, unless already accomplished within the last 100 hours time in service, and thereafter at intervals not to exceed 200 hours time in

service, inspect the critical components of the

EFFECTIVE DATE: August 18, 1980. Compliance is required as set forth in

and Manufacturing Branch, Federal Aviation Administration, Eastern Region,

International Airport, Jamaica, New

nut is less than 15 ft.-lbs., the engine

service, inspect the critical components of the NLG strut assembly, Part Numbers 010A-39131 or 030A-39111, for cracks in accordance with the instructions contained in Mitsubishi MU-2 Service Bulletin No. 181, dated July 12, 1979 (hereinafter referred to as the Service Bulletin), or an FAA-approved equivalent. Specific affected strut assemblies by part and dash numbers are listed in the Service Bulletin. Airplanes equipped with new outer cylinder assemblies, axle assemblies, and trunions that are identified by "SP" markings need not comply with the repetitive inspection requirements of this AD.

(b) If a crack is discovered during any inspection required by paragraph (a) of this AD, replace the defective part with a new part of the same part number in accordance with the instructions contained in the Service Bulletin, or an FAA-approved equivalent, and continue repetitive inspections as required by paragraph (a) of this AD.

(c) If an equivalent means of compliance is used in complying with paragraphs (a) and (b), that equivalent must be approved by the Chief, Engineering and Manufacturing District Office, Federal Aviation Administration, Pacific-Asia Region, P.O. Box 50109, Honolulu, Hawaii 96850.

Note.—All persons affected by this directive who have not already received the applicable service bulletin from the manufacturer may obtain a copy upon request to Mitsubishi Heavy Industries, Ltd., 10, Oye-Cho, Minato-ku, Nagoya, Japan, or Mitsubishi Aircraft International, Inc., P.O. Box 3848, San Angelo, Texas 76901. The service bulletin may also be examined at FAA, Pacific-Asia Region, Room 7321, 300 Ala Moana Blvd., Honolulu, Hawaii 96850, and at FAA Headquarters, Room 916, 800 Independence Avenue, S.W., Washington, D.C. 20591.

This amendment becomes effective September 2, 1980.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—The Federal Aviation Administration has determined that this document involves a regulation which is not significant under the provisions of Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

Issued in Washington, D.C., on August 8, 1980.

M. C. Beard,

Director of Airworthiness.

14 CFR Part 39

[Docket No. 80-EA-15, Amdt. 39-3881]

AVCO Lycoming VO, TVO-435 and VO, IVO, TVO, and TIVO-540 Series Engines; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule issues an amendment and revision to AD 80-04-04, applicable to AVCO Lycoming VO, TVO-435, VO, IVO, TVO and TIVO-540 aircraft engines. AD 80-04-04 concerns an inspection for torque of the crankshaft flange to transmission drive coupling attaching bolt nuts. This rule changes the required torque value from 25 foot pounds to 15 foot pounds, the former value having been an error. It also changes some words for clarification purposes, as well as the number of the service bulletin. The inspection with the higher torque value applied would result in unnecessary cases of loose bolts and further unnecessary disassembly and inspection.

EFFECTIVE DATE: August 18, 1980. Compliance is required as set forth in the AD.

ADDRESSES: AVCO Lycoming Service Bulletins may be acquired from the manufacturer at Williamsport, Pennsylvania 17701.

FOR FURTHER INFORMATION CONTACT: E. Manzi, Propulsion, section, AEA-214, Engineering and Manufacturing Branch, Federal Building, J.F.K. International Airport, Jamaica, New York 11430; Tel. 212-995-2894.

SUPPLEMENTARY INFORMATION: Because of the need to inform owners and operators of the error in torque value as soon as possible, this rule was disseminated as an airmail airworthiness directive under date of March 13, 1980. Since the same situation still exists and requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations, 14 CFR 39.13 is amended, by revising and amending AD 80-04-04 to read as follows:

AVCO Lycoming: Applies to all VO and TVO-435 series engines and to all VO, IVO, TVO and TIVO-540 series engines.

To prevent possible failure of the crankshaft flange bolts perform the following, unless already accomplished:

(a) Within the next 50 hours in service after effective date of this AD, engines that have accumulated 550 hours or more time in service since new or overhaul must have the engine crankshaft flange to transmission drive coupling attaching bolt nuts checked for 15 ft.-lbs. torque measured in the tightening direction. If the torque on any attaching bolt nut is less than 15 ft.-lbs., the engine crankshaft flange and the helicopter transmission drive coupling flange must be inspected for cracks, fretting, galling, or for any metal transfer from one surface to its mating surface. Remove from service any crankshaft or drive coupling which shows such deficiencies. Prior to returning the engine to service accomplish the following:

(1) Remove and discard all flange bolts. Measure all bolt holes in the crankshaft flange and repair if necessary in accordance with the requirements of AVCO Lycoming Service Instruction No. 1209B or equivalent procedure approved by Chief, Engineering & Manufacturing Branch, FAA Eastern Region.

(2) Install replacement bolts in accordance with AVCO Lycoming Service Instruction No. 1209B paragraph 5 or equivalent procedure approved by Chief, Engineering & Manufacturing Branch, FAA Eastern Region.

Those engines which showed no such deficiencies or whose attaching bolt nut torques measured 15 ft.-lbs. may be returned to service, but the torque of the crankshaft flange attaching bolt nuts must be measured every 600 hours in service thereafter or until compliance with paragraphs (a)(1) and (a)(2) of this AD is accomplished.

Effective date. This amendment is effective August 18, 1980.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—The Federal Aviation Administration has determined that this document involves a regulation which is not significant under Executive Order 12044 as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

Issued in Jamaica, New York, on August 1, 1980.

Lonnie D. Parrish,

Acting Director, Eastern Region.

[FR Doc. 80-24655 Filed 8-15-80; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 80-EA-13; Amdt. 39-3880]

Airworthiness Directives; AVCO Lycoming T10-540-S1AD

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment issues a new airworthiness directive, applicable to AVCO Lycoming T10-540-S1AD type aircraft engines. It requires repetitive checks of the throttle for stiffness or seizure, and replacement where necessary of the turbo-charger wastegate valve or cable assembly. It appears that seizure of the wastegate valve and cable assembly have resulted in power losses and unscheduled landings.

EFFECTIVE DATE: August 18, 1980. Compliance is required as set forth in the AD.

ADDRESSES: AVCO Lycoming Service Bulletins may be acquired from the manufacturer at Williamsport, Pennsylvania 17701.

FOR FURTHER INFORMATION CONTACT: I. Mankuta, Propulsion Section, AEA-214, Engineering and Manufacturing Branch, Federal Building, J.F.K. International Airport, Jamaica, New York 11430; Tel. 212-995-2894.

SUPPLEMENTARY INFORMATION: Because of the seriousness of the air safety hazard, known owners and operators of the Piper PA-32RT-300T and PA-32R-301T airplanes with the subject engines installed were notified by telegram under date of March 10, 1980, of the substance of this amendment. Since the same situation still exists, it requires the immediate adoption of this regulation, and it is therefore found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Section 39.13 of Part 39 of the Federal Aviation Regulations, 14 CFR 39.13 is amended, by adding the following new Airworthiness Directive:

AVCO Lycoming: Applies to Lycoming Model T10-540-S1AD engine with serial numbers thru S/N L-6991-61A except: S/Ns L-5253-61A, L-5616-61A, L-5641-61A, L-5691-61A, L-5808-61A, L-5823-61A, L-5878-61A, L-5909-61A, L-5967-61A, L-5970-61A, L-6160-61A, L-6183-61A, L-6451-61A, L-6669-61A, L-6671-61A, L-6775-61A, L-6840-61A, L-6860-61A, L-6861-61A, L-6886-61A, L-6887-61A, L-6888-61A, L-6900-61A Thru L-6905-61A, L-6915-61A Thru L-6921-61A, L-6930-61A Thru L-6940-61A, L-6979-61A Thru L-6988-61A and L-6990-61A; installed in Piper PA-32RT-300T and PA-32R-301T aircraft.

Compliance is required prior to each flight after receipt of this directive until a new transition wastegate assembly P/N LW16858 is installed.

To prevent loss of engine power control due to seized throttle movement, accomplish the following:

1. Prior to each flight check the throttle movement for stiffness or binding as follows:

a. Release the throttle friction lock in the cockpit.

b. Move the throttle from idle to full open and back to idle.

c. If the throttle movement is stiff or binds, replace any wastegate valve or cable assembly with a new assembly in accordance with Lycoming S/B 448.

2. An alternative method of compliance may be approved by the Chief, Engineering and Manufacturing Branch, Federal Aviation Administration, Eastern Region.

The checks in this AD may be accomplished by the pilot. Any corrective action required by this AD must be accomplished by a person authorized by FAR 43.3.

Piper special advisory Telex SA-32RT-300T/32R-301-1 dated February 8, 1980, and Lycoming Service Bulletin No. 448 pertain to this subject.

This AD is effective on August 18, 1980, and was effective upon receipt for all recipients of the letter dated March 17, 1980, which concerned this subject.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, 49 U.S.C. 1354(a), 1421, and 1423; Sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c) and 14 CFR 11.89)

Note.—The Federal Aviation Administration has determined that this document involves a regulation which is not significant under Executive Order 12044 as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

Issued in Jamaica, New York, on August 1, 1980.

Lonnie D. Parrish,

Acting Director, Eastern Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 80-EA-33; Amdt. 39-3886]

Bendix D-2000 and D-2200 Magnetos; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment issues a new airworthiness directive, applicable to Bendix D-2000 and D-2200 magnetos. The subject matter is related to that found in AD 79-18-06. This AD requires an inspection to determine whether there has been distortion of the distrubutor block bore due to tightening of the four center magneto screws; it also requires permanent removal of the screws. The distortion can cause magneto housing interference with a possible failure of the magneto.

EFFECTIVE DATE: August 21, 1980. Compliance is required as set forth in the AD.

ADDRESSES: Bendix Service Bulletins may be acquired from the manufacturer at the Electrical Components Division, Sidney, New York 13838.

FOR FURTHER INFORMATION CONTACT: A. T. Farrar, Propulsion Section, AEA-214, Engineering and Manufacturing Branch, Federal Building, J.F.K. International Airport, Jamaica, New York 11430; Tel. 212-995-2894.

SUPPLEMENTARY INFORMATION: Since the publication of AD 79-18-06 which relates to this problem, it has been determined that some red nameplate magnetos have failed the limits established by the AD. Further, it appears that all magnetos should have the four center cover screws removed, as these appear to be a possible source of distortion for any magneto. Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Section 39.13 of Part 39 of the Federal Aviation Regulations, 14 CFR 39.13 is amended, by adding the following new Airworthiness Directive:

Bendix: Applies to Bendix D-2000 and D-2200 series magnetos installed on 4, 6, or 8 cylinder reciprocating engines.

To preclude the loss of ignition, accomplish the instructions shown in the following sections of Bendix Service Bulletin No. 605A or an FAA approved equivalent, within the next fifty hours' time in service after the effective date of this AD unless previously accomplished.

a. Service Bulletin Section 2, Housing Distortion Check:

1. For red nameplate magnetos with serial numbers above 25000.

2. For any magneto, regardless of serial number, which has operated with the four center cover screws installed after compliance with AD 79-18-06.

b. Service Bulletin Section 4, Installation of Cover Sealing Kit and Cover Decals.

c. Service Bulletin Section 5, Identification After Compliance.

d. Make an engine log book entry of compliance, including magneto serial number.

Equipment inspections and procedures must be approved by the Chief of the Engineering and Manufacturing Branch, AEA-210, Federal Aviation Administration (FAA) Eastern Region. As permitted by FAR 21.197, aircraft may be flown to a base where maintenance required by this Airworthiness Directive can be accomplished.

Effective Date: This amendment is effective August 21, 1980.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, 49 U.S.C. 1354(a), 1421, 1423, and 1431(b); Sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c) and 14 CFR 11.89)

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment issues a new airworthiness directive, applicable to DeHavilland DHC-7 type airplanes and requires repetitive inspections of the main landing gear upper lock strut assembly for cracks. This results from findings of the failure of the landing gear, possibly being attributable to lock failures.

EFFECTIVE DATE: August 21, 1980. Compliance is required as set forth in the AD.

ADDRESSES: DeHavilland Service Bulletins may be acquired from the manufacturer at Downsview, Ontario, Canada M3K 145.

FOR FURTHER INFORMATION CONTACT: L. Lipsius, Airframe Section, AEA-212, Engineering and Manufacturing Branch, Federal Building, J.F.K. International Airport, Jamaica, New York 11430; Tel. 212-995-2875.

SUPPLEMENTARY INFORMATION: There has been a report of a DHC-7 having an accident when the right main gear folded during a landing roll-out after failure of the lock strut. The rule requires a dye penetrant or eddy test inspection followed by daily visual inspections. Upon incorporation of DeHavilland Modification No. 7/1838, the inspections may be discontinued. Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Section 39.13 of Part 39 of the Federal Aviation Regulations, 14 CFR 39.13 is amended, by adding the following new Airworthiness Directive:

DeHavilland: Applies to all DHC-7 series airplanes certificated in all categories.

To prevent possible retraction of the main landing gear due to failure of the main landing gear upper lock struts, accomplish the following:

(a) Within 10 hours in service after receipt of this AD, unless already accomplished, conduct a one-time inspection of the unpainted area as noted in paragraph (b) for cracks using eddy current technique or dye penetrant methods with at least a 4-power glass, or equivalent.

(b) Chemically remove paint around the strut within a 1-inch band below the boss on each main landing gear upper lock strut assembly, P/N Menasco 15709-5, where the spring-loaded cable attaches.

(c) Visually inspect the area noted in paragraph (b) for cracks each day at intervals not to exceed 24 hours, after receipt of this AD, using at least a 4-power glass.

(d) If a crack is found, the upper lock strut must be replaced before further flight with a part of the same part number or equivalent, inspected and found airworthy in accordance with either method prescribed in paragraph (a) or equivalent. Continue to inspect in accordance with paragraph (c). Refer to DeHavilland Maintenance Manual PSM 1-7-2, Chapter 32-10-16.

(e) Report positive findings, including crack length, to the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region, within 5 days of inspection. (Reporting approved by the Office of Management and Budget under OMB No. 04-R0174).

(f) Compliance with this airworthiness directive may be discontinued following incorporation of DeHavilland Modification No. 7/1838 in DeHavilland Service Bulletin No. 7-32-21, Revision A, dated May 2, 1980.

(g) Equivalent inspection procedures and parts must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region.

(h) The aircraft may be flown in accordance with FAR 21.197, with the landing gear locked in the full extended position, to a base where the inspection or part replacement can be performed.

(i) Upon submission of substantiating data by an owner or operator through an FAA Maintenance Inspector, the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region, may adjust the compliance times specified in this AD.

Effective Date: This amendment is effective August 21, 1980.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, 49 U.S.C. 1354(a), 1421, 1423, and 1431(b); Sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c) and 14 CFR 11.89)

Note.—The Federal Aviation Administration has determined that this document involves a regulation which is not significant under Executive Order 12044 as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034, February 26, 1979).

Issued in Jamaica, New York, on August 7, 1980.

Lonnie D. Parrish,

Acting Director, Eastern Region.

Gulfstream American—Models G-164B, 164C, and 164D; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment issues a new airworthiness directive (AD), applicable to Gulfstream American G-164B, C, and D type airplanes. It requires an inspection for elongation of the aileron cable attachment holes in the bellcrank assembly. This deficiency results from a possible improper press fit of the bushings in the assembly, and could result in dislodgment of the bushing. The deficiency could cause a loss of flight control of the airplane.

EFFECTIVE DATE: August 18, 1980. Compliance is required as set forth in the AD.

ADDRESSES: Gulfstream American Service Bulletins may be acquired from the manufacturer at P.O. Box 147, Elmira, New York 14902.

FOR FURTHER INFORMATION CONTACT: A. Maila, Airframe Section, AEA-212, Engineering and Manufacturing Branch, Federal Building, J.F.K. International Airport, Jamaica, New York 11430; Tel. 212-995-2875.

SUPPLEMENTARY INFORMATION: Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations, 14 CFR 39.13 is amended, by adding the following new Airworthiness Directive.

Gulfstream American: Applies to Gulfstream Models G-164B S/N 1B thru 656B, G-164C S/N 1C thru 44C, and G-164D S/N 1D thru 16D. Compliance is required as indicated, unless already accomplished.

To detect elongation of the aileron cable attach holes and to eliminate the possibility of bushings becoming dislodged from the aileron bellcrank, accomplish the following within then next 25 hours in service after the effective date of this AD.

a. For airplanes that have not been altered in accordance with the original issue of Gulfstream American AG-CAT Service Bulletin No. 75, comply with the inspection and alteration specified in the bulletin, Revision A, Parts A, B and C, or an approved equivalent.

b. For airplanes that have already been altered in accordance with the original issue of the bulletin, accomplish the alteration specified in the bulletin, Revision A, Part D, or an approved equivalent.

c. Equivalent inspections, alterations, and replacement parts must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region.

d. Upon request, with substantiating data submitted through an FAA Maintenance Inspector, the compliance time specified in this AD may be adjusted by the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region.

Effective date: This amendment is effective August 18, 1980.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act, 49, U.S.C. 1655(c); 14 CFR 11.89)

Note.—The Federal Aviation Administration has determined that this document involves a regulation which is not significant under Executive Order 12044 as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

Issued in Jamaica, New York, on August 1, 1980.

Murray E. Smith,

Director, Eastern Region.

[Airspace Docket No. 80-ARM-02]

Establishment of Transition Areas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes 700 foot and 1,200 foot transition areas at Pembina, North Dakota to provide controlled airspace for aircraft executing the new VOR runway 33 standard instrument approach procedure developed for the Pembina Municipal Airport, Pembina, North Dakota.

EFFECTIVE DATE: 0901 G.m.t., October 30, 1980.

FOR FURTHER INFORMATION CONTACT: Robert E. Greene, Operations, Procedures and Airspace Branch, Air Traffic Division, ARM-500, Federal Aviation Administration, Rocky Mountain Region, 10455 East 25th Avenue, Aurora, Colorado 80010; telephone (303) 837-3937.

SUPPLEMENTARY INFORMATION:

History

On Thursday, April 17, 1980, the FAA published for comment (45 FR 26079) a proposal to establish a 700' and 1,200' transition area at Pembina, North Dakota. The only comments received as a result of this circular expressed no objections.

The Rule

This amendment to Subpart G of Part 71 of the Federal Aviation Regulations (FAR's) establishes 700' and 1,200' transition areas at Pembina, North Dakota, to provide controlled airspace for aircraft executing the new VOR runway 33 standard instrument approach procedure developed for the Pembina Municipal Airport, Pembina, North Dakota.

Drafting Information

The principal authors of this document are Robert E. Greene, Operations, Procedures and Airspace Branch, Air Traffic Divsion, and Daniel J. Peterson, office of Regional Counsel.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended effective 0901 G.m.t., October 30, 1980, as follows:

By amending Subpart G, § 71.181 (45 FR 445) so as to establish the following transition areas to read:

That airspace extending upward from 700' above the surface within a 6.5-mile radius of the Pembina Municipal Airport (latitude 48°56'43" N., longitude 97°14'31" W.); and within 2 miles each side of Pembina VORTAC (latitude 48°52'09" N., longitude 97°07'00" W.) 310° radial extending from the 6.5-mile radius area to 8 miles southeast of Pembina Municipal Airport; and that airspace extending upward from 1,200' above the surface beginning at latitude 49°00'00" N., longitude 97°30'00" W.; to latitude 48°48'00" N., longitude 97°30'00" W., to latitude 48°16'30" N., longitude 98°40'00 W.; to latitude 48°08'30"N., longitude 98°32'00" W.; to latitude 48°07'00"N., longitude 98°12'00" W.; to latitude 48°31'00" N., longitude 97°14'30" W. excluding portions outside the United States, Minnesota and the Grand Forks, North Dakota 1,200' transition area.

(Sec. 307(a) Federal Aviation Act of 1958 as amended (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); and 14 CFR 11.89)

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Aurora, Colo., on August 5, 1980.

Arthur Varnado,

Director, Rocky Mountain Region.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 281

[Docket No. RM79-40; Order No. 55-B]

Natural Gas Curtailment; Final Regulations Governing the Determination of Alternative Fuels for Essential Agricultural Users and Finding of No Significant Impact

August 11, 1980.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final Regulations and Finding of No Significant Environmental Impact.

SUMMARY: The Commission is amending Part 281 of its regulations by amending Subparts B and C that prescribe which fuels the Commission has determined to be economically practicable and reasonably available as a substitute for the essential agricultural use of natural gas and how certain essential agricultural users of natural gas must change their priority 2 entitlements for those volumes of gas for which there is an alternative fuel. The rule applies only to: (1) Essential agricultural use establishments that have requested from any direct supplier, over 300 Mcf of natural gas per day as a priority 2 entitlement; and (2) new boilers with a capacity of 300 Mcf per day, except diesel engines and turbines that can only use distillate fuels as a substitute for natural gas. The application of the rule is limited to the use of coal or residual fuel oil as alternative fuels.

This rule is promulgated under section 401(b) of the Natural Gas Policy Act of 1978 which restricts the protection from curtailment afforded under the Act by excluding from that protection any gas applied to essential agricultural uses, where there are other economically practicable and reasonably available fuels for those uses.

Essential agricultural users, local distribution companies and interstate

V 45 A G 1 8 0 UMI

pipelines must revise their priority 2 entitlements only to the extent there have been changes from the previous year. Any changes must be reported by August 31, 1980. Under the final rule interstate pipelines will receive sufficient information from customers in the next six weeks to be able to amend their indices of entitlement to reflect the changes in priority 2 entitlements. Revised indices must be filed by October 1, 1980.

The Commission has also made a finding that adoption of the final rule will have no significant environmental impact.

EFFECTIVE DATE: August 11, 1980.

FOR FURTHER INFORMATION CONTACT: MaryJane Reynolds, Federal Energy Regulatory Commission, Office of the General Counsel, 825 North Capitol St. NE., Washington, D.C. 20426, (202) 357–8455.

The Federal Energy Regulatory Commission (Commission) adopts final regulations that implement section 401(b) of the Natural Gas Policy Act of 1978 (NGPA) by establishing a generic alternative fuel determination for essential agricultural users and by updating filing requirements for natural gas curtailment plans that are affected by priority 2 (essential agricultural) uses of natural gas.

I. Background

On June 3, 1980, the Commission issued a notice of proposed rulemaking (the "June 3 notice") in this proceeding (45 FR 39283, June 10, 1980). The notice proposed implementation of a final rule pursuant to section 401(b) of the Natural Gas Policy Act (NGPA), to replace the interim rule promulgated by Order No. 55 on October 26, 1979.

Order No. 55 established that alternative fuel determinations under section 401(b)[1] would be made generically rather than case-by-case.[2] In that rule the Commission determined that, for the 1979–1980 heating season, only coal and residual fuel oil were reasonably available and economically practicable for essential agricultural users with requirements exceeding 300 Mcf per day. In addition, new boilers with a capacity in excess of 300 Mcf per day were deemed to have alternative fuel capability.

In the June 3 notice, the Commission proposed a final rule retaining the procedural features of the interim rule. The notice further provided that residual oil and coal would be determined to be reasonably available and economically practicable as alternative fuels. The Commission indicated that although the rule would be considered final, it would be subject to future amendment as circumstances might require.[3]

The statute requires that a rule implementing section 401(b) be made only after consultation with the Secretary of Agriculture. The Commission has consulted with the Department of Agriculture and its comments have been placed in the public files of this proceeding. In addition, a representative of the Department of Agriculture served as a member of the panel designated by the Chairman of the Commission to conduct a public hearing on the proposed rule.

The Commission appreciates the efforts of the Department of Agriculture in developing a full and sound decisional record and providing the Commission with comments and advice that have been given careful consideration. However, we must reject the position of one commentor who argued that the views of the Department of Agriculture must be accommodated unless they are clearly erroneous. No legal authority was cited for this "clearly erroneous" test. The Commission, not the Department of Agriculture, is ultimately responsible for implementing section 401(b). The statutory requirement for consultation is not synonymous with a joint rule fully agreed upon by both the Commission and the Secretary of Agriculture.

Upon consideration of the comments received in this proceeding as well as the record in the interim rule, the Commission has determined to adopt the rule proposed in the June 3 notice as a final rule, with certain minor changes. Residual fuel oil and coal will continue to be viewed as reasonably available and economically practicable alternatives to natural gas. Aside from technical changes, the only change from the proposed rule is that the proposal to exempt small users on the basis of *peak* day requirements will be deleted. The provision of the interim rule exempting small users with requirements of 300 Mcf per day will be retained. By the deletion of the word "peak" from the 300 Mcf per day limitation as proposed, the Commission intends that the 300 Mcf per day limitation be implemented in the same manner as was done during the past year.

II. Discussion of the Major Issues

A. Introduction

The issues raised in the comments on the proposed rule are in large part the same as those raised concerning the interim rule. The Commission has reviewed them but is not persuaded that it should change the positions expressed in Order No. 55. To the extent the issues are the same, the explanations given in Order No. 55 also apply to the arguments presented in the present proceeding.

B. Economic Practicability

The most difficult issues facing the Commission in this rulemaking is how to interpret the Congressional phrase "economically practicable alternative." The Congress established a special priority for agricultural users of natural gas in order, the Statement of Managers states, "to prevent unnecessary increases in the cost of food in this country." Congress provided that the Commission could deny this priority to users with an economically practicable alternative. Again, consistent with Congress basic concern about increases in the cost of food and fiber, the Statement of Managers states that the intention was not to require agricultural gas users to switch to a "high cost alternative."

Some agricultural users who want to protect their priority 2 classification would translate "economic practicability" into a simple test of comparing natural gas prices with prices of possible substitute fuels. They would say the substitute fuel is economically practicable only if it is equal to or less than the price of natural gas. Other essential agricultural users, however, suggest that a substitute fuel may be economically practicable so long as its price is within some reasonable range of the price of natural gas.

To industrial process and feedstock users, interested in keeping priority 2 as small as possible because their requirements are curtailed immediately before those in priority 2, "economic practicability" represents the other extreme on the spectrum of construction. They note that § 402 (the NGPA priority 3 protection for essential industrial process and feedstock users) also imposes an alternative fuel test. It, too, is based on economic practicability (and reasonable availability). The Statement of Managers indicates that in the context of § 402 economic practicability means the "economic feasibility" standard of the Federal Power Commission ("FPC") under extraordinary relief proceedings seeking waiver from curtailment. The advocates of this position do not articulate a specific test for determination of "economic feasibility." However, they appear to seek to limit the test to the economic feasibility of installing conversion facilities to use a fuel other than natural gas. To this end, the cost of the alternative fuel itself would be irrelevant. Cost of conversion would control.

Under the test proposed by the industrial process and feedstock users, substitute liquid fuel,[4] at any price, would be economically practicable for any essential agricultural user with installed alternative fuel capability. Some would go beyond this to say alternative fuel would also be economically practicable for additional essential agricultural users if the cost of conversion were "economically feasible."

As this brief summary indicates the statutory term "economically practicable" is not clear on its face, and the Commission must construe it and shall do so in a manner which will best comply with the overall statutory scheme embodied in Title IV of the NGPA. The Commission does not believe the proposed construction of either side gives consideration to the full intent of Congress. Numerous aspects of energy costs affect food prices in this country in a complex way. A precise estimate of the impact of using an alternative fuel would require a determination or not only the increase in energy cost but also the extent to which other production factors (*e.g.* capital and labor) could be substituted. We would also have to know how much of the increased cost could be passed through to consumers considering the elasticities of demand. This can be done with precision only on a facility-by-facility basis. The Commission first proposed a procedure along these lines for purposes of implementation of the interim rule. 44 FR 26894 (May 9, 1979). There was near unanimous opposition to such case-by-case analysis and decisionmaking. The required data submissions by essential agricultural users appeared burdensome. There was also concern that individual determinations would unduly delay implementation of the alternative fuel rule.

As part of finding some meaningful but workable operational definition of "economically practicable" the Commission has the difficult task of interpreting the terms "unnecessary increases in food costs," and "high cost alternatives". Even with precise facility-specific measures of output cost impacts as a result in the change in the cost of energy inputs, the Commission would still have to determine if the increases were "unnecessary" or the alternative fuel was "high cost."

With this legislative context in mind, we now consider how the various potential constructions of the alternative fuel exemption would affect the priority 2 classification established by Title IV. The position that any fuel more expensive than natural gas is not economically practicable, based on the data contained in this record, would result in no liquid fuel qualifying as an alternative fuel. Except for those few uses of coal, agricultural users would be given priority 2 treatment for all their requirements and the alternative fuel exemption would be largely meaningless. We do not believe Congress intended the alternative fuel rule to be so limited as to be illusory. Certainly, if the intent of the Congress was to limit alternative fuels to those that cost less than gas, it could have reached the result with simpler and clearer language.

Liquid fuel prices exceeded natural gas prices when the Natural Gas Policy Act was passed. (Appendix A; June 3 notice, Appendices A and B, Charts 2–3.) A major concern leading to passage of Title I of the NGPA was the need to increase domestic production of natural gas. The shortage in natural gas supplies had manifested itself in natural gas curtailments every year since the beginning of the 1970's and curtailment was projected for the winter heating season 1978–1979.[5] In sum, at the time the NGPA was passed all liquid fuel prices including those to agricultural users exceeded natural gas prices, and natural gas customers including essential agricultural users were experiencing curtailment. It was in this context that Congress said use of an alternative fuel should not cause "unnecessary increases in the cost of food in this country." Read in this light, the agricultural users are actually advocating that the alternative fuel rule must be construed to reduce their energy costs. Specifically, if economic practicability were measured as "equal to or less than natural gas costs" all essential agricultural users would have been entitled to priority 2 because all liquid fuels exceeded natural gas prices when the NGPA was passed.[6] Subsequent price increases in liquid fuels would be irrelevant. Thus, they could have substituted natural gas (even if liquid fuel prices remained constant). This would have *reduced* their energy costs. If such were the intent, why would Congress have expressed concern about unnecessary *increases*? Some users might suggest that only increases above fuel oil prices in effect when the NGPA was passed give rise to the "economic practicability" bar. However, these essential agricultural users fail to recognize that such a rule, in the face of decreased curtailment, could also lead to a reduction in the cost of energy.

The Commission is unable to accept a construction which implies that Congress was unmindful that fuel is only one of many costs involved in the cost of food. It is equally unable to accept a construction which ignores the level of curtailment—which is directly related to the amount of alternative fuel required and therefore to the energy cost component of food.[7] In reaching this conclusion we are aware that Congress admonished against requiring the switch to high cost alternatives. However we do believe this language must be given meaning in the context of the impact that use of high cost fuel would have on the cost of food, and after projected curtailment levels have been factored in.

The economic feasibility test, advocated by process and feedstock users, yields a result as extreme, albeit opposite, as the result advocated by the agricultural users. It would have all essential agricultural users with

---

[1] Section 401(a) of the NGPA provides that essential agricultural uses of natural gas may not be curtailed except to the extent necessary to meet high priority uses. Section 401(b), however, provides that the curtailment status of section 401(a) shall not apply to those essential agricultural users for which the Commission, in consultation with the Secretary of Agriculture, determines that an alternative fuel is reasonably available and economically practicable.

[2] The Commission had earlier proposed a case-by-case approach. The overwhelming response to the Notice of Proposed Rulemaking favored a generic procedure. The Commission accepted the arguments that a generic rather than a case-by-case procedure is persuasive, and Order No. 55 resulted. (See discussion below.)

[3] As indicated in Order No. 55, any changes, would, if possible, not be made during any winter heating season.

We recognize that a rule which may be changed due to changing circumstances makes long term planning more difficult. However, the NGPA is a new statute. It has created a new program and imposes a new alternative fuel test which the Commission believes requires consideration of circumstances, as they exist from time to time, for its proper implementation.

[4] At least one essential process and feedstock user recognizes the potential economic disruption its construction could visit upon essential agricultural users. PGC suggests synthetic fuels might not be considered economically practicable because of the cost. However, PGC fails to explain how cost of fuel would be applied in its economic feasibility test. (Hearing transcript, June 30, 1980, p. 138.)

[5] Indeed, the record in this proceeding shows that curtailment was approximately 20% in the winter heating season 1978–1979.

[6] We also note that to the extent essential agricultural users were using alternative fuels they were incurring, in certain situations, additional costs associated with handling the alternative fuel.

[7] Some commentors suggest that the additional cost of handling alternative fuel is also relevant. We agree that there may indeed be additional costs. However, we lack record data that under the present circumstances there have been substantial increases in handling costs of alternative fuels.

installed capability [8] excluded from priority 2. Such a test ignores the cost of fuels in its entirety. We believe Congress intended to create a preference for agricultural users when it passed § 401. Use of the economic feasibility test would return most essential agricultural users to their pre-NGPA curtailment priority. It would render § 401 virtually meaningless.

A determination of "unnecessary increases" in costs requires discretion which is best exercised in light of prevailing circumstances. It requires a balancing of the economic risks a particular construction would have upon the various users of natural gas. Given the present situation we believe we should consider the extent to which agricultural users of natural gas are likely to be curtailed. The level of curtailment has decreased for the past several winter heating seasons.

Annual Natural Gas Curtailments

[April through the following March]

Year	Volume (in MMcf) [1]
1976–77	3,853,886
1977–78	3,655,279
1978–79	3,128,952
1979–80	1,606,474
1980–81 (projected)	1,242,770

[1] Excludes pipeline to pipeline curtailments. Source: Form 16's of major interstate pipelines.

Our present projections indicate approximately 8% curtailment for the 1980–1981 winter heating season. This means that the amount of time an essential agricultural user which will lose priority 2 classification will have to use an alternative fuel, because of inability of pipelines to serve all customers, is likely to be small. On an annual basis, deliveries for residential, commercial and firm industrial users (roughly corresponding to curtailment priorities one, two and three) range between 70 and 75 percent of total deliveries to end-users.[9] The remainder are below priority 3 and generally serve various categories of boiler fuel requirements. Thus, it is unlikely that for this winter heating season process and feedstock users will experience significant curtailment caused by supply shortages. Therefore the alternative fuel question is reduced to a question of whether agricultural boilers should be given a preference over other industrial boilers. We believe agricultural users with No. 2 oil and propane as their only alternatives should be given such a preference over other boiler users but users with other alternative fuels should not.

No. 2 oil is the most expensive of the alternative liquid fuels. Its price almost doubled in 1979. We cannot predict the rate of increase in 1980.[10] However, under the circumstances, we believe the risk of additional increases in No. 2 oil prices is an unnecessary one to impose upon essential agricultural users. These considerations lead the Commission to decline to exercise its discretion to determine No. 2 oil to be an economically practicable alternative.

Propane prices appear to be generally higher than those of No. 2 oil. The same considerations lead the Commission to decline to find propane to be an economically practicable fuel.

The question of the economic practicability of low sulphur No. 6 oil is more difficult. The data show it is generally less expensive than No. 2 oil but more expensive than high sulfur No. 6 oil. For the years 1976–1979 Monthly Energy Review data indicates the price differential between low sulphur No. 6 and No. 2 fuel oil relative to the natural gas price shows that low sulphur No. 6 was 27% to 40% less expensive than No. 2 oil. The Form 423 data indicates these differentials are 21% to 30%. [Appendix A hereto.] The data also indicates that No. 6 oil has not increased in price as rapidly as No. 2 oil, and the gap between the prices of No. 2 and low sulphur No. 6 is widening.[11] We must also be mindful that curtailment levels are decreasing. These factors lead us to conclude that treating low sulphur No. 6 as an alternative fuel would impose a lesser economic risk on essential agricultural users. Accordingly, we believe that low sulphur No. 6 is economically practicable. It follows that high sulphur No. 6 is also economically practicable.

We realize that this rule does not apply to existing facilities which have not installed alternative fuel capability. Some persons have argued that the result of this rule is to create a preference for those users which have not chosen to install alternative fuel capability. We do not deny that such a preference is reflected in our rule. But we believe imposition of conversion costs could cause unnecessary increases in food costs in the face of current gas supply projections. Therefore, we believe this preference is outweighed by the increases in costs that could be associated with conversion.

C. Reasonable Availability

As indicated in the June 3 notice, recent data published by DOE indicate that stocks for both residual and distillate fuel oil have been well above the level usually considered acceptable. Many agricultural users, however, argue that our nation's reliance on imported oil makes supplies subject to sudden disruptions. Supplies are also said to be affected by such unpredictable factors as the weather, curtailment levels, oil prices, conservation, and changes in the economy. Consequently, these persons argue, neither distillate nor residual oil may be considered reasonably available. Instead of relying on present fuel inventories, they say, the Commission must consider the projected availability of these fuels. Others say that finding fuel oil reasonably available would be inconsistent with the fuel oil displacement program expressed in FERC Order Nos. 30 [12] and 30–A [13] as well as with the goal of minimizing our dependence on foreign oil.

We do not find these arguments persuasive. Neither the statute nor the Statement of Managers qualifies the term "reasonably available" with references to long-term availability. Moreover, Congress clearly intended to protect essential industrial process and feedstock users from curtailment, albeit in a priority lower than agricultural users. In our view, it is implausible to conclude that Congress intended to expose these process and feedstock users to curtailment when alternative fuel is available to agricultural users simply because these fuels might become unavailable at some time in the future.

Our determination that liquid fuel oil is reasonably available for essential agricultural users does not conflict with the oil displacement program or the goal

[8] The economic feasibility test may exclude additional essential agricultural users if the installation of alternative fuel capability is determined to be economically feasible. Such determinations could inordinately delay implementation of the alternative fuel rule.

[9] "Future Gas Consumption of the United States," Gas Requirements Committee, published by the University of Denver Research Institute. Volume 6, December 1975, Table A–5 and "Supplement to Volume 6," September 1976, Table 3; See also American Gas Association *Gas Facts* (1978), Tables 64 and 69.

[10] We wish to clarify that the inclusion of price data for January 1980 in the Notice of Proposed Rulemaking was solely for the purpose of providing the public with all the information available to the Commission at the time the notice was issued. However, the Commission does not believe it is appropriate to evaulate and project on the basis of data from a single month. Moreover, the Commission does not believe it is appropriate to compare monthly data with annual data because of seasonal and other short term price variability.

[11] In reaching this conclusion we are not unaware of the price increases in low sulphur No. 6 oil in January 1980. (June 3 notice, Appendix A) However, we do not believe it is appropriate to base decisions on data for only one month.

[12] Docket No. RM79–34, May 17, 1979 (44 FR 30323, May 25, 1979).

[13] Docket No. RM79–34, September 12, 1979 (44 FR 54472, September 20, 1979).

of reducing our dependence on foreign oil. The oil displacement program had at the time of adoption a two-fold basis: shortage of residual fuel oil and No. 2 oil as well as a need to reduce dependence on foreign oils. The Commission is considering continuation of the rule. Continuation of the oil displacement rule, in light of current circumstances, may appropriately be based solely on the need to reduce dependence on foreign oil. Moreover, it is highly unlikely that this rule will alter the total amount of gas and oil consumed in this country. At issue here is only the question of whether certain agricultural users or other industrial users will be required to utilize the alternative fuel.

United Gas Pipeline Company (United) urges that determinations of reasonable availability be made by means of "a relief mechanism whereby any customer actually deprived of alternate fuel would obtain relief from its supplying pipeline or distributor." United does not provide details concerning how such a plan would work. In any event, determining the availability of fuels by means of individual requests for relief would have the same disadvantages as the case by case approach to section 401(b), which we have considered previously and rejected.[14] In dismissing United's proposal as a rule of general applicability, we express no view on whether or not such an approach would be considered appropriate for an individual pipeline as a result of a petition for relief under section 502(c).

There was no significant debate on the availability of coal on a national level to those capable of using it.[15]

Based upon the record, we find that coal and residual fuel oil are reasonably available fuels within the meaning of section 401(b).[16]

D. Adequacy of Data

The Commission has studied data from Form 423 and EIA data in connection with this rulemaking. The public data were summarized in the June 3 notice and public comment on these data solicited. Comments indicate that these sources may reflect large users who may enjoy lower prices than certain essential agricultural users. Nobody however, has suggested an alternate source of data that more accurately measures costs to essential agricultural users. Nor is it apparent that data more directly focused on agricultural consumers would suggest different policy outcomes from those suggested by the Form 423 and EIA data.

Other comments indicate individual users have experienced prices that exceed those prices summarized in our June 3 notice. This is to be expected with any data set that is a composite of various reports from various sources. It does not however mean that the data are inappropriate for the general use made of them by the Commission. We have used the best data available and sought improved data. Even with more precise generic data of the sort advocated by some commentors, as we have previously stated, a highly accurate evaluation of impacts can be made only in a case-by-case determination, not in a rule of general applicability. Considering the inherent generality implied by a generic approach, we believe that the available data are adequate and the comments do not persuade us that further search for more precise generic series would be cost-effective.

E. New Boilers

Some commentors object to our exclusion of new boilers which are presumed to have alternative fuel capability. However, a contrary rule would remove incentives to install alternative fuel capability. This would not be sound public policy, and there is no indication that Congress intended such a result.

We are aware that the curtailment priority treatment by this Commission is not the only factor that may enter into a decision concerning alternative fuel capability on a new or replacement boiler. However, where an adjustment request established that the sole reason for installation of such capacity would be the operation of our rule, we believe it would be appropriate to consider the cost of such additional facilities and whether the incurring of such cost would cause unnecessary increases in the cost of food.

Several commentors oppose using the nameplate rated capacity to exempt boilers below 300 Mcf per day from an alternative fuel test. Some also object to using 16 hours as a measure of the capacity (expressed in MMBtu per hour). It is argued that boilers frequently are not used at full capacity and may be used for periods more or less than 16 hours.

We realize that actual use is not necessarily the same as nameplate rating and that boilers operate for periods other than 16 hours. Nevertheless, the use of nameplate capacity is an objective, verifiable, and administratively practicable method for excluding boilers below a certain size from operation of § 281.304(b) of the rule, which applies only to new boilers. Furthermore, it is often considered inefficient to limit a boiler's operation to 8 hours a day. Thus, 16 hours was selected as a reasonable, practical, middle ground.

F. Adjustments

A rule of general applicability cannot anticipate and accommodate every peculiar fact situation confronted by each person subject to the rule. We also realize that some users' actual experience will differ from the generalizations upon which the rule is base.[17] The impact of the rule on a particular user may give rise to a situation which warrants adjustment relief. Procedures for adjustments are available under 18 CFR 1.41.

In addition to the comments concerning regional availability and practicability of various fuels, a number of persons urged that the rule should provide for special problems faced by certain industries. Central Florida Gas Corporation, for instance, urges special protection for seasonal agricultural users against heavy curtailment at the height of their seasonal use. National Grain and Feed Association alleges that use of fuel oil in grain drying contaminates the grain because grain drying is a direct flame application. Likewise, National Milk Producers Federation says that use of fuel oil in mild processing results in an inferior product.

Our notice invited comment on the need and advisability of regional determinations of economical practicability and reasonable availability. Some persons advocated regional determinations. However, they provided little supporting data. Upon consideration of the available published data and the views and comments provided us, we do not believe an adequate basis exists for a regional rule at this time. One difficulty is the availability of regional data in the detail that could be desirable. For example, the inventory data published by the Economic Regulatory Administration shows availability on a national basis with reference to the "estimated minimum acceptable level," but ERA does not provide regional estimates of

[14] *See* Notice of Proposed Rulemaking, Docket No. RM79–40, August 29, 1979.

[15] One person alleges that coal is not reasonably available in California. The rule itself does not provide for circumstances that may affect individuals in certain regions. Unique circumstances are appropriately addressed in an adjustment proceeding.

[16] Since we have not been able to find that distillate fuel oil and propane are economically practicable, we need not determine whether they are reasonably available.

[17] For example, we are aware that the record indicates the cost of fuels to individual users differs from the costs published in the June 3 notice.

minimum acceptable levels. Our

plan" is revoked. The phrase is now

Filing and service dates for 1980

553 of the Administrative Procedure Act

minimum acceptable levels. Our experience with curtailment cases suggests that to collect sufficient data to implement a rule based on regional considerations or tailored to individual industries would be a major task. We do not believe such a delay in implementing section 401(b) in order to implement a regional plan would be warranted by the likely advantages relative to a national rule.

G. Periodic Reconsideration of the Rule

A number of persons noted that conditions of price and availability can change rapidly and cannot be accurately predicted over a long period of time. Some urged the Commission to reevaluate frequently any rule adopted. Others suggested that a series of interim rules would be preferable. Several persons urged the Commission to adopt a methodology that would be useful indefinitely without requiring periodic review. Still others noted that deep curtailments are not anticipated for the approaching heating season and urged the Commission not to adopt any rule until further data could be obtained.

The NGPA was enacted in 1978. We do not believe that our duties under that law permit further delay in promulgating a final rule under section 401(b). Moreover, for reasons previously discussed, we have decided not to adopt a fixed formula for determining when alternative fuels are reasonably available and economically practicable.

Accordingly, we will endeavor to reconsider the rule adopted herein as changed circumstances may require, even though it is established as a final rule. We will also attempt, to the maximum extent practicable, to implement any required changes in time to allow adequate planning for future heating seasons. In any event, we do not anticipate changing the rule before the end of the 1980–1981 winter heating season.

H. The impact of this rule on other provisions in the NGPA.

Title II of the NGPA excludes from incremental pricing those essential agricultural users which do not have alternative fuel. The term is defined as fuel which is economically practicable and reasonably available. NGPA Section 206(b)(2). The Commission expects to issue a notice of proposed rulemaking in a separate docket in the near future which will seek comment on the appropriate alternative fuel test for purposes of incremental pricing. A number of people have commented in this proceeding (Docket No. RM79–40) concerning the application of this rule to incremental pricing. The Commission has not addressed the question of incremental pricing in this docket and will not do so. Rather it will reach a determination on the appropriate alternative fuel rule for Section 206(b) following further rulemaking proceedings.

Similarly, many persons have commented that the alternative fuel test for Section 402 is also one of economic practicability and reasonable availability. They urge that the same test must be applied to Section 401 and 402. However the Commission has just recently taken referral of the rule proposed by the Economic Regulatory Administration for implementation of Section 402. See Docket No. RM80–67. No rule has yet been issued establishing a priority 3 for essential industrial users and process users. Such a rule must be adopted by ERA before the Commission implements the Section 402 alternative fuel rule. Accordingly, the meaning of the alternative fuel rule in Section 402 is not before the Commission at this time, and it would be inappropriate to attempt to construe its meaning in the context of this discussion of Section 401.

I. The Environmental Assessment

In an environmental assessment of the proposed rule, Staff concluded that the effects of the rule on air quality would be insignificant and the effects on agricultural costs of production would be small. The assessment was made available to the public in the Commission's Office of Public Information and comments were invited.

Staff's environmental assessment is predicated on the assumption that curtailments will be no worse than in the 1976–1979 heating season. Certain persons object to the use of the 1978–1979 curtailment levels and argue that the 1976–1977 levels, or even 100 percent curtailment, should be assumed. We do not agree. As shown in the table below, the 1976–1977 year was a watershed for curtailment, and included the coldest winter in fifty years. Although the 1978–1979 heating season is not the year of highest curtailment, nonetheless, substantial curtailment did occur that year as well, certainly signficantly more curtailment than occurred during the 1979–1980 year or than is projected for 1980–1981.

Annual Natural Gas Curtailments

[April through the following March]

Year	Volume (in MMcf) [1]
1973–74	1,399,444
1974–75	2,209,002
1975–76	3,130,260
1976–77	3,853,886
1977–78	3,655,279
1978–79	3,128,952
1979–80	1,606,474
1980–81 (projected)	1,242,770

[1] Excludes pipeline to pipeline curtailments. Source: Form 16's of major interstate pipelines.

Moreover, several of the problems experienced by pipelines during 1976–1977 have been mitigated by the construction of additional pipeline capacity and by the development of more storage facilities. Finally, the passage of the NGPA has made significant volumes of additional supply available to the interstate market, at least in the near term. The suggestion that analysis of the proposed rule should be based on 100 percent curtailment of natural gas bears no relation to anything that is likely to occur in the reasonably foreseeable future. The curtailment level experienced during the 1978–1979 winter is an appropriate assumption to include in the environmental analysis.

National Council of Farmers Cooperatives incorrectly alleges that Staff failed to consider the effect on nonagricultural users of finding that no alternative fuel is economically practicable and reasonably available. Staff considered this alternative (Environmental Assessment at 19–20) and concluded that under such a rule, nonagricultural users could be more severely effected than agricultural users would be under the proposed rule.

Based on Staff's environmental assessment, the Commission finds that the rule adopted herein does not constitute a major federal action significantly affecting the environment.

J. Other Issues

Two persons requested that the rule be clarified to indicate that priority 2 status may be retained for those users of natural gas for which an agricultural user cannot use alternative fuels, even though the user has the ability to use alternative fuel for other uses at the same establishment. The interim rule was so clarified.[18] The rule adopted herein retains those features of the interim rule not specifically amended.

IV. Section-by-Section Summary of the Amendments

Definitions and cross references (§ 281.203). Section 281.203(a)(17), which defines "currently effective curtailment

[18] Order No. 55–A, Docket No. RM79–40, Order Denying Rehearing, February 19, 1980, at 5–6.

plan" is revoked. The phrase is now self-explanatory because the March 1, 1979 date is no longer relevant in describing existing plans.

Tariff filing requirements (§ 281.204). Section 281.204(b)(3) provides that the index of entitlements shall not include the volumes of natural gas for which the essential agricultural user has the ability to use an alternative fuel as determined under Subpart C. Under the interim rule, each interstate pipeline was required to amend its index of entitlements to remove from the priority 2 classification and place in an appropriate priority of service category "any volumes of natural gas included in any index of entitlements that is effective on October 31, 1979 (or on November 30, 1979, if the pipeline elects to file tariff sheets under paragraph (a)(2) of this section)." Under this final rule, a pipeline is required to amend its index of entitlements "pursuant to paragraph (b)(2)" to remove from the priority 2 classification and place in an appropriate priority of service categtory any volumes of natural gas for which the user has an ability to use alternative fuel if such volumes are included in any index of entitlements that is effective on or after October 31, 1979.

A new § 281.204(b)(4) is added to provide an optional deadline for revising indexes of entitlement in 1980 to accommodate alternate fuel capabilities. Notwithstanding anything in paragraph (b)(2) (periodic update of the index of entitlements), a pipeline may elect to file its revised index of entitlements on November 1, 1980, with a proposed effective date December 1, 1980, if the pipeline files with the Commission's Secretary by October 1, 1980 a written notice of its decision to file its revised index on November 1, 1980, and also continues its existing index in effect until December 1, 1980.

Filing and documentation (§ 281.211). Section 281.211(b)(1)(ii)(D) is amended to provide that a request for classification of any essential agricultural requirement as a priority 2 entitlement shall include, with respect to any agricultural user to which Subpart C (alternative fuel determinations) applies, the data and calculations necessary to determine alternative fuel volumes under § 281.304.

Section 281.211 is amended to provide that for years subsequent to 1979, the data required by this paragraph must be filed only to the extent that there has been a change in essential agricultural requirements. This amendment makes it clear that changes resulting in reduced agricultural requirements must be filed, as well as requests for changes reflecting increased requirements.

Filing and service dates for 1980 (§ 281.216). Section 281.216 is amended by designating the existing paragraph [19] as paragraph (a) and by adding a new paragraph (b) to provide that if the pipeline elects to file its revised index of entitlements on November 1, 1980, under § 281.204(b)(4), the Data Verification Committee shall submit its report by October 23, 1980.

Definitions (§ 281.303). Section 281.303(a) of the interim rule defined "ability to use" an alternative fuel as meaning that an essential agricultural use establishment had, on August 29, 1979, the installed physical capability to use the alternative fuel and used that alternative fuel, in any amount, at any time after 1973, for an essential agricultural use. The final rule amends this definition by inserting the phrase "or thereafter acquired" after "on August 29, 1979." A similar change is made in § 281.304(a)(2).

Section 281.303(h) defined "essential agricultural requirements" to mean volumes of natural gas certified by the Secretary of Agriculture and calculated in accordance with 7 CFR 2900.4. This section is clarified by adding the words "and § 281.208(b) of this Part" to the end of the sentence.

Filing of amendments to essential agricultural requirements and priority 2 entitlements (§ 281.305). Under Order No. 55, this section provided for filing amendments to priority 2 entitlements to reflect alternative fuel volumes. Since that process has been completed, § 281.305 (a), (b)(2), (c), and (d) are no longer necessary and are deleted. The section is now entitled "General Rule." Existing paragraph (b)(1) is revised and made the general rule. It provides that any essential agricultural user subject to this subpart that has requested from any direct supplier priority 2 classification for volumes for any essential agricultural use establishment shall reduce its essential agricultural requirements calculated under § 281.208 to reflect the exclusion of volumes of natural gas for which its essential agricultural establishment has alternative fuel volumes under § 281.304.

V. Effective Date

These regulations are being issued effective immediately. The Commission finds good cause to waive the 30-day delay in the effective date under section 553 of the Administrative Procedure Act. In order that the interstate pipelines have sufficient opportunity to amend the indices of entitlements by the winter season, data on alternative fuels must be requested and transmitted to the pipelines in the next few weeks. In a curtailment situation, permitting priority 2 natural gas to be used this winter by essential agricultural users that are able to use an alternative fuel, as defined in § 281.303, could jeopardize the availability of natural gas to process and feedstock users that do not have the ability to use alternative fuels.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432; Department of Energy Organization Act, 42 U.S.C. 7101–7352; E.O. 12009, 42 FR 46267.)

In consideration of the foregoing, Part 281, Chapter I of Title 18, Code of Federal Regulations is amended as set forth below, effective immediately.

By the Commission. Chairman Curtis voted present.

Kenneth F. Plumb,
Secretary.

[19] Contemporaneously with the Notice of Proposed Rulemaking issued in this proceeding on June 3, 1980, the Commission issued a rule in Docket No. RM79–15 adding a new § 281.216(a). The rule provides that under Subpart B filing and service dates for 1980 shall be the same as for 1979, notwithstanding anything to the contrary in § 281.212(d) or § 281.213(c).

§ 281.203 [Amended]

1. Section 281.203(a)(17) is revoked.

2. Section 281.204 is amended in paragraph (b) by revising second sentence of paragraph (b)(3) and by adding a new paragraph (b)(4), to read as follows:

§ 281.204 Tariff filing requirements.

* * * * *

(b) * * *

(3) * * * Each interstate pipeline shall amend its index of entitlements pursuant to paragraph (b)(2) of this section to remove from the priority 2 entitlements and place in an appropriate priority of service category any such volumes or natural gas included in any index of entitlements that is effective on or after October 31, 1979.

(4) Notwithstanding paragraph (b)(2) of this section, a pipeline may elect to file its revised index of entitlements on November 1, 1980 with a proposed effective date of December 1, 1980, if the pipeline:

(i) Files with the Secretary no later than October 1, 1980, a written notice of its decision to file its revised index of entitlements on November 1, 1980; and

(ii) Continues the effectiveness of its existing index of entitlements filed under this subpart B until December 1, 1980.

* * * * *

§ 281.211 [Amended]

3. Section 281.211 is amended by revising paragraph (b)(1)(ii)(D) and by

revising the first sentence of paragraph

§ 281.216 [Amended]

§ 281.304 [Amended]

18 CFR Part 282

economic judgments that Congress

argument can be made that Order No. 80

revising the first sentence of paragraph (b)(4)(ii), to read as follows:

* * * * *

(b) *Priority 2.* * * *

(1) *Essential agricultural users.* * * *

(ii) * * *

(D) Includes with respect to any essential agricultural user to which Subpart C applies the data and calculations necessary to determine alternative fuel volumes under § 281.304.

* * * * *

(4) *Subsequent request.* * * *

(ii) For years subsequent to 1979, the data required by this paragraph must be filed only to the extent that there has been a change in essential agricultural requirements.

* * * * *

§ 281.216 [Amended]

4. Section 281.216 is amended by designating the existing paragraph as paragraph (a) and by adding paragraph (b) to read as follows:

(a) * * *

(b) The Data Verification Committee shall submit its report not later than October 23, 1980, if the pipeline has elected under § 281.204(b)(4) to file its revised index of entitlements on November 1, 1980.

§ 281.303 [Amended]

5. Section 281.303 is amended by adding in paragraph (a) the words "or thereafter acquired" between "1979," and "the", and by adding at the end of paragraph (h) the words "and § 281.208(b) of this Part."

§ 281.304 [Amended]

6. Section 281.304(a)(2) is amended by adding the term "or thereafter acquired," between "1979" and the word "the".

7. Section 281.305 is revised to read as follows:

§ 281.305 General Rule.

Any essential agricultural user subject to this subpart that has requested from any direct supplier priority 2 classification for volumes for any essential agricultural use establishment shall reduce its essential agricultural requirements calculated under § 281.208 to reflect the exclusion of volumes of natural gas for which its essential agricultural establishment has alternative fuel volumes under § 281.304.

[1] As reported in DOE/EIA Energy Data Report entitled *Cost and Quality of Fuels for Electric Utility Plants* (Annual summary data 1976–1979) and Monthly Report for January 1980. Note: All prices are delivered prices to steam electric plants. Prices paid for No. 6 fuel oil include prices paid for minor amounts of No. 4 and No. 5 fuel oil, crude and topped crude.

[2] Fuel oil prices are reported on FEA Form P302–M–1, "Petroleum Industry Monthly Report for Product Prices." Natural Gas Prices are those paid by industrial customers of major interstate pipeline companies as reported on FPC Form No. 11, "Natural Gas Pipeline Company Monthly Statement."

[3] The price data for coal is the same as shown under FPC Form No. 423 price data.

[4] Mathematically the price difference ratio is $P_R = P_1/P_2$; Where P_R = the price of fuel oil or coal and P_1 = the price of natural gas. The ratio indicates the percent difference between natural gas and alternate fuel prices. For example in January 1980 electric utilities reported that in that month they paid 1.897 times more (189.7 percent) for No. 2 fuel oil than they paid for natural gas. As determined in Docket No. RM79–40 NOPR issued June 3, 1980, corrected for clerical/typographical error.

[FR Doc. 80–25004 Filed 8–15–80; 8:45 am]

BILLING CODE 6450–85–M

18 CFR Part 282

[Docket No. RM80–10]

Incremental Pricing; Order Denying Rehearing and Revoking Amendments Made by Order No. 80

Issued: August 1, 1980.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Order Denying Rehearing and Revoking Amendments Made by Order No. 80.

SUMMARY: On June 5, 1980, the Consumer Energy Council of America filed a petition for rehearing of Order No. 80, raising a single issue—whether the legislative veto provisions of section 202 of the Natural Gas Policy Act of 1978 (NGPA) are constitutional. In this order denying rehearing, the Commission finds that sound administrative practice requires it to presume the constitutional validity of all provisions of the NGPA. Nevertheless, since the constitutional issue raised here has not yet been spoken to by the Supreme Court, the Commission notes that it is possible that the legislative veto of section 202 could eventually be held to be invalid. In view of this potential, the Commission also acts in this order to revoke the amendments made by Order No. 80, on the basis that the underlying premise of its decision to promulgate the order would no longer apply without the legislative veto mechanism.

EFFECTIVE DATE: August 1, 1980.

Tom S. Runge, Office of the Chairman, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, (202) 357–8335.

Stephen Melton, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, (202) 357–8467.

In Order No. 80, issued on May 6, 1980, the Commission promulgated a rule in this docket and submitted it to Congress as required by section 202(c) of the Natural Gas Policy Act of 1978 (NGPA). That rule would have expanded the scope of incremental pricing from its present coverage of industrial boiler fuel facilities to include "any industrial facility which is within a category defined by the Commission." The rule proposed to Congress would have extended the incremental pricing program "to all industrial users except those specifically exempted." (Order No. 80 at 6)

In Order No. 80, the Commission did not "second-guess the social and economic judgments that Congress made in enacting Title II." (Order No. 80 at 5) On the contrary, it saw its role as a more limited one, *i.e.*, it brought "its technical expertise to bear on the design of a workable Phase II rule that [could] best advance the purposes set by Congress." (*Id.*) The Commission believed, however, that in the last analysis the Congress had reserved to itself the question "whether this Phase II submittal meets adequately the social and economic goals of the incremental pricing program or, indeed, whether those goals are still appropriate." (*Id.*)

On May 6, 1980, the Commission transmitted the rule to Congress. On May 20, 1980, the House of Representatives passed a Resolution of Disapproval (H. Rep. 655),[1] which under the language of section 202 of the NGPA makes the rule ineffective.

On June 5, 1980, the Consumer Energy Council of America, *et al.* ("CECA"), filed a timely petition for rehearing of Order No. 80. In that petition, CECA raises a single issue—whether the legislative veto provision of section 202 is constitutional.[2] On July 8, 1980, the Commission granted rehearing solely for the purpose of further consideration.

We recognize that the constitutional issue concerning the validity of the legislative veto mechanism is one which has not been decided by the Supreme Court of the United States, and is one on which there is great diversity of view both within the Federal government and among legal scholars. Nevertheless, it was, at the time order 80 was promulgated and today remains, our view that sound administrative practice requires that presumption of constitutional validity of the statutes entrusted to this Commission for implementation.[3]

If section 202(c) of the NGPA containing the Congressional review and legislative veto mechanism is eventually held to be invalid, an argument can be made that Order No. 80 would take effect at the expiration of 90 days after the 30-day Congressional review period. This is CECA's position. In view of this potential (a matter squarely presented to us in this application for rehearing), the Commission has examined the underlying premise of its decision to prescribe Order No. 80 in its present form. As we noted in Order No. 80, many commenters suggested that no section 202 rule, or the narrowest possible section 202 rule, be prescribed. We refused to entertain these arguments, stating:

> The Commission believes that it was neither requested nor authorized to second-guess the social and economic judgments that the Congress made in enacting Title II. The role of the Commission under Section 202 is more limited. Instead, the Commission is instructed to bring its technical expertise to bear on the decision of a workable Phase II rule that can best advance the purposes set by the Congress. It is up to the Congress to decide whether this Phase II submittal meets adequately the social and economic goals of the incremental pricing program or indeed, whether those goals are still appropriate. (Order No. 80, p. 5)

Clearly, if section 202(c)'s Congressional review provisions are constitutionally invalid, then our premise for refusing to consider these arguments, namely that it "is up to Congress to decide whether this Phase II submittal meets adequately the social and economic goals of the incremental pricing program", is equally invalid, and cannot be the basis for such refusal. If the Commission refused to consider material arguments made in the course of the rulemaking because of this faulty premise, then Order No. 80 cannot be the product of reasoned decisionmaking and the Commission is neither authorized nor required to place it in effect. Thus this question seems largely academic at this point, and Order No. 80 cannot take effect under its terms at the conclusion of the 90-day period which follows the conclusion of the 30-day Congressional review period.

As previously pointed out, the Commission has not yet independently evaluated whether the Phase II rule meets the social and economic goals of the Title II incremental pricing program.

But we question whether the marketplace should be left exposed to the potential of significant disruption should the courts not share this view of the law. We think such an exposure to be most inadvisable. Hence, we propose to adopt an administrative course which should remove this jeopardy.

Moreover, if the Commission were to make that independent social and

[1] This is the only instance where Congress has exercised its veto in relation to the incremental pricing progam.

[2] CECA raises this issue by requesting the Commission to strike the following language from the Order:

". . . if neither House of Congress passes a Resolution of Disapproval of the regulations transmitted to them in this Order within 30 days of Congressional review, as determined in accordance with section 507(b) of the NGPA . . . ." (Order No. 80, p. 93)

Petitioners apparently believe that the elimination of this language could make the rule effective in accordance with its remaining terms.

[3] See *Califano* v. *Sanders*, 430 U.S. 99, 109 (1976); *Ostereich* v. *Selective Board*, 393 U.S. 233, 242, (1968) (Justice Harlin concurring in the result); *Buckeye Industries, Inc.* v. *Secretary of Labor*, 587 F.2d 231 (5th Cir. 1979); and *Speigel, Inc.* v. *Federal Trade Commission*, 540 F.2d 287 (7th Cir. 1976).

economic evaluation—and we stress that we have not made it previously and do not make it here today—we believe as an initial matter that we might well have very serious reservations as to the wisdom of making the Phase II rule effective. As we pointed out in Order No. 80, there are serious questions of general social and economic policy that deserve to be addressed. For example, we noted in the order that the rule there prescribed did not appear to be capable of carrying out the market ordering function of incremental pricing.[4]

Moreover, we note that the rule in its present form [5] might be an imperfect instrument for sheltering high-priority users from the economic impacts of rapidly increasing natural gas prices. Perhaps a better mechanism can be devised but if so, we were not able to discover it in the strict statutory period for implementation of incremental pricing.

In order to fairly make a broader judgment on the social and economic desirability of the rule as a sheltering device, or as a market-ordering device, the Commission would also have to consider and weigh much more imponderable and possibly contervailing factors—for example, the possibility that these fairly minimal savings to millions of high-priority users will be more than offset, in a broad social and political sense, by the significant surcharges and the increased costs of required reporting and accounting measures that would be imposed on the natural gas users subject to the Phase II rule.

A related and equally difficult social policy judgment that should properly be made by the Commission—if the Congress cannot constitutionally make it by way of the section 202(c) legislative veto—is whether the projected savings for high-priority users in annual gas costs might not be largely offset, in a strictly monetary sense, by increased prices for consumer goods possibly caused by passed-on Phase II incremental pricing surcharges.

These imponderables, and the other major social and economic issues raised by Order No. 80, simply must be assessed, and a reasoned judgment reached upon them, before the rule takes effect. The House of Representatives made a judgment to reject this proposal after consideration of these and other social and economic issues. The Commission has not made and does not today attempt an independent evaluation of them.

Moreover, such an evaluation in the future would be aided by an opportunity to judge the implementation of the Phase I over the coming months and the accompanying opportunity to address and resolve any administrative problems that may be encountered.

This seems to us the wiser administrative course of action, one that would minimize the risk of economic dislocations to the industrial sector and avoid adding at this time further recessionary pressures on American industry. It is the administrative course which we would choose, if the choice were ours to make.

In order to assure that an opportunity to evaluate Phase I, and the impacts of Phase II as proposed in the event section 202(c) is held invalid, the Commission will exercise its authority under sections 201 and 202 to amend the rule under section 201 to revoke the amendments made by Order No. 80. Revocation will permit the Commission in the future to carefully weigh these considerations and if appropriate prescribe a Phase II rule which it finds to be in the public interest.

The Commission's authority to amend is clear. Section 201 directs the Commission to prescribe an incremental pricing rule applicable to industrial boiler fuel facilities, and authorizes the Commission "from time to time" to amend the rule. Section 202 requires the Commission to amend the 201 rule to expand its applications to such other categories of industrial facilities as it may define. The amendment required by section 202 to the section 201 rule is part of the section 201 rule. Thus, the amendment may, by the terms of section 201, be amended "from time to time." By the terms of 202(a)(2), the amendment required by section 202 and all amendments "applicable to facilities to which the amendments required by this section applies (other than technical and clerical amendments)" are subject to the Congressional review procedure in section 202(c), if those procedures are constitutionally valid. However, the amendment made by this order will have legal effect only if section 202(c) is invalid. Moreover, if section 202(c) is invalid, then the Congressional review procedure it sets out is inoperative. The amendment shall, in this event, take effect immediately on issuance without submission to either House of Congress.[6]

The Commission orders: (A) The petition for rehearing is denied.

(B) The amendments made by Order No. 80 (45 FR 31622, May 13, 1980) to the Commission's regulations are revoked, effective on issuance of this order

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-24131 Filed 8-15-80; 8:45 am]

BILLING CODE 6450-85-M

[4] Order No. 80, pp. 57–66.

[5] As Order No. 80 pointed out, at p. 71, sheltered high-priority users would, on the average, probably be spared a total of about $.14 per Mcf of purchased gas. For the average household using natural gas for heating or cooking purposes, this translates into a savings of about $18 per year.

[6] It is similarly clear, if section 202(c) is invalid, that there is no requirement that Order No. 80 be made effective at any particular time or at all. Section 202(a)(1) requires the Commission, within 10 months after the enactment of the NGPA, to "prescribe" an amendment to the rule under section 201. However, under section 202(a)(2), the amendment prescribed "shall take effect only as provided in subsection (c) [of section 202]." If section 202(c) is invalid, the statutory mechanism for placing the rule in effect no longer exists, and the Commission is not required to place Order No. 80 in effect.

20 CFR Part 416

Pass Along of Federal Supplemental Security Income Benefit Cost-of-Living Increases to Recipients of State Supplementary Payments; Limitations on State Costs for Hold-Harmless States

AGENCY: Social Security Administration, HHS.

ACTION: Final rule.

SUMMARY: These final regulations provide the rules we will use to implement the pass-along provisions of the social security amendments enacted October 21, 1976 (section 2 of Pub. L. 94–585). Generally, these provisions require that States that supplement the Federal SSI benefit "pass along" Federal cost-of-living increases to individuals who are eligible for State supplementary payments. In order to meet this requirement, States that make supplementary payments on or after June 30, 1977, must agree to continue making these payments and to keep them at certain levels. If a State does not agree, or if the State agrees but does not keep the payments at the required levels, the State shall be determined by the Secretary to be ineligible for Medicaid reimbursement under title XIX of the Social Security Act. However, the State will not be found to be out of compliance because it did not keep its payments at the required level if it maintains its total annual expenditures for State supplementary payments. Another provision, known as the "preservation of hold-harmless provision," protects certain States

(currently Hawaii, Massachusetts, and Wisconsin) from an increase in their State expenditures when they pass along cost-of-living increases in Federal SSI benefits.

In these regulations, we describe (1) the requirements that States must meet under the "pass-along" amendments, (2) the general content of the agreements between the States and the Secretary, and (3) the basis for our finding that a State is not in compliance and the effect of this finding on the State. In addition, we (1) remove the parenthetical phrase in the definition of State supplementary payments that refers to burn-outs, utility turn-offs, etc., because it is no longer necessary, and (2) amend the regulations on hold-harmless protection so that they provide protection for "passing along" Federal cost-of-living increases.

EFFECTIVE DATE: These final regulations shall be effective August 18, 1980.

FOR FURTHER INFORMATION CONTACT: Clara B. Powell, Legal Assistant, Office of Operational Policy and Procedures, Office of Regulations, Social Security Administration, Baltimore, Maryland 21235 (301) 594–7459.

SUPPLEMENTARY INFORMATION: On March 27, 1979, these rules were published in the **Federal Register** (44 FR 18238) as a Notice of Proposed Rulemaking (NPRM) with a 60-day comment period. We received a total of 12 comments that we discuss following our discussion of the provisions of the regulations.

Which States Must Comply With The Provisions

If a State makes supplementary SSI payments on or after June 30, 1977, the State must comply with the provisions of section 1618 of the Social Security Act (the pass-along amendment). Generally, this section requires that States have in effect an agreement with the Secretary to continue to make supplementary payments at least at the same levels as the supplementary payment levels in effect in December 1976. If the State did not make supplementary payments in December 1976, the levels that the State must maintain are the levels for the first month after December 1976 in which the State makes supplementary payments. If a State does not meet these requirements, the State shall be determined by the Secretary to be ineligible for Medicaid reimbursement. However, a State with an agreement will not be found to be out of compliance because it did not maintain its payment levels if its total expenditures for supplementary payments in the 12-month period beginning with each effective date of Federal SSI cost-of-living increases are at least equal to the State's total expenditures for supplementary payments in the immediately preceding 12-month period.

Purpose of the Amendment

The purpose of the pass-along amendments is to encourage States to pass along to individuals who are eligible for State supplementary payments under the SSI program the amount of the Federal cost-of-living increase. Some States have not done this in the past. Instead, when Congress enacted cost-of-living increases in the Federal SSI benefit amount, some States would reduce the levels of the State supplementary payments by amounts up to the amount of the Federal increase. The SSI beneficiaries in these States would receive the same or slightly more in Federal/State benefits as before the increase, and therefore would not receive all the additional money provided by the Federal cost-of-living increase.

We are adding new §§ 416.2095–416.2098 to the SSI regulations. These provisions describe (1) the scope and substance of the requirements that States must meet under the pass-along amendments, (2) the general content of the agreements between the States and the Secretary, (3) the conditions for meeting the pass-along requirements, and (4) the basis for our finding that a State is not in compliance and the effect of this finding on the State. We also are making a technical change in § 416.2001(a) that defines "supplementary payments," a term used in the pass-along amendments, and amending § 416.2080 to give full protection to hold-harmless States in passing along Federal SSI cost-of-living increases.

State Supplementary Payments That Are Covered by the Pass-Along Requirements

The pass-along requirements apply to the type of payments described in section 1616(a) of the Act. These payments are known as optional supplementary payments. The law states that these payments must be made (1) in cash, (2) by a State or political subdivision, (3) on a regular basis, (4) to individuals who are eligible, or would be eligible except for their income, for Federal SSI benefits under title XVI of the Social Security Act, (5) as assistance based on need, and (6) in supplementation of Federal SSI benefits, as determined by the Secretary.

The pass-along requirements also apply to State supplementary payments made under section 212 of Pub. L. 93–66 and § 416.2001(c) of the regulations. These payments are known as mandatory minimum supplementary payments. They are available only to individuals who received aid for the month of December 1973 under a State plan approved under title I, X, XIV, or XVI (AABD) of the Social Security Act.

Optional or mandatory minimum supplementary payments may be administered by the State or by the Federal government at the State's option. The pass-along requirements apply whether the State or the Federal government administers the payments. They also apply whether the person who receives those payments receives both a Federal SSI benefit and a State supplementary payment or, because of his or her income, receives only a State supplementary payment. The pass-along requirements apply to the latter type of payment, known as "supplement-only payments," because they are specifically referred to in the description of supplementary payments in section 1616(a) of the Act and because they are required under the formula for mandatory minimum supplements under section 212 of Pub. L. 93–66. A person who has countable income and receives a supplement-only is in the same relative financial position as a person who receives both the Federal SSI benefit and a State supplementary payment. The pass-along requirements do not apply to vendor payments, interim assistance payments, or payments made under other Federal programs such as title IV, XIX, or XX of the Social Security Act. None of these payments is a supplementary payment of the type described in section 1616(a) of the Act or section 212 of Pub. L. 93–66. Vendor payments are not made directly to the individual but rather to the vendors of goods and services provided to the individual. Benefits under other titles and interim assistance payments are not made in supplementation of Federal SSI benefits.

State Agreement With the Secretary and Conditions for Compliance

In § 416.2096, we discuss the State agreement with the Secretary. Basically, the State must have an agreement with the Secretary to continue making supplementary payments and maintain these payments at least at the same levels in effect in December 1976. If a State that has entered into an agreement does not maintain these levels, but does make total State supplementary payments (that is, total expenditures) in the 12-month period beginning with the date of Federal cost-of-living increase that are at least equal to the total

requiring each individual's December

Therefore, to maintain its payment level,

either (1) the individual would be

payments made in the preceding 12-month period, we shall consider that the State has complied with its agreement with the Secretary.

In § 416.2096, we have added a discussion of the conditions for compliance with the pass-along requirement by a State that did not maintain payment levels or total expenditures during a relevant 12-month period. The conditions include a provision that if a State's total expenditures during a relevant 12-month period are less than its total expenditures in the immediately preceding 12-month period (a "shortfall"), a State may make up the shortfall by increasing its total expenditures within the 12-months following the relevant period. For example, a State's expenditures in the period July 1982 through June 1983 totalled $3,000,000. In the preceding 12-month period (July 1981 through June 1982) the State's total expenditures were $3,090,000. Thus, $3,090,000 is the amount the State should have expended during the period July 1982 through June 1983. Therefore, the State must spend $90,000 in the following 12-month period over the required total expenditures for that period in order to be considered to have complied with the pass-along requirement during July 1982 through June 1983. The $90,000 used to make up the shortfall in the period July 1982 through June 1983 will be treated as an expenditure in that period only. Further total expenditures for the period July 1983 through June 1984 will be the actual total expenditures less $90,000.

As an alternative, § 416.2096 also includes the condition that the State may restore each of the payment levels that it failed to maintain retroactively to the beginning of the 12-month period in question and make a single retroactive benefit payment to each of the affected beneficiaries. Therefore, if the only alternative open to a State were to try to meet the total expenditures test, it would have to greatly overspend to make sure it did not suffer a shortfall. Since we do not believe that this was what the Congress intended as evidenced in the legislative history of the pass-along provisions, we have provided special provisions to permit a State to make retroactive adjustments.

We believe these rules recognize the intent of the pass-along provision which, in effect, allows a State to either maintain payment levels or maintain total expenditures. The legislative history of the provision notes that the pass-along provision will not require a State to spend more for supplementary benefits but only prevents a State from reducing its expenditures when Federal SSI benefits are raised. Because of the various factors that affect actual benefit payments during a 12-month period, it is virtually impossible for a State to precisely meet in a current period total expenditures for the preceding 12-month period. For example, a State's total expenditures are affected by a reduction in total number of beneficiaries, increases in beneficiaries' incomes that cause reductions in benefit payment amounts, changes in beneficiaries' payment levels due to changes in living arrangements, and refunds of overpayments by beneficiaries. Therefore, even if a State budgeted for expenditures in a 12-month period (or increased some of its supplementary payment levels) with the intent to maintain its total expenditures, these factors, as experience has shown, could cause a State to fall short in meeting the expenditures test of compliance during any particular period. Moreover, whether a State has met the expenditures test for a particular 12-month period can only be ascertained after that period.

In addition, because States were required to make fiscal decisions and set their payment levels without the benefit of final regulatory guidelines, and recognizing the administrative burden that would result if States were required to make retroactive adjustments to its expenditures or payment levels for a 3-year period, we have provided a special rule for correcting noncompliance with respect to the 36-month period ending June 30, 1980. Under this rule, excess State expenditures during any of the 12-month periods from July 1977 through June 1981 measured against total expenditures in the period July 1976 through June 1977 may be balanced (or offset) against shortfalls in any of the 12-month periods from July 1977 through June 1980. This rule is being given limited application because of the reasons stated. With the publication of the regulations, the basis for continuance of this exception will no longer exist.

In a recent court case *Reichenthal* v. *Harris,* U.S. District Court (E.D. NY), No. 79 C 1632, involving the pass along of cost-of-living increases to New York recipients of State supplements, the Court noted the absence of regulations, and discussed noncompliance with the pass-along requirement as well as the severity of terminating a State's Medicaid funding for noncompliance. In this regard, the Court indicated that under regulations interpreting the pass-along provisions we may find compliance if reasonable efforts were made to comply and the shortfall in expenditures was *de minimus.* Further, substantial compliance could also be found in light of subsequent over-expenditures.

Accordingly, the foregoing policies are also in response to public comments discussed below and the views expressed in the *Reichenthal* opinion.

State Supplementary Payment Level

In § 416.2097, we define the supplementary payment level as the amount of the State supplementary payment that an individual in each payment category would have received for December 1976 if the individual had no countable income. States must maintain these levels to comply with the pass-along requirements.

For example, the Federal SSI benefit amount in June 1977 for an individual having no income was $167.80 per month. If a State made a $50 optional supplementary payment per month to the individual in this situation, he or she would receive a total payment of $217.80 per month under the SSI program. In July 1977, the Federal cost-of-living increase was $10 and the Federal SSI benefit amount was increased to $177.80 per month. A State would maintain the level of its supplementary payment to this individual if the State continued to make a $50 supplementary payment per month above the Federal SSI benefit level. Thus, the individual would receive a total payment of $227.80 per month under the SSI program, and the Federal cost-of-living increase of $10 per month would be passed along to him or her.

This is the only definition of supplementary payment level that would carry out the intent of the statute. If we defined the supplementary payment level as the total amount of the Federal and State payments before the Federal cost-of-living increase (in our example, $217.80 per month), the States could do exactly what Congress enacted section 1618 to discourage them from doing. When the Federal benefit increased, the State could decrease its supplementary payment and the total Federal plus State level still would be maintained. However, the SSI beneficiary would not receive the added money that he or she should receive from the Federal cost-of-living increase and there would be no pass-along.

Also, it would be contrary to the intent of the statute if we defined the "level" that must be maintained in terms of the amount of the State supplementary payment that the particular individual received (rather than the amount the State paid to individuals in that category who had no countable income). A definition

requiring each individual's December 1976 payment to be maintained would not accommodate changes in current countable income. Further, it would not give pass-along protection to individuals who become eligible for SSI payments after December 1976. The definition of State supplementary payment level in the regulations will allow for changes in actual payments to individual beneficiaries because of changes in their income.

Some examples follow that show what will happen to SSI benefits after a cost-of-living increase under these rules. For these examples, the Federal SSI standard payment amount is $168 before the cost-of-living increase and $178 after the increase. The State supplementary payment level is $50.

	Federal SSI cost-of-living increases	
	Before	After
Example 1		
Receipt of Federal SSI benefits, no outside income:		
Income	0	0
Federal benefits	$168	$178
State supplementary payment	50	50
Total	218	228
Example 2		
State supplement only, countable income $195 remains constant:		
Income	195	195
Federal benefits	0	0
State supplementary payment	23	33
Total	218	228
Example 3		
State supplement only, countable income title II benefit $195 (title II benefit is increased by same percentage as SSI following a cost-of-living increase):		
Income (title II)	195	208
Federal SSI	0	0
State supplementary payment	23	20
Total	218	228

We have already explained Example 1. Where an individual is receiving a Federal SSI benefit and has no outside income, the State maintains its supplementary payment level by continuing to pay $50 per month. The same principle would apply if the individual did have income, but not enough to reduce the Federal SSI benefit to zero.

Example 2 and Example 3 show what happens when an individual has enough income to offset the entire Federal SSI benefit but not the State supplementary payment as well. These are the State "supplement only" cases. In these situations, the State must again maintain a level of payment $50 above the increased Federal level, i.e., to a total of $228. In Example 2, the individual's outside income has not increased. Therefore, to maintain its payment level, the State must increase its supplementary payment by $10.

However, Example 2 is not the typical case. Most individuals who receive only a State supplementary payment do so because they also receive title II social security benefits. These benefits are automatically increased by increases in the cost-of-living. Example 3 shows that if the title II benefits rise by $13, the State can maintain its supplementary level up to $228 while actually reducing the State payment by $3. Since there are far more Example 3 cases than Example 2 cases, we believe that the States generally can maintain their payment levels for the individuals receiving only State supplementary payments and at the same time can reduce their total expenditures.

State Compliance with the Pass-Along Requirements

In § 416.2098, we discuss what we will require that the States do to show that they are complying with the pass-along rules. Generally, a State must keep records and provide information about (1) its supplementary payment levels in December 1976 and following months, (2) its total expenditures for supplementary payments in the 12-month period beginning July 1976 through June 1977 and following 12-month periods, and (3) its advance estimates of the total State supplementary payment expenditures in each 12-month period covered by the agreement. If a State is not complying with the pass-along rules, the State shall be determined by the Secretary to be ineligible for reimbursement under title XIX of the Social Security Act beginning with the first quarter it fails to comply.

Provision for "Hold-Harmless" States

The Congress also provided, in section 2(b) of Pub. L. 94–585, that certain States, referred to as hold-harmless States, shall be able to pass along Federal increases in SSI payments to beneficiaries without increasing a State's fiscal liability. The States currently protected by this provision are Hawaii, Massachusetts, and Wisconsin.

Because of this provision in Pub. L. 94–585, we have changed the regulations in § 416.2080 to allow the disregard of the amount of any Federal SSI benefit increase becoming effective after June 30, 1977, in the formula for determining fiscal liability. In almost all cases, these States are permitted to pass on the increases entirely at Federal expense whether the individual is receiving a Federal SSI benefit plus a State supplement or is receiving the State supplement only. In the latter case, either (1) the individual would be receiving Federal SSI benefits except that he or she had other income that prevented payment of the Federal SSI benefit, or (2) the increase would enable the individual to become eligible for Federal SSI benefits. For hold harmless purposes, payments will be counted in the period when paid regardless of whether any of the payments are credited to the immediately preceding 12-month period for purposes of determining the State's compliance with the pass-along requirements under the rules in § 416.2096.

Change in Definition of State Supplementary Payments

We have changed the definition of "State supplementary payments" in § 416.2001(a) to delete the parenthetical phrase in § 416.2001(a)(2) that refers to payments for burn-outs, utility turn-offs, etc. We do not believe that inclusion of these payments in the definition is appropriate for pass-along purposes. These payments were included previously to make sure that they were not counted as income. At that time, State supplementary payments were the only State payments based on need that were excluded from countable income. Since section 1612(b)(6) of the Social Security Act now specifically excludes from countable income any payments (regular or not) made by a State or locality based on need, specific mention of those payments as State supplementary payments is no longer necessary.

Discussion of Comments

On March 27, 1979, these rules were published in the **Federal Register** (44 FR 18238) as an NPRM with a 60-day comment period. We received 12 comments on the Notice of Proposed Rule Making, 7 from States, 3 from groups providing legal aid for the elderly, 1 from a senior citizen action coalition, and 1 from an attorney on behalf of several States. The comments and suggestions we received are summarized as follows:

1. Support for the Regulations

Comment: One group wrote to give support to the regulations.

Response: This comment requires no response.

2. Purpose of Amendment

Comment: One commenter argued that we understand the effect on the pass-along amendment by saying in the preamble that the purpose of the amendment is to encourage States to pass along the Federal increase. The commenter suggested that the law

"requires," not "encourages," the States to pass along the increases.

Response: As provided in section 1618 of the Social Security Act and in § 416.2098 of the regulations, a State is required to comply with pass-along provisions only if it wishes to be eligible for Medicaid reimbursement.

3. Levels of Supplementary Payments Not Set by State

Comment: One group complained that the pass-along provisions do not apply to a State whenever the optional supplementary payment levels are set by a political subdivision rather than by the State.

Response: The statutory requirement that a State agree to maintain the levels of its supplementary payments presupposes the State's authority to control the levels of payments. Therefore, a provision (§ 416.2095(b)(5)(i)) was included in the regulations that would exempt from the mandatory pass-along requirement those supplementary payments made by a political subdivision where the levels of the political subdivision's payments are not set by the State.

4. "Total State Expenditures"

Comment: One State official suggested that the phrase "total State expenditures for supplementary payments" as used in § 416.2098(b)(1), and defined in § 416.2098(b)(2), be interpreted to include the Federal "hold-harmless" contribution.

Response: The commenter's interpretation is correct. However, since § 416.2080 indicates that the Federal contributions are considered a share of "State supplementary payments," we do not believe any change in the wording of these sections is required.

Comments: Another State official argued that the regulations in § 416.2098(b) interpret the law too strictly by requiring that a State maintain its total expenditures for supplementary payments "in" the 12-month period. The commenter believed that a reasonable interpretation of the law would be maintenance of total expenditures "for" the 12-month period. Several commenters stated that the regulations should be modified to allow for post-year end adjustments in total State expenditures and objected to our "prohibiting retroactive adjustments."

Response: The regulation has been revised to provide for post-year-end adjustments.

Comment: Another State official suggested that the regulations are not clear as to how the "annual expenditures test" would operate. The official noted that in § 416.2098(b) total State expenditures are payments made "in" the 12-month periods, whereas in § 416.2098(a)(2) payments can be made "for" the periods. The same commenter suggested a 5 percent tolerance in meeting the total expenditures test or that the State be allowed to count total expenditures "for" a period.

Response: We believe we have addressed the commenter's concerns by providing for post-year-end adjustments.

5. "State Supplementary Payment Levels"

Comments: One commenter recommended that the language in § 416.2095(a)(2) be amended to include "supplementary payments at the December 1976 level." One commenter stated that the statute requires the State to maintain its supplementary payments rather than levels and that under no circumstances is a State required to increase its supplementary payments. Another commenter objected to "forcing States to increase need levels."

Response: Section 416.2095(a)(2) refers to § 416.2096 that includes the suggested language regarding maintenance of supplementary payments at the December 1976 level. In reference to the comment concerning statutory provisions, section 1618 requires that a State agree to maintain the levels of its supplementary payments as distinguished from the individual supplementary payment amounts. This requirement to maintain payment levels can result in an increase or decrease in the actual payment amount, depending on the individual's countable income. The State supplementary payment level, however, must remain fixed at whatever it was in December 1976, unless the State voluntarily raises it. The whole concept of SSI (unlike the former programs it replaced) is based on uniform benefit amounts, not individually budgeted grants.

Comment: One commenter objected to the "application of the pass-along requirements to mandatory minimum supplementary levels."

Response: The law is specific as to the applicability of the pass-along provisions to mandatory minimum supplements. We cannot change this requirement by regulations.

6. Variations Based on Living Arrangements

Comment: One commenter argued that our treating each optional State supplement payment variation based on living arrangements as a separate supplementary payment level is an example of a general failure of the proposed regulations to expand upon the legislation to cope with the complexity of federally administered State supplementary payments.

Response: This regulatory provision reflects the statutory requirement that States continue their supplementary payments at the December 1976 levels. These levels correspond to the payment variations chosen by the State.

7. "State Supplement-Only" Cases

Comments: One commenter stated that the regulations indicated that the instances in which "State Supplemental Program only" cases arise are not typical. That State had 20.6 percent of its cases in that category. Several commenters argued that the statute does not require that the pass-along provisions apply to "State supplement-only" cases. Some acknowledge that this may be a possible interpretation. Some believe that States that chose of supplement the basic SSI benefit are being penalized because of the effect of the pass-along amendment on State supplement-only cases. Others say that the regulations would improperly compel States to increase payments in State supplement-only cases. One commenter stated that a disparity exists in our regulations in that we indicate in one section that States must maintain a minimum supplementary payment level, while in another we declare that this level is before the consideration of the cost-of-living increase which means increased exenditures in all State supplement-only cases.

Response: In the preamble to the NPRM published on March 27, 1979 (44 FR 18238), we merely pointed out that State supplement-only cases where the person's income remained constant (i.e., the person is not receiving title II Social Security benefits) are not typical cases. Where an individual receives only a State supplement under the SSI program and also receives a title II benefit, the State can likely maintain its payment level while actually reducing the State payment. Therefore, in the aggregate, State supplement-only cases would not ordinarily require additional State expenditures, and inclusion of these cases under the pass-along provisions does not penalize the States.

With respect to the applicability of the statute to State supplement-only cases, section 1618 of the Social Security Act provides the pass-along requirements apply to "* * * any State which makes supplementary payments of the type described in section 1616(a) * * *." The description of the payments in section 1616(a) includes those made "* * * to individuals who are receiving benefits under this title or who would but for their income be eligible to receive benefits under this title * * *."

Therefore, section 1618 necessarily applies to "State supplement-only" cases and the regulations implement the mandate of the law. Payments in State supplement-only cases may increase or decrease—depending on changes in the amount of the individual's income. These fluctuations in payments result from the requirement that the States maintain levels, not payments. Payment levels need never increase as a result of the pass-along requirement.

8. Vendor Payments

Comments: Several commenters suggested that the regulations be modified to permit inclusion of vendor payments as part of a State's total expenditures. One commenter argued that not including vendor payments in total annual expenditures is harmful to the SSI program and unrealistic because vendor payments are made to meet living arrangements for individuals who are in no way capable of managing their own financial affairs. The commenter further pointed out that the Keys Amendment, Pub. L. 94–566, October 20, 1976, excludes vendor payments from countable income in the SSI program. Another commenter asserted that our regulations are in conflict with the Keys Amendment. Still another commenter objected to sanctions being taken from Medicaid funds.

Response: Although the Keys Amendment changed the income exclusion for "assistance based on need" to include vendor payments (section 1612(b)(6)), it did not change the definition of State supplementary payment (section 1616(a)). It is not possible to include vendor payments in State supplementary payments because section 1618 of the Social Security Act refers to supplementary payments as described in section 1616(a). Since vendor payments are not paid to the individuals who are receiving SSI benefits, as provided in section 1616(a), they are not "supplementary payments" within the meaning of the Act. Therefore, they cannot be included in determining "total State expenditures for supplementary payments."

For this same reason, States are not required to agree to continue to make vendor payments or to maintain any particular level with respect to them.

The withholding of Medicaid funds as a result of a State's noncompliance with the pass-along provisions is specifically required by section 1618.

9. Raising Need Levels

Comment: One commenter argued that the regulations effectively require an increase in combined Federal-State need levels in all SSI related cases and could increase the overall caseload by making new cases eligible for State financial assistance.

Response: This increase in need levels stems from the statutory requirement that State maintain the levels of their supplementary payments when the Federal levels are increased. The Federal cost-of-living increases reflect rising costs and need levels, and section 1618 encourages the State to pass along the Federal increases. There are many factors in the economy that will affect the number of people who will be eligible for SSI payments and State supplementary payments. Other sources of income rise to help offset inflation, i.e., title II social security benefits, increased wages, and retirement and pension benefits. However, for those persons whose other income is low enough to permit payment of a State supplementary payment, the law and implementing regulations are designed to reduce the likelihood that those individuals, whether current or potential recipients, will have to become accustomed to a lower life style.

10. Requesting Records

Comment: One commenter recommended that § 416.2098(b) include language that stipulates that the Department will not request State supplementary payment Records for inspection with regard to those States that enter into an agreement with SSA to administer the State's supplementary payments.

Response: We agree with this recommendation and § 416.2098(b) has been revised to reflect this change.

11. Noncompliance

Comment: One commenter stated that it is not clear in § 416.2098(c) what month would be "the first month that the State does not comply" if a State elects the total expenditures option.

Response: The "first month that a State does not comply" in this context means the first month that a State does not maintain its supplementary payments at levels at least equal to the December 1976 levels. Under the statute, a State must agree to maintain its December 1976 levels, but will not be found to be out of compliance if it maintains total expenditures. Therefore, if a State fails to satisfy either of the provisions in the law, the noncompliance begins with first month the State fails to keep the terms of the agreement with Secretary, i.e., fails to maintain December 1976 levels.

Comments: One commenter wanted to know what the guidelines are for determining noncompliance, i.e., time table and methods, and another wanted the regulations expanded to include a section detailing exactly how noncompliance can be corrected.

Resonse: Guidelines for determining and correcting noncompliance, including time limits, are provided in §§ 416.2096–416.2098.

12. Special Payment Amount

Comment: One commenter pointed out that the SSI program has never raised the $25 standard in institution cases.

Response: The Federal benefit rates for persons in certain medical treatment facilites ($25 for eligible individuals) are set by section 1611(e)(1)(B). Section 1617 of the Social Security Act, which provides for cost-of-living increases in SSI benefits does not apply to the benefit amounts in section 1611(e)(1)(B). A legislative change would be necessary to increase the $25 amount and legislative proposals to do so have been unsuccessful. These regulations do not directly concern the $25 payments.

13. Alternative Ways of Complying With the Statute

Comment: One group argued that we have construed the statute in such a way that a State has two alternative ways of complying with the Act—either (1) by maintaining the December 1976 levels of benefits, or (2) by maintaining the same total expenditures in a current year as the year before. The group argued further that the application of this interpretation would seriously undermine congressional intent. Another commenter took the opposite position by suggesting that we do not make it clear that the States have an option to maintain total expenditures or maintain all supplementary payment levels at the December 1976 levels.

Response: The statute requires the State to agree to maintain its December 1976 supplementary payment levels, but then provides that the Secertary shall not find that a State has failed to maintain its payment levels if it maintains its total annual expenditures. Thus, the statute is structured to provide a specific undertaking in the agreement, but two alternative methods of complying. As long as a State has agreed to maintain its supplementary payment levels but instead maintains total expenditures, the Secretary will not find it to be out of compliance. Moreover, the legislative history of the statute clearly states that it is not intended to require a State to increase its total expenditures.

Comment: One commenter suggested that the regulations are silent on the issue as to whether a State could switch back and forth between the two methods of complying. The commenter

asked whether, if a State were to switch back and forth, it would be required to make retroactive adjustments to all supplementary payment levels based on the 1976 levels.

Response: There is nothing in the law or regulations that would prevent a State from changing its method of complying with the pass-along requirements from year to year. The choice would be for the State to make taking a number of factors into consideration, such as whether the caseload is increasing or decreasing. If a State were to change from maintaining total expenditures to maintaining payment levels, all payment levels for that year would have to be set at least as high as the State's December 1976 levels. The State, in effect, would be passing through to all current beneficiaries all intervening Federal cost-of-living increases.

14. Regulations in Conflict With State Agreements

Comment: One commenter suggested that the regulations are inconsistent with the pass-through agreements that have been or are in the process of being executed by the States. The commenter stated that one of the matters agreed to in the course of the negotiations was that the States would be free under the agreement to utilize any method they chose, including the income disregard method, to comply with the pass-through requirements.

Response: SSA never agreed to a proposal that would allow States to utilize any method not provided by the law to comply with the pass-through requirements.

Summary of Changes Made in Final Rules

We have made several policy and clarifying changes in these final regulations from the rules proposed on March 27, 1979 (44 FR 18238). A summary of these changes follows:

(1) As a result of public comments and the opinion of the U.S. District Court in the case of *Reichenthal* v. *Harris* (E.D. NY, May 22, 1980) we are expanding § 416.2096 to provide for post-year-end adjustments that will allow States to meet the pass-along requirements.

(2) We are adding an example to § 416.2097(e) to illustrate how we arrive at the optional supplementary payment level for per diem based grant amounts.

(3) As a result of public comments, we are making substitutions in the language of § 416.2098(a)(2) to make that section fully consistent with the statutory definition of the total expenditures test.

(4) Also, as a result of public comments, we are changing § 416.2098(b) to show that the State need not maintain records about its supplementary payment levels and total 12-month expenditures in those instances where the Secretary administers the payments.

(5) In § 416.2098(c) we are clarifying the provision that any State that does not have an agreement in effect shall be determined by the Secretary to be ineligible for payments under title XIX of the Act. We also provide more specific guidance describing when ineligibility begins.

(6) We are adding § 416.2098(d) to provide for the issuance of a timely notice to a State concerning its potential noncompliance, and advising the State of available corrective actions.

Accordingly, the rules with these changes and editorial changes are adopted as shown below.

(Secs. 1102, 1601, 1616, 1618, and 1631(d) of the Social Security Act, as amended; 49 Stat. 647 as amended; 86 Stat. 1465, 86 Stat. 1474, as amended; 90 Stat. 2901; 86 Stat. 1476; (42 U.S.C. 1302, 1381, 1382e, 1382g, 1383(d)(1); sec. 401 of Pub. L. 92–603, as amended by section 504 of Pub. L. 94–566; and sec. 2 of Pub. L. 94–585)

(Catalog of Federal Domestic Assistance Program No. 13.807, Supplemental Security Income Program)

Dated: August 7, 1980.

Herbert R. Doggette, Jr.,

Acting Commissioner of Social Security.

Approved: August 12, 1980.

Nathan J. Stark,

Acting Secretary of Health and Human Services.

Chapter III of Title 20 of the Code of Federal Regulations is amended as set forth below:

1. In § 416.2001, paragraph (a)(2) is revised to read as follows:

§ 416.2001 State Supplementary payments; general.

(a) *State supplementary payments; defined.* * * *

(2) Regularly, on a periodic recurring, or routine basis of at least once a quarter; and

* * * * *

2. In § 416.2080, paragraphs (c), (d), (e)(1), and (f) are revised to read as follows:

§ 416.2080 Limitation of fiscal liability of States.

* * * * *

(c) *State fiscal protection.* Except as provided in paragraph (e) of this section, the provisions of paragraphs (a) and (b) of this section apply only to that portion of the State supplementary payments made by the Secretary on behalf of a State under an agreement for any month that does not exceed, in the case of any individual (or couple), the difference between—

(1) The adjusted payment level as defined in § 416.2085 under the appropriate approved State plan(s) as in effect for January 1972; and

(2) An amount equal to—

(i) The benefits paid for the current month under title XVI; plus

(ii) Any income not excluded under Subpart K of this part; less

(iii) The amount of any cost-of-living increase in Federal benefits under section 1617 of the Social Security Act (or any general increase enacted by law in the dollar amounts referred to in section 1617) becoming effective after June 30, 1977.

(d) *Unprotected payments.* Except as provided in paragraph (e) of this section, the State shall make entirely at State expense that portion of the State supplementary payment that is, in the case of any individual, more than the difference between (1) the State's January 1972 adjusted payment level and (2) the Federal benefit plus income counted under Federal eligibility rules and less the amount of any cost-of-living or general increase in the Federal benefits becoming effective after June 30, 1977.

(e) *Credits and debits.* For purposes of determining the extent of protected payments where State supplementary payments are paid at varying levels, to the extent that payments above the adjusted payment level do not exceed the difference by which variations in payment levels (variant payment levels) are established below the adjusted payment level, payments count toward the amount of a State's fiscal liability protection. This provision is explained as follows:

(1) The variant payment levels must be both above and below the adjusted payment level. The variant payment level is the sum of the Federal benefit plus income counted under Federal eligibility rules; less the amount of the cost-of-living and general increases in the Federal benefits becoming effective after June 30, 1977; plus the State supplementary payment.

* * * * *

(f) *Fiscal limit not applicable.* The limitation on the fiscal liability provision does not apply to any State supplementary payments, that are made to individuals or couples within any category for which the adjusted payment level is less than, or equal to the Federal monthly benefit rate (excluding the cost-of-living and general increases in the Federal benefits becoming effective after June 30, 1977) for an eligible individual or eligible

couple as specified in §§ 416.410 and 416.412. Further, the provisions of paragraph (a) of this section do not apply to the amount of any State supplementary payment that results from the application of additional income exclusions specified by the State in its agreement with the Secretary (see § 416.2025(c)). In addition, the provisions of paragraph (a) of this section do not apply with respect to supplementary payments to any individual (or couple) who—

(1) Is not required to be included in the agreement administered by the Secretary (see § 416.2010(a)); and

(2) Would have been ineligible (for reasons other than income) for payments under the appropriate approved State plan as in effect for January 1972.

3. Subpart T of Part 416 is amended by adding new §§ 416.2095 through 416.2098 to read as follows:

§ 416.2095 Pass-along of Federal cost-of-living increases.

(a) *General.* This section and the three that follow describe the rules for passing along the cost-of-living increases in the Federal SSI benefit to recipients of State supplementary payments.

(1) Section 416.2095(b) indicates when the pass-along rules apply to State supplementary payments.

(2) Section 416.2096 describes the basic pass-along rules. The States must have an agreement to "pass along" cost-of-living increases in Federal SSI benefits. A State passes along an increase when it maintains (rather than decreases) the levels of all its supplementary payments after a Federal cost-of-living increase has occurred. Generally, a pass-along of the increase permits recipients to receive an additional amount in combined benefits equal to the Federal cost-of-living increase. A State can change its payment levels if it meets an annual expenditures test.

(3) Section 416.2097 explains how to compute a supplementary payment level.

(4) Section 416.2098 discusses what information the States must provide to the Secretary concerning their supplementation programs so that the Secretary can determine whether the State is in compliance. That section also discusses the basis for findings of noncompliance and what will occur if a State is found out of compliance.

(b) *When the pass-along applies.* (1) The pass-along requirements apply to all States (and the District of Columbia) that make supplementary payments after June 29, 1977, and wish to participate in the Medicaid program.

(2) The pass-along requirements apply to both optional supplementary payments of the type described in § 416.2001(a) and mandatory minimum supplementary payments as described in § 416.2001(c), whether or not these State supplementary payments are Federally administered.

(3) The requirements apply to State supplementary payments for both recipients who also receive Federal SSI benefits and recipients who, because of countable income, receive only a State supplementary payment.

(4) The requirements apply to State supplementary payments for recipients eligible for a State supplementary payment on or after June 30, 1977.

(5) Supplementary payments made by a State include payments made by a political subdivision (including Indian tribes) where—

(i) The payment levels are set by the State; and

(ii) The payments are funded in whole or in part by the State.

§ 416.2096 Basic pass-along rules.

(a) *State agreements to maintain supplementary payment levels.* In order to be eligible to receive Medicaid reimbursement, any State that makes supplementary payments on or after June 30, 1977, must have in effect an agreement with the Secretary. In this agreement—

(1) The State must agree to continue to make the supplementary payments; and

(2) The State must agree to maintain the supplementary payments at levels at least equal to the December 1976 levels (or, if a State first makes supplementary payments after December 1976, the levels for the first month the State makes supplementary payments). The Secretary will find that the State has met this requirement if the State complies with the conditions in either paragraph (b) or (c) of this section. The Secretary will consider a State to have made supplementary payments on or after June 30, 1977, unless the State furnishes evidence to the contrary that is satisfactory to the Secretary.

(b) *Meeting the pass-along requirement—Supplementary payment levels.* (1) We shall consider a State to have met the requirements for maintaining its supplementary payment levels (described in § 416.2097) for a particular month or months if the supplementary payment levels have not been reduced below the levels in effect in December 1976 (or if a State first makes supplementary payments after December 1976, the levels in effect the first month the State makes supplementary payments).

(2) If a State reduced its supplementary payment levels for a month or months within any 12-month period beginning with the effective date of a Federal cost-of-living increase, we shall consider the State to meet the requirement to maintain its supplementary levels if—

(i) Within 12 months after the relevant 12-month period, the State restores the levels retroactively; and

(ii) The State makes a single retroactive benefit payment to each of the beneficiaries eligible for the retroactive payment.

(c) *Meeting the pass-along requirement—Total expenditures.* (1) If a State does not meet the conditions in paragraph (b) of this section, we shall consider a State to have met the requirement for maintaining supplementary payment levels for a particular month or months if total State expenditures for supplementary payments in the 12-month period within which the month or months fall, beginning on the effective date of a Federal cost-of-living increase, are at least equal to the total State expenditures for supplementary payments in the 12-month period before the Federal cost-of-living increase.

(2) If total State expenditures in the relevant 12-month period are less than the total expenditures in the preceding 12-month period (a "shortfall"), we also shall consider a State to have met the requirement for maintaining supplementary payment levels for the relevant 12-month period if within the following 12 months the State increases its total expenditures by an amount at least equal to the amount of the shortfall in the relevant 12-month period. The increased amount up to the amount needed to correct the shortfall shall be deemed to be an expenditure in the relevant 12-month period.

(3) Exception for 12-month periods ending before July 1980: If a State does not meet any of the conditions in paragraph (b) or (c) (1) and (2) of this section, we shall consider a State to have met the maintenance of supplementary payment levels requirement before July 1980 under the following conditions—

(i) Total State expenditures in each of the 12-month periods ending June 30, 1978, June 30, 1979, or June 30, 1980, at least equal total State expenditures in the 12-month period ending June 30, 1977; or

(ii) Total State expenditures in one or more of the 12-month periods equals the total State expenditures in the 12-month period ending June 30, 1978, June 30, 1979, June 30, 1980, or June 30, 1981, exceeded total expenditures in the 12-

Sec.

month period ending June 30, 1977, and the excess amount when apportioned to the expenditures in the 12-month period or periods in which the State had a shortfall, makes up the shortfall so that the total State expenditures for each of the three 12-month periods equals the total State expenditures in the 12-month period ending June 30, 1977.

(4) Total State expenditures for supplementary payments are the State's total payments for both mandatory minimum and optional supplementary payments in the appropriate 12-month period less the amount of any payments recovered and other adjustments made in that period. Total State expenditures do not include State administrative expenses, interim assistance payments, vendor payments, or payments made under other Federal programs, such as title IV, XIX, or XX of the Social Security Act.

(5) Adjustments in total State supplementary payments made afer the expiration of the relevant 12-month period for purposes of meeting total State expenditures under paragraph (c) of this section shall be considered a State expenditure in the relevant 12-month period only for purposes of the pass-along requirement. For purposes of § 416.2080, which discusses the rules for limitation on fiscal liability of States (hold harmless), these retroactive adjustments are State expenditures when made and shall be counted as a State expenditure in the fiscal year in which the adjustments are made.

§ 416.2097 Supplementary payment levels.

(a) *General.* The supplementary payment level is the total State payment for December 1976 that a State provides an eligible individual (or couple) with no countable income in excess of the Federal SSI benefit for December 1976. We compute supplementary payment levels according to rules described in pararaphs (b)–(e) of this section. When applying these rules to States that did not make supplementary payments in December 1976, we base the supplementary payment level on the payment for the first month after December 1976 in which a State makes supplementary payments.

(b) *Mandatory minimum supplementary payment level.* The mandatory minimum supplementary payment level is a recipient's December 1973 minimum income level plus any State increases prior to January 1977, less any reductions made at any time after December 1973 due to changes in special needs or circumstances, less the December 1976 Federal standard payment amount.

(c) *Optional supplementary payment level for flat grant amounts.* The optional supplementary payment level for flat grant amounts is the total amount that an eligible individual (or couple) with no countable income received for December 1976 in excess of the Federal SSI benefit for December 1976. If the State varied its payment levels for different groups of recipients (e.g., paid recipients different amounts based on eligibility categories, geographic areas, living arrangements, or marital status), each variation represents a separate supplementary payment level.

(d) *Optional supplementary payment level for individually budgeted grant amounts.* The optional supplementary payment level for individually budgeted grant amounts is the amount that the State budgeted for December 1976 in excess of the December 1976 Federal SSI benefit for an eligible individual (or couple) having the same needs and no countable income.

(e) *Optional supplementary payment level for per diem based grant amounts.* The optional supplementary payment level for a particular calendar month for per diem grant amounts is the total dollar amount that the State would have paid to an eligible individual (or couple) with no countable income for that month at rates in effect for December 1976 (number of days in the calendar month multipled by the December 1976 per diem rate plus any December 1976 personal needs allowance) in excess of the December 1976 Federal SSI benefit.

Example:

DECEMBER 1976

$6.90	per diem rate.
×31	days in month.
$213.90	
+34.00	personal needs allowance.
$247.90	
−167.80	Federal SSI benefit.
$80.10	State Supplementary level.

APRIL 1977

$6.90	per diem rate.
×30	days in month.
$207.00	
+34.00	personal needs allowance.
$241.00	
−167.80	Federal SSI benefit.
$73.20	State Supplementary level.

The 31-day month level to be maintained is $80.10; the 30-day month level to be maintained is $73.20.

§ 416.2098 Compliance with pass-along.

(a) *Information regarding compliance.* Any State required to enter into a pass-along agreement with the Secretary shall provide appropriate and timely information to demonstrate to the Secretary's satisfaction that the State is meeting the pass-along requirements. The information shall include—

(1) The State's December 1976 supplementary payment levels, any subsequent supplementary payment levels, and any change in State eligibility requirements. If the State made no supplementary payments in December 1976, it shall provide information about the first month in which it makes supplementary payments; and

(2) The total State expenditures for supplementary payments in the 12-month period beginning July 1976 through June 1977, in each subsequent 12-month period, and in any other 12-month period beginning on the effective date of a Federal SSI cost-of-living increase. The State shall also submit advance estimates of its total supplementary payments in each 12-month period covered by the agreement.

(b) *Records.* Except where the Secretary administers the payments, the State shall maintain records about its supplementary payment levels and total 12-month expenditures for supplementary payments and permit inspection and audit by the Secretary or someone designated by the Secretary.

(c) *Noncompliance by the States.* Any State that makes supplementary payments on or after June 30, 1977, and does not have a pass-along agreement with the Secretary in effect, shall be determined by the Secretary to be ineligible for payments under title XIX of the Act. A State does not have an agreement in effect if it has not entered into an agreement or has not complied with the terms of the agreement. Ineligibility shall apply to total expenditures for any calendar quarter beginning after June 30, 1977, for which a State has not entered into an agreement. A State that enters into an agreement but does not maintain its payment levels or meet the total expenditures test, in a particular 12-month period, shall be determined by the Secretary not to have an agreement in effect for any month that the State did not maintain its payment levels during that particular 12-month period. The State shall then be ineligible for title XIX payments for any calendar quarter containing a month for which an agreement was not in effect. If a State first makes supplementary payments beginning with a month after June 1977, ineligibility shall apply to any calendar quarter beginning after the calendar quarter in which the State first makes payments.

(d) *Notices to States about potential noncompliance.* Within 90 days after the end of the relevant 12-month period, the Secretary shall send a notice to any State that has not maintained its supplementary payment levels and that appears not to have maintained its total expenditures during the period. The notice will advise the State of the available methods of compliance and the time within which corrective action must be taken in order to avoid a determination of noncompliance. If the State fails to take the corrective action, the Secretary shall make a timely determination of noncompliance.

BILLING CODE 4110-07-M

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

22 CFR Parts 220, 221, 222

Personnel Regulations

AGENCY: Agency for International Development, IDCA.

ACTION: Final rule.

SUMMARY: Pursuant to Section 401 of the International Development and Food Assistance Act of 1978, Pub. L. 95–424, 92 Stat. 956, as amended by section 503 of the International Development Cooperation Act of 1979, Pub. L. 96–53, 93 Stat. 378, the President on May 1, 1979, submitted to the Congress regulations affecting the personnel system of the Agency for International Development. On May 4, 1979, the regulations were published as a proposed rule in the **Federal Register** at 44 FR 26726.

Pursuant to section 401, the regulations could not become effective until after the end of the 90-day period beginning on the date of submission to the Congress, i.e., May 1, 1979, and could not become effective then if, during such 90-day period, either House of Congress adopts a resolution stating in substance that it disapproves the personnel system proposed to be established by the regulations. Since neither House adopted a resolution of disapproval within the 90-day period, the regulations became effective on October 1, 1979.

DATE: Effective as of October 1, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Jan Miller, Office of the General Counsel (202) 632–8277.

Dated: August 5, 1980.

Norman L. Holmes,

General Counsel.

Accordingly Parts 220, 221 and 222 are added to 22 CFR Chapter II to read as follows:

PART 220—GENERAL PROVISIONS

Sec.

220.01 Statement of authority.
220.02 Purpose.
220.03 Definitions.
220.04 Position management.

Authority: Sec. 401, International Development and Food Assistance Act of 1978, Pub. L. 95–424, 92 Stat. 956, as amended by sec. 503, International Development Cooperation Act of 1979, Pub. L. 96–53, 93 Stat. 1378.

§ 220.01 Statement of authority.

This subchapter of Chapter II is promulgated pursuant to section 401 of the International Development and Food Assistance Act of 1978, October 6, 1978, Pub. L. 95–424, 92 Stat. 956, 22 U.S.C. 2385a, and section 625 of the Foreign Assistance Act of 1961, as amended, 22 U.S.C. 2385.

§ 220.02 Purpose.

The purpose of this subchapter is to extend the Foreign Service personnel system to all employees of the Agency for International Development (A.I.D.) in the United States and abroad who are responsible for planning and implementing A.I.D.'s overseas development programs and activities, so that those persons will have significant overseas experience or understanding of the overseas development process. An extended application of the Foreign Service personnel system within A.I.D. is intended to ensure that—

(a) The employees of A.I.D. effectively serve the interests of the United States, both in the United States and abroad;

(b) A.I.D.'s personnel system can better adjust to frequently changing program and work-force composition requirements;

(c) A framework is provided to meet the particular requirements of A.I.D., including the need to have personnel serve overseas and meet language and technical skill requirements; and

(d) All employees who work in the United States and abroad within a single structure of positions, and in common endeavor to plan, carry out and directly support A.I.D.'s overseas program, may be brought within a single personnel system.

§ 220.03 Definitions.

(a) "A.I.D." means the Agency for International Development, or any successor agency primarily responsible for administering programs under part I of the Foreign Assistance Act of 1961, as amended.

(b) "Administrator" means the Administrator of A.I.D.

§ 220.04 Position Management.

(a) Under such regulations as he may prescribe, the Administrator may, notwithstanding the provisions of Chapter 51 of title 5 of the United States Code, classify positions in A.I.D., both abroad and in the United States, that he designates as Foreign Service positions to be occupied by Foreign Service employees of A.I.D., and establish such positions in relation to the grades provided for the Foreign Service of the United States: *Provided,* That such actions shall be carried out in a manner consistent with the purposes of this Subchapter and with the principles of position classification established in Chapter 51 of title 5 of the United States Code.

(b) As of the effective date of this Subchapter, each position in A.I.D. shall be reviewed and redesignated, if necessary, as to the service in which the incumbent should serve. A position shall be designated as a General Schedule position rather than a Foreign Service position only if the position is in the United States, and if it is determined (1) that the functions of such position are primarily of a clerical, administrative or program support character and can be performed without significant overseas experience or understanding of the overseas development process; or (2) that such position requires continuity of incumbency and specialized knowledge and skill to the extent that it is not practicable for incumbents of such position to be assigned abroad. Any person aggrieved by the designation made pursuant to this subsection of a position in which he or she is serving may appeal the designation to the Administrator. Such designation shall remain in effect pending the appeal provided for herein and pending any other appeal an employee may make, and shall be set aside only if arbitrary or capricious.

(c) A position designated as a Foreign Service position in accordance with paragraph (b) of this section which becomes vacant may be occupied thereafter only by a Foreign Service employee: *Provided, however,* That at any time when the number of non-Foreign Service employees filling positions in A.I.D.'s headquarters office in the United States which are designated as Foreign Service positions does not exceed 10 per centum of the number of such positions, such a position, when it becomes vacant, may, at the discretion of the Administrator, be filled by a non-Foreign Service employee.

(d) A position designated as General Schedule in accordance with paragraph (b) of this section may be temporarily designated Foreign Service whenever the Administrator deems it advisable in order to administer properly the rotation policies provided for in § 221.02 of this

subchapter: *Provided,* That only vacant General Schedule positions may be so redesignated.

(e) In furtherance of the policy of this Subchapter, as provided in § 220.02, to the extent consistent with law, regulation, and staffing and promotion policies generally applicable to AID employees, the Administrator shall encourage employees who are not in the Foreign Service, who serve or wish to serve in positions designated as Foreign Service positions, and who are qualified for appointment in the Foreign Service, to convert to the Foreign Service.

PART 221—EMPLOYMENT

Sec.
221.01 Employment in the Foreign Service.
221.02 Tours of assignment.

Authority: Sec. 401, International Development and Food Assistance Act of 1978, Pub. L. 95–424, 92 Stat. 956, as amended by Sec. 503, International Development Cooperation Act of 1979, Pub. L. 96–53, 93 Stat. 378.

§ 221.01 Employment in the Foreign Service.

The limitation in paragraph (2) of section 625(d) of the Foreign Assistance Act of 1961, as amended, regarding periods of assignment in the United States shall be extended to allow initial assignments in the United States for a period not to exceed three years for the purpose of carrying out any of the functions under the Foreign Assistance Act.

§ 221.02 Tours of assignment.

(a) Pursuant to such regulations as he may prescribe, the Administrator shall establish tours of assignment for A.I.D.'s Foreign Service employees.

(b) Subject to section 933 of the Foreign Service Act of 1946, as amended, regarding mandatory leave in the United States, the Administrator shall, by such regulations as he may prescribe, establish policies for rotation between assignments, including transfers among positions whether in the United States or abroad.

PART 222—MISCELLANEOUS PROVISIONS

Sec.
222.01 Implementing regulations.
222.02 Construction.
222.03 Effective date.

Authority: Sec. 401, International Development and Food Assistance Act of 1978, Pub. L. 95–424, 92 Stat. 956, as amended by Sec. 503, International Development Cooperation Act of 1979, Pub. L. 96–53, 93 Stat. 378.

§ 222.01 Implementing regulations.

(a) notwithstanding the provisions of this Subchapter, existing rules and regulations of or applicable to employment in A.I.D., to the extent not inconsistent with the provisions of this Subchapter, shall remain in effect until revoked or until modified or superseded by implementing regulations promulgated in accordance with the provisions of paragraph (b) of this section.

(b) The Administrator may prescribe such administrative, implementing regulations as are necessary and desirable in order to carry out the provisions of this Subchapter (and such authority may be delegated as he deems necessary). Such implementing regulations may not revoke, suspend, supersede, or otherwise modify this Subchapter.

§ 222.02 Construction.

If any provision of this Subchapter or the application of any provision to any circumstance or persons shall be held invalid, the validity of the remainder of this Subchapter and the applicability of such provision to other circumstances or persons shall not be affected thereby.

§ 222.03 Effective date.

This subchapter shall become effective on October 1, 1979.

[FR Doc. 80–25003 Filed 8–15–80; 8:45 am]
BILLING CODE 4710–02–M

DEPARTMENT OF JUSTICE

Office of Justice Assistance, Research, and Statistics

28 CFR Part 18

LEAA Administrative Review Procedure Regarding Oral Hearings

AGENCY: Office of Justice Assistance, Research, and Statistics (OJARS), Law Enforcement Assistance Administration (LEAA), National Institute of Justice (NIJ), Bureau of Justice Statistics (BJS).

ACTION: Final rule.

SUMMARY: OJARS is adopting an amendment to its hearing and appeal procedures, that will require all oral hearings to be held in Washington, D.C. unless the hearing officer determines that the hearing can be conducted in a more expeditious manner in another location. Because the travel and per diem costs associated with a grant denial or termination hearing are so substantial, convening the hearings in Washington will result in a significant savings to OJARS and LEAA and will reduce administrative costs.

EFFECTIVE DATE: August 18, 1980.

FOR FURTHER INFORMATION CONTACT: David I. Tevelin, OJARS, Office of General Counsel, (202) 724–6235.

SUPPLEMENTARY INFORMATION: OJARS received only two comments on the proposed rule published on June 27, 1980. 45 FR 43436. Both commenters expressed concern that the proposal would have a "chilling effect" on distant applicants who had a bonafide appeal. In light of the hearing officer's authority to convene the hearing in a location other than Washington, D.C. if that would result in a "more expeditious" hearing, we do not believe the amendment will inhibit any appellant's ability to fully and fairly present its case.

In addition, as noted in the preamble to the proposed rule, an appellant's witness' testimony can still be presented by affidavit, response to interrogatories, or deposition, even if the witness is unable to attend the hearing in person.

Accordingly, 28 CFR 18.51 is amended by deleting paragraphs (b) and (c); relettering (d)–(f) as (c)–(e) and adding a new (b) to read as follows:

§ 18.51 General rules.

* * * * *

(b) All oral hearings requested under this part shall be held in Washington, D.C., unless the hearing examiner decides that the hearing could be conducted in a more expeditous manner in another location.

(c) *Expedition.* * * *
(d) *Rights of parties.* * * *
(e) *Participation.* * * *

Robert F. Diegelman,
Assistant Administrator, Office of Planning and Management.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 700, 785, 816, 817 and 820

Surface Coal Mining and Reclamation Operations; Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM) Department of the Interior.

ACTION: Final rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement is amending the incorporation by reference expiration dates of 30 CFR 700, 785, 816, 817 and 820 as they appear in 45 FR 8240, February 6, 1980. This action is being taken as a result of the Office of the Federal Register publishing at 44 FR 18630–18631, March 28, 1979, amended procedures for the approval and maintenance of incorporations by reference.

EFFECTIVE DATE: August 18, 1980.

FOR FURTHER INFORMATION CONTACT: Bruce R. Fye, (202) 343–5447.

SUPPLEMENTARY INFORMATION: On March 28, 1979, the Office of the Federal Register published at 44 FR 18630–18631, amended procedures for the approval and maintenance of incorporations by reference. As a result of this action OSM's incorporation by reference material was scheduled to expire on July 1, 1980, unless an extension was approved by the Director of the Office of the Federal Register.

On June 19, 1980, the Acting Director of the Office of the Federal Register, approved the material OSM submitted for incorporation by reference in 30 CFR Chapter VII for one year effective July 1, 1980.

Dated: August 11, 1980.

Walter N. Heine,
Director, Office of Surface Mining, Reclamation and Enforcement.

Amendments to Regulations

30 CFR is amended as follows:

PART 700—GENERAL

(Secs. 102, 201, 304, 405, 407, 412, 501, 510, 512, 516, 517, 520, 523, 527, 528, 529, 701, 708, 719, Pub. L. 95–87, 91 Stat. 448, 449, 454, 462, 466, 467, 480, 483, 486, 495, 498, 503, 510, 513, 514, 515, 516, 521, 526, (30 U.S.C. 1202, 1211, 1224, 1235, 1237, 1242, 1251, 1260, 1262, 1265, 1266, 1267, 1270, 1273, 1277, 1278, 1291, 1298, 1309))

§ 700.5 [Amended]

1. In § 700.5 the last sentence of the definition "Anthracite" is amended to read: * * * "The Director's approval of this incorporation by reference expires on July 1, 1981."

PART 785—REQUIREMENTS FOR PERMITS FOR SPECIAL CATEGORIES OF MINING

(Secs. 102, 201, 501(b), 503, 504, 506, 507, 508, 509, 510, 511, 513, 514, 515, 516, 517, 519, 527, 529, 701, and 711, Pub. L. 95–87, 91 Stat. 445 (30 U.S.C. 1202, 1211, 1251, 1253, 1254, 1256, 1257, 1258, 1259, 1260, 1261, 1263, 1264, 1265, 1266, 1267, 1269, 1277, 1279, 1291, 1301))

2. In § 785.17(b)(1)(i), the last sentence is amended to read:

§ 785.17 [Amended]

* * * * *
(b) * * *
(1) * * *
(i) * * * The Director's approval of this incorporation by reference expires on July 1, 1981.

3. In § 785.19(e)(i)(B), the last sentence is amended to read:

§ 785.19 [Amended]

* * * * *
(e) * * *
(i) * * *
(B) * * * The Director's approval of this incorporation by reference expires on July 1, 1981.

PART 816—PERMANENT PROGRAM PERFORMANCE STANDARDS—SURFACE MINING ACTIVITIES

(Secs. 102, 201, 501, 503, 504, 508, 515, 517, 519, 701, 717, and 719 of Pub. L. 95–87, 91 Stat, 448, 449, 467, 470, 471, 478, 486, 498, 501, 516, 526, (30 U.S.C. 1202, 1211, 1251, 1253, 1254, 1258, 1265, 1267, 1269, 1291, 1307, 1309))

4. In § 816.49(a)(5), the last sentence is amended to read:

§ 816.49 [Amended]

(a) * * *
(5) * * * The Director's approval of this incorporation by reference expires on July 1, 1981.

5. In § 816.65(e)(2), the last sentence is amended to read:

§ 816.65 [Amended]

* * * * *
(e) * * *
(2) * * * The Director's approval of this incorporation by reference expires on July 1, 1981.

6. In § 816.85(c)(2), the last sentence is amended to read:

§ 816.85 [Amended]

* * * * *
(c) * * *
(2) * * * The Director's approval of this incorporation by reference expires on July 1, 1981.

PART 817—PERMANENT PROGRAM PERFORMANCE STANDARDS—UNDERGROUND MINING ACTIVITIES

(Secs. 102, 201, 501, 503, 504, 507, 508, 515, 516, 517, 519, 701, 717, and 719, Pub. L. 95–87, 91 Stat. 448, 449, 467, 470, 471, 474, 478, 495, 498, 501, 516, 526, (30 U.S.C. 1202, 1211, 1251, 1253, 1254, 1257, 1258, 1266, 1267, 1269, 1291, 1307, 1309))

7. In § 817.49(a)(5), the last sentence is amended to read:

§ 817.49 [Amended]

(a) * * *
(5) * * * The Director's approval of this incorporation by reference expires on July 1, 1981.

8. In § 817.65(e)(2), the last sentence is amended to read:

§ 817.65 [Amended]

* * * * *
(e) * * *
(2) * * * The Director's approval of this incorporation by reference expires on July 1, 1981.

9. In § 817.85(c)(2), the last sentence is amended to read:

§ 817.85 [Amended]

* * * * *
(c) * * *
(2) * * * The Director's approval of this incorporation by reference expires on July 1, 1981.

PART 820—SPECIAL PERMANENT PROGRAM PERFORMANCE STANDARDS—ANTHRACITE MINES IN PENNSYLVANIA

(Secs. 102, 201, 501, 503, 504, 529, Pub. L. 95–87, 91 Stat, 448, 449, 467, 470, 471, 514, (30 U.S.C. 1202, 1211, 1251, 1253, 1254, 1279))

10. In § 820.11 (d), the last sentence is amended to read:

§ 820.11 [Amended]

* * * * *
(d) * * * The Director's approval of this incorporation by reference expires on July 1, 1981.

DEPARTMENT OF DEFENSE

Department of the Navy

32 CFR Part 706

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972

AGENCY: Department of the Navy, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is amending its certifications and exemptions under the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS) to reflect that the Secretary of the Navy: (1) Has determined that U.S.S. *Dallas* (SSN 700) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with certain provisions of the 72 COLREGS without interfering with its special function as a naval submarine; and (2) has found that U.S.S. *Dallas* (SSN 700) is a member of the SSN 688 class of ships, exemptions for which have previously been granted under 72 COLREGS, Rule 38. The intended effect of this rule is to warn mariners in waters where 72 COLREGS apply.

EFFECTIVE DATE: July 23, 1980.

FOR FURTHER INFORMATION CONTACT:

Rulemaking in the Federal Register

Lake Champlain near the Town of

Dated: July 28, 1980.

FOR FURTHER INFORMATION CONTACT:
Lieutenant Commander Charles Stanley Prentace, JAGC, USN, Admiralty Division, Office of the Judge Advocate General, Navy Department, Alexandria, Virginia 22332, Telephone number: (202) 325–9744.

SUPPLEMENTARY INFORMATION: This amendment to Part 706 provides notice that the Secretary of the Navy has certified that U.S.S. *Dallas* (SSN 700) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS: Annex I, section 2(a)(i) regarding the height of the masthead light; Annex I, section 2(k) regarding the height and relative positions of the anchor lights; and Annex I section 3(b) regarding the location of the sidelights. Full compliance with the above-mentioned 72 COLREGS provisions would interfere with the special function of the ship. The Secretary of the Navy has also certified that the above-mentioned lights are located in closest possible compliance with the applicable 72 COLREGS requirements.

Notice is also provided to the effect that U.S.S. *Dallas* (SSN 700) is a member of the SSN 688 class of ships for which certain exemptions, pursuant to 72 COLREGS Rule 38, have been previously authorized by the Secretary of the Navy. The exemptions pertaining to that class, found in the existing tables of § 706.3 are equally applicable to U.S.S. *Dallas* (SSN 700).

Moreover, it has been determined, in accordance with CFR Parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary and contrary to public interest since it is based on technical findings that the placement of lights on this ship in a manner different from that prescribed herein will adversely affect the ship's ability to perform its military function.

Accordingly, 32 CFR Part 706 is amended as follows:

§ 706.2 [Amended]

1. The third Table One of § 706.2 is amended as follows to indicate certifications issued by the Secretary of the Navy:

Vessel	Number	Distance in meters of forward masthead light below minimum required height. § 2(a)(i) Annex I
•	•	•
USS JACKSONVILLE	SSN 699	
USS DALLAS	SSN 700	3.5
•	•	•

2. The Table Three of § 706.2 is amended as follows to indicate certifications issued by the Secretary of the Navy:

Vessel	Number	Masthead light, arc of visibility; Rule 21(a)	Sidelights, arc of visibility; Rule 21(b)	Stern light, arc of visibility; Rule 21(c)	Sidelights, distance inboard of ship's sides in meters; § 3(b), Annex I	Stern light, distance forward of stern in meters; Rule 21(c)	Forward anchor light, height above hull in meters; § 2(k), Annex I	Anchor lights, relationship of aft light to forward light in meters; § 2(k), Annex I
•	•	•	•	•	•	•	•	•
USS JACKSONVILLE	SSN 699	—	—	—	—	—	—	—
USS DALLAS	SSN 700	—	—	—	4.1	6.5	3.4	1.7 below.
•	•	•	•	•	•	•	•	•

(EO 11964 and 33 U.S.C. 1605)

Effective Date. The effective date of this amendment will be July 23, 1980.

Dated: July 23, 1980.

Edward Hidalgo,
Secretary of the Navy.

Coast Guard

[CCGD3-80-1A]

33 CFR Part 110

Special Anchorage Area, Oyster Bay, N.Y.

AGENCY: Coast Guard, DOT.

ACTION: Final Rule.

SUMMARY: This rule implements the request of the Incorporated Village of Centre Island, Oyster Bay, New York, by designating a Special Anchorage Area in Oyster Bay Harbor at Oyster Bay, New York. The designation will enhance navigational safety by reducing congestion in adjacent special anchorages and by providing charted indication (by depiction on appropriate charts) to passing vessels that unlighted vessels or vessels not sounding fog signals may be present in the anchorage

EFFECTIVE DATE: September 17, 1980.

FOR FURTHER INFORMATION CONTACT:
Commander Peter T. Muth, Project Manager, Chief, Port Safety Branch, Coast Guard District Three (mps), Marshall Hall, Room 108, governors Island, New York 10004, (212–668–7179). Working hours 8 a.m. to 4:30 p.m. Monday through Friday.

SUPPLEMENTARY INFORMATION: On March 31, 1980, the Coast Guard published a notice of Proposed Rulemaking in the **Federal Register** concerning this amendment (45 FR 20982). Interested persons were given until May 16, 1980 to submit comments. No comments have been received. The proposed rule is therefore adopted without change and is set forth below.

DRAFTING INFORMATION: The principal persons involved in drafting this proposal are: Lieutenant William St. J. Chubb, Port Safety Officer, Third Coast Guard District, and Lieutenant Thomas J. Donlon, Project Attorney, Third Coast Guard District Legal Office.

In consideration of the foregoing Part 110 of Title 33 Code of Federal Regulations is amended by adding § 110.60 (u-3) to read as follows:

§ 110.60 Port of New York and vicinity.

* * * * *

(u-3) *Harbor of Oyster Bay, New York, Moses Point to Brickyard Point.* That portion of the waters of the Harbor of Oyster Bay enclosed by a line beginning at Moses Point on Centre Island at latitude 40° 53′ 11″ N., longitude 73° 31′ 14″ W.; thence to latitude 40° 53′ 02″ N., longitude 73° 31′ 22″ W.; thence to latitude 40° 53′ 02″ N., longitude 73° 32′ 00″ W.; thence to Brickyard Point on Centre Island at 40° 53′ 06″ N., longitude 73° 32′ 00″ W.; thence following the shoreline to the point of beginning.

Note.—The anchoring of vessels and placement of temporary moorings in anchorage areas described in paragraphs (u), (u-2), and (u-3) of this section will be under the jurisdiction of the local Harbormaster appointed in accordance with Article 12 of the Village Ordinance of the Village of Centre Island, New York.

BILLING CODE 4910-14-M

33 CFR Part 110

[CCGD3-80-2A]

Shelburne Bay, VT.; Special Anchorage Area

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This rule implements the request of the Town of Shelburne, Vermont by designating a special anchorage area in Shelburne Bay in Lake Champlain near the Town of Shelburne. The designation will enhance navigational safety by reducing congestion in adjacent special anchorages and by providing charted indication (by depiction on appropriate charts) to passing vessels that unlighted vessels or vessels not sounding fog signals may be present in the anchorage.

EFFECTIVE DATE: September 17, 1980,

FOR FURTHER INFORMATION CONTACT:
Commander Peter T. Muth, Project Manager, Chief, Port Safety Branch, Third Coast Guard District(mps), Marshall Hall, Room 108, Governors Island, New York 10004, (212–668–7179). Working hours are 8 AM to 4:30 PM Monday through Friday.

SUPPLEMENTARY INFORMATION: On May 5, 1980, the Coast Guard published a Notice of Proposed Rulemaking in the **Federal Register** concerning this amendment (45 FR 29593). Interested persons were given until June 19, 1980 to submit comments. Only one comment was received, and it favored the proposal. The proposed rule is therefore adopted without change and is set forth below.

DRAFTING INFORMATION: The principal persons involved in drafting this proposal are: Lieutenant Commander William St. J. CHUBB, Port Safety Officer, Third Coast Guard District, and Lieutenant Thomas J. DONLON, Project Attorney, Third Coast Guard District Legal Office.

In consideration of the foregoing, Part 110 of Title 33 Code of Federal Regulations is amended by adding § 110.8 (c–2) to read as follows:

§ 110.8 Lake Champlain, N.Y., and Vt.

* * * * *

(c–2) *Shelburne Bay Allen Hill to La Platte River.* That portion of the waters of Shelburne Bay west of the line from a point at Allen Hill at latitude 44°24′35″N., longitude 73°14′14″W.; to a point near the mouth of the La Platte River at latitude 44°24′03″N., longitude 73°14′05″W.

Note.—The anchoring of vessels and placement of temporary moorings in the anchorage area described in paragraph (c–2) of this section are administered by the Harbormaster appointed by the Town of Shelburne, Vermont.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

41 CFR Part 7–12

[AIDPR Notice 81–1]

Revision to Procedures for EEO Clearances of Contractors

AGENCY: Agency for International Development (AID).

ACTION: Final rule.

SUMMARY: The Office of Federal Contract Compliance Programs (OFCCP) of the Department of Labor has assumed full responsibility for preaward clearance and monitoring of contractor compliance with Equal Employment Opportunity (EEO) requirements. In recognition of this, the AID Procurement Regulations (AIDPR's) are being amended to specify EEO clearance requirements, and procedures for obtaining EEO clearance.

EFFECTIVE DATE: August 7, 1980.

FOR FURTHER INFORMATION CONTACT:
Mr. J. Michael Kelly, CM/SD/POL, International Development Cooperation Agency, AID, Washington, D.C. 20523. Telephone: (703) 235–9107.

PART 7–12—LABOR

Subpart 7–12.8 is revised as follows:

Subpart 7–12.8—Equal Opportunity in Employment

Sec.

7–12.805–50 Administration by AID.
7–12.805–51 Introduction.
7–12.805–52 EEO clearance requirements.
7–12.805–53 Clearance procedures.

Authority: Sec. 621, Pub. L. 87–195, 75 Stat. 424, as amended (22 U.S.C. 2381).

§ 7–12.805–50 Administration by AID.

§ 7–12.805–51 Introduction.

Executive Order 12086 consolidated the compliance responsibility for equal employment opportunity programs, which had previously been assigned to selected, designated compliance agencies, in the Department of Labor. The Department of Labor assumed full responsibility for verification of contractor's compliance with EEO requirements. Since there is no longer a compliance officer in AID, contracting officers will now obtain verification of

contractor compliance directly from the cognizant Regional Office of Federal Contract Compliance Programs (OFCCP) in accordance with the procedures in § 7–12.805–53.

§ 7–12.805–52 EEO clearance requirements.

(a) *General.* AID will not award a contract to a firm or institution unless it complies with EEO requirements.

(b) *Contracts for $1,000,000 or more.* For contracts with an estimated total value over the life of the contract of $1,000,000 or more, formal verification of compliance shall be obtained from the cognizant regional OFCCP in accordance with the procedures in paragraphs (a), (b), and (d) of § 7–12.805–53.

(c) *Contracts over $10,000, but less than $1,000,000.* Contracts with an estimated total value over the life of the contract of more than $10,000, but less than $1,000,000 do not require formal verification of compliance from OFCCP. Compliance shall be determined in accordance with the procedures in paragraphs (a), (c), and (d) of § 7–12.805–53.

(d) *Contract amendments.* Any amendment which increases the total estimated value of a contract to $1,000,000 or more, or any amendment which is itself $1,000,000 or more, requires formal verification of compliance from the cognizant regional OFCCP, i.e., the regional office responsible for the geographic area where the work is to be performed, in accordance with the procedures in § 7–15.805–53(b). For other amendments, the method of verification of compliance is at the discretion of the contracting officer (see § 7–12.805–53 (c) and (d)(3)); formal verification is not required.

§ 7–12.805–53 Clearance procedures.

(a) *General.* (1) A completed and signed Representations, Certifications, and Acknowledgements (AID Form 1410–13), and a satisfactory Minority and Women Representation on Overseas Team Agreement, as required by AID Form 1410–13, are required for all AID contracts over $10,000. The Representations, Certifications, and Acknowledgements (Reps. and Certs.) and (when applicable) the Minority and Women Representation on Overseas Team Agreement (O/S Team Agreement) must be reviewed by the contracting officer when received to determined that they have been completed and signed as required, and are acceptable. Acceptable Reps. and Certs. and O/S Team Agreement are the first step in the EEO clearance process.

(2) If the Reps. and Certs. or O/S Team Agreement are not deemed acceptable on technical grounds (e.g. incomplete, not signed, etc.) the contracting officer must decide if they can be made acceptable within a reasonable period by corrective action on the part of the offeror, or if the fault is such that it renders the offer non-responsive. In the first case, necessary corrective action should be taken; in the second case, negotiations with the non-responsive offeror will be terminated. If the Reps. and Certs. or O/S Team Agreement raise questions concerning EEO compliance, and this would be the basis for finding the offeror non-responsive, the matter must be referred to OFCCP regardless of the estimated value of the contract; only OFCCP may make determination of non-compliance with EEO requirements.

(b) Contracts for $1,000,000 or more. Contracts and amendments with an estimated value of $1,000,000 or more must have OFCCP verification of EEO compliance before award (see § 7–12.805–52). This verification shall be obtained by:

(1) Getting completed, signed, Reps. and Certs. and (when applicable) the O/S Team Agreement from the offeror (see § 7–12.805–53(a)).

(2) Contacting the cognizant Regional OFCCP for verification of EEO compliance.

(i) OFCCP may require 30 days lead time for verification if a compliance study is required. This should be considered in the procurement planning process.

(ii) The contracting officer may make initial inquiry to OFCCP by telephone, and telephone verification of EEO compliance may be used in making an award; however, the inquiry and verification must be confirmed in writing.

(iii) The following information is normally required by OFCCP:

(A) The offeror's full name and address;

(B) Name, title, address, and telephone number of a contact person for the prospective contractor;

(C) A description of the type of organization (university, nonprofit, etc.) and its ownership (private, foreign, state, etc.).

(D) Names and addresses of organizations in joint venture (if any); names and addresses of subcontractors (if any).

(E) Type of procurement (new contract— RFP or IFB, amendment, etc.) and estimated dollar amount, and term.

(F) Copy of approved Reps. and Certs. and O/S Team Agreement. In the initial contact with OFCCP, the contracting officer and OFCCP should mutually determine what information is to be included in the written verification request. In the event that OFCCP reports that the offeror is not in compliance, negotiations with the offeror shall be terminated.

(c) Contracts over $10,000, but less than $1,000,000. Contracts and amendments within this range do not require formal verification by OFCCP (see § 7–12.805–52). The method used to verify compliance is at the discretion of the contracting officer. The contracting officer may rely on the documentation submitted by the offeror (the Reps. and Certs. and O/S Team Agreement—see § 7–12.805–53(a)), unless he or she is aware of some reason to doubt the documentation submitted. In case of doubt, then an informal check with OFCCP should be made. In the event that evidence of non-compliance is developed, the contracting officer must contact OFCCP for confirmation of EEO status; only OFCCP may determine non-compliance with EEO requirements. If OFCCP confirms non-compliance, negotiations with the offeror contractor shall be terminated.

(d) Documentation for the contract file.

(1) Every contract file must contain completed signed Reps. and Certs. and (when applicable) the O/S Team Agreement. The file must clearly show that these documents have been reviewed and accepted by the contracting officer. If the Reps. and Certs. or O/S Team Agreement were revised to make them acceptable (see § 7–12.805–53(a)), the file must show what changes were required and certify that the changes were made.

(2) For contracts or amendments of $1,000,000 or more, the file must contain:

(i) A record of the initial contact with OFCCP, specifying the name, address, and telephone number of the person contacted, a summary of the information presented, and the advice given by OFCCP;

(ii) A copy of the written follow-up request for EEO compliance verification to OFCCP; and

(iii) A copy of the compliance verification from OFCCP.

(3) For contracts or amendments over $10,000 but less than $1,000,000, the file must contain a memorandum from the contracting officer stating that the contractor is considered in compliance with EEO requirements, and giving the basis for this statement (see § 7–12.805–53(c)).

(4) Documentation in the event of non-compliance. In the event that OFCCP determines that a prospective contractor is not in compliance, a copy of OFCCP's

written determination, and a summary of resultant action taken (termination of negotiations, notification of offeror and project officer, negotiation with next offeror in competitive range, re-solicitation, etc.) will be placed in the contract file for any contract which may result, together with other records related to unsuccessful offers, and retained for at least six months following award.

Authority: This AIDPR Notice is issued pursuant to 41 CFR 7–1.104–4.

Dated: August 7, 1980.

John F. Owens,

Deputy Assistant Administrator, Bureau for Program and Management Services.

BILLING CODE 4710–02–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 405

Medicare Program; Definition and Reimbursement of Hospital Intensive Care Type Units

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: This amendment to the Medicare regulations clarifies the requirements for the reimbursement of hospital "special care units" and substitutes the term "intensive care type unit" for that term wherever it appears in regulations. The current regulation has been misinterpreted by some hospitals as applying to units that furnish a level of care that is less than that furnished in the traditional intensive care unit. The revised regulation makes clear that only those units furnishing a level of care equivalent to that furnished in intensive care units qualify for the separate reimbursement specified in 42 CFR 405.452(d)(8).

EFFECTIVE DATE: Effective for provider cost reporting periods beginning on or after October 1, 1980.

FOR FURTHER INFORMATION CONTACT: William Goeller (301) 597–1802.

SUPPLEMENTARY INFORMATION:

Background

Section 1861(v) of the Social Security Act provides that the Secretary may establish, by regulations, the methods to be used in determining the reasonable costs of hospital services furnished to Medicare beneficiaries. Reimbursement to providers is based on costs actually incurred in furnishing services to beneficiaries.

This section of the law is implemented by regulations at 42 CFR 405.452. These regulations initially specified that the costs of furnishing routine services would be determined by an averaging method. The Secretary, at his discretion, decided at the time that this averaging method was both equitable and administratively feasible and that it took into account the fact that cost of care varies from patient care area to patient care area, and from patient to patient.

Under this method, reimbursement to providers for the costs of furnishing routine services was calculated by adding together the costs of routine services in all patient care areas of the hospital, deriving an average cost per diem and multiplying that per diem by the Medicare beneficiary utilization rate.

However, in 1972, the Secretary decided (again at his discretion) to amend the regulations at 42 CFR 405.452 to remove from the calculation of routine services costs, the costs incurred in furnishing care in special care units. This was done because the program recognized that the costs of furnishing care in these special care units were significantly higher, due to need for greater staffing and more specialized equipment, than the costs associated with other patient care areas, including intermediate or subintensive care units. Thus, incorporation of these higher costs with general routine costs would unfairly skew the calculation.

Since HEW's adoption of the special care unit reimbursement policy in 1972, we have maintained and intended that only those units furnishing a level of care that is equivalent to intensive care should be reimbursed separately as special care units. In our view, a subintensive or intermediate level of care is only part of the spectrum of general routine care, as are pediatric care, orthopedic care, and the like, and should be reimbursed by combining the reasonable costs of the care furnished in these intermediate or subintensive units with the reasonable costs of care in other general routine areas. Many patients in general routine areas receive more intensive care than other patients. For example, patients in traction or in pediatric units generally receive more care than routine appendectomy patients with no complications. Yet, the costs of these various types of care are all included in the routine cost center, and the calculation of an average per diem cost takes into account the fact that some patients receive more care than others. We believe that to separately compute cost of care by degree of illness would lend itself to more and more fragmentation of the costs—a result that could significantly increase the complexity of reimbursement, without necessarily effecting more accurate reimbursement.

Several Provider Reimbursement Review Board and Federal court decisions have addressed the issue of whether intermediate or subintensive care units are special care units for reimbursement purposes, and the conclusions reached have varied widely. These decisions reflect a lack of uniformity of understanding as to what constitutes a special care unit. Thus, it has become necessary to define more clearly what special care units are and to state under what circumstances a separate computation will be used in determining Medicare reimbursable costs in these units. That is the purpose of this regulation.

Notice of Proposed Rulemaking

A Notice of Proposed Rulemaking (NPRM) was published on May 16, 1979 (44 FR 28768). The proposed rule provided specific criteria that a unit must meet in order to qualify as a special care unit for reimbursement purposes. Those criteria were:

(i) The unit must be in a hospital;

(ii) The unit must be physically and identifiably separate from other areas and units in the hospital. There cannot be a sharing of space or nursing services between the unit and other patient care areas or ancillary service areas;

(iii) There must be specific written policies that include criteria for admission to, and discharge from, the unit;

(iv) Registered nursing care must be furnished constantly on a continuous 24-hour basis. The staffing may not be decreased during night shifts, weekends, or periods when it is commonly decreased in other patient care areas;

(v) There must be a minimum of 12 scheduled hours of direct patient nursing care per patient day. This would not include any time spent performing administrative duties for the unit, nor would it include care furnished by aides and orderlies;

(vi) A minimum of 6 hours of direct patient care per patient day must be furnished by registered nurses; and

(vii) The unit must be permanently equipped with the life-saving equipment necessary to treat the critically ill patients for whom it is designed.

The NPRM also solicited comments on whether the admission and discharge policies for special care units must be consistent with the standards set by Professional Standards Review

Organizations (PSROs) and be approved by PSROs in advance.

Discussion of Major Comments

Comments on the NPRM were received from Medicare intermediaries and providers, from a few major provider chain organizations, and from major health care organizations such as the American Hospital Association, the Federation of American Hospitals and the American Nurses' Association. A summary of the major comments and our responses follow. In discussing the responses and in the final regulation, we use the term "intensive care type units", which is more descriptive than "special care units". We believe that this term more accurately reflects the type of unit that qualifies for separate reimbursement under the regulations.

1. Some commenters suggested that the proposed regulation should recognize subintensive or intermediate care units as distinct treatment modalities qualifying for separately computed reimbursement.

We realize that hospital care encompasses a broad spectrum, from the care of the very ill to the care of the patient well enough to be discharged home, and that subintensive and intermediate care units have become an accepted part of medical practice. Our current policy only differentiates between two major segments of that spectrum—general routine care and intensive type care. Intermediate care, as well as orthopedic care, pediatric care, self care, and the like, are included in general routine care.

If separate reimbursement were allowed for intermediate or subintensive care units, arguments would be made for separate reimbursement of still other levels of care. Separately computing the costs of care by degree of illness in this way would lend itself to more and more fragmentation of costs—a result that could significantly increase the complexity of reimbursement, without necessarily effecting more accurate reimbursement because while Medicare utilization may be greater at some levels, it will necessarily be lower at others.

In addition, before separate reimbursement could be made for some of these units, definitions including certain objective criteria, would need to be developed. However, these levels of care may not be the same in all hospitals, so that if HCFA were to attempt to develop a definition for subintensive or intermediate care units, it would also have to define all levels of routine care used by hospitals. This would be an extremely difficult task and result in constant disagreements because similarly termed levels of care may not represent the same level in every hospital.

In contrast to the difficulty and complexity of computing reimbursement based on multiple levels of care, experience has shown that the current system, which recognizes the two major levels of care, general routine and intensive type care, is administratively feasible. In addition, the method of computing a per diem cost for general routine care by the averaging method accurately reflects the costs of the various types of care that individual hospitals furnish, and will include any increased costs that are associated with intermediate or subintensive care units.

2. Some commenters objected to the criterion that the intensive care type unit must be physically and identifiably separate from general patient care areas, other special care inpatient hospital units, and ancillary service areas. Some commenters also suggested that rural hospitals be granted an exception to this requirement.

We are amending this criterion to state that the unit must be physically and identifiably separate from general routine patient care areas, including intermediate and subintensive care units and ancillary services areas. Thus, an intensive care type unit need not be separate from other intensive care type units in order to satisfy the regulation. While there cannot be a concurrent sharing of nursing staff between intensive care type units and other units, two or more intensive care type units may share the same nursing staff, in which case the units may be considered as one single intensive care type unit for reimbursement purposes. This would be the case, for example, where there is a combined coronary care unit/intensive care unit (CCU/ICU).

However, where there is no concurrent sharing of staff, but only a sharing of support areas such as supply rooms or conference room, each unit will be considered as an individual intensive care type unit, provided that costs can be identified for each unit. Float nurses (nurses who work in different units on an as-needed basis) can be utilized in the intensive care type unit. Where possible, these nurses should be assigned for full eight hour shifts, but a nurse's time may be split between two or more units during the same shift where fluctuation of the hospital's census dictates that this is the most effective use of nursing personnel. Where a nurse's time is split between units, then the costs must be allocated to the appropriate units depending upon the time spent in those units. The hospital must maintain adequate records to support the allocation. If such records are not available, then the costs must be allocated to the general routine services cost areas.

Two commenters also suggested that rural hospitals be granted an exception to this requirement, especially regarding the concurrent sharing of staff. We do not believe that such an exception would be appropriate from the standpoint of cost allocation, particularly with respect to the proper allocation of staff costs. Extensive recordkeeping by the hospital, as well as extensive monitoring by the intermediary, would be necessary, with no assurance that costs would be accurately allocated to the different cost centers.

We are also concerned about the quality of care which would be furnished to a patient in a situation where staff was required to monitor patients in intensive care type units and other units at the same time. Patients are admitted to intensive care type units because they are seriously ill and require careful and continuous care. The intensive nature of this care would be compromised if the nursing staff were required to provide care at the same time to patients in other areas and units as well.

In addition, the criteria that are contained in this regulation have already been revised in light of actual hospital practices as discussed in the comments received on the Notice of Proposed Rulemaking. In particular, we no longer require that each intensive care type unit be physically and identifiably separate from other intensive care type units, or that there be constant staffing at the same level 24 hours of every day. Also, we have made specific provisions for a hospital's use of float nurses. We believe that these changes that apply to all hospitals, urban as well as rural, respond to the concerns expressed by the commenters that the requirement of physical separation as stated in the Notice of Proposed Rulemaking was too rigid.

3. Many commenters objected to the constant staffing requirement as not being cost effective. They argued that providers should be allowed to decrease staffing on nights and weekends, and when utilization is low.

We agree that most patient care activity such as medical procedures, testing, doctor rounds, and the like, is conducted on the day shifts during the normal workweek, and we believe providers should be allowed to decrease staffing when patient care activity is decreased. The same level of staffing is not required on nights and weekends as

during the normal workweek and, therefore, we are eliminating this requirement. This conclusion is consistent with our understanding of medical practice and the comments we received, and the elimination of the requirement will have no adverse effect on the quality of patient care.

4. Many commenters objected, because of potential increased costs, to the requirements that there be 12 hours of nursing care per patient day and 6 hours of direct registered nursing care per patient day. They argued that hospitals will be forced to increase staffing to meet these requirements. In addition, the commenters indicated that our data supporting these requirements was inconclusive and not well grounded.

We have again reviewed the data supporting the requirement for 6 hours of direct registered nursing care per patient day and agree that it should be deleted.

We have retained the overall nursing care staffing requirement by stating that there must be a minmimum ratio of one nurse to every two patients per patient day. Included in the calculation of this nurse/patient ratio are registered nurses, licensed vocational nurses, licensed practical nurses and nursing assistants who provide patient care. Not included are general support personnel such as ward clerks, custodians and housekeeping personnel. We relied on data obtained from the survey of Critical Care Nursing Practice, 1979, conducted for the American Association of Critical Care Nurses by Arthur P. Little, Inc., and Opinion Research Corporation, in arriving at this nurse/patient ratio and believe that the data indicates that the requirement is a reasonable standard for intensive care type units.

5. Several commenters indicated that PSRO involvement is not necessary with respect to approval of admission and discharge policies for intensive care type units. One commenter also recommended that HCFA prepare a regulation that would require a hospital to determine, subject to PSRO approval, which patients require an intensive level of care on the basis of their medical needs.

We agree that PSRO involvement is not specifically necessary with respect to admission and discharge policies. Under the law, PSROs are responsible for assuring that health services that are reimbursed under the Medicare, Medcaid and Maternal and Child Health and Crippled Children's programs are medically necessary, meet professionally recognized standards of care, and are appropriately furnished in the most economical settings. While some PSROs do not review every case admitted to an intensive care type unit, they are responsible for review of the overall quality and appropriateness of care furnished in hospitals, including that furnished in intensive care type units. Where necessary, PSROs work with hospitals in identifying problems that may exist with respect to utilization of special care units and may participate in the development of revised policies.

In addition, the PSRO Hospital Review Regulations (42 CFR Part 466) already require that PSRO criteria specify clinical indications of the necessity for hospital admission and continued stay. Therefore, an additional regulation is not needed.

6. Some commenters objected to the criterion that an intensive care type unit be permanently equipped with life-saving equipment.

We are amending this criterion by eliminating the word "permanently" so that units may qualify as intensive care type units if they have portable equipment readily available for immediate use.

7. Several commenters objected to the criteria, particularly with regard to staffing, as being arbitrary and suggested that HCFA adopt a more flexible approach overall.

As a result of comments received, we have eliminated certain requirements that were in the proposed regulation, and revised others.

We believe that the revised criteria reasonably describe widely accepted characteristics of intensive care type units. The specific purpose of these criteria is to eliminate confusion and misunderstanding as to the definition of an intensive care type unit and to enable intermediaries to verify when a unit qualifies for separately computed reimbursement as an intensive care type unit. Therefore, clarity and definitive application to a variety of settings are primary objectives. However, we have also tried to reflect currently accepted standards of hospital practice and administration in the development of these criteria.

It would also not be possible, as was suggested by one commenter, to recognize the same beds alternatively as either general routine or special care, depending upon the daily needs of the hospital and patients. Beds which alternate from one category to another cannot be reimbursed on two different bases under our regulations, since it is not possible to apply current cost accounting procedures to the cost of such beds.

8. Several commenters objected to the 24-hour continous registered nurse requirement.

We believe that registered nursing care is absolutely essential due to the critical state of patients in intensive care type units. Therefore, we have retained the requirement that, at a minimum, one registered nurse be present in this unit at all times.

9. Several commenters stated that the proposed regulation would act to increase costs, because intermediate care units would be eliminated resulting in patients being kept in intensive care units longer.

We do not agree that intermediate care units will be eliminated as a result of this regulation. Hospitals make decisions as to the types and levels of care they will offer based on patient needs. Just as intensive care units existed before Medicare recognized separate reimbursement for these units, hospitals will retain intermediate and subintensive care units if these are deemed necessary for quality patient care. There is no firm evidence to indicate either that the quality of care would improve if HCFA allowed separate reimbursement for imtermediate or subintensive care units or that the quality of care will decline if separate reimbursement is not permitted. We will monitor closely the impact of this regulation, however, and will consider further changes in the reimbursement process if it is demonstrated that the regulation has had a detrimental impact on the quality of patient care.

We also wish to emphasize that, just because a unit does not meet the definition of an intensive care type unit does not mean that the Medicare program will not reimburse for the care furnished in that unit. Rather, the costs of care furnished in that unit are reimbursed with other general routine service costs.

As indicated in comment No. 1, general routine care includes a broad spectrum of care. Due to the many different levels of care, an averaging procedure has been adopted to compute the costs of general routine care. We believe the average per diem, which includes the costs of intermediate or subintensive care units, is an accurate measure of a hospital's general routine costs, since it is based on the actual costs incurred by the hospital in furnishing a broad spectrum of care. If the costs of intermediate or subintensive care units are higher than other routine service costs, then the combination of these higher costs with other general routine costs will increase the average per diem cost for general routine care. Thus, the method of average per diem reimbursement is responsive to differences in the types of care

V 45 AG 1980 UMI

furnished by hospitals, and provides an accurate way of determining the reasonable cost of services furnished.

42 CFR Part 405 is amended as set forth below:

§ 405.430 [Amended]

1. § 405.430 (b)(1), (b)(2), (b)(3), (b)(5), (b)(6), (b)(9), and § 405.452 (b)(1), (b)(2), and (d)(7), the words "other special care inpatient hospital units" are changed to "other intensive care type inpatient hospital units".

2. Section 405.452 is amended by revising paragraphs (d)(8), (d)(10), (e)(2)(ii) and (e)(3)(iii) and (e)(3)(iv) to read as follows:

§ 405.452 Determination of cost of services to beneficiaries.

* * * * *

(d) *Definitions.* * * *

(8) *Average cost per diem for hospital intensive care type units.* Average cost per diem for intensive care units, coronary care units; and other intensive care type inpatieht hospital units as defined in subparagraph (10) of this paragraph means the amount computed by dividing the total allowable costs for routine services in each (see paragraph (b)(1) of this section), or the aggregate (see paragraph (b)(2) of this section), of these units by the total number of inpatient days of care rendered in each or the aggregate of these units.

* * * * *

(10) *Intensive care type inpatient hospital unit.* To be considered an intensive care type inpatient hospital unit, the unit must furnish services to critically ill patients. (Examples of intensive care type units include, but are not limited to, intensive care units, trauma units, coronary care units, pulmonary care units, and burn units. Excluded as intensive care type units are postoperative recovery rooms, postanesthesia recovery rooms, maternity labor rooms, and subintensive or intermediate care units.) The unit must also meet the following conditions:

(i) The unit must be in a hospital;

(ii) The unit must be physically and identifiably separate from general routine patient care areas, including subintensive or intermediate care units, and ancillary service areas. There cannot be a concurrent sharing of nursing staff between an intensive care type unit and units or areas furnishing different levels or types of care. However, two or more intensive care type units that concurrently share nursing staff can be reimbursed as one combined intensive care type unit if all other criteria are met. Float nurses (nurses who work in different units on an as-needed basis) can be utilized in the intensive care type unit. If a float nurse works in two different units during the same eight hour shift, then the costs must be allocated to the appropriate units depending upon the time spent in those units. The hospital must maintain adequate records to support the allocation. If such records are not available, then the costs must be allocated to the general routine services costs areas;

(iii) There must be specific written policies that include criteria for admission to, and discharge from, the unit;

(iv) Registered nursing care must be furnished on a continuous 24-hour basis. At least one registered nurse must be present in the unit at all times;

(v) A minimum nurse-patient ratio of one nurse to two patient per patients day must be maintained. Included in the calculation of this nurse/patient ratio are registered nurses, licensed vocational nurses, licensed practical nurses, and nursing assistants who provide patient care. Not included are general support personnel such as ward clerks, custodians and housekeeping personnel; and

(vi) The unit must be equipped, or have available for immediate use, life-saving equipment necessary to treat the critically ill patients for which it is designed. This equipment may include, but is not limited to, respiratory and cardiac monitoring equipment, respirators, cardiac defibrillators, and wall or canister oxygen and compressed air.

(e) *Application.* * * *

(2) *Departmental Method.* * * *

(ii) *For cost reporting periods starting after December 31, 1971.* The following illustrates how apportionment based on the average cost per diem for general routine services, taking into account, to the extent pertinent, an inpatient routine nursing salary cost differential (see § 405.430 for definition and application of this differential) and each intensive care type unit and apportionment of the cost of ancillary services on the ratio of beneficiary charges to total charges applied to cost by department would be determined for cost reporting periods starting after December 31, 1971, under the Departmental Method, using only inpatient data:

(3) *Combination Method.* * * *

(iii) *Combination Method for cost reporting periods beginning after December 31, 1971.* The following illustrates how apportionment based on the average cost per diem for general routine services, taking into account, to the extent pertinent, an inpatient routine nursing salary cost differential (see § 405.430 for definition and application of this differential) and the aggregate of the intensive care type units and apportionment of the cost of ancillary services on the basis of the ratio of total beneficiary ancillary charges to total patient ancillary charges (excluding delivery room charges) applied to the cost of all such ancillary services (excluding delivery room costs) would be determined for cost reporting periods beginning after December 31, 1971, under the Combination Method using only inpatient data.

* * * * *

(iv) *Using cost finding for cost reporting periods ending after June 30, 1973.* Use of the Combination Method of apportionment for cost reporting periods ending after June 30, 1973, and starting before July 1, 1979, necessitates cost finding as specified in § 405.453(d)(3) to determine the division of the provider's total costs among general routine care, routine care in intensive care type units, renal dialysis, delivery room and labor room, the aggregate of all other ancillary services, and nonallowable activities.

FEDERAL EMERGENCY AGENCY

[Docket No. FEMA-5687]

44 CFR Part 70

National Flood Insurance Program; Letter of Map Amendment for Napa County, Calif.

AGENCY: Federal Insurance Administration.

ACTION: Final rule.

SUMMARY: The Federal Insurance Administrator published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included Napa County, California. It has been determined by the Federal Insurance Administrator after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for Napa County, California, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: August 18, 1980.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert G. Chappell, Acting Assistant Administrator, Program Implementation & Engineering Office, National Flood Insurance Program, 451 Seventh Street, SW., Washington, DC 20410, (202) 755-6570 or toll free line (800) 424-8872 (in Alaska and Hawaii call toll free (800) 424-9080).

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Telephone: (800) 638-6620.

The map amendments listed below are in accordance with § 70.7(b):

Map No. H & I 060205 Panels 0410A and 0430A, published August 22, 1979 in 44 FR 49269, indicates that Parcel One, being Lot 1, Map of North Napa, Napa County, California, as recorded in Book 417, Page 457, in the Office of the Recorder, Napa County, California, is partially within the Special Flood Insurance Area.

Map No. H & I 060205 Panels 0410A and 0430A is hereby corrected to reflect that the above mentioned property is not within the Special Flood Hazard Area identified on February 1, 1980. This property is in Zone C.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; Executive Order 12127, 44 FR 19367; delegation of authority to Federal Insurance Administrator)

Issued: August 7, 1980.

Gloria M. Jimenez,

Federal Insurance Administrator.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[Docket No. FEMA-5712]

44 CFR Part 70

National Flood Insurance Program; Letter of Map Amendment for the City of Aurora, Colo.

AGENCY: Federal Insurance Administration.

ACTION: Final rule.

SUMMARY: The Federal Insurance Administrator published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the City of Aurora, Colorado. It has been determined by the Federal Insurance Administrator after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the City of Aurora, Colorado, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: August 18, 1980.

FOR FURTHER INFORMATION CONTACT:

[Docket No. FEMA-5712]

44 CFR Part 70

National Flood Insurance Program; Letter of Map Amendment for the Unincorporated Area of Washington County, Md.

AGENCY: Federal Insurance Administration.

ACTION: Final rule.

SUMMARY: The Federal Insurance Administrator published a list of communities for which maps were published identifying Special Flood Hazard Areas. This list included the Unincorporated Area of Washington County, Maryland. It has been determined by the Federal Insurance Administrator, after acquiring additional flood information and after further

technical review of the Flood Insurance Rate Map for the Unincorporated Area of Washington County, Maryland, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: August 18, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, Acting Assistant Administrator, Program Implementation & Engineering Office, National Flood Insurance Program, 451 Seventh Street SW., Washington, D.C. 20410, (202) 755–6570 or Toll Free Line (800) 424–8872.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone: (800) 638–6620 toll free.

The Map amendments listed below are in accordance with § 70.7(b):

Map No. 240070, Panel No. 0085A, published on October 23, 1979, in 44 FR 61010, indicates that Lot No. 29, Section B, Spring Valley Wooded Estates, Unincorporated Area of Washington County, Maryland, as recorded in Liber 663, Page 64, in the Office of the Clerk of the Circuit Court of Washington County, Maryland, is located within the Special Flood Hazard Area.

Map No. 240070, Panel No. 0085A, is hereby corrected to reflect that the existing structure located on the above-mentioned property is not within the Special Flood Hazard Area identified on May 1, 1978. The structure is in Zone C.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator)

Issued: June 23, 1980.

It has been determined by the Federal Insurance Administrator after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the Township of Tinicum, Bucks County, Pennsylvania, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: August 18, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, Acting Assistant Administrator, Program Implementation & Engineering Office, National Flood Insurance Program, 451 Seventh Street SW., Washington, DC 20410, (202) 755–6570 or toll free line (800) 424–8872.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Telephone: (800) 638–6620 toll free.

The map amendments listed below are in accordance with § 70.7(b):

Map No. H & I 420205 Panel No. 0005B, published on October 23, 1979 in 44 FR 61012, indicates that Lot No. 44–009–011, Township of Tinicum, Bucks County Pennsylvania, as recorded in Deed Book 1177, Page 0583, in the Office of the Recorder of Deeds of Bucks County, Pennsylvania, is located within the Special Flood Hazard Area.

Map No. H & I 420205, Panel No. 0005B, is hereby corrected to reflect that dwelling and two-story shop situated 40 feet to the rear of the dwelling, located on the above-mentioned Lot, are not within the Special Flood Hazard Area identified on February 1, 1979. The structures are in Zone B.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator)

Issued: August 7, 1980.

[Docket No. FEMA–5712]

Letter of Map Amendment for Township of Tinicum, Bucks County, Pa., Under National Flood Insurance Program

AGENCY: Federal Insurance Administration.

ACTION: Final rule.

SUMMARY: The Federal Insurance Administrator published a list of communities for which maps were published identifying Special Flood Hazard Areas. This list included the Township of Tinicum, Bucks County, Pennsylvania. It has been determined by the Federal Insurance Administrator, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the Township of Tinicum, Bucks County, Pennsylvania, that certain property is not within the Special Flood Hazard Area identified on February 1, 1979. The structures are in Zone B.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator)

Issued: August 7, 1980.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

45 CFR Part 71

HHS Day Care Regulations; Correction

AGENCY: Office of the Secretary, HHS.

ACTION: Final rules: Correction.

SUMMARY: This document corrects the final HEW Day Care Regulations (now HHS Day Care Regulations) in 45 FR 17870, March 19, 1980.

FOR FURTHER INFORMATION CONTACT: Warren Master, Director, Office of Policy Development, Office of Human Development Services, Room 736E, Hubert H. Humphrey Bldg., 200 Independence Avenue SW., Washington, D.C. 20201, (202) 245–6275.

SUPPLEMENTARY INFORMATION: The Department of Health, Education, and Welfare (HEW) Day Care Regulations, now the Department of Health and Human Services (HHS) Day Care Regulations, were published in final in the **Federal Register** on March 19, 1980. We are making technical corrections to these final rules. These corrections are needed in order to extend the effective date regarding group composition to day care homes as well as to day care centers. To do this we are modifying 45 CFR 71.66(b) by adding a reference to § 71.24 where appropriate and the phase "or homes" where appropriate.

45 CFR 71.66 appearing on page 17885 is corrected to read as follows:

§ 71.66 Effective date.

These regulations are effective on October 1, 1980 except that—

(a) The training requirements in § 71.12 and § 71.32, and the requirements in § 71.36 and § 71.40 that day care homes inform parents about and refer them to health and social services, will become effective on April 1, 1981; and

(b) For any State, the October 1, 1980 effective date of the group composition requirements at § 71.24 and § 71.44 may be extended for not more than two years upon a showing satisfactory to the Secretary that substantial numbers of HEW funded children are receiving care in centers or homes that meet group composition requirements less stringent than the requirements in § 71.24 and § 71.44 and that additional time is needed to meet those requirements within the State. The showing must—

(1) Be made to the Secretary by the State agency by October 1, 1980; and

(2) Include detailed information about the group composition requirements currently being met by the centers or homes within the State;

(3) Indicate the number of HEW funded children who are receiving care in centers or homes that do not comply with the group composition requirements in § 71.24 and § 71.44;

(4) Estimate the time necessary to fully meet those requirements in centers or homes caring for HEW funded children within the State; and

(5) Include a schedule for a gradual phase-in of the requirements.

Dated: August 8, 1980.

Cesar A. Perales,

Assistant Secretary for Human Development Services.

Approved: August 12, 1980.

Nathan J. Stark,

Acting Secretary.

Federal Aviation Administration

14 CFR Ch. 1

Proposed Sacramento, California Terminal Control Area; Informal Airspace Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of informal airspace meeting, proposed Sacramento, California, terminal control area.

SUMMARY: The Federal Aviation Administration (FAA) will hold an Informal Airspace Meeting for the purpose of discussing a plan by the FAA to establish a Group II Terminal Control Area (TCA) at Sacramento, California.

DATE: The meeting will be held on Saturday, September 6, 1980, 9:00 a.m.

ADDRESS: Little Theatre, American River College, 4700 College Oak Drive, Sacramento, California.

FOR FURTHER INFORMATION CONTACT: Mr. Eddie Lewis, Chief, Terminal Radar Approach Control (TRACON), 5839 22nd Street, Rio Lindo, California 95673; telephone (916) 922–9511 or Mr. Richard Morrison, AWE–532, Air Traffic Division, FAA Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009; telephone (213) 536–6182.

SUPPLEMENTARY INFORMATION: The purpose of the Informal Airspace Meeting is to offer all persons likely to be affected by the proposed TCA the opportunity to present their views, and to assist the FAA in the preparation of an airspace action that will accomplish the improved safety objectives with the least impact on the airspace users.

No formal minutes or transcripts will be taken, however, anyone may submit written comments before or during the meeting which will be made a matter of record if they so desire. This action will not prevent interested persons from submitting comments later in response to a Notice of Proposed Rulemaking (NPRM) in the event the item is formally proposed.

A detailed written description of the draft TCA configuration is available by contacting the persons listed under "FOR FURTHER INFORMATION CONTACT * * *"

Issued in Los Angeles, Calif., on August 6, 1980.

H. C. McClure,
Acting Director, Western Region.

[Airspace Docket No. 18605/80–AWA–10]

Alteration of Group II Terminal Control Area; St. Louis, Mo.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to reconfigure the Group II Terminal Control Area (TCA) at St. Louis, Mo., which first became effective on January 1, 1974. This action would: (1) Add airspace to accommodate a proposed new arrival procedure to Runways 12 and 30; and (2) remove from the TCA a large segment of airspace.

DATES: Comments must be received on or before October 2, 1980.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Central Region, Attention: Chief, Air Traffic Division, Docket No. 18605/80–AWA–10, Federal Aviation Administration, 601 E. 12th Street, Kansas City, Mo. 64106.

The docket for this action may be examined at the office of the Regional Air Traffic Division, 601 E. 12th Street, Kansas City, Mo. 64106, or at the FAA, Office of the Chief Counsel, Rules Docket (AGC–204), Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: James King, Airspace and Procedures Branch, Air Traffic Division, Central Region (ACE–500), Federal Aviation Administration, 601 E. 12th Street, Kansas City, Mo. 64106; (816) 374–3408.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in triplicate to the Director, Central Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 601 E. 12th Street, Kansas City, Mo. 64106. All communications received on or before October 2, 1980, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the FAA Regional and Headquarters rules dockets for examination by interested persons.

Commenters wishing to have the FAA acknowledge receipt of their comments submitted in response to this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 18605/80–AWA–10." The postcard will be date/time stamped and returned to the commenter.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2 which describes the application procedures.

History

As part of a comprehensive program announced on December 27, 1978, in the FAA Administrator's Plan for Enhanced Safety in the National Airspace System, St. Louis was a candidate for Group I designation and possible expansion of the designated TCA airspace. Consequently, the St. Louis TCA was reviewed in depth. The goal was to provide the most safe and efficient configuration for all airspace users. Aspects that were considered included noise abatement, costs to users, safety for passengers and aircraft, and the safe and efficient use of airspace.

The review disclosed that Group I designation would not be necessary. The analysis also disclosed that a high level of safety can be maintained in that area while at the same time reducing the amount of airspace in the TCA. Concurrently, the FAA was developing a new concept for arrival procedures to increase airspace use capability.

Accordingly, this proposed action would reconfigure parts of the TCA, reducing the overall TCA airspace. The reduction would provide greater flexibility to aircraft wishing to avoid TCA airspace. Also, it is necessary to propose an expansion of portions of TCA airspace to accommodate proposed new arrival procedures to Runways 12 and 30. This expansion would insure that turbojet operations would continue to be contained within TCA airspace and the high level of safety provided by the TCA would not be reduced.

After experience is gained with the revised TCA configuration, consideration will be given to proposing any modifications that appear necessary. Any future modifications that may be proposed would be thoroughly coordinated with airspace users.

The proposal contained in this notice was preceded with broad and helpful public participation with the FAA in considering the development of an airspace description for a TCA that is responsive to the need to increase safety and to the needs of both transient and local aircraft operators who might be affected. An extensive publicity effort was made to invite all interested persons to participate in a meeting held on April 24, 1980. Invitations were extended to all fixed-base operators and pilots in the local area. Notice of the meeting was also given through radio, telephone, mail, and posting announcements. As a result of the meeting, adjustments to the TCA configuration were developed and are reflected in this notice. Another informal airspace meeting will be held on Tuesday, September 9, 1980, at 7 p.m. at Noah's Ark Restaurant, 1500 South 5th Street, Charles, Mo. The purpose of that meeting is to discuss this proposed alteration of the St. Louis, Mo., TCA. Notice of that meeting was published in the **Federal Register** on July 3, 1980 (45 FR 45305). Invitations were extended to all fixed-base operators and pilots in the local area and notice was given through radio, telephone, mail, and posting announcements. An additional opportunity for public participation is provided by this notice to insure full consideration of public concerns at every stage of the rulemaking process.

Local Benefits

The modifications of the Group II TCA, as proposed in this notice, would: (1) Provide greater accessibility to aircraft wishing to avoid TCA airspace at the outer rings; and (2) accommodate sufficient airspace for new arrival procedures, thereby reducing delays and consequently fuel consumption. All turbojet arrival and departure profiles would be contained within TCA airspace for air safety purposes with the TCA having a minimum impact on aircraft not required to be under ATC due to this proposed action.

Economic Impacts

The costs of modifying the St. Louis TCA are being considered as part of the regulatory decisions being made. Since all turbine-powered, IFR aircraft will continue to be contained in the TCA as reconfigured, there will be no change in economic effect for those flights. Uncontrolled aircraft will have a larger amount of airspace in which to conduct their activities and therefore will have an increased degree of flexibility to plan their flights to use more economic routes or altitudes. Any adverse economic impact that may now exist will be the same or reduced as available airspace is increased for traffic not operating within the TCA.

The existing TCA configuration as compared to the proposed configuration demonstrates no change in impacted airports, number of operations, the number of airports receiving diverted traffic, the distance in air miles or ground miles flown by diverted traffic, the number of aircraft expected to relocate or divert due to the TCA, the special use operations conducted within the core area of the TCA or other segments of the TCA and adjacent airspace, and no change in operational procedures at adjacent airports.

Environmental Impacts

An environmental assessment has been prepared which addresses the aircraft noise, aircraft emissions, and fuel consumption impacts of the proposed altered TCA. It concludes that those impacts would not significantly affect the quality of the human environment. That assessment is in both the Regional and Washington dockets for public comments.

The Proposed TCA

The FAA is proposing an amendment to Subpart K of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter certain lateral and vertical dimensions of the St. Louis, Mo., TCA. The original St. Louis TCA became effective on January 1, 1974.

The FAA considered raising the ceiling of the St. Louis TCA to 12,500 feet. That action would have made the TCA abut airspace where regulations require an operable transponder and altitude encoding equipment for operations above 12,500 feet.

Analysis of St. Louis airspace showed no operational problems that justified an expansion of the TCA above 8,000 feet MSL at this time. In fact, the review indicated that the size of the TCA could be reduced at the outer rings. Further, the analysis showed that additional airspace is required for radar vectors and separation to accommodate new arrival procedures for Runways 12 and 30.

Accordingly, the airspace description for the TCA action proposed in this notice was developed by the FAA, Central Region, in consultation with affected users to minimize the potential adverse impacts of the proposal. Several planning meetings with key representatives of general aviation user groups were held to assess the existing TCA configuration and proposed modifications to that configuration. The modifications were concurred in by all planning participants as well as by the Missouri Pilots Association. Local representatives of the Missouri Air National Guard, McDonnell Douglas Aircraft, Aircraft Owners and Pilots Association, and the Air Transport Association have stated no serious objections to the proposal. The elimination of the outer segments from TCA airspace will not derogate safety or the efficient use of airspace.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 71.401(b) of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (45 FR 669) by amending the St. Louis, Mo., TCA to read as follows:

Subpart K-Terminal Control Areas

§ 71.401 Designation.

* * * * *

(b) Group II, Terminal Control Areas:

* * * * *

St. Louis, Mo., Terminal Control Area

Primary Airport

St. Louis International Airport (lat. 38°44'54"., long. 90°21'47"W.)

Boundaries

Area A. That airspace extending upward from the surface to and including 8,000 feet MSL within a 6-mile radius arc of the St. Louis International Airport ASR Antenna (lat. 38°44'25"N., long. 90°22'14"W.), excluding that airspace within a 2-mile radius arc of the Creve Coeur Airport (lat. 38°43'35"N., long. 90°30'35"W.).

Area B. That airspace extending upward from 2,000 feet MSL to and including 8,000 feet MSL within a 10-mile radius arc of the St. Louis International Airport ASR Antenna, excluding Area A and excluding the area south of the Foristell VORTAC 093° radial.

Area C. That airspace extending upward from 3,000 feet MSL to and including 8,000 feet MSL within a 15-mile radius arc of the St. Louis International Airport ASR Antenna, and that area which lies south of the Foristell VORTAC 093° radial which is contained within the 10-mile radius arc of the St. Louis International Airport ASR Antenna, excluding Areas A and B, and excluding the area within and underlying Area E.

Area D. That airspace extending upward from 4,500 feet MSL to and including 8,000 feet MSL between the 15-mile and 20-mile radii arcs of the St. Louis International Airport ASR Antenna, excluding an area bounded on the east by a line 5 miles northwest of and parallel to the St. Louis International Airport Runway 24 ILS localizer northeasterly course, counterclockwise to a line 8 miles south of and parallel to the St. Louis International Airport Runway 12R ILS localizer northwesterly course, and excluding an area bounded on the south by a line 5 miles south of and parallel to the St. Louis International Airport Runway 6 localizer southwesterly course, counterclockwise to a line 8 miles north of and parallel to the St. Louis International Airport Runway 30L ILS localizer southeasterly course.

Area E. That airspace extending upward from 3,600 feet MSL to and including 8,000 feet MSL within a 15-mile radius arc of the St. Louis International Airport ASR Antenna, bounded on the northwest by the Troy VORTAC 229° radial, and on the west by a line extending from lat. 38°35'00"N., long. 90°12'00"W., to lat. 38°10'00"N., long. 90°07'00"W.

Area F. That airspace extending upward from 4,000 feet MSL to and including 8,000 feet MSL in two areas: (1) Within 8 miles of each side of the St. Louis International Airport Runway 12R ILS localizer northwesterly course extending outward from the 15-mile radius arc to the 25-mile radius arc of the St. Louis International Airport ASR Antenna; and (2) Within 8 miles of each side of the St. Louis International Airport Runway 30L ILS localizer southeasterly course extending outward from the 15-mile radius arc to the 25-mile radius arc of the St. Louis International Airport ASR Antenna.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.65.)

Note. The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the draft regulatory evaluation prepared for this action is contained in the Washington and Regional dockets. A copy of it may be obtained by contacting the person identified above under the caption "FOR FURTHER INFORMATION CONTACT * * *."

Issued in Washington, D.C. on August 13, 1980.

R.J. Van Vuren,

Director, Air Traffic Service.

DEPARTMENT OF JUSTICE

28 CFR Part 42

Federal Financial Assistance; Nondiscrimination on the Basis of Sex in Education Programs; Extension of Comment Period

AGENCY: Department of Justice.

ACTION: Extension of time for filing public comments on proposed rules and requests for comments.

SUMMARY: The Department of Justice proposed to add a new regulation for nondiscrimination on the basis of sex in education programs and activities receiving or benefiting from federal financial assistance. These rules were intended to implement Title IX of the Education Amendments of 1972, as amended, 20 U.S.C. 1681 *et seq.*, which prohibits (with certain exceptions) sex discrimination in federally assisted education programs or activities.

The proposed rules and requests for comments were published in the Federal Register on June 17, 1980, at 45 FR 41001–41012, and parties were given 60 days from that date in which to file comments. The Department has recently been asked by several interested groups to extend the comment period. We believe that an extension would be useful since it will allow the public to prepare more thoughtful and complete comments without unduly delaying the publication of the final rules.

DATES: Comments should be received on or before September 19, 1980.

ADDRESS: Comments must be submitted to: Drew S. Days III, Assistant Attorney General, Civil Rights Division, Department of Justice, Washington, D.C. 20530, phone (202) 633–2151. Comments received in response to this notice will be available for public inspection in Room 412, 521 12th Street, NW., Washington, D.C., between 9:00 a.m. and 5:30 p.m. Monday through Friday, except on Federal holidays, until the proposed rule is published in final form.

FOR FURTHER INFORMATION CONTACT: Ms. Stewart B. Oneglia, Director, Office of Coordination and Review, Civil Rights Division, Department of Justice, Washington, D.C. 20530, phone: (202) 724–6758.

Stewart B. Oneglia,

Director, Office of Coordination and Review, Department of Justice.

BILLING CODE 4410-01-M

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

33 CFR Part 209

Administrative Procedures; Shipping Safety Fairways, Gulf of Mexico

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Corps of Engineers proposes to amend the regulations which establish shipping safety fairways in the Gulf of Mexico to relax the absolute prohibition on structures. The amendment if adopted would allow the district engineers to permit certain temporary structures within a fairway.

DATE: Comments must be received by September 30, 1980.

ADDRESS: HQDA, DAEN–CWO—N, Washington, D.C. 20314.

FOR FURTHER INFORMATION CONTACT: Mr. Charles Decker at (504) 838–2255 or Mr. Ralph T. Eppard at (202) 272–0200.

SUPPLEMENTARY INFORMATION: Department of the Army Permits are required for the construction of any structure in or over any navigable water of the United States pursuant to Section 10 of the River and Harbor Act of 1899. This authority was extended to artificial islands and fixed structures located on the Outer Continental Shelf (OCS) by the OCS Lands Act as amended September 18, 1978, (92 Stat. 635; 43 U.S.C. 1333(e)). Pursuant to these authorities shipping safety fairways were established in the Gulf of Mexico under 33 CFR 209.135. The Corps, in effect, established the fairways by denying permits for structures within certain designated lanes after extensive negotiations with navigation and shipping interests, oil companies and conducting public hearings. In accordance with this position on structures within a fairway, the Corps has traditionally prohibited placing cables, chains and anchors used by drilling rigs from extending into a fairway. Recent leases issued for oil and gas activities on the OCS are located in greater depths than earlier lease areas and, in some cases, are within fairways. Production of oil and gas on the OCS is normally accomplished by drilling multiple wells directionally from strategically located platforms. Due to the cost to design, fabricate, and install these structures, companies normally drill several wells using floating or semisubmersible drilling rigs to determine whether there are sufficient hydrocarbons to justify installation of a platform and to select the optimum locations for platforms and production facilities. Through companies drilling exploratory wells from floating or semisubmersible rigs in these lease areas are not allowed to place any structure within the fairways, occasionally they do need to place the rig as close as possible to the fairway boundaries to allow directional drilling to areas under the fairway. The anchors from a semisubmersible drilling rig are normally placed in a circular pattern on the bed of the Gulf with each anchor approximately 2500 feet from the rig. The amount of anchor line (chain or cable) lying on the botton of the Gulf and the depth from the water surface to any point on the line depends on the total depth of water and distance from the rig. Several oil companies have now expressed their interest in placing semisubmersible or floating rigs close to the fairway boundaries.

Based on the increased depth of water and the resultant depth of anchor lines if allowed to enter a fairway at or below a controlled depth, the Corps is of the opinion that the regulations should be amended.

The conditions contained in this draft proposal would allow the temporary drilling rigs to be situated adjacent to the fairways only where the water depth is sufficient to maintain a minimum of 250 feet of clearance over the anchor chains or cables within the fairway boundaries. The drilling rigs must be sufficiently separated along a fairway boundary and may not bc situated across the fairway from another rig to provide needed operating area for vessels in emergency situations. In addition to the restrictions outlined in the following draft proposal, the district engineer will consider such factors as the expected or seasonal weather conditions, the size and types of vessels using the area and input provided by navigation and shipping interests to assure the structure will not unduly interfere with navigation. It should be emphasized that the decision on whether to permit these structures must be determined by the district engineer on a case-by-case basis.

Accordingly, the Corps of Engineers proposes to amend 33 CFR 209.135 with respect to paragraph (b) Permits, as set forth below. It should be noted that we are also making an editorial change to paragraph (b) to form subparagraphs (1), (2), and (3). Subparagraphs (1) and (3) remain unchanged and are reprinted only for clarity. Subparagraph (2) would be this proposed change. Therefore, it is proposed to amend § 209.135 by revising paragraph (b) to read as follows:

§ 209.135 Shipping safety fairways and anchorage areas, Gulf of Mexico

* * * * *

(b) Permits.

(1) Department of the Army permits are required pursuant to law (30 Stat. 1151; 33 U.S.C. 403) and (92 Stat. 635; 43 U.S.C. 1333(e)) for work or structures in the Gulf of Mexico in coastal waters and the waters covering the Outer Continental Shelf. The Deprtment of the Army will grant no permits for the erection of structures in the area designated as fairways, since structures located therein would constitute obstructions to navigation. Exception: The temporary placement of anchors may be allowed by these regulations.

(2) The Department of the Army may permit temporary anchors and attendant cables or chains for floating or semisubmersible drilling rigs to be placed within a fairway provided the following conditions are met.

(i) The installation of anchors to stabilize semisubmersible drilling rigs within fairways must be temporary and under no condition be allowed to remain over 90 days.

(ii) Drilling rigs must be at last 500 feet from any fairway boundary or whatever distance necessary to insure that minimum clearance over an anchor line within a fairway would be 250 feet.

(iii) No anchor buoys or floats or related rigging will be allowed on the surface of the water or to a depth of 250 feet from the surface, within the fairway.

(iv) Drilling rigs may not be placed closer than 2 nautical miles of any other drilling rig situated along a fairway boundary, and not closer than 5 nautical miles to any drilling rig located on the opposite side of the fairway.

(v) The permittee must notify all concerned Federal agencies of the dates (commencement and completion) the anchors will be in place to insure maximum notification to mariners.

(vi) Navigation aids or danger markings must be installed as requireed by the U.S. Coast Guard.

(3) The Deprtment of the Army will grant permits for the erection of structures within an area designated as an anchorage area, but the number of structures will be limited by spacing, as follows: The center of a structure to be erected shall be not less than two (2) nautical miles from the center of any existing structure. In a drilling or production complex, associated structures shall be close together as practicable having due consideration for the safety factors involved. A complex of associated structures, when connected by walkways, shall be considered one structure for the purposes of spacing. A vessel fixed in place by moorings and used in conjunction with the associated structures of a drilling or production complex, shall be considereed an attendant vessel and its extent shall include its moorings. When a drilling or production complex includes an attendant vessel and the complex extends more than five hundred (500) yards from the center of the complex, a structure to be erected shall be not closer than two (2) nautical miles from the near outer limit of the complex. An underwater completion installation in an anchorage area shall be considered a structure and shall be marked with a lighted buoy as approved by the United States Coast Guard.

* * * * *

(30 Stat. 1151, 33 U.S.C. 403) and (92 Stat. 635; 43 U.S.C. 1333(e)).

Note.—The Corps of Engineers has determined that this document does not contain a major proposal requiring preparation of a regulatory analysis under EO 12044, Improving Government Regulations (43 FR 12661, 24 March 1978), or an environmental impact statement under the National Environmental Policy Act.

Date: August 11, 1980.

Forrest T. Gay, III,

Colonel, Corps of Engineers, Executive Director, Engineer Staff.

BILLING CODE 3710-92-M

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 14

Right-of-Way Regulations

AGENCY: National Park Service, Interior.

ACTION: Notice of Intent to Propose Rulemaking.

SUMMARY: On July 11, 1980, the National Park Service published interim right-of-way regulations in the Federal Register (45 FR 47092) and alerted the public of its intent to revise these regulations.

This document provides additional notice to the public of the Service's intent to promulgate revised right-of-way regulations which will provide a process for the review, consideration, and approval or disapproval of requests for rights-of-way across all areas of the National Park System.

DATES: Written comments, suggestions or objections will be accepted until September 17, 1980.

ADDRESS: Comments should be directed to:
Division of Ranger Activities and Protection, National Park Service, Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Maureen Finnerty, Division of Ranger Activities and Protection, National Park Service, Telephone: (202) 343–5607 or 4874.

SUPPLEMENTARY INFORMATION: These regulations will establish procedures for the granting of rights-of-way authorized at the discretion of the Secretary of the Interior, for rights-of-way authorized by individual park legislation, and for rights-of-way issued because of a right held. These regulations must ensure compliance with the right-of-way authorities found in 16 U.S.C. 5, 79 and 23 U.S.C. 317. They will also have to reflect the additional factor that Congress has now specifically stated that activities inconsistent with national park values and purposes shall not be authorized in areas of the National Park System "except as may have been or shall be directly and specifically provided by Congress." *See* section 101(b) of the Act of March 27, 1978 (16 U.S.C. 1a–1, 92 Stat. 166).

These regulations may be drafted narrowly just to ensure compliance with the right-of-way authority mentioned above. Or, they may be written more broadly to cover such issues as: Access by necessity, private reserved access, right-of-way authorizations in individual statutes, and regulating inholdings and utility easements through right-of-way regulations. The National Park Service is proposing that these regulations, whether drafted narrowly or broadly, address both the direct and indirect effects of granting rights-of-way across units of the National Park System. The National Park Service is seeking early public involvement in the preparation of these regulations. Accordingly, interested persons may submit written comments, suggestions or objections on this subject to the address noted above.

The National Park Service has determined that the regulations it is proposing to promulgate are significant in accordance with Part 14 of Title 43 of the Code of Federal Regulations. This determination of significance is based on the fact that these regulations may have regionwide or local impacts on State and local governments, and on other programs of the Department or other Federal agencies.

A determination on the need for a regulatory analysis has not been made in accordance with Part 14 of Title 43 of the Code of Federal Regulations. Public comment is invited on whether the potential economic consequences of the rule require this analysis. The Department of the Interior has

determined that a regulatory analysis is

revision will be further based on a final

ADDRESSES: The Washington submittal

Dated: August 6, 1980.

Phildelphia, Pa. 19106, Phone Number:

DATE: Comments due September 17, 1980

determined that a regulatory analysis is required for rules which are likely to have a substantial economic effect on the entire economy or on an individual, region, industry or level of government. The criteria for this analysis are as follows: (1) The rule will have an annual economic effect of $100 million or more; or (2) even though the economic effect of the rule will be less than $100 million, the potential economic effect of the rule on the economy or an individual region, industry or level of government is sufficiently major as to require formal analysis to assure that the objectives of the rule are achieved with minimum burden.

It has also been determined that the proposed action may have potential for significant environmental impact. An environmental assessment will therefore be prepared as part of the process of preparing the regulations.

Russell E. Dickenson,

Director, National Park Service.

BILLING CODE 4310-70-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL 1574-3]

Availability of Implementation Plan Revision for State of Washington

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability and advance notice of proposed rulemaking.

SUMMARY: EPA announces today that information and additional revisions to the State Implementation Plan (SIP) have been submitted by the State in fullfillment of conditions on the approval of the Washington Part D SIP revision. Specific conditions governing EPA's final rulemaking were published June 5, 1980 (45 FR 37821).

The public is invited to submit written comments to the record which will be held open for a period of thirty (30) days.

A Notice of Proposed Rulemaking describing the revisions and the action that EPA intends to take regarding them will be published in the **Federal Register** after the initial thirty (30) day public comment period has closed. A second period for the submittal of written comments will extend for thirty (30) days after the publication of the Notice of Proposed Rulemaking.

DATE: Comments are due by September 17, 1980.

ADDRESSES: The Washington submittal may be examined during normal business hours at the following locations:

Central Docket Section (#10A-79-1), Environmental Protection Agency, West Tower Lobby, Gallery I, 401 M Street, S.W., Washington, D.C. 20460.

Library, Environmental Protection Agency, Region 10, 1200 Sixth Avenue, Seattle, Washington 98101.

State of Washington, Department of Ecology, 4224 Sixth Avenue S.E., Row Six, Bldg. #4, Lacey, Washington 98503.

COMMENTS SHOULD BE ADDRESSED TO:

Laurie M. Kral, Air Programs Branch, M/S 629, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington, 98101.

FOR FURTHER INFORMATION CONTACT:

Richard F. White, Air Programs Branch, M/S 625, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101, Telephone No. (206) 442-1226, FTS 399-1226.

SUPPLEMENTARY INFORMATION:

On June 5, 1980 EPA published in the **Federal Register** (45 FR 37821) final rulemaking on the Part D revision to the Washington SIP. In this action EPA approved revisions to the State's General Source Regulations, Volatile Organic Compound Regulations and Non-attainment Plans based on the conditions that the State submit adquate information to correct the deficiencies by July 31, 1980. The State responded on July 31, 1980 by submitting (1) copies of those revised sections of the Washington Administrative Codes (WAC), Chapters 173-400 and 173-490, (2) a new regulation governing civil sanctions under the Washington Clean Air Act, WAC-173-402, (3) revisions to non-attainment plans and (4) documentation that the rules were adopted in accordance with the requirements of 40 CFR 51.4.

The purpose of this notice is to call the public's attention to the fact that these rules have been formally submitted to EPA and are available for public inspection at the locations noted above. The public is encouraged to submit written comments regarding the proposed rules and thus participate in this rulemaking activity.

A more detailed description of the proposed Washington SIP revisions will be published in the **Federal Register** at a later date as part of a Notice of Proposed Rulemaking.

(Secs. 110 and 172 of the Clean Air Act (42 U.S.C. 7410 and 7502))

Dated: August 6, 1980.

L. Edwin Coate,

Acting Regional Administrator.

[FR Doc. 80-25073 Filed 8-15-80; 8:45 am]

BILLING CODE 6560-01-M

40 CFR Part 58

[FRL 1574-8]

Approval and Promulgation of State Implementation Plan; Delaware; State and Local Air Monitoring Stations (SLAMS)

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve revisions to Delaware's State Implementation Plan to meet Federal Monitoring Regulations, 40 CFR Part 58, Subpart C, Paragraph 58.20, Air Quality Surveillance; Plan content.

DATES: Comments due on or before September 17, 1980.

ADDRESSES: Comments on this modification should be directed to: Mr. Robert J. Blanco, Acting Chief, Air Programs Branch (3AH10), Air, Toxics & Hazardous Materials Division, EPA, Region III, 6th & Walnut Streets, Curtis Building, Philadelphia, Pa. 19106. Attn: AH500DE.

Copies of the materials submitted by the State of Delaware and comments received on this proposal may be examined during normal business hours at: U.S. Environmental Protection Agency, Region III, 6th & Walnut Streets, Curtis Building, Air Programs Branch, Philadelphia, Pa. 19106. Attn: Patricia Sheridan.

FOR FURTHER INFORMATION CONTACT:

Mr. Joseph Paparella, U.S. EPA, Region III, 6th & Walnut Streets, Curtis Building, Philadelphia, Pa. 19106. Phone Number: 215-597-8184.

SUPPLEMENTARY INFORMATION:

In a May 10, 1979, **Federal Register** notice, EPA required that by January 1, 1980, States shall adopt a revision to their plan which meets the requirements of 40 CFR Part 58, Subpart C, § 58.20. On January 4, 1980, the State of Delaware submitted a revision to their State Implementation Plan concerning compliance with these Federal monitoring regulations. EPA has reviewed the State's submittal and finds that it meets the requirements of Part 58.

The public is invited to submit to the address stated above comments on whether the above listed modifications should be approved as a revision to the Delaware State Implementation Plan.

The Administrator's decision to approve or disapprove this proposed SIP revision will be further based on a final determination as to whether it meets the requirements of Section 110(a)(2) of the Clean Air Act and 40 CFR 51, Requirements for Preparation, Adoption, and Submittal of Implementation Plans.

Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized." I have reviewed this regulation and determined that it is a specialized regulations not subject to the procedural requirements of Executive Order 12044.

This Notice of Proposed Rulemaking is issued under the Authority of Section 319 of the Clean Air Act as amended.

(42 U.S.C. §§ 7401-642)

Dated: July 22, 1980.

Alvin R. Morris,

Acting Regional Administrator.

BILLING CODE 6560-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 405

Medicare Program; Reimbursement on the Basis of Prudent Practices; Decision to Develop Regulations

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of Decision to Develop Regulations.

SUMMARY: The proposed regulation would clarify the rules governing Medicare reimbursement of reasonable costs, by explicitly stating that providers must apply sound management principles to their day-to-day business transactions, thus assuring that their actual operating costs do not exceed what a prudent and cost-conscious business manager would have incurred for similar transactions. While current regulations (42 CFR 405.451) provide that Medicare payment of a provider's reasonable costs is intended to meet the costs actually incurred, a limit applies where a particular institution's costs are found to be substantially out of line with other institutions in the same area which are similar in size, scope of services, utilization, and other relevant factors, or the costs are otherwise not reasonable. This limitation has been interpreted in various program manuals and instructions as a "prudent buyer" concept. The proposed amendment would explain the "prudent buyer" concept in the regulations. The intent of this change is to clarify HCFA's existing authority to disallow costs that are unreasonable.

The Department of Health and Human Services has classified the proposed regulation as policy significant. We do not plan to conduct a regulatory analysis.

BILLING CODE 4110-35-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-5882]

National Flood Insurance Program; Proposed Zone and Base Flood Elevation Determinations for the City of Alvin, Brazoria County, Tex.

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed zones and base flood elevations as described below.

The proposed zones and base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in the newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed zones and base flood elevations are available for review at the Office of the City Engineer, 216 West Sealy Street, Alvin, Texas 77511.

Send comments to: The Honorable Allen Gray, Mayor, 216 West Sealy Street, Alvin, Texas 77511.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, Acting Assistant Administrator, Program Implementation and Engineering Office, National Flood Insurance Program, 451 Seventh Street SW., Washington, DC 20410 (202) 755-6570 or toll free line (800) 424-8872 (in Alaska and Hawaii call toll free (800) 424-9080).

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed zones and base flood elevations for the City of Alvin, Texas, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Public Law 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Public Law 90-448), 42 U.S.C. 4001-4128, and 44 CFR Part 67.

There zones and base flood elevations, together with the flood plain management measures required by Section 60.3 of the program regulations, are the minimum that are required. It should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. The proposed zones and base flood elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation [1]
Mustang Bayou	Route 35	38
	Backwater area between Tovrea Road, Route 35, Old Galveston Road, and Mustang Bayou.	39

[1] National Geodetic vertical datum.

Proposed Special Flood Hazard Areas for the annexed areas are located throughout the perimeter of the City.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator)

Issued: July 21, 1980.

Francis V. Reilly,

Acting Federal Insurance Administrator.

[FR Doc. 80-24980 Filed 8-15-80; 8:45 am]

BILLING CODE 6718-03-M

44 CFR Part 67

[Docket No. FEMA-5880]

National Flood Insurance Program; Proposed Zone and Base Flood Elevation Determinations for the City of Gallup, McKinley County, N. Mex.

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed zones and base flood elevation as described below.

The proposed zones and base flood elevation are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in the newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed zones and base flood elevation are available for review at the Office of the Mayor, City Hall, Gallup, New Mexico.

Send comments to: The Honorable F. Wayne Lewis, Mayor, City of Gallup, P.O. Box 1270, Gallup, New Mexico 87301.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, Acting Assistant Administrator, Program Implementation and Engineering Office, National Flood Insurance Program, 451 Seventh Street SW., Washington, DC 20410 (202) 755-6570 or toll free line (800) 424-8872 (in Alaska and Hawaii call toll free (800) 424-9080).

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed zones and base flood elevation for the City of Gallup, New Mexico, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Public Law 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Public Law 90-448), 42 U.S.C. 4001-4128, and 44 CFR Part 67.

These zones and base flood elevation, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. It should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. The proposed zones and base flood elevation will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation [1]
Puerco River	Upstream of the U.S. Route 666 crossing.	6489
Bread Springs Wash	Upstream of the Atchison Topeka and Santa Fe crossing.	6466

[1] National Geodetic vertical datum.

The proposed Special Flood Hazard Area for the annexed area is located in the vicinity of the Gallup Industrial Park between Interstate 40 and the Puerco River.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator).

Issued: July 15, 1980.

Francis V. Reilly,

Acting Federal Insurance Administrator.

BILLING CODE 6718-03-M

44 CFR Part 67

[Docket No. FEMA-5879]

National Flood Insurance Program; Proposed Zone Designations for the Village of Lexington, Richland County, Ohio

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed zone designations described below.

The proposed zone designations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety-days following the second publication of this proposed rule in the newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood zone designations are available for review at 44 West Main Street, Lexington, Ohio.

Send comments to: Mr. Charles Pscholka, Village Administrative Director, Village of Lexington, 44 West Main Street, Lexington, Ohio 44904.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, Acting Assistant Administrator, Program Implementation and Engineering Office, National Flood Insurance Program, 451 Seventh Street SW., Washington, D.C. 20410, (202) 755-6570 or toll free line (800) 424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed zone designations for the Village of Lexington, Ohio, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

Zone designations and base (100-year) flood elevations, together with the flood plain management measures required by Section 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. The proposed zone designations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed zone designations are:

Zone A along the tributary west of Lexington Ontario Road from Clear Fork Mohican River to Lexington Stream Corners Road.

Zone A along the Clear Fork Mohican River from the northern corporate limits to the Baltimore and Ohio Railroad.

Zone A in an area north of U.S. Route 42 and east of the cemetery.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator)

Issued: July 15, 1980.

Francis V. Reilly,

Acting Federal Insurance Administrator.

BILLING CODE 6718-03-M

44 CFR Part 67

[Docket No. FEMA-5841]

Proposed Flood Elevation Determinations; Correction

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule; correction.

SUMMARY: This document corrects a Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the City of Burlington, Alamance County, North Carolina, previously published at 44 FR 42711 on June 25, 1980.

EFFECTIVE DATE: June 25, 1980 (published in **Federal Register**).

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program, (202) 426-1460 or Toll Free Line (800 424-8872). (In Alaska and Hawaii call Toll Free Line (800 424-9080), Federal Emergency Management Agency, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the correction to the Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the City of Burlington, Alamance County, North Carolina previously published at 44 FR 42711 on June 25, 1980, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

The elevation for Servis Creek just upstream of lower Hopedale Road (S.R. 1700) should be 540 NGVD.

The listing appears correctly as follows:

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD).
North Carolina	City of Burlington, Alamance County.	Servis Creek	Just upstream of lower Hopedale Road (S.R. 1700)	*540

(National Flood Insurance act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; Executive Order 12127)

Issued: August 4, 1980.

Gloria M. Jimenez,
Federal Insurance Administrator.

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Part 11

[CGD 79-173]

Temporary Licenses and Endorsements

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: These proposed regulations would provide for the issuance of licenses in temporary grades of third mate and third assistant engineer and for endorsements of certain licenses authorizing the holders to serve temporarily in the grade next higher than the grade in which the license is issued, other than as Master or Chief Engineer. The reduced requirements of these regulations may be authorized by the Commandant, U.S. Coast Guard under emergency conditions when licensed officers are not available in sufficient numbers to man all the vessels required to meet the needs of commerce, and it is reasonable to provide for the licensing of officers for such emergency purposes. This proposed rule is necessary in order that vessels may be manned by officers who are considered sufficiently qualified, under such emergency conditions but who might not otherwise be considered as fully qualified under non-emergency conditions.

DATES: Comments must be received on or before October 2, 1980.

ADDRESSES: Comments should be mailed to Commandant (G-CMC/24) (CGD 79-173), U.S. Coast Guard, Washington, D.C. 20593. Between the hours of 7 a.m. and 5 p.m., Monday through Thursday, comments may be delivered to, and are available for inspection and copying at the Marine Safety Council (G-CMC-24), Room 2418, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, D.C. 20593. (202) 426-1477.

FOR FURTHER INFORMATION CONTACT: LCDR D. E. Struck, c/o Commandant (G-MVP/14), Room 1400, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, D.C. 20593. (202) 426-6259. Normal office hours are 7 a.m. to 5 p.m., Monday through Thursday.

SUPPLEMENTARY INFORMATION: The public is invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Persons submitting comments should include their name and address, identify this notice (CGD-79-173) and the specific section of the proposal to which the comment applies, and give the reasons for the comment. Persons desiring acknowledgment that their comment has been received should enclose a stamped self-addressed postcard or envelope.

The proposal may be changed in view of the comments received. All comments received will be considered before final action is taken on this proposal. Copies of all written comments received will be available for examination at the Marine Safety Council address noted above. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will be beneficial.

Drafting Information

The principal persons involved in drafting this proposal are: LCDR Daniel E. Struck, Project Manager, Office of Merchant Marine Safety, and LCDR Jack Orchard, Project Attorney, Office of the Chief Counsel.

Discussion of the Proposed Regulations

The Coast Guard has the administrative responsibility for establishing requirements and procedures for the licensing of persons who are deemed sufficiently qualified to serve as licensed officers on merchant vessels. On March 17, 1966 the Coast Guard published temporary licensing procedures (Part 11 of Title 46, CFR) at 31 FR 4517 in response to a serious problem precipitated by the sudden increase in the number of active vessels needed to carry cargoes from U.S. ports due to the Vietnam conflict. The Coast Guard determined, in 1966, that definite shortages or potential shortages in the availability of licensed officers below the grades of Master and Chief Engineer existed. At the termination of the conflict the Coast Guard determined that the emergency measures were no longer necessary, so the regulations were removed in 1976.

In the event of a national emergency in the future requiring a sudden increase in the amount of cargo carried from U.S. ports, it is anticipated that a shortage of licensed officers below the grades of Master and Chief Engineer would exist. Although emergency licensing regulations could be issued at the time of a national emergency, the Coast Guard believes that confusion and delays may be avoided by publication of the regulations before the need for them arises. Furthermore, early publication affords the Merchant Marine and other interested parties the opportunity to familiarize themselves with the regulations.

The temporary license and endorsements contemplated under these regulations will only be issued when considered necessary by the Commandant. Once the Commandant has determined that a shortage of qualified personnel exists and has published a notice in the **Federal Register** announcing that temporary licenses and endorsements may be issued, applicants will be evaluated by the Officer in Charge, Marine Inspection.

Applicants must meet the requirements set forth in Part 10 of this chapter except that the proposed regulations would modify certain requirements in subparts 10.05 and 10.10. Service time for Temporary Third Mate and for Temporary Third Assistant Engineer licenses would be reduced from 36 months to 24 months. These proposed regulations also provide for endorsements on a regular license authorizing the holder to serve in a temporary capacity in the grade next higher than the grade of the regular license, but subject to any other limitations placed on the regular license. The service requirement for temporary endorsements would be reduced to 6 months and examination for the higher grade would not be required. Endorsements to serve in a temporary capacity higher than the grade of the regular license would apply only to the holder of a regular third mate, third assistant engineer, second mate, and second assistant engineer license.

Temporary licenses would be valid for 5 years and would not be renewable. Temporary endorsements would be valid for the period of the regular license and could be continued for one renewal of the regular license that was held subsequent to obtaining the temporary endorsement. When the need for additional licensed officers no longer exists the Commandant would publish the date, in the **Federal Register**, after which temporary licenses or endorsements would not be issued. Temporary licenses and endorsements issued prior to the termination date would remain valid for periods of 12 and 6 months respectively. This provision of the proposed regulations would provide sufficient time for officers to convert their temporary licenses or endorsments to regular licenses.

This proposal has been evaluated under the Department of Transportation's "Regulatory Policies and Procedures" (February 26, 1979, 44 FR 11034), and is considered to be a nonsignificant rulemaking. The expected impact is so minimal that a draft evaluation is not warranted. This determination is based upon a finding that the economic consequences of this action are negligible. The proposed regulations would simply establish procedures for the issuance of temporary licenses and endorsements to regular licenses. This proposal will help to avoid delays and confusion to members of the shipping industry who may be confronted with the task of providing additional licensed personnel on merchant ships in the event of a national emergency.

In consideration of the foregoing, the Coast Guard proposes to add a new Part 11 to Title 46, Code of Federal Regulations as follows:

PART 11—TEMPORARY LICENSES AND ENDORSEMENTS

Sec.

11.01-1 Purpose.
11.01-3 Applicability.
11.01-5 Duration of temporary licenses and endorsements.
11.01-7 Conversion to a regular license.
11.01-9 Temporary third mate; ocean steam or motor vessels.
11.01-11 Temporary third mate; coastwise steam or motor vessels.
11.01-13 Temporary third assistant engineer; steam vessels.
11.01-15 Temporary third assistant engineer; motor vessels.
11.01-17 Temporary endorsements.

Authority: R.S. 4438, as amended (46 U.S.C. 224); R.S. 4440, as amended, (46 U.S.C 278); R.S. 4441, as amended, (46 U.S.C. 229); R.S. 4405, as amended (46 U.S.C. 375); R.S. 4462, as amended (46 U.S.C. 416).

§ 11.01-1 Purpose.

These regulations allow the Commandant of the Coast Guard to compensate for shortages in the numbers of licensed officers created by an increase in the level of merchant vessel commerce during a national emergency.

§ 11.01-3 Applicability.

(a) These regulations apply to:

(1) Applicants for a license to serve as a "temporary third mate" or a "temporary third assistant engineer"; or

(2) Holders of regular licenses as second and third mates and second and third assistant engineers who apply for a temporary endorsement to their regular license which allows them to serve in the next higher grade.

(b) Once the Commandant has determined that a shortage of licensed officers exists as the result of a national emergency, applications will be accepted for temporary licenses and temporary endorsements. The Commandant will publish in the **Federal Register** the commencement date for issuance of these documents. All applicants must comply with the provisions of Part 10 of this chapter except to the extent that the requirements in subparts 10.05 and 10.10 are modified by this part.

§ 11.01-5 Duration of temporary licenses and endorsements on regular licenses.

(a) Temporary licenses issued under the provisions of this part shall be valid for a period of 5 years from the date of issuance unless sooner canceled by the Commandant. Temporary licenses shall not be renewed.

(b) The temporary endorsements placed on regular licenses to permit service in the grade next higher shall be valid for the period of the regular license unless sooner canceled by the Commandant. The temporary endorsement may be continued upon the first renewal of the regular license that was held subsequent to obtaining the temporary endorsement.

(c) Issuance of temporary licenses and endorsements may be terminated by the Commandant, on a date to be published in the **Federal Register**, when the shortage of licensed officers no longer exists. In order to allow for their conversion to regular licenses, temporary licenses will remain valid for

12 months after the termination date, and temporary endorsements will remain valid for 6 months after the termination date.

§ 11.01-7 Conversion to a regular license.

A holder of a temporary license or endorsement must comply with all of the service and examination requirements as set forth in Part 10 of this chapter in order to obtain a regular license.

§ 11.01-9 Temporary third mate of ocean steam or motor vessels.

In lieu of the service requirements of subparagraph (a)(1) of § 10.05-33 of this chapter, an applicant may apply and be examined for a license as a temporary third mate of ocean steam or motor vessels after having served 24 months in the deck department of ocean or coastwise steam or motor vessels of 1000 gross tons or over. At least 4 months of this service must have been as able seaman, boatswain, or quartermaster, while holding a certificate as able seaman.

§ 11.01-11 Temporary third mate of coastwise steam or motor vessels.

In lieu of the service requirements of subparagraph (a)(1) of § 10.05-35 of this chapter, an applicant may apply and be examined for a license as a temporary third mate of coastwise steam or motor vessels after having served 24 months in the deck department of ocean or coastwise steam or motor vessels. At least 4 months of this service must have been as able seaman.

§ 11.01-13 Temporary third assistant engineer; steam vessels.

In lieu of the service requirements of subparagraph (a)(1) of § 10.10-21 of this chapter, an applicant may apply and be examined for a license as temporary third assistant engineer of steam vessels after having served 24 months in the engine department of steam or motor vessels. At least 12 months of this service must have been as fireman, oiler, watertender or junior engineer on steam vessels, while holding a certificate as a qualified member of the engine department.

§ 11.01-15 Temporary third assistant engineer; motor vessels.

In lieu of the service requirements of subparagraph (a)(1) of § 10.10-23 of this chapter, an applicant may apply and be examined for a license as a temporary third assistant engineer of motor vessels after having served 24 months in the engine department of steam or motor vessels. At least 12 months of this service must have been as oiler or junior engineer on motor vessels, while holding a certificate as a qualified member of the engine department.

§ 11.01-17 Temporary endorsements.

A holder of a regular license as a second or third mate of ocean or coastwise steam or motor vessels, or as a second or third assistant engineer, who has served for a period of six months at sea in the capacity and under the authority of the regular license, may be granted a temporary endorsement allowing the holder to serve in a temporary capacity in the next higher grade, subject to any other limitations on the regular license. (This modifies the standards contained in the following sections of this chapter: 10.05-25(a)(1), 10.05-27(a)(1), 10.05-29(a)(1), 10.05-31(a)(1), 10.10-13(a)(1), 10.10-15(a)(1), 10.10-17(a)(1), and 10.10-19(a)(1)). The temporary endorsement is granted by the Officer in Charge, Marine Inspection, without examination (this modifies the standards contained in § 10.05-45 and 10.10-04 of this chapter).

(R.S. 4438, as amended (46 U.S.C. 224); R.S. 4440, as amended, (46 U.S.C. 278); R.S. 4441, as amended, (46 U.S.C. 229); R.S. 4405, as amended (46 U.S.C. 375); R.S. 4462, as amended (46 U.S.C. 416)).

Henry H. Bell,

Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

August 13, 1980.

BILLING CODE 4910-14-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 13, 81, 83, and 87

[Gen. Docket No. 20817; FCC 80-481]

An Inquiry Relating to the Commission's Radio Operator Licensing Program

AGENCY: Federal Communications Commission.

ACTION: Further notice of proposed rule making.

SUMMARY: This action proposes to eliminate the requirement that all installation, maintenance and repair of transmitting equipment in the AM, FM, and TV broadcast services be accomplished only by the holder of a First Class Radiotelephone Operator License. Many persons believe that as station licensees are ultimately responsible for the technical performance of their stations, they should not be required to employ technicians who have been examined and licensed by the Commission, but should be able to employ any qualified person.

DATES: Comments must be submitted by November 14, 1980, with reply comments by December 15, 1980.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Vernon P. Wilson or Roy E. Kolly, Field Operations Bureau, (202) 632-7240, or Charles B. Goldfarb, Broadcast bureau (202) 632-6460.

SUPPLEMENTARY INFORMATION:

Adopted: August 1, 1980.

Released: August 18, 1980.

By the Commission: Chairman Ferris issuing a separate statement.

1. In this Notice, the Commission proposes to discontinue the issuance of new and renewed First Class Radiotelephone Operator Licenses, and to eliminate the requirement for licensing by examination of operators who perform installation, maintenance, and technical supervision of the operation of transmitting equipment at AM, FM, non-commercial educational FM, and TV Broadcast Stations, and TV and FM Broadcast Translator Stations.[1] It is proposed that the Commission's rules be modified to allow individuals performing any technical duties at Broadcast stations to hold any class of commercial radio operator license, including the Restricted Radiotelephone Operator Permit,[2] and that the broadcast station licensees be fully responsible for determining the competence of employees responsible for all transmission system technical activities at their stations.

[1] This Further Notice of Proposed Rule Making will not address the operator requirements of other stations in the broadcast auxiliary services licensed under Part 74 of the FCC Rules. Instead, these stations will be dealt with in a future proceeding. While we realize some temporary anomalies may result (i.e., less complex transmitters in the auxiliary services having more stringent operator requirements than complex AM, FM, and TV transmitters) we will allow this to happen because to correct the anomalies now would delay this rule making and the public interest benefits that we expect to result. Since the transmission equipment for FM and TV translators is similar to that used in the regular broadcast services, we believe the same maintenance operator licensing requirements should be applicable.

[2] No oral or written examination is required to obtain this permit. Applicants are required to certify in writing that they have a need for the requested permit; can receive and transmit spoken messages in English; can keep at least a rough written log in English or in some other language that can be readily translated into English; are familiar with the treaties, laws, and rules and regulations governing the authority granted under the requested permit; and understand that it is their responsibility to keep currently familiar with all such provisions. (47 U.S.C. 13.22(h))

History of This Docket

2. This Notice is part of a larger ongoing proceeding that is addressing the matter of Commission licensing of commercial radio operators in all services, broadcast and non-broadcast, directed primarily to the radiotelephone operator class of license. (Notice of Inquiry, released June 7, 1976, FCC 76-746, 41 FR 22981; Notice of Proposed Rulemaking released August 4, 1977, FCC 77-528, 42 FR 40939).[3]

3. The *First Report and Order* in this proceeding reduced the requirement for duty operators at AM and FM broadcast stations, except those AM stations with critical directional antennas, to the holder of any class of commercial operator license, including the Restricted Radiotelephone Operator Permit, in lieu of the Radiotelephone Third Class Operator Permit endorsed for broadcast operation. (Released January 5, 1979, FCC 78-871, 44 FR 1733, 70 FCC 2d 2371.)

4. The *Second Report and Order* authorized both AM stations with critical directional antennas and TV stations to employ operators holding any class of operator license for routine operating duties as long as the station has in its employ at least one first class operator. Stations electing to use lesser grade operators for routine operating duties must designate the first class operator as chief operator whose responsibilities include, among other things, review of operating logs, conducting station technical inspections, performance or supervision of all installation, maintenance and adjustments of the transmitting system, and continuing training and supervision of the lesser grade operators in the performance of their operating duties. The *Second Report and Order* further provided that the rquired employment of a first class operator, for all stations at which a chief operator must be designated, should be full time, or whatever less than full time the licensee determines is necessary to keep the station's technical operation in compliance with FCC rules. (Released November 16, 1979, FCC 79-721, 44 FR 66816)

5. It was stated in the *Second Report and Order* that other matters contained in this overall proceeding would be considered in the near future by means of a Further Notice of Inquiry, Further Notice of Proposed Rulemaking, or a Report and Order, as may be appropriate.

[3] In the Notice of Inquiry, more than 500 parties filed formal and informal comments. One reply comment was filed.

Comments

6. Of the more than 500 comments and reply comments filed in response to the Notice of Inquiry, 341 addressed the question of whether the Radiotelephone First Class Operator License requirement should be retained for personnel performing installation, maintenance, repair, and technical supervision of AM, FM, and TV transmitting equipment. These comments and reply comments revealed diverse points of view. Assigning commenters to broad categories, those favoring or opposing retention of the requirement were distributed as follows:

	Favor retention	Oppose retention
Holders of first- or second-class licenses	95	1
Station managers and licensees	48	46
Groups, organizations, and multiple licensees	15	2
Consulting engineers	4	3
Others (unlicensed or interest not identifiable)	30	95

7. Among the commenters favoring retention of the licensing requirement was the National Association of Broadcasters, which includes in its membership thousands of broadcasters. However, among the individual broadcast station licensees and managers who commented, an equal number favored and opposed retention. Typical of broadcaster comments in favor of retaining the first class operator license requirement was that of Morris H. Blum, President of Annapolis Broadcasting Corporation (WANN), an owner-licensee of 31 years, who said "While it can be argued that a licensee can, without undue trouble, find technically proficient unlicensed persons to maintain the station's technical equipment and consequently, the Commission's operational requirements under its rule, we would prefer to employ full-time licensed service operator who has, at the very least, demonstrated some degree of technical knowledge and ability by passing a required examination."

8. The general contention of those broadcast station licensees and managers opposed to retention was that persons holding a first class license have not necessarily proved that they possess any practical technical expertise, whereas many technically competent persons do not hold FCC operator licenses. They feel that since the Commission holds the station licensees responsible for the proper operation of the station, they should be free to employ any person they believe to be technically competent to meet the needs of that particular station.

Discussion of the Comments

9. The commenters provided arguments for and against retention of the first class license requirement, but did not provide empirical support for their positions. Predictably, licensed technicians argued that the license provided proof of competence; non-licensed technicians disagreed. Also, not surprisingly, large market broadcasters tended to favor licensing; small market broadcasters tended to favor its elimination.

10. In many small markets licensed technicians are scarce and broadcasters with limited revenues object to paying what they consider artificially high salaries to licensed technicians when, in their opinion, qualified nonlicensed technicians are available. The claim that existing Commission rules requiring broadcasters to meet technical standards, and the imposition of sanctions upon those who fail to meet these rules, will provide sufficient incentive for the broadcasters to hire competent technical help.

11. Large market stations, on the other hand, operate in a different environment. Station revenues tend to be substantially greater in these markets and there is generally a greater supply of licensed technicians. Because licensed technicians are not scarce, mere possession of a license is not sufficient for a technician to command a high salary. Practical experience is also necessary. In fact, large market stations generally hire only technicians with several years' broadcast experience (usually in small market stations), at relatively higher pay. Therefore any special salary compensation that possession of the license might convey is a smaller share of the total salary (and also of station revenues). As a result, many broadcasters in large markets find that, even if the license does not guarantee competence, it does act as a screening device that reduces the number of job applicants in a well-supplied market, thereby reducing the broadcasters' search costs without unduly increasing the cost of salaries.

12. The comments suggest that there are both benefits and costs associated with the current operator licensing procedures. To the extent that the license examination measures technical competence, it is a useful screening device that reduces the likelihood that human error will result in poor broadcast signal quality or interference. At the same time, the licensing process imposes costs. There are administrative

costs to the Commission and higher salary costs to stations in geographic regions with a shortage of licensed operators. Most significantly, costs are imposed if the license examination does not accurately measure technical competence and knowledge in the FCC operating rules, procedures, and standards—the costs of excluding competent technicians who are not skilled at taking written examinations [4] and of licensing individuals who can pass a written examination but do not have the necessary technical skills to install, maintain, repair, and supervise operation of transmitting equipment.

13. This discussion of the comments suggests that the following key questions must be answered:

A. Does FCC examination of operators who perform transmitter installation, service, and maintenance, and who train and instruct lower grade operators, contribute to the operation of broadcast stations within FCC technical standards?

If the answer is "no", then it is not in the public interest to require examinations since they impose costs but do not provide benefits.

If the answer is "yes", then ask question "B".

B. Are there other forces—including competitive market forces, the Commission's technical rules and standards, and sanctions against errant stations—that can effectively assure that broadcast stations will be operated within the FCC's technical standards without the need for examinations.

If the answer is "yes", then the examinations represent a costly and unnecessary restriction that is not in the public interest.

If the answer is "no", then continuing the examination of operators would be in the public interest.

The Georgia Tech Study

14. Subsequent to the close of the comment period, the final report of the Broadcast Regulation Tradeoff Study,[5] which was prepared for the Commission by the Communications Technology Group of the Electronics Technology Laboratory at the Georgia Institute of Technology, was released. This study addressed, for AM, FM, and TV services, the relationship between signal quality and interference potential and the various Commission activities designed to monitor and regulate signal quality. Of particular interest in the instant matter are the analysis, conclusions, and recommendations pertaining to the examination and licensing of operators employed in the broadcast industry. Pertinent portions of the report are attached as Appendix A.[6]

15. The Georgia Tech study relied in part on an informal telephone survey that was not scientifically designed and its findings cannot be considered definitive. Though limited, it is a systematic investigation of the effectiveness of the various Commission activities relating to broadcast signal quality, and as such may provide useful information that can be used as a basis for decision making.

16. FCC operator license examinations will contribute to the operation of broadcast stations within FCC technical standards only if they accurately gauge the applicant's technical competence to install, service, and maintain transmitter equipment. The Georgia Tech study indicates that, at present, possession of a first class operator license does not assure such technical competence. There are many relevant references in the study (see, for example, Appendix A, paragraphs 3–6), including the concise statement, in paragraph 16, that

> * * * the examination for maintenance and repair should be more relevant and meaningful. The validity of the present examination process in measuring competence is questionable.

17. The Georgia Tech study never directly addresses the question of whether a license examination could be constructed that accurately measures technical competence. However, the study suggests, at paragraph 4, that

> the additional requirement of practical experience, education, and a service record included in the licensing process would improve the qualifications of licensed operators.

How these additional factors could be included in the licensing process is not addressed.

18. With respect to the question of other forces operating to assure broadcast station operation within Commission technical standards, the Georgia Tech report identifies a number of existing mechanisms, including the reliability of available broadcast equipment, station licensing procedures, and a variety of Commission activities such as equipment authorization, transmitter system operation regulations, monitoring and inspection activities, and violation notices and sanctions placed on station licensees for failing to meet Commission standards. (See Appendix A, paragraphs 6, 7, and 11.) In addition, the Georgia Tech study suggests that competitive market forces tend to operate to assure signal quality control.

19. The Georgia Tech study notes, however, that competitive market forces may not exist to curb interference problems. As is stated in paragraph 9:

> In the technical area of interference control, there does appear to be some advantage of operator licensing. Interference, although manifested as a lack of quality at a listener or viewer's receiver, is not necessarily subject to the same competitive forces as transmitted signal quality. For example, it is entirely possible that a given broadcaster may maintain a high quality signal to his audience, but a spurious emission from his broadcast equipment could disrupt or reduce the quality of another broadcaster or even another radio service. In the extreme, it is even possible that a given broadcaster could be motivated to deliberately interfere.
>
> Notwithstanding these possible advantages of controlling interference by requiring use of licensed operators, our assessment did not reveal a strong relationship. It is highly probable that in those instances where interference has occured, the cause may be attributed to other factors such as equipment reliability. Moreover, our results indicate that the present overall level of signal quality is remarkably high.

20. Where the station has an incentive to produce interference through deviate operation, it is not apparent that operator licensing requirements will protect the public. For a station to purposely cause interference (or to fail to correct inadvertent interference) both the station licensee and the technical operator must cooperate. There is no *a priori* reason to expect a licensed operator to be any more honest than an unlicensed operator unless the former faces a credible threat of loss of license if caught improperly maintaining or operating transmitting equipment. The Commission has never imposed such a penalty upon an operator licensee in broadcasting, on the assumption that the station licensee bears final and total responsibility for all station activity. In this situation it is not obvious that licensing of operators will provide an incentive for interference control.

21. With respect to operator licensing, the Georgia Tech study concludes with the following recommended alternatives:

1. Reduce the current operator licensing program for broadcast operation to a registration program and eliminate the requirements for examinations, or

2. Alter the current licensing program so that only individuals who perform broadcast maintenance or repair must pass a relevant and meaningful examination of their abilities.

The first alternative is a direct outcome of the apparent lack of strong correlation between broadcast technical signal quality and use of licensed operators. The suggested registration process without technical examination should meet the Communications Act requirements and should permit reasonable allocation of responsibility.

The second alternative is presented primarily in recognition of the possibility that non-technical factors may indicate a need for certified operators and the fact that the broadcast industry as a whole may wish the Commission to continue to certify the minimum competence of operators. (Paragraphs 13, 15, 16)

22. The study adds a *caveat* concerning a potential transitional period after delicensing is introduced.

If the first alternative identified above is implemented, it is expected that there may be some transient effects observed in small market areas. In such areas there may be a tendency on the part of some station owners to hire anyone, qualified or not, to operate or maintain their station. Part of the motivation for this would be to lower personnel cost, but it is expected that an equilibrium will be reached between the cost of having problems and the cost of not having problems.

23. It is difficult to predict the likely incidence of the scenario suggested by the Georgia Tech study—that some stations might initially try to take advantage of delicensing by hiring inexpensive, but incompetent, technical help, but eventually will recognize the costs associated with the resultant technical problems and thus hire competent staff. Station licensee response to the relaxation of technical licensing requirements in the *First* and *Second Reports and Orders* in this proceeding [7] might provide, at best, limited anecdotal evidence.[8] We therefore invite comment, particularly empirical evidence, on the good and bad effects that have occurred as a result of:

1. The relaxation of the rules to permit the routine operation of any AM, FM, or TV broadcast transmitter by persons who have not been examined by the Commission, and

2. The recent rule changes permitting the employment of chief operators on a "less than full-time" rather than on a "full-time" basis.

24. The Commission has recently issued a Notice of Proposed Rulemaking [9] concerning broadcast station license renewal procedures that proposed, among other things, to employ random, in-depth investigations of stations, including field audits. These audits would cover station compliance with technical and non-technical rules. It is expected that these random audits would place increased pressure on station licensees to abide by all Commission regulations and, as such, would provide incentives for stations to hire competent technical staffs to assure compliance with the Commission's technical rules. The need for operator licensing may therefore be diminished.

Analysis and Conclusions

25. There is evidence that the current First Class operator license examination may fail to accurately measure technical competence to install, maintain, repair, and supervise operation of AM, FM, and TV transmitting equipment. It is clearly impractical for the Commission to test applicants directly on transmitting equipment—i.e., to require applicants to make repairs, etc., in the presence of examiners. The Georgia Tech study recommendation to include a requirement of practical experience, education, and a service record in the licensing process appears to be the next best solution, but this too is fraught with difficulties. Standards are difficult to develop and monitor. Anyone familiar with interpreting resumes knows the uncertainty that they offer if follow-up contacts are not possible. The Commission could scarcely handle administratively reliance on letters of reference.[10]

26. Even if an effective license examination procedure could be constructed, there appear to be a number of other forces—especially other Commission imposed rules, requirements, and potential sanctions—that may render technical operator licensing largely redundant. Since such licensing imposes costs, but primarily provides redundant benefits, it appears to be in the public interest to now eliminate the operator requirements to the maximum extent the Communications Act will allow.

Procedural Issues

27. If the proposed rule modifications are adopted, the Commission would no longer conduct examinations for, or continue to issue, the First Class Radiotelephone license, as it would no longer be required of any operator. Individuals currently holding First Class licenses would continue to hold them, but upon application for renewal they would be issued Radiotelephone Second Class license documents. Holders of any class of commercial operator license, including the Restricted Radiotelephone Operator permit, would be allowed to install, maintain, repair, and technically supervise AM, FM, and TV transmitting equipment. Station licensees would continue to be responsible for all aspects of station operations. The proposed modifications to Parts 13, 73, and 74 of the Commission rules are presented in Appendix B.

28. The Commission is aware that some current employment contracts and personnel procedures require employees to hold First Class licenses and that compensation is sometimes dependent upon the class of license held. In many cases these requirements or standards stem from existing Commission rules; changes in these rules would render the need for such requirements obsolete. In any case, contracts, personnel procedures, and compensation standards could be modified readily to take into account experience or training or to substitute specific task requirements for employees' license status. Also, these are simply matters of distributing income between employees and employers and therefore should not be relevant to the public interest unless they will affect the quality of broadcast service offered. There may be transition and other unanticipated costs imposed upon some individuals by the rule changes, however, and therefore comments from affected parties are solicited.

29. Further information concerning this Notice of Proposed Rule Making can be obtained from Roy Kolly or Vernon Wilson, telephone (202) 632–7240, or Charles B. Goldfarb (202) 632–6460, FCC, Washington, D.C. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, the proceeding is governed

---

[4] This cost may fall disproportionately on minority technicians who have received practical training and experience with telecommunications systems in the armed forces, but who for social or other reasons may be unable to fare well on written examinations.

[6] For ease of reference, the excerpts from the Georgia Tech study in Appendix A have been assigned paragraph numbers and these are referred to in this Notice. These paragraph numbers do not appear in the text of the original report.

[7] See paragraphs 3 and 4, *supra*.

[8] The Field Operations Bureau has initiated a 90-day survey to compare compliance of stations that have implemented the relaxed operator rules produced in the *Second Report and Order* with those that have not implemented them. It may be impossible to extract useful data from this survey as no comparative data exist for the period prior to the *Second Report and Order*, and we won't know how stations in each of these groups behaved before the rule change. This matter is open for further comment in this proceeding and will continue to receive Commission attention during the comment period.

[9] Notice of Proposed Rule Making, adopted June 4, 1980, FCC 80–327.

[10] Individual employers, on the other hand, with a limited number of job applicants, could handle such job screening functions quite efficiently.

by the interim policy of the Commission on *ex parte* contacts.

30. A summary of procedures in the interim policy is available from the Commission's Consumer Assistance Office, FCC, Washington, D.C. 20554, (202) 632–7000.

31. It provides, in pertinent part, that an *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentations requested by the Commission. Each such written *ex parte* communication is to be sent to the Secretary's office to be placed in the public docket file. If an individual wants to discuss a pending rule making with a Commissioner or a staff member, the individual should make arrangements for a meeting, or, if a meeting is impossible, a telephone call. The individual must prepare, and bring with him/her, a memorandum summarizing the points to be discussed. If the discussion must be held over the telephone, the summary memorandum must be sent in advance. The memorandum and any update thereof will be placed in the public docket file. Spontaneous *ex parte* communications should not take place.

32. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

33. Interested persons desiring to submit comments, proposals and recommendations pertaining to the above matter may do so on or before November 14, 1980. Replies to such comments, proposals or recommendations may be submitted on or before December 15, 1980. All relevant and timely filed comments will be considered.

34. Pursuant to § 1.419 of the Commission's Rules, an original and 5 copies of all statements, briefs or comments filed in response to this Notice shall be furnished to the Commission.

35. In an effort to obtain the widest possible response to this proceeding, informal comments (without extra copies) will be accepted. Such informal comments should specifically reference this proceeding.

36. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C. 20554.

37. Authority for this action is contained in Sections 4(i), 303(i), and 303(r) of the Communications Act of 1934, as amended.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix A—Excerpts From Georgia Institute of Technology Report

Operator Education and Selection

1. Broadcast stations are comprised of a fairly complex array of electronic equipment. The proper operation and maintenance of station equipment to provide quality service which meets or exceeds FCC requirements is largely dependent upon the qualifications of station personnel. Some station operations (running tape recorders, program editing, etc.) may be adequately performed by inexperienced, unlicensed personnel under the proper supervision of the primary station operator. Generally, however, the hour-by-hour operation and servicing of the station equipment must be under the control of an operator with considerable technical expertise. Although experience is a major contributing factor to operator technical knowledge, the educational background of station personnel is a governing factor which strongly influences personnel qualifications for station operation and maintenance.

2. A number of schools offer courses related to the educational needs of operator/maintenance personnel in the broadcast industry. A number of comments are pertinent to the type of courses offered. First, the course contents and objectives range from those concerned with basic electronic fundamentals through FCC license qualifications to those which prepare a student for a primarily non-technical career in public broadcasting. Second, the courses range in length from 6 weeks to 3 years.

3. Third, many of the courses appear to be directed solely to preparing a student for FCC license qualification. This is not surprising since there are no educational requirements for station operators, only FCC licensing requirements. This could be a possible weakness in establishing station operator requirements if the examination material is not kept up to date and/or is not of sufficient depth and breadth to assure a certain level of technical competence and knowledge by those persons receiving licenses.

4. Although not a requirement or prerequisite for station operators, education is an obvious factor in the selection and hiring of personnel because the mere obtaining or holding of a license does not automatically assure that an operator is technically qualified to assume the operation and maintenance responsibilities of a station. A student could pass an examination via a crash "memory" type course directed to FCC licensing exam preparation, and/or the examination could be compromised through repetitive offerings if the subject material were not changed. It is thus possible that a person could become a licensed operator without having a sound background in technical principles and practices. The process of selecting and hiring operators appears to vary considerably with station size for a number of reasons. Smaller stations typically have lower pay scales, less job security, and fewer job related benefits than the larger stations and hence tend to have greater difficulty in hiring and retaining qualified personnel. The larger stations apparently have little difficulty in obtaining experienced license operators and generally have a small turnover of personnel. This is undoubtedly due to job stability, working conditions and benefits, and pay scales. Also, some of the larger stations sponsor "continuing education" programs for station operators. Indications are that the larger stations are highly in favor of the FCC licensing program, which serves as a screening process for potential employees, but the additional requirement of practical experience, education, and a service record included in the licensing process would improve the qualifications of licensed operators.

5. Additional information was obtained from an informal telephone survey of broadcasters. This survey was not scientifically designed, and no attempt was made to select statistically valid samples or to preclude broadcaster biases. Nevertheless, the resulting opinions are significant and when related to other independent indicators yield useful general characteristics. Some of the more significant salient trends are as follows:

Operators with only a background oriented toward passing the various FCC license exams do not typically perform well in jobs requiring technical skills,

Military training in electronics has frequently been mentioned as a good background for operators who perform technical maintenance tasks,

The large stations in the larger markets actively seek individuals who have an electronics background, a first class radiotelephone license, and two or three years of experience in small stations where they have had major responsibilities for all aspects of station operation,

Both market size and geographical factors influence the availability of competent technical personnel, and

The negative influences of geography are more evident than the positive influences, and the negative influences fall most heavily upon the small stations in the small market areas.

Conclusions: Operator Licensing

6. Based on our assessment of the interrelationships between quality and interference and the operator licensing program, it is not evident that operator licensing is needed to ensure use of adequately skilled personnel in commercial broadcasting. Our technical analysis of quality and interference factors has shown that there are situations, although relatively few in number, in which the stations's operator can influence interference or signal quality, but the present concern is with the impact of the license held by the operator upon station performance. Our assessment is that the license's impact is minimal for the following reasons: (1) A review of the currently available broadcast equipment and the design philosphies behind that equipment indicates that reliability and high performance were design goals, and that in general, these objectives have been met in the major equipment lines. Thus, proper operation with respect to quality and interference is not the result of an extremely delicate balance of a host of technical parameters under the control of the station's operator; and (2) the technical analysis of Chapters 5 and 6 has identified areas where the operator may influence quality and interference problems. Few such areas of any significance have been found, and for the ones identified, it is not evident that a license examination would contribute to the reduction or elimination of such problems.

7. Typically, the technical staff in large market stations is highly trained and motivated by market pressures to maintain a high level of signal quality. In the absence of operator licensing, competition in the labor markets and market competition would act to provide the mix and levels of skills which broadcast stations need. The minimum manpower skills would ultimately be dictated by the station performance criteria and as demanded by commercial advertisers. Minimum station performance requirements are likely to continue to be imposed on broadcasters by the FCC and by market forces regardless of whether operating personnel are licensed or not. The broadcasters necessarily impose corresponding performance requirements on their operating personnel, and they would have to do so regardless of whether or not personnel are licensed. Operator licensing, not being contingent upon performance measures, makes only short lived, if any contributions to station operation. Equivalent personnel skills would be forthcoming by other means: voluntary self training, on-the-job training, etc. It may be concluded that the technical service rendered by the commercial broadcast industry is not highly dependent on the FCC's operator licensing program.

8. One tendency of the operator licensing requirement is to restrict the supply of labor in commercial broadcasting and hence to increase labor costs which will be passed on (indirectly) to the public. Any impact the licensing requirements might have on raising skill levels over and above those that are required by the broadcasters themselves are of little demonstrable value to the general public. It can be concluded that from the viewpoint of technical signal quality the operator licensing requirements provides no increase in public service, and even ignoring the direct cost to the FCC to maintain the requirements, operator licensing has a public cost reflected in some incremental supply (advertiser) costs for market goods and services.

9. In the technical area of interference control, there does appear to be some advantage of operator licensing. Interference, although manifested as a lack of quality at a listener or viewer's receiver, is not necessarily subject to the same competitive forces as transmitted signal quality. For example, it is entirely possible that a given broadcaster may maintain a high quality signal to his audience, but a spurious emission from his broadcast equipment could disrupt or reduce the quality of another broadcaster or even another radio service. In the extreme, it is even possible that a given broadcaster could be motivated to deliberately interfere. Notwithstanding these possible advantages of controlling interference by requiring use of licensed operators, our assessment did not reveal a strong relationship. It is highly probable that in those instances where interference has occurred, the cause may be attributed to other factors such as equipment reliability. Moreover, our results indicate that the present overall level of signal quality is remarkably high.

10. There are special interest groups which gain from the FCC operator requirements. These include profit making technical schools which depend on the FCC licensing requirement to recruit students. Inexperienced operators probably command a wage premium because they are licensed. Broadcasters can possibly avoid some training costs which might otherwise have to be incurred to impart needed technical skills to employees. These are largely transfer payments when the individuals in these groups are viewed simply as members of the larger group, the general public. The purpose of the licensing requirement, however, is not to serve these special small segments of the public particularly in light of fact that the gains of any such groups are ultimately felt as an unnecessary and uncompensated net cost to the general public.

11. It should also be noted that, to some extent, operator licensing serves a function which is redundant with the functions of other FCC programs. For instance operator licensing, like equipment authorization, and transmitter system operation regulations, helps prevent quality problems from occurring. Monitoring and inspection deter and detect transmission problems, some of which at least may be due to inadequately trained or supervised personnel. Violation notices and sanctions also tend to deter operator-induced problems as well as others. Thus the quality-enhancement function served by operator licensing is also served by other FCC programs, which have decidely more direct impacts on moderating transmission problems.

Recommendations: Operator Licensing

12. Based on results of the broadcast tradeoff study and the conclusions summarized earlier, the following actions are recommended with regard to proposed rules concerning use of licensed operators for broadcast operation. As noted previously these recommendations arise from evaluation of signal quality and interference. Other considerations could complement or contradict these recommendations.

13. The general trend of Docket No. 20617 to relax operator requirements in the broadcast service is consistent with our findings. We recommend that this deregulatory trend be followed since no clear evidence exists to support stronger and more rigid requirements. Specifically, we recommend the following alternatives:

1. Reduce the current operator licensing program for broadcast operation to a registration program and eliminate the requirements for examinations, or

2. Alter the current licensing program so that only individuals who perform broadcast maintenance or repair must pass a relevant and meaningful examination of their abilities.

14. Both alternatives appear to be consistent with the Communications Act of 1934. This Act requires that individuals who operate broadcast stations be licensed, but it does not indicate the depth and degree of comeptence certification.

15. The first alternative is a direct outcome of the apparent lack of strong correlation between broadcast technical signal quality and use of licensed operators. The suggested registration process without technical examination should meet the Communications Act requirements and should permit reasonable allocation of responsibility.

16. The second alternative is presented primarily in recognition of the possibility that non-technical factors may indicate a need for certified operators and the fact that the broadcast industry as a whole may wish the Commission to continue to certify the minimum competence of operators. It is our view that, with regard to technical signal quality, the principal benefit is to be gained by licensing those individuals who deal directly with broadcast station maintenance, repair, and installation. These activities have potentially the greatest impact on signal quality and interference. Routine station operation should not require competence certification by examination. However, it must also be emphasized that the examination for maintenance and repair should be more relevant and meaningful. The validity of the present examination process in measuring competence is questionable. In many cases it appears only to measure individual persistence in memorization rather than indicate attained competence.

17. If the first alternative identified above is implemented, it is expected that there may be some transient effects observed in small market areas. In such areas, there may be a tendency on the part of some station owners to hire anyone, qualified or not, to operate or maintain their station. Part of the motivation for this would be to lower personnel cost, but it is expected that an equilibrium will be reached between the cost of having problems and the cost of not having problems.

18. In summary the combination of the above two recommended alternatives along with the underlying justifications suggest the following: (1) routine station operation can be satisfactorily carried out by other than licensed operators, and technical signal quality will not be significantly degraded; (2) the present classification of licensed operators (first, second, third, etc.) and the corresponding examination of competence (if any) do not significantly impact technical signal quality; and (3) a licensing program for broadcast operators should either be based on registration without examination for any class of license, or be based on registration without examination for routine station operation and a meaningful operator license for maintenance, repair, and critical adjustment of broadcast transmitters.

V 45 AG 1 8 0 UMI

Appendix B

1. It is proposed to amend the operator requirement rules for TM, FM, non-commercial educational FM, and TV Broadcast Station to include the following provisions:

(a) Present operator requirement rules for AM, FM, Non-commercial Educational FM and TV stations (Sections 73.93, 73.265, 73.565, and 73.661) would be deleted in their entirety. All broadcast operator requirements would be uniform and included in a rule common to all stations in Part 73, Subpart H.

(b) The revised operator requirement rule would indicate that all technical installation, maintenance, and technical supervision of broadcast transmitting apparatus could be performed by an operator holding any class of commercial operator license or permit. The station licensee would be fully responsible for establishing the employment requirements for all operators who perform routine operating duties and technical maintenance of transmitting equipment.

(c) FCC Rules Part 13 would delete the category of First Class Radiotelephone Operator License and all examination requirements for such licenses. No new licenses of this class would be issued. Holders of existing First Class Radiotelephone Operator Licenses, when applying for renewal, would be issued Second Class Radiotelephone Operator Licenses.

(d) Each broadcast station licensee would be required to designate one person holding any class of FCC commercial operator license or permit as the station's chief operator with duties and responsibilities as prescribed for chief operators under the existing rules. This operator must be either employed on a full-time or less than full-time basis. However non-directional AM stations licensed to operate with 10,000 watts or less power, and all FM stations, may engage the services of a chief operator on a part-time contract basis.

(e) Existing requirements for transmission system inspections would be retained in a separate rule section under the title of "Transmission system inspection." (Existing inspection and technical measurement requirements, and technical log rules are beyond the scope of this proceeding, and no changes in such rules are being proposed.)

2. It is proposed to amend the operator requirement rules for TV and FM Broadcast Translator stations as follows:

(a) All operator duties in connection with the installation, inspection and maintenance of translator station transmission equipment may be performed by any person holding a commercial operator license or permit. The station licensee must have full responsibility for determining the qualifications of operators to perform technical duties.

3. It is proposed to amend the operator requirement rules for broadcast experimental and developmental stations by specifying operators holding Second Class Radiotelephone Operator Licenses in lieu of First Class Radiotelephone Operator Licenses as duty operators.

4. No changes are to be made in the operator requirement rules for other broadcast auxiliary stations. The frequency bands used by the broadcast auxiliary stations are either shared with or are adjacent to bands used by non-broadcast services (private radio, common carrier, CARS, marine, etc.), and the transmitting equipment is similar in design and operation to that used by the non-broadcast services. Until such time as the Commission determines in this proceeding the appropriate operator licensing requirement for persons who maintain non-broadcast and non-compulsory radio transmitting equipment, the present operator requirements for the broadcast auxiliary services will be continued.

Separate Statement of Chairman Charles D. Ferris

August 1, 1980.

Re Proposed Deregulation of First Class Radiotelephone Operator Licensing Program.

This proposal is a major step forward in our ongoing effort to re-examine all of our licensing programs. We need to determine whether our licensing programs of commercial radio operators are necessary in a communications market that responds to a wide-range of pressures, of which we are only one.

Today we seek a final round of comments on whether our First Class Radiotelephone Operator Licenses are an effective or necessary means of insuring that the technical performance of broadcast stations meet our requirements. It appears that the government may be able to remove itself from this process without any adverse impact.

Broadcast licensees, after all, must be as concerned about keeping their audience tuned in as they are in keeping the FCC satisfied with their technical performance. And our rules provide for significant penalties if they do not meet the technical parameters we set.

Further, it is not even clear that the tests we use are the most accurate way to determine the technical competence of operators. These tests do not account for experience and common sense, and they may even be susceptible to "cramming" at the last minute. Broadcasters may well be able to devise their own testing procedures that are far more relevant to their own, and the public's, needs.

47 CFR Part 15

[Gen. Docket No. 80-439; RM-3673; FCC 80-482]

Amending Computing Devices Rules Clarifying Which Electronic Games Are Exempted From Commission Certification

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rule making.

SUMMARY: The Commission has adopted an NPRM in response to a Petition for Rule Making (RM 3673) filed by the Toy Manufacturers of America, Inc. The proposed rule would allow self-contained, non-video electronic games with generated main timing frequencies of less than 500 kHz to be exempted from FCC Certification. This would clarify the current categories of devices that are exempted from certification.

DATES: Comments must be received on or before September 22, 1980, and Reply Comments must be received on or before October 7, 1980.

ADDRESSES: Send comments to: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mr. Herman Garlan, Office of Science and Technology, 202-653-8121; Mr. Douglas D. Rohall, Office of Science and Technology, 202-632-7073.

SUPPLEMENTARY INFORMATION:

[Gen Docket No. 80-439; RM-3673; FCC 80-482]

Notice of Proposed Rule Making

Adopted: August 1, 1980.

Released: August 12, 1980.

In the matter of amendment of Part 15 (Computing Devices Rules) to Clarify Which Electronic Games are Exempted from Commission Certification.

By the Commission:

1. On September 18, 1979, the Commission adopted a First Report and Order on Technical Standards for Computing Equipment.[1] In this proceeding, portions of Part 2 and Part 15 of the Commission's Rules and Regulations were revised and amended. These new regulations attempted to reduce the interference potential to radio communications of electronic computing equipment by imposing minimum technical standards for such electronic devices or systems.

2. On March 27, 1980, the Commission adopted an Order Granting in Part Reconsideration of the First Report and Order—Technical Standards for computing Equipment [2] after receiving thirteen timely petitions requesting partial reconsideration of the aforementioned First Report and Order.

3. On May 6, 1980, the Toy Manufacturers of America, Inc. (TMA) filed a Petition for Reconsideration of the March 27th Order. The petition was considered a Petition for Rule Making and was placed on Public Notice on May 28, 1980. No comments were received in response to the Public Notice, although a letter from Dash-Straus Associates submitted data verifying the claims made in the TMA request.

4. TMA's petition seeks to exempt from FCC certification certain categories of non-video games, claiming that § 15.834(a) is too vague in its definition of "hand held" games and as presently written does not adequately define the exempted devices so that TMA is not sure as to exactly which devices must be certificated. In lieu of the present "self-contained, hand held" criteria, TMA proposes to precisely define that category of products which will be exempted from certification. TMA requests that all non-video, electronic games with a generated timing frequency of 500 kHz or less be exempted from FCC certification.

5. TMA believes that since personal calculators and digital watches are exempted because of their low potential for causing interference, low-power electronic games that have electomagnetic radiation charactericitics similar in nature to the above devices, should have a similar exemption provision. TMA chose the generated timing frequency as the limiting critieria since no devices with clock rates, the rate at which the synchronizing mechanism updates function execution or the rate of the timing frequency, below 500 kHz demonstrated any appreciable interference radiation. TMA feels that exemption from certification should be based on a device's technical potential for causing interference and not on size related terms such as "hand held."

6. TMA proposes that the 500 kHz timing frequency be used as the limiting criteria for the following reasons. No device with a timing frequency below 500 kHz emitted significant levels of radiation. The level of radiation of most such devices was actually 20 dB below the Commission's requirements.[3] TMA points out further that most of the simple electronic games have clock rates below 500 kHz, hence the fundamental frequency falls below the AM Broadcast Band, and cannot be driven above such rates due to physical limitations inherent in their technology. Moreover, it is only games with more advanced technological design resulting in clock rates above 500 kHz—i.e. in the 1 MHz to 4 MHz range, that emit significant levels of radiation which require careful testing to insure that interference will not result.

7. This Notice sets forth a proposal in response to TMA's Petition for Rule Making. Given in Appendix A, this proposal would exempt all self-contained, non-video devices with a generated timing frequency of 500 kHz or less. As an alternative approach, we may also consider exempting from certification electronic games or toys that have a total power consumption of less that ½ watt.[4]

We request interested parties to comment on the merits or deficiencies of either or both of these two alternatives, or some combination thereof. Specific issues to address are the clarity of the definitions, the likely impact on the marketplace, and the chosen cutoff limits of 500 kHz or ½ watt, particularly in light of the fact that toys are currently being designed with clock rates greater than 500 kHz. The ½ watt power limit is based on the assumption that there is very little energy to be radiated and thus cause interference. Comments on this alternative proposal are requested. In addition, it has been suggested that the line of demarcation be set at 495 kHz instead of 500 kHz to keep the maritime distress and calling band (495–505 kHz) free of interference for international safety reasons. We would like to request comments on this suggestion. Also, we request comment on the desirability of applying these limits to hand-held and desk top calculators.

8. Notice is given of proposed rule making in this matter. Any interested person may participate in this proceeding by filing comments by September 22, 1980. Reply comments may be filed October 7, 1980.

Comments and reply comments may be addressed to the issues and proposals set forth in the Notice and to other issues as the participants believe are relevant and necessary to the resolution of these matters. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, providing that such information or writing indicating the nature and source of such information is placed in the public file and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

9. For further information concerning this Notice, contact Mr. Herman Garlan, FCC, Office of Science and Technology, RF Devices Branch, Washington, D.C. 20554, telephone (202) 653-8121; or Mr. Douglas D. Rohall, FCC, Office of Science and Technology, Technical Planning Staff, Washington, D.C. 20554, telephone (202) 632-7073. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, *ex parte* contacts made to members of the Federal Communications Commission in this proceeding must be disclosed in the public docket file. A summary of the Commission's procedure governing *ex parte* contacts in rulemaking proceedings is available from the Commission's Consumer Assistance Office, FCC Washington, D.C. 20554, (202) 632-2700.

10. Authority for the proposed amendments is contained in Sections 3, 4(i), and 301-303 of the Communications Act of 1934, as amended. Pursuant to § 1.415 of the Commission's Rules, an original and five (5) copies of all comments, reply comments, and other pleadings and submissions shall be furnished to the Commission. All documents will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix A

1. The text of § 15.834(a)(1) is revised to read as follows:

[1] First Report and Order in Docket 20780, Adopted September 18, 1979, Released October 11, 1979, (44 FR 59530, October 16, 1979).

[2] Order Granting in Part Reconsideration of First Report and Order in Docket 20780, Adopted March 27, 1980, Issued April 9, 1980, (45 FR 24154, April 9, 1980).

[3] These measurements were performed by Dash-Straus Associates of Malden, Massachusetts and were submitted by TMA in their Petition for Rule Making.

[4] This exemption would not apply to toys or other devices that emit radiation for communication or control purposes such as radio-controlled vehicles. These devices must still comply with Part 15, Subpart D and any other applicable sections of the Commission's Rules and Regulations.

§ 15.834 Class B computing device: compliance requirement.

(a) The following Class B computing devices which are manufactured after January 1, 1981, shall be certificated by the Commission pursuant to Subpart J of Part 2 of this Chapter.

(1) electronic games or toys, including video coin operated games, but excluding self-contained units that do not use a TV receiver for display and that employ digital logic that generates a main timing frequency not in excess of 500 kHz.

(2) personal computers as defined in § 15.4(q) of this Part, excluding desk top and hand held calculators and digital clocks and watches.

(3) peripherals, terminals, etc. that are capable of being attached to a personal computer.

47 CFR Part 73

[BC Docket No. 80-190; RM- 3630]

Amendment of Form 324, Annual Financial Report of Broadcast Stations; Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; order extending comment time.

SUMMARY: Action taken herein extends the comment and reply comment dates in the proceeding to revise FCC Form 324, the Annual Financial Report of Broadcast Stations (BC Docket No. 80-190). The Broadcast Financial Management Association requested this extension in order to obtain input from discussions to be held at its mid-September National Conference.

DATES: Comments must be filed on or before October 9, 1980, and reply comments on or before November 28, 1980.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Alan Stillwell, Broadcast Bureau, (202) 632-6302.

SUPPLEMENTARY INFORMATION:

Adopted: July 31, 1980.

Released: August 8, 1980.

By the Chief, Policy and Rules Division:

1. On April 24, 1980, (45 FR 35370, May 27, 1980) the Commission adopted a *Notice of Proposed Rulemaking* looking toward the revision of FCC Form 324, the Annual Financial Report of Networks and Licensees of Broadcast Stations. Comments on this matter are presently due by September 15, 1980, and reply comments by November 14, 1980.

2. The Broadcast Financial Management Association (BFM) has asked the Commission to extend the time for filing comments in this proceeding to October 9, 1980. In requesting this extension, BFM states that it will hold discussions concerning draft comments at its National Conference in mid-September. They anticipate that it will require an additional three weeks to revise the draft and put it in final form for submission to the Commission.

3. We think these comments would be useful in developing a full record and are, therefore, granting the additional time requested. In order to provide sufficient time for replies to all comments, we are also extending the date for filing reply comments by two weeks to November 28, 1980.

4. Accordingly, it is ordered, That the above request for an extension of filing time is granted and the date for filing comments is extended to October 9, 1980 and for reply comments to November 28, 1980.

5. This action is taken pursuant to Section 4(i), 5(d)(1) and 303(r) of the Communications Act of 1934, as amended, and Section 0.281 of the Commission's Rules.

Federal Communications Commission.

Henry L. Baumann,

Chief, Policy and Rules Division, Broadcast Bureau.

Vol. 45, No. 161

Monday, August 18, 1980

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

CIVIL AERONAUTICS BOARD

[Order 80-8-65]

Alaska Airlines Subpart Q Restriction Removal Proceeding (Subsidy Limitation)

AGENCY: Civil Aeronautics Board.

ACTION: Notice of order to show cause (Order 80-8-65).

SUMMARY: The Board is instituting the *Alaska Airlines Subpart Q Restriction Removal Proceeding* (Subsidy Limitation) and is proposing to remove a restriction in Alaska's certificates which limits the total subsidy payable for the transportation of mail under section 406 of the Act. The proceeding is being processed under the expedited procedures of Subpart Q of the Board's Procedural Regulations. The tentative findings and conclusions will become final if no objections are filed. The complete text of this order is available as noted below.

DATES: All interested persons having objections to the Board removing the certificate restrictions shall file, and serve upon all persons listed below, no later than September 15, 1980, a statement of objections together with a summary of the testimony, statistical data, and other material expected to be relied upon to support the stated objections.

ADDRESSES: Objections to the issuance of a final order should be filed in Docket 38017 which we have entitled the *Alaska Airlines Subpart Q Restriction Removal Proceeding (Subsidy Limitation).* They should be addressed to the Docket Section, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428.

In addition, copies of such filings should be served on Alaska Airlines, the Alaska Transportation Commission, the United States Postal Service and the Mayors of the following Alaska cities: Cordova, Yakutat, Gustavus, Petersburg and Wrangell.

FOR FURTHER INFORMATION CONTACT: Lawrence R. Krevor, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, (202) 673-5333.

SUPPLEMENTARY INFORMATION: The complete text of Order 80-8-65 is available from our Distribution Section, Room 516, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 80-8-65 to that address.

By the Civil Aeronautics Board: August 12, 1980.

Phyllis T. Kaylor,

Secretary.

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q of the Board's Procedural Regulations

Notice is hereby given that, during the week ended August 8, 1980 CAB has received the applications listed below, which request the issuance, amendment, or renewal of certificates of public convenience and necessity or foreign air carrier permits under Subpart Q of 14 CFR Part 302.

Answers to foreign permit applications are due 28 days after the application is filed. Answers to certificate applications requesting restriction removal are due within 14 days of the filing of the application. Answers to conforming applications in a restriction removal proceeding are due 28 days after the filing of the original application. Answers to certificate applications (other than restriction removals) are due 28 days after the filing of the application. Answers to conforming applications or those filed in conjunction with a motion to modify scope are due within 42 days after the original application was filed. If you are in doubt as to the type of application which has been filed, contact the applicant, the Bureau of Pricing and Domestic Aviation (in interstate and overseas cases) or the Bureau of International Aviation (in foreign air transportation cases).

Subpart Q Applications

Date filed: 8-8-80.

Docket No. 38580.

Description: Cayman Airways Limited, c/o Roy Nerenberg, 1825 K Street, NW., Suite 720, Washington, D.C. 20006. Application of Cayman Airways Limited pursuant to Section 402 of the Act and Subpart Q of the Board's Regulations requests a foreign air carrier permit for foreign air transportation of persons, property and mail in scheduled operations between a point or points in Belize and the terminal point Miami, Florida, to be performed pursuant to a wet lease agreement with Belize Airways, Ltd. Answers to the Application may be filed by September 5, 1980.

[Order 80-8-60]

Chicago-Albany/Oklahoma City/Syracuse/Tulsa; Subpart Q Proceeding

AGENCY: Civil Aeronautics Board.

ACTION: Notice of order to show cause (80-8-60)

SUMMARY: The Board is instituting the *Chicago-Albany/Oklahoma City/Syracuse/Tulsa; Subpart Q Proceeding* and is proposing to grant unrestricted authority to Trans World in these markets and to United in the Chicago/Rockford-Tulsa/Oklahoma City markets under expedited procedures of Subpart Q of its Procedural Regulations. The tentative findings and conclusions will become final if no objections are filed.

The complete text of this order is available as noted below.

DATES: Objections: All interested persons having objections to the Board issuing the proposed authority shall file, and serve upon all persons listed below, no later than September 15, 1980, a statement of objections, together with a summary of the testimony, statistical data, and other material expected to be relied upon to support the stated objections.

ADDRESS: Objections to the issuance of a final order should be filed in Docket 38587 which we have entitled the *Chicago-Albany/Oklahoma City/Syracuse/Tulsa Subpart Q Proceeding.* They should be addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428.

In addition, copies of such filing should be served upon Trans World

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

Bureau of the Census

Annual Surveys in Manufacturing Area; Notice of Consideration

Notice is hereby given that the Bureau of the Census is considering a proposal to initiate or to continue the annual surveys listed below for the year 1980 and for each year thereafter under the authority of title 13, United States Code, sections 182, 224, and 225. These surveys, most of which have been conducted for many years, are significant in the manufacturing area. On the basis of information and recommendations received by the Bureau of the Census, the data have significant application to the needs of the public and industry and are not available from nongovernmental or other governmental sources.

The establishments covered by these surveys directly account for the bulk of all manufacturing employment. The information to be developed from these surveys is necessary for an adequate measurement of total industrial production. Government agencies need data on the output of these industries. Manufacturers in the industries involved, as well as their suppliers and customers and the general public, have requested such data in the interest of business efficiency and stability.

These surveys, if conducted, shall begin not earlier than October 17, 1980.

Most of the following commodity or product surveys provide data on shipments and/or production; some provide data on stocks, unfilled orders, orders booked, consumption, etc. Reports will be required of all or a sample of establishments engaged in the production of the items covered by the following list of surveys. These surveys have been arranged under major group headings based on the Standard Industrial Classification Manual (1972 edition) promulgated by the Office of Management and Budget for the use of Federal statistical agencies.

Major Group 20—Food and Kindred Products

Confectionery.

Major Group 22—Textile Mill Products

Broadwoven goods finished
Narrow fabrics.
Yarn production.
Knit fabric production.

Major Group 23—Apparel and Other Finished Products Made From Fabrics and Similar Materials

Men's and Boys' Outerwear.
Women's and Children's Outerwear.
Underwear and Nightwear.
Brassieres, corsets, and allied garments.
Gloves and mittens.

Major Group 24—Lumber and Wood Products, Except Furniture

Hardwood plywood.
Softwood plywood.
Lumber.

Major Group 26—Paper and Allied Products

Pulp, and detailed grades of paper and board.

Major Group 28–Chemicals and Allied Products

Industrial gases.
Inorganic chemicals.
Pharmaceutical preparations, except biologicals.
Sulfuric acid.

Major Group 29—Petroleum Refining and Related Industries

Asphalt and tar roofing and siding products.

Major Group 30—Rubber and Miscellaneous Plastics Products

Rubber.
Plastics products.

Major Group 31—Leather and Leather Products

Shoes and slippers (by method of construction).

Major Group 32—Stone, Clay, and Glass

Consumer, scientific, technical, and industrial glassware.
Fibrous glass.

Major Group 33—Primary Metal Industries

Steel mill products.
Insulated wire and cable.
Magnesium mill products.
Nonferrous castings.

Major Group 34—Fabricated Metal Products Except Ordnance, Machinery, and Transportation Equipment

Commercial steel forgings.
Steel power boilers.
Selected heating equipment.
Metal cans.

Major Group 35—Machinery, Except Electrical

Internal combustion engines.
Tractors, except garden tractors.
Farm machines and equipment.
Mining machinery and mineral processing equipment.
Refrigeration and air-conditioning equipment, including warm air furnaces.
Computers and office and accounting machines.
Pumps and compressors.
Selected industrial air pollution control equipment.
Construction machinery.
Anti-friction bearings.

Major Group 36—Electrical Machinery, Equipment, and Supplies

Radios, televisions, and phonographs.
Motors and generators.
Wiring devices and supplies.
Switchgear, switchboard apparatus, relays, and industrial controls.
Selected electronic and associated products, including telephone and telegraph apparatus.
Electric housewares and fans.
Electric lighting fixtures.
Major household appliances.

Major Group 37—Transportation Equipment

Aircraft propellers.

Major Group 38—Professional, Scientific, and Controlling Instruments; Photographic and Optical Goods; Watches and Clocks

Selected instruments and related products.
Atomic energy products and services.

The following survey represents an annual supplement of a monthly survey and will cover the same establishments canvassed monthly. There will be no duplication of reporting, however, since the type of data collected on the annual supplement will be different from that collected monthly.

Major Group 32—Stone, Clay, and Glass

Glass containers.

The following list of surveys represents annual counterparts of monthly and quarterly surveys and will cover only those establishments which are not canvassed or do not report in the more frequent surveys. Accordingly, there will be no duplication in reporting. The content of these annual reports will be identical with that of the monthly and quarterly reports.

Major Group 20—Food and Kindred Products

Flour milling products.

Major Group 22—Textile Mill Products

Broadwoven fabric (gray).
Consumption of wool and other fibers, and production of tops and noils.
Carpet and rugs.

Major Group 23—Apparel and Other Finished Products Made From Fabrics and Similar Materials

Sheets, pillowcases, and towels.

Major Group 25—Furniture and Fixtures

Mattresses and bedsprings.

Major Group 26—Paper and Allied Products

Converted flexible packaging products.

Major Group 28—Chemicals and Allied Products

Phosphatic fertilizer materials.
Paint, varnish, and lacquer.

Major Group 30—Rubber and Miscellaneous Products

Plastics bottles.

Major Group 32—Stone, Clay, and Glass

Glass containers.
Refractories.
Clay construction products.
Flat glass.

Major Group 33—Primary Metal Industries

Nonferrous castings.
Iron and steel foundries.
Aluminum producers and importers.
Titanium ingot, mill products, and castings.
Copper controlled materials.

Major Group 34—Fabricated Metal Products Except Ordnance, Machinery, and Transportation Equipment

Plumbing fixtures.
Steel shipping drums and pails.
Closures for containers.

Major Group 35—Machinery, Except Electrical

Construction machinery.
Metalworking machinery.

Major Group 36—Electrical Machinery, Equipment, and Supplies

Fluorescent lamp ballasts.
Electric lamps.

Major Group 37—Transportation Equipment,

Complete aircraft anf aircraft engines, except military.
Backlog of orders for aircraft, space vehicles, missiles, engines, and selected parts.
Truck trailers.

The annual survey of manufactures will collect general statistical data such as total value of shipments, shipments by product class, employment, payroll, workhours, capital expenditures, cost of materials consumed, gross book value of assets, retirements, and depreciation of fixed assets, rental payments, supplemental labor costs, information on the quantity of fuels used, etc. This survey, while conducted on a sample basis, will cover all manufacturing industries, including data on plants under construction but not yet in operation.

A survey of research and development (R&D) activities will be conducted. The major data to be obtained in this survey will include total R&D expenditures by source of funds, the number of scientists and engineers employed, the amounts spent for pollution abatement and energy R&D, and, for comparative purposes, the total net sales and receipts and the total employment of the company.

A survey of shipments to the Federal Government is planned to provide information on the impact of Federal procurement on selected industries and geographic areas by Federal Government agencies.

The annual survey on oil and gas will canvass the industry which provides most of the fuel produced in the United States as well as a substantial portion of the hydrocarbon raw material requirements of many industries. The survey will collect information on exploration, development, and production costs; sales volumes and values; drilling activity; and assets in the crude petroleum and natural gas industry.

The annual survey of pollution abatement expenditures is designed to collect from manufacturers the total expenditures by industry and

geographic area to abate pollutant emissions. The survey covers current operating costs, capital expenditures, and assets by industry to reduce pollution in its air, water, or solid form. It will also obtain the costs recovered from abatement activities and quantities of pollutants abated.

The survey of plant capacity will obtain information such as the amount of time a plant is in operation; operating rates as related to preferred levels and practical capacity; the value of production and other statistics for actual, preferred, and practical capacity operating levels; and the reasons for operating at less than capacity. The survey will be done on a sample basis and will cover all manufacturing industries.

Copies of the proposed forms will be made available on request to the Director, Bureau of the Census, Washington, D.C. 20233.

Any suggestions or recommendations concerning the subject matter of these proposed surveys should be submitted in writing to the Director of the Bureau of the Census on or before October 17, 1980.

Dated: August 12, 1980.

Vincent P. Barabba,

Director, Bureau of the Census.

[FR Doc. 80-25082 Filed 8-15-80; 8:45 am]

BILLING CODE 3510-07-M

International Trade Administration

Subcommittee on Export Expansion of the President's Export Council; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), notice is hereby given that a meeting of the Subcommittee on Export Expansion of the President's Export Council will be held on Thursday, September 4, 1980, at 10:00 a.m. in Room 4830, Main Commerce Building, 14th Street and Constitution Avenue, N.W., Washington, D.C.

The President's Export Council (PEC) was established by Executive Order 11753 of December 20, 1973, extended by Executive Order 11827 of January 4, 1975, Executive Order 11948 of December 20, 1976 and Executive Order 12110 of December 28, 1978. The PEC was reconstituted by Executive Order 12131 of May 4, 1979, to advise the President on matters relating to United States export trade, including the implementation of the President's National Export Policy. The Subcommittee has been formed to make recommendations to the PEC on matters related to U.S. policies, practices and procedures which assist or inhibit the expansion of U.S. exports in the areas of finance, taxation, disincentives, transportation and documentation, as well as broader economic policies affecting the competitiveness of U.S. exports. The Subcommittee is composed solely of members of the Council.

The Subcommittee meeting agenda is as follows:

1. Opening remarks of the Chairman.
2. Report of the Working Group on Export Credit.
3. Status of PEC recommendations on taxation of Americans working abroad.
4. Discussion of Subcommittee's proposed activities report to the PEC.
5. Concluding remarks of the Chairman.

The meeting is open to the public at which a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

For further information, contact Mr. Brant W. Free, PEC Subcommittee on Export Expansion, Room 4312, U.S. Department of Commerce, Washington, D.C. 20230, telephone (202) 377-3575. Minutes of the meeting may be obtained from Mr. Free.

Dated: August 12, 1980.

David Biltchik,

Acting Assistant Secretary for International Economic Policy, U.S. Department of Commerce.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

New England Fishery Management Council's Scientific and Statistical Committee; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA.

SUMMARY: The New England Fishery Management Council, established by section 302 of the Fishery Conservation and Management Act of 1976 (Public Law 94-265), has established a Scientific and Statistical Committee, which will meet to discuss the groundfish interim plan; data and plan for lobster; value of a reduction of variability in catch and abundance as an objective; reports on Council meetings; minutes of previous meeting, as well as new and old business.

DATES: The meeting which is open to the public will convene on Wednesday, September 10, 1980, at approximately 10 a.m., and will adjourn at approximately 5 p.m. The meeting may be lengthened or shortened, or agenda items rearranged, depending upon progress on the agenda.

ADDRESS: The meeting will take place at the University of Connecticut, Marine Advisory Service, Building 24, Avery Point, Groton, Connecticut.

FOR FURTHER INFORMATION CONTACT: New England Fishery Management Council, Suntaug Office Building, Five Broadway (Route One), Saugus, Massachusetts 01906, Telephone: (617) 231-0422.

Dated: August 13, 1980.

BILLING CODE 3510-22-M

South Atlantic Fishery Management Council; Public Meeting With Partially Closed Session Amendment

AGENCY: National Marine Fisheries Service, NOAA.

SUMMARY: The South Atlantic Fishery Management Council, established by section 302 of the Fishery Conservation and Management Act of 1976 (Public Law 94-265), will now conduct a public meeting with a partially closed session. Therefore, the public meeting notice previously published in the **Federal Register** (Volume 45, No. 143, July 23, 1980, pages 49120-49121) is hereby amended to allow for this partially closed session in accordance with section 552b(c)(6) of title 5, United States Code.

DATES: August 26-28, 1980.

ADDRESS: Council Headquarters, One Southpark Circle, Suite 306, Charleston, South Carolina.

FOR FURTHER INFORMATION CONTACT: South Atlantic Fishery Management Council, One Southpark Circle, Suite 306, Charleston, South Carolina 29407, Telephone: (803) 571-4366.

Meeting Agendas follow:

Council—(open meeting) August 26-28, 1980 (1:30 p.m. to 5 p.m. on August 26; 8:30 a.m. to 5 p.m. on August 27; 8:30 a.m. to noon on August 28).

Agenda: discuss decision elements for Snapper-Grouper Fishery Management Plan (FMP); review status of Swordfish FMP; discuss Billfish FMP; update FMP activities as appropriate and discuss election of officers.

Council—(closed session) August 28 (1:30 p.m. to 5 p.m.)

Agenda: Closed Session—Conduct personal interviews and discuss potential candidates for the Council Executive Director position.

The Assistant Secretary for Administration of the Department of Commerce with the concurrence of its General Counsel, formally determined on August 12, 1980, pursuant to section 10(d) of the Federal Advisory Committee Act, that the agenda item covered in the closed session may be exempt from the provisions of the act relating to open meetings and public participation therein, because items will be concerned with matters that are within the purview of 5 U.S.C. 552(c)(6) as information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy. (A copy of the determination is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 5317, Department of Commerce.) All other portions of the meeting are open to the public.

Dated: August 13, 1980.

Robert K. Crowell,

Deputy Executive Director, National Marine Fisheries Service.

BILLING CODE 3510-22-M

South Atlantic Fishery Management Council; Public Meeting With Partially Closed Session

AGENCY: National Marine Fisheries Service, NOAA.

SUMMARY: The South Atlantic Fishery Management Council, established by Section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), will conduct a series of meetings.

DATE: September 23-25, 1980.

ADDRESS: The meetings will take place at the Holiday Inn, 2600 A1A, Melbourne, Florida.

FOR FURTHER INFORMATION CONTACT: South Atlantic Fishery Management Council, One Southpark Circle, Suite 306, Charleston, South Carolina 29407, Telephone: (803) 571-4366.

Meeting Agendas follow:

Council— (open meeting) September 23-25, 1980 (1:30 p.m. to 5 p.m., on September 23; 10:30 a.m. to 5 p.m., on September 24; 8:30 a.m. to 12 noon on September 25).

Agenda: Open Session— Final decisions on Billfish and Snapper-Grouper Fishery Management Plans (FMP's); review status of ongoing FMP's, and discuss other management /administrative matters as necessary.

Council— (closed session) September 24, 1980 (8:30 a.m. to 10:30 a.m.)

Agenda: Closed Session— Discuss employee evaluations as well as other personnel matters. Only Council members and staff relevant to these discussions will be allowed to attend the closed session.

The Assistant Secretary for Administration of the Department of Commerce with the concurrence of its General Council, formally determined on August 12, 1980, pursuant to Section 10(d) of the Federal Advisory Committee Act, that the agenda item covered in the closed session may be exempt from the provisions of the Act relating to open meetings and public participation therein, because items will be concerned with matters that are within the purview of 5 U.S.C. 522(c)(6) as information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy. (A copy of the determination is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 5317, Department of Commerce.) All other portions of the meeting are open to the public.

Dated: August 13, 1980.

Robert K. Crowell,

Deputy Executive Director, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMISSION ON FINE ARTS

Meeting

The Commission of Fine Arts will close a portion of its next meeting scheduled for Wednesday, September 3, 1980, at 10:00 a.m. in the Commission's offices at 708 Jackson Place, N.W., Washington, D.C. 20006 to discuss personnel matters and budget estimates, under authority of Section 522b2, 6, and 9(b) of Title 5, U.S.C. This is an amendment to notice of meeting dated July 31, 1980. (45 FR 52257, August 6, 1980)

Inquires should be addressed to Mr. Charles H. Atherton, Secretary, Commission of Fine Arts, at the above address.

Dated in Washington, D.C. August 12, 1980.

Charles H. Atherton,

Secretary.

BILLING CODE 6330-01-M

COMMUNITY SERVICES ADMINISTRATION

Energy Consumer Advocacy

AGENCY: Community Services Administration.

ACTION: Notice of proposed 1981-82 CSA energy advocacy initiative.

SUMMARY: CSA is proposing to fund approximately 25 two-year grants at an estimated $75,000 per year for activities related to low-income and elderly energy consumer advocacy. (See catalogue of Federal Domestic Assistance; 49.014, "Emergency Energy Conservation Services.") This Notice describes the type of proposals which will be considered by CSA and the application process that is to be followed.

DATE: Proposals must be received by CSA by September 29, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. Rufus Bradford, Community Services Administration, 1200-19th Street, NW., Washington, D.C. 20506, Telephone (202) 632-6503, Teletypewriter (202) 254-6218.

SUPPLEMENTARY INFORMATION: This Initiative is being carried out pursuant to the Stipulation and Agreed Order in the case *Simer v. Olivarez* (U.S. District Court—Northern Illinois No 796390—April 25, 1980). That Order, with reference to the CSA Energy Advocacy Initiative, provides that CSA will fund low-income and elderly energy consumer advocacy activities for a two year period commencing in FY 1980 as follows:

"a. 4 million dollars shall be granted to local groups to fund advocacy efforts on behalf of elderly and/or low-income persons with regard to energy issues affecting them, subject to the following requirements:

1. Grants for groups shall average $75,000 per year and at least four groups so funded will be advocacy groups which are not being funded by CSA as energy advocates as of the date of this Order.

2. In selecting which applicants are to receive funds CSA shall give preference to those applicants which can show a demonstrated capability in the following areas, and which propose in their work programs the conduct of activities in these areas: (a) energy availability and access to energy sources, including customer service issues; (b) energy costs and local, state, or federal energy regulatory policies; (c) impact of energy problems on basic necessities such as housing, food, transportation, including building performance standards; and (d) impact of energy conservation, weatherization, and alternative energy development policies on elderly and/or low-income persons.

3. Grantees must utilize at least fifty (50) percent of any grant under this program to contract with existing legal programs serving low-income people as authorized under 42 U.S.C.A. 3001 or 45 U.S.C.A. 2701 or Title XX of the Social Security Act. This 50% legal component may be waived only for those grantees who currently have on staff full time

attorneys working exclusively on energy

recommendations are to include

Title VI delegations of authority and for

DEPARTMENT OF ENERGY

attorneys working exclusively on energy advocacy or for those grantees that can show in writing a commitment from a practicing legal service program serving consumers for the availability and use of a full time attorney/paralegal for two years for energy advocacy".

The purpose of the waiver described in 3 above is to avoid duplication of funding or services in cases of those grantees who, in carrying out the legal intervention activities emphasized in the Stipulation and Agreed Order, have made adequate provision for access to needed legal services from other sources. Applicants who have made such arrangements which they feel are adequate for the carrying out of their work program should request a waiver, which will be considered as a part of the review of their proposal for funding.

Work Program

Given the nature of the Energy Advocacy Initiative, CSA suggests that applicants, in addition to proposing a work program that addresses the requirements of 2(a) thru (d) of the Stipulation quoted above, discuss the following elements in their proposals:

1. Discussion of the specific cases of legal intervention in which the applicant proposes to engage under the work program, including the goals of such intervention, the hoped-for results, and how they will affect the poor and the elderly, including any on going activities of this nature. Examples of such activity include participation in administrative or rule making proceedings, rate hearings and the like, as well as judicial proceedings.

2. Assessment of the energy advocacy needs which the applicant feels are most pressing for the poor and the elderly in the applicant's State, with a description of the manner in which the applicant proposes to address those needs through its work program, in terms of specific goals, objectives, and strategies. It would be useful, in this context, to describe the extent of State compliance with Sections 111 and 113 of the Public Utilities Regulatory Policies Act (PURPA), and whether and to what extent the objectives of the advocacy project will include the attainment of consumer protective structures or regulations with regard to the customer service issues enumerated in those sections.

3. Description of how the applicant in its work program relates or proposes to relate to Community Action Agencies and other low income groups at the local level, including how and to what extent such agencies and groups participate in the setting of priorities for the project; and describing any non-legal intervention activities which the applicant in conjunction with such organization proposes to undertake.

Examples of non-legal activities include community organization, education, participation in State Plan development for the Home Energy Assistance Program or local emergency planning, or consultation and assistance in the removal of barriers to the uses of alternative energy technologies.

4. Description of the applicant's experience, if any, in energy or other advocacy programming for the poor, and of ways the applicant's activities have lead to changes in laws, regulations, procedures, or institutional behavior affecting the poor and the elderly.

Support To Energy Advocacy Grantees

Applicants should be aware that the Community Services Administration will also be providing support grants to the National Consumer Law Center to provide training and technical assistance to funded advocacy projects, including the sum of $500,000 for an expert witness and consultant fund; and to the Citizen Labor Energy Coalition Foundation for specific training and assistance in community organization and coalition building.

Application Process: Grantees will be selected by the national office of the Community Services Administration, Office of Community Action. However, grants will be made at the Regional level. In addition, grantees will be monitored by the Region pursuant to close policy direction and consultation from CSA Headquarters. It may be that additional funds will become available to support this program activity. In that event the total number of grants could be increased by five or ten and the size of each grant increased by ten to fifteen percent. Applicants should use the application process found at 45 CFR 1067.40. Applying for a grant under Title II, Section 221, (22)(a), and 231 of the Economic Opportunity Act of 1964 as amended. All interested applicants must follow "CSA procedures for the Project Notification and Review System" (A–95) as outlined in 45 CFR 1067.10.

Applications should be forwarded to: Rufus Bradford, Energy Programs, Community Services Administration, 1200—19th Street, N.W.—Room 334, Washington, D.C. 20506, Telephone (202) 632–6503.

It is suggested that you use registered, return-receipt mail and allow sufficient time to assure that this deadline is met.

Reporting Requirements

Financial and project progress report will be submitted quarterly in the manner and format outlined in 45 CFR 1050, Subpart H and Subpart J respectively.

(Sec. 602, 78 Stat 530; 42 U.S.C. 2942)

Richard J. Rios,

Director.

BILLING CODE 6315–01–M

DEPARTMENT OF EDUCATION

Commission on the Review of the Federal Impact Aid Program

AGENCY: Commission on the Review of the Federal Impact Aid Program.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given that the Commission on the Review of the Federal Impact Aid Program, the members of which were appointed by the President on August 15, 1979, will hold a business meeting on September 18, 1980 through September 19, 1980, in Washington, D.C. The meeting will be open to the general public, and all interested persons are invited to attend. Notice of the meeting is given in accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix 1).

DATE: September 18–19, 1980. The Commission will meet at 9:00 a.m. and continue until business is completed.

ADDRESS:

September 18, 1980—Rayburn House Office Building, Room 2257, Independence Ave. & So. Capitol St., Washington, D.C. 20515.

September 19, 1980—Education Department Building (FOB–6), 400 Maryland Ave., S.W., Room 3000, Washington, D.C. 20202.

TENTATIVE AGENDA: The Commission members will consider recommendations and other Commission business.

FOR FURTHER INFORMATION CONTACT: Richard Dallas Smith, Executive Director, Commission on the Review of the Federal Impact Aid Program, 1832 M Street, N.W., Suite 837, Washington, D.C. 20036, tel. no. (202) 653–5817.

Authority and Function: The Commission on the Review of the Federal Impact Aid Program is established under section 1015 of the Education Amendments of 1978 (Pub. L. 95–961). The Commission is to conduct a review and evaluation of the administration and operation of the Impact Aid Program, authorized under the Act of September 30, 1950 (Pub. L. 874, 81st Congress), and report its recommendations on that program to the President and Congress not later than December 1, 1980. Such recommendations are to include proposed legislation to accomplish the recommendations. Pub. L. 874 requires that the Commissioner make payments to the local educational agencies in accordance with a formula designed to compensate such agencies for the financial burden carried by them by reason of Federal activities—the loss of revenue because of the Federal ownership of real property and provision of education services for federally-connected children—or by reasons of sudden or substantial increases in the school attendance resulting from Federal activities.

Records: Records of all proceedings of the Commission will be kept in accordance with law and will be available for inspection by the public at the offices of the Commission, located at 1832 M Street, N.W., Suite 837, Washington, D.C. 20036.

Signed at Washington, D.C. on the 13th day of August, 1980.

Richard Dallas Smith,

Executive Director, Commission on the Review of the Federal Impact Aid Program.

BILLING CODE 4000–01–M

Office for Civil Rights

Title VI of the Civil Rights Act of 1964; Lead Agency Status for Elementary and Secondary Schools and Institutions

AGENCY: Department of Education.

ACTION: Announcement of Title VI Lead Agency Status for Elementary and Secondary Schools and Institutions of Higher Education.

SUMMARY: Notice is hereby given that by operation of law, under the Department of Education Organization Act, Pub. L. 96–88, Section 509, all Federal interagency agreements in force on May 4, 1980, the effective date of the Act, which delegated to the Department of Health, Education, and Welfare (HEW) certain compliance responsibilities under Title VI of the Civil Rights Act of 1964, with regard to elementary and secondary schools and institutions of higher education, apply to the Department of Education (ED). Under these agreements and the Department of Education Organization Act, ED is now the lead agency for Title VI compliance rather than HEW.

SUPPLEMENTARY INFORMATION:

The agencies and subject areas for which HEW was the lead agency under Title VI delegations of authority and for which ED became the lead agency on May 4, 1980 are as follows:

Agency	Subject area	Effective date of delegation*
Agriculture	Higher Education	Feb. 7, 1967.
Atomic Energy Commission (Dept. of Energy).	Elementary and Secondary Schools.	June 22, 1966.
	Higher Education	Apr. 22, 1966.

BILLING CODE 4000–02–M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Vickers Petroleum Corp.'s Application for Permission To Use Multiple Allocation Fractions.

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of issuance of order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives notice that on August 8, 1980, a Decision and Order was issued pursuant to the provisions of 10 CFR 205.90 *et seq.*, and § 211.10(b) denying Vicker's Petroleum Corporation's January 25, 1980 request for permission to use multiple allocation fractions. The request, if granted, would have permitted Vickers to use separate allocation fractions for the distribution of motor gasoline in each of seven (7) proposed marketing subsystems.

A copy of the Decision and Order, with proprietary information deleted, is attached.

FOR FURTHER INFORMATION REGARDING THIS ORDER, PLEASE CONTACT:

John A. Carlyle, Economic Regulatory Administration, Office of Petroleum Operations, Room 2104–I, 2000 M Street NW., Washington DC 20461, Telephone: (202) 653–3701.

Joel M. Yudson, Office of General Counsel, Room 6A–127, 1000 Independence Avenue SW., Washington, DC 20585, Telephone: (202) 252–6744.

Issued in Washington, D.C., on the 8th day of August 1980.

Doris J. Dewton,

Assistant Administrator, Office of Petroleum Operations, Economic Regulatory Administration.

Economic Regulatory Administration Decision and Order

August 8, 1980.

To: Vickers Petroleum Corporation, Post Office Box 2240, Wichita, Kansas 67201.

Subject: Application to Use Multiple Allocation Fractions—Case No. 80–004.

I. Introduction

On January 25, 1980, Vickers Petroleum Corporation (Vickers) filed an application with the Department of Energy's (DOE) Economic Regulatory Administration (ERA) for permission to use multiple allocation fractions pursuant to 10 CFR 211.10(b). The request, if granted, would permit Vickers to use a separate allocation fraction for the distribution of motor gasoline in each of its seven (7) proposed marketing subsystems.

II. Legal Authority

Vickers' application is being processed in accordance with 10 CFR 205.90 *et seq.*, and Section 211.10(b).

III. Background

Vickers, a small and independent refiner as those terms are defined in 10 CFR 211.62, owns and operates a refinery at Ardmore, Oklahoma with a DOE certified capacity of 64,100 barrels per day. In addition, Vickers markets motor gasoline which it both produces and purchases in a 19 state area in the central continental United States. The firm sells gasoline at the retail level through wholly-owned subsidiaries operating approximately [proprietary information deleted] service stations and at the wholesale level to branded and non-branded independent marketers. Vicker's maintenance of its gasoline marketing activities depends upon the purchase of gasoline for resale in order to supplement its own refinery production. According to Vickers' application, the motor gasoline which it produces in its Ardmore refinery accounts for approximately [proprietary information deleted] percent of the gasoline which it sells. The remaining [proprietary information deleted] percent is purchased from other firms.

IV. Vickers' Contentions

Vickers asserts that the requirement that it maintain a uniform firm-wide allocation fraction has resulted in frequent and severe supply shortages since the updating of the motor gasoline base period.[1] In its submission Vickers requests permission to establish the following seven (7) distribution subsystems for motor gasoline, which generally conform to state boundaries:

(1) The subsystem which includes the States of Iowa, Kansas, Minnesota, Missouri (excluding the St. Louis metropolitan area), Nebraska, and Oklahoma (hereinafter referred to as the Central subsystem);

(2) The subsystem which encompasses the State of Arizona;

(3) The subsystem which encompasses the State of Colorado;

(4) The subsystem which encompasses the State of Wisconsin;

(5) The subsystem which includes the State of Illinois and the St. Louis, Missouri metropolitan area (hereinafter referred to as the St. Louis subsystem);

(6) The subsystem which includes the States of Alabama, Arkansas, Indiana, Kentucky, Louisiana, and Tennessee; and

(7) The subsystem which encompasses the States of New Mexico and Texas.

Vickers contends that its proposed subsystems are independent and therefore meet the standards to which the DOE adheres in considering applications for relief of this type. Specifically, Vickers has referred to the standards set forth in *Shell Oil Company*, 3 FEA Para. 80,557 (January 22, 1976). The firm has provided the following combination of factors which it believes form a basis upon which its request should be granted:

(i) The subsystems operate in widely disparate geographical areas.

(ii) The sources of supply for each subsystem are separate. The Ardmore refinery provides Vickers with nearly all of the motor gasoline which it distributes in the Central subsystem. Product is distributed to the Central subsystem through the Williams Brothers Pipeline System and by truck hauls from the refinery. None of Vickers' other six subsystems receive gasoline produced at the Ardmore facility. Vickers utilizes exchange agreements with several other refiners, purchases from base period suppliers, and acquisitions on a spot basis on the open market to supply motor gasoline to them.

(iii) The great distance between many of Vickers' subsystems creates difficulties in shipping gasoline from one area to another to compensate for supply imbalances. Vickers has difficulty supplying its base period customers outside the Central subsystem directly from the Ardmore refinery because moving gasoline by truck is costly and they are not served by the Williams Brothers Pipeline System.

(iv) Vickers has taken all possible steps to meet its supply obligations through exchange agreements. Although the firm has attempted to improve its supply position through the acquisition of surplus product it has been unable to pass through the full amount of the increased costs due to the Petroleum Price Regulations and existing market conditions. This produces a situation in which Vickers is incurring a loss on each gallon which it purchases and resells.

Vickers contends that in determining a single allocation fraction it is unreasonable that it be required to include in its allocable supply[2] each month relatively small quantities of spot market gasoline which may be available at times in a particular marketing area because such volumes cannot feasibly be exchanged to any other area. Thus the firm is effectively prevented from acquiring additional supplies of gasoline for resale. However, if Vickers is permitted to maintain separate allocation fractions for each of its proposed distribution subsystems there would be no need to shift such small amounts of gasoline between regions to equalize supplies.

Finally, Vickers makes a broad allegation that approval of its application would be consistent with the national energy objectives enunciated in Section 4(b)(1) of the Emergency Petroleum Allocation Act of 1973 (EPAA), while denial of its application would be inconsistent with these objectives.[3]

V. Comments Received to Vickers' Application

On February 28, 1980, the ERA gave notice of the pendency of Vickers' application to use multiple allocation fractions. See 45 FR 13,186, February 28, 1980. Two firms filed written comments, Gas Mart Company (Gas Mart) and Key Oil Company (Key). Gas Mart purchases the majority of the gasoline which it sells from Vickers. Key's predominant supplier, Parks Oil Company, purchases a significant amount (??? percent) of its total motor gasoline base period entitlement from Vickers. Since both Key and Gas Mart sell gasoline in more than one of Vickers' proposed distribution sybsystems they oppose Vickers' request primarily because it would create difficulties for them, as small wholesale purchasers, to maintain a uniform allocation fraction in their respective marketing systems.

VI. Analyses And Findings

The ERA recently published a notice in the **Federal Register** describing the criteria which are applicable to applications requesting the use of multiple allocation fractions under 10 CFR 211.10(b).[4] In the Criteria we reviewed the standards which the FEA applied in *Shell Oil Company*, supra., to evaluate whether such an application should be approved. These factors are:

(1) The relative location of the marketing area to be included in computing each separate allocation fraction;

(2) The source of supply for each such area;

(3) The method used in transportion the product to each area;

(4) The availability of transporting facilities and the cost of transporting product, either

(a) between such areas, or

(b) from the source of supply to one area as opposed to another;

(5) The destination of product within such an area; and

(6) The degree to which transfers or exchanges of like product with other products have been in the past or could reasonably be arranged.

The ERA intends to continue to utilize the standards set forth in *Shell Oil Company*, supra. We are also concerned with the type of information and standards described below.

(i) An applicant should indicate whether product is available for acquisition on the open market, i.e., surplus and spot markets. A firm generally is required to demonstrate that it cannot improve its supply situation through the purchase of product on the open market. If such product is available to the applicant, then the applicant would not be entitled to relief unless it makes a further showing that its purchase of such product would be impractical or inconsistent with the objectives of the allocation program. The purchase of surplus product may be demonstrated to be impracticable on financial grounds. However, showing that the available surplus product is expensive is not sufficient to justify a finding of impracticability, the applicant must show that it would be unable to recover the costs of purchased product for the period of the multiple allocation fractions, or that it would experience financial difficulties if it had to purchase product to maintain a single allocation fraction. Such a demonstration must be supported by data; mere allegations or conclusions are not sufficient.

(ii) An applicant must demonstrate that it is impracticable to transport or exchange product from one subsystem to another. If financial impracticability is asserted, the showing required would be similar to that required to demonstrate that the purchase of surplus product would be financially impracticable. As with other elements of impracticability, the burden of demonstrating financial impracticability rests upon the applicant.

(iii) An applicant that is a refiner must demonstrate that it is impractical and burdensome for it to increase production of the product and thereby alleviate any supply imbalances.

(iv) An applicant should demonstrate that the competitive viability of the class of independent marketers would not be jeopardized in the regions in which the applicant's allocation fraction would be reduced if relief is granted. In this connection, an applicant should also furnish the DOE its expected allocation fractions with and without relief, for each region in which a separate fraction is requested.

(v) The applicant should show that the circumstances justifying relief are likely to continue during the entire period for which relief is requested.

Despite the allegations made, Vickers' submission to the DOE fails to adequately support its factual contentions, contains inadequate material to support its general legal conclusions, and contains no substantiating financial data which would indicate that Vickers is unable to recover the costs of purchased spot market product.

Vickers, for example, erroneously contends that it would be infeasible to expect it to supply motor gasoline from its Ardmore refinery to marketing areas outside the Central subsystem. Transporting product between the refinery and Vickers' retail outlets in Dallas, Texas is not only feasible but can be accomplished quite readily in view of the fact that they are located within 110 miles of each other.

It would also appear that Vickers is capable of supplying motor gasoline produced at its Ardmore refinery to its retail stations in the St. Louis subsystem. Vickers admits that the Williams Brothers Pipeline has terminals both at Palmyra and St. Charles, Missouri. The St. Charles terminal is about 10 miles from the St. Louis metropolitan area and therefore is easily accessible to Vickers' retail stations located there. Vickers' outlets in central Illinois are not more than 150 miles from either terminal, not an inordinately long distance.

We are unable to accept Vickers' contention that there is no direct supply capability from the Ardmore refinery to its retail stations in the Wisconsin subsystem which are located in the Milwaukee area. The Williams Brothers Pipeline System has a terminal facility within 90 miles, located at Chicago, Illinois. It may be inconvenient to transport gasoline by truck from the Chicago terminal to Milwaukee but it is not burdensome.

Although Vickers contends that the motor gasoline production from the Ardmore refinery is committed to supply purchasers in the Central subsystem, it is not unreasonable to expect Vickers to alter its historical distribution patterns on a short-term basis to relieve any supply shortages. Therefore, we have determined that the St. Louis, Texas/New Mexico, and Wisconsin subsystems are not sufficiently independent of the Central subsystem to constitute separate motor gasoline distribution systems.

Vickers has also submitted data which indicates that its stations in Arizona and the western part of the Texas/New Mexico subsystem procure a substantial portion of their motor gasoline supplies from Navajo Refining Company (Navajo). Thus, Vickers could conceivably arrange with Navajo to divert gasoline from one area to the other in order to compensate for any supply shortfalls. The Arizona stations also obtain gasoline by pipeline from California pursuant to an exchange agreement with Mobil Oil Corporation (Mobil). There has been no showing that Vickers would not be able to modify that arrangement so that, if necessary; its Dallas stations could be furnished gasoline via Mobil pipeline from the firm's Beaumont, Texas refinery. For these reasons, we have concluded that the Arizona and Texas/New Mexico subsystems are not sufficiently independent to constitute separate distribution systems.

However, the mere demonstration that all of part or Vickers' proposed subsystems are independent of one another does not, in and of itself provide the basis for the approval of relief from the requirement to maintain a single allocation fraction. In *Shell Oil Company*, supra, the FEA noted that "The policy of maintaining a single allocation fraction will be outweighed only to the extent that it is truly impracticable and burdensome to do so in particular situations." In this connection Vickers has failed to demonstrate that the procedures which it has utilized in the past are inadequate to relieve any temporary shortages which it may experience.

Vickers has made no showing whatsoever that it has been adversely affected to any substantial extent as a result of the alleged supply problems which it is experiencing or that it would be infeasible to maintain a single allocation fraction from the sources of supply which are currently available. The firm admits, and material submitted in support of its application confirm, that Vickers has been able to arrange exchanges of motor gasoline with nine other refiners which collectively supply six of its distribution subsystems. Vickers has indicated that it has occasionally transferred gasoline between subsystems by means of truck transport and barge. Moreover, Vickers has not demonstrated that surplus motor gasoline is currently in short supply in any of its marketing regions or that it will have difficulty obtaining product in the near future.

Vickers has given no indication of the extent to which it has been unable to recover the costs associated with either purchasing available surplus product or delivering volumes of gasoline by truck, rail or barge between regions. For example, Vickers could have provided the DOE with data which demonstrates that if it purchased motor gasoline on the surplus market and applied the allowable cost increases permitted it by the regulations, its retail prices would not be competitive or that it will incur operating losses. It should be noted that the costs of surplus motor gasoline purchased for resale would be distributed among all of Vickers stations and not borne exclusively by outlets in a given area.

Vickers contends that the regulatory requirement to maintain a single allocation fraction restricts it from increasing its sales of gasoline through purchases on the surplus market. In our view, purchasing available surplus product is a means of mitigating the adverse impact of supply imbalances on a firm. The mere fact that a firm could sell more gasoline in a particular marketing area through such purchases if it is permitted to use separate allocation fractions does not mean that the firm is suffering an undue burden.

There is no basis for Vickers' assertion that the denial of its request is inconsistent with the broad objectives of the EPAA. When the Congress adopted the EPAA, it specified nine general objectives which the regulations promulgated thereunder were to be designed to accomplish. Recognizing that these goals would not always be mutually compatible, the Congress stated that they should be reached "to the maximum extent practicable" (Section 4(b)(1)) and thereby provided the DOE with the discretion to weigh and balance these objectives in formulating and implementing the regulatory program required by the EPAA. One of the principle objectives outlined in the EPAA is the allocation of refined petroleum products in an equitable manner throughout all areas of the U.S. A nationwide allocation fraction for motor gasoline is essential in order to achieve that objective. Despite its allegations, Vickers has not convincingly demonstrated that the denial of its request would substantially frustrate any policy objectives set forth in Section 4(b)(1) of the EPAA. Although Vickers has demonstrated its inability to produce sufficient motor gasoline supplies to meet the entirety of its base period supply obligations results in certain inconveniences, the firm has made no showing that the impact of § 211.10(b) on Vickers is so severe as to result in a serious financial hardship or so disproportionate from its general impact on other firms. Moreover, if the DOE were to grant Vickers' request without a substantial showing that it is truly impractical and burdensome to maintain a single allocation fraction, that action could result in market distortions and Vickers may have an unwarranted competitive advantage over those firms which must continue to employ a single fraction.

We are not pursuaded by Vickers' contention that a situation exists in which it is experiencing severe supply shortages. To the contrary, according to information provided by Vickers and data which the firm has submitted to DOE on Form EIA–25, *Prime Suppliers' Monthly Report*, during the period of March 1979 through July 1980 Vickers' allocation fraction has been below in only three months, July, August, and December 1979. Indeed, during that seventeen month period Vickers' allocation fraction has been at least on eleven occasions.

Based on the considerations set forth above, the ERA has concluded that Vickers has failed to make a compelling showing that it is truly impracticable and burdensome to maintain a single, uniform allocation fraction and that to do so is inconsistent with the objectives of the Mandatory Petroleum Allocation Program.

VII. Order

This order is issued pursuant to the provisions of 10 CFR 205.90 *et seq.*, and § 211.10(b).

It is, therefore, ordered that:

(1) The application filed by Vickers Petroleum Corporation for permission to use multiple allocation fractions be and hereby is denied.

(2) In accordance with the provisions of 10 CFR Part 205, an aggrieved party may file an

V 45 AG 18 80 UMI

appeal from this decision and order with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. The provisions of 10 CFR Part 205, Subpart H, set forth the procedures and criteria which govern the filing and determination of any such appeal.

(3) Communications, other than appeals, regarding this directive should be referred to Charles R. McCrea, Chief, Gasoline Allocation Branch, Allocated Products Division, Office of Petroleum Operations, Economic Regulatory Administration, 2000 M Street, NW., Washington, D.C. 20461, telephone number (202) 653-3701.

Doris J. Dewton,

Assistant Administrator, Office of Petroleum Operations, Economic Regulatory Administration.

[FOOTNOTES]

[1] On February 22, 1979, Activation Order No. 1, Standby Petroleum Product Allocation Regulations, was adopted, 44 FR 11202 (February 28, 1979). In that order, ERA activated certain portions of the Standby Petroleum Product Allocation Regulations in order to update the base period for motor gasoline allocation from the 1972 base period to the corresponding month of the period July, 1977, to June 30, 1978, and implemented the updated base period for an initial period of March, April, and May 1979. Subsequently, on May 1, 1979, ERA issued an Interim Final Rule, 44 FR 26712 (May 4, 1979), which superseded the Activation Order. Under the Interim Rule, the updated base period for motor gasoline allocation was designated as the corresponding month of the period November 1977 through October 1978. The updated base period was permanently established by the final rule, 44 FR 42549 (July 19, 1979).

[2] The term "allocable supply" is defined in 10 CFR 211.10(b)(1).

[3] The objectives are:

* * * Protection of public health, safety, and welfare * * * and the national defense;

Maintenance of all public services * * *;

Maintenance of agricultural operations, including farming, ranching, dairy, and fishing activities * * *;

Preservation of an economically sound and competitive petroleum industry; including the priority needs to restore and foster competition in the producing, refining, distribution, marketing, and petrochemical sectors of such industry, and to preserve nonbranded independent marketers, and branded independent marketers;

The allocation of suitable types, grades, and quality of crude oil to refineries in the United States to permit such refineries to operate at full capacity;

Equitable distribution of crude oil, residual fuel oil, and refined petroleum products at equitable prices among all regions and areas of the United States and sectors of the petroleum industry, including independent refineries, small refiners, nonbranded independent marketers, branded independent marketers, and among all users;

Allocation of residual fuel oil and refined petroleum products in such amounts and in such manner as may be necessary for the maintenance of exploration for, and production or extraction of, fuels, and for required transportation related thereto;

Economic efficiency; and

Minimization of economic distortion, inflexibility, and unnecessary interference with market mechanisms. (EPAA, Section 4(b)(1).)

Federal Energy Regulatory Commission

[Docket No. CP80-464]

Columbia Gas Transmission Corp.; Notice of Application

August 12, 1980.

Take notice that on July 28, 1980, Columbia Gas Transmission Corporation (Applicant), 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, filed in Docket No. CP80-464 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing 64 additional points of delivery to existing wholesales customers, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Applicant proposes to construct the following 64 tap facilities for the following customers:

Columbia Gas of Kentucky, Inc.: 2 taps for residential service—Estimated annual usage of 300 Mcf.

Columbia Gas of Maryland, Inc.: 1 tap for commercial service—Estimated annual usage of 7,500 Mcf.

Columbia Gas of Ohio, Inc.: 39 taps for residential service, 2 taps for commercial service, 4 taps for industrial service, 1 tap for combined residential, commercial and industrial service—Estimated annual usage of 44,342 Mcf.

Columbia Gas of Pennsylvania, Inc.: 2 taps for residential service—Estimated usage of 300 Mcf.

Columbia Gas of Virginia, Inc.: 1 tap for residential service—Estimated annual usage of 150 Mcf.

The Dayton Power and Light Company: 4 taps for residential service, 2 taps for commerical service, 2 taps for combined residential and commerical service—Estimated annual usage of 6,287 Mcf.

Shenandoah Gas Company: 1 tap for residential service—Estimated annual usage of 2,108 Mcf.

West Ohio Gas Company: 1 tap for residential service—Estimated annual usage of 120 Mcf.

Applicant asserts that the additional volumes to be provided through these new points of delivery would be within Applicant's currently authorized level of sales.

It is stated that the total cost of the new interconnections would be $41,030 which cost would be financed through internally generated funds.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 3, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the cerificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" after the section code. Estimated annual production (PROD) is in million cubic feet (MMcf).

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Persons objecting to any of these final determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission, on or before September 2, 1980.

Please reference the FERC Control Number (JD NO) in all correspondence related to these determinations.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-85-C

[Docket No. CP79-161]

Midwestern Gas Transmission Co.; Notice of Petition To Amend

August 12, 1980.

Take notice that on July 23, 1980, Midwestern Gas Transmission Company (Petitioner), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP79-161 a petition to amend the order issued September 25, 1979, in said docket pursuant to Section 7(c) of the Natural Gas Act so as to authorize an extension of the term of its resale of volumes of natural gas purchased from TransCanada PipeLines Ltd. (TransCanada) and Great Lakes Gas Transmission Company (Great Lakes) to Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), Northern Natural Gas Company, Division of InterNorth, Inc. (Northern), and Natural Gas Pipeline Company of America (Natural) and also to add an additional point of delivery for sales to Tennessee at Niagara, New York, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that the order of September 25, 1979, authorized it to sell to Tennessee, Northern and Natural up to 350,000 Mcf per day of imported natural gas purchased by Petitioner from TransCanada and Great Lakes and up to a total quantity of 132,000,000 Mcf for a term up to and including October 31, 1980.

Petitioner proposes herein to extend the term of resale of gas to Tennessee, Northern and Natural to October 31, 1981. Petitioner further proposes to operate an additional delivery point for sales to Tennessee only at the existing interconnection of the facilities of TransCanada and Tennessee at Niagara Falls, New York, for delivery to Tennessee of up to 80,000 Mcf per day. Petitioner states the price that it would charge Tennessee for volumes which may be delivered at the said proposed additional delivery point would be the price per Mcf paid by Petitioner to TransCanada plus $.01 per Mcf. Petitioner asserts that volumes delivered at the proposed delivery point would be in lieu of and not in addition to equal volumes to which Tennessee would be otherwise entitled to receive under the present authorization.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 3, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. CP80-475]

Montana-Dakota Utilities Co.; Notice of Application

August 12, 1980.

Take notice that on August 1, 1980, Montana-Dakota Utilities Co. (Applicant), 400 North Fourth Street, Bismarck, North Dakota 58501, filed in Docket No. CP80-475 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and for permission and approval to abandon certain natural gas facilities on its interstate natural gas transmission system, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate pipeline and compressor facilities necessary to purchase and process new reserves from the western North Dakota area. It is stated that additional daily volumes of gas to be handled require enlargement of pipeline capacity between Sidney, Montana, and the Cabin Creek Compressor Plant. Moreover, Applicant states that it has recently started purchasing gas from Koch Hydrocarbon Company (Koch) which has informed Applicant that a new processing plant becoming operational in August 1980 would also significantly increase the volumes available.

Although it is asserted that Koch's plant would have the capacity to delivery 50,000 Mcf per day upon completion, Applicant has designed its proposed facilities for construction in two stages. Applicant states that the facilities to be constructed in 1980 would be able to handle 30,000 Mcf from Koch, while those scheduled to be constructed in 1981 would allow the taking of the full 50,000 Mcf from the Koch plant. It is contended that limited manpower, economic constraints, and possible inclement weather preclude the construction of all facilities proposed during the balance of 1980.

Applicant states that the facilities proposed for 1980 construction are approximately 10.3 miles of 12¾-inch O.D. loopline between its Morgan Creek Compressor Station and Glendive in Dawson County, Montana, and approximately 14.3 miles of 12¾-inch O.D. natural gas transmission loopline beginning in Fallon County, Montana, and terminating at the Cabin Creek Compressor Station in Wilbaux County, Montana.

In conjunction with increasing the capacity of the system between Morgan Creek and Cabin Creek, Applicant also proposes to abandon and remove approximately 23.5 miles of 8⅝-inch O.D. pipeline beginning in Fallon County, Montana, and terminating in Dawson County, Montana, which is in very poor condition and has a bad leak history. Applicant reports that the entire 23.5 miles of loopline would not be replaced in 1980, resulting in a shortened loop line and low terminal pressure at the Cabin Creek Compressor Station. Since gas at the lower pressure must be injected to storage, Applicant also proposes to construct additional loopline in 1981 to allow gas to free flow to storage.

It is stated that the facilities proposed for 1981 construction are 23.9 miles of 12¾-inch O.D. transmission loop line from a point in Dawson County, Montana, to a point in Richland County, Montana, an additional 18.8 miles of 12¾-inch O.D. loopline between Glendive, Wilbaux County, Montana, and Cabin Creek in Dawson County, Montana, the replacement of 4.1 miles of 8-inch and 12-inch pipeline with 16-inch O.D. pipeline from Glendive north terminating in Dawson County, and the addition of 800 horsepower of compression to the Morgan Creek Compressor Station, Dawson County, Montana, to raise the total installed horsepower to 3400. The 1981 facilities would allow the Morgan Creek to Cabin Creek line section to transport 82,300 Mcf to the Cabin Creek Station and put the gas at the Cabin Creek Station under sufficiently high pressure to permit the free flow of gas to storage, Applicant states.

Applicant further states that it proposes to remove and retire in 1981 approximately 0.3 mile of 8⅝-inch O.D. and 3.7 miles of 12¾-inch O.D. transmission line in Dawson County, Montana.

Applicant states that the proposed new pipeline facilities would be designed for 1000 psig operation but would not operate higher than the maximum allowable operation pressure for the old line. Applicant estimates the total cost of construction to be $9,173,600 which would be financed through internally generated funds and/or short term bank loans.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 3, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.70). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. CP78-434]

Northwest Pipeline Corp.; Notice of Petition To Amend

August 12, 1980.

Take notice that on July 21, 1980, Northwest Pipeline Corporation (Petitioner), 315 East Second South Street, Salt Lake City, Utah 84111, filed in Docket No. CP78-434 a petition to amend the order issued March 13, 1979, in the instant docket pursuant to Section 7(c) of the Natural Gas Act so as to authorize the sale to, and exchange with, Mountain Fuel Supply Company (Mountain Fuel), of natural gas from additional wells and acreage in Uintah County, Wyoming, all as more fully set forth in the petition to amend.

It is stated that the order issued March 13, 1979, in Docket No. CP78-434 authorized Petitioner to deliver up to 1,000 Mcf of natural gas per day to Mountain Fuel at a point near the Amoco-Gulf #1 well located in Section 2, Township 14 North, Range 121 West, Uintah County, Wyoming. Petitioner states that it was also authorized to sell to Mountain Fuel up to 25 percent of the volumes so delivered. Mountain Fuel redelivers such volumes to Petitioner, less the volumes that Mountain Fuel redelivers such volumes to Petitioner, less the volumes that Mountain Fuel purchased, at an existing point of interconnection between Mountain Fuel and Applicant in Section 21, Township 18 North, Range 111 West, Sweetwater County, Wyoming.

Petitioner indicates that the sale and exchange authorized by the order of March 13, 1979, commenced on April 11, 1979. Petitioner says that since then additional volumes of natural gas have become available to it from 5 wells in Uintah County, Wyoming. According to Petitioner, it has acquired an interest in 3 wells in the Yellow Creek Unit, the Amoco-Gulf #2, Amoco-Gulf #3 and Amoco-Anschutz #1, which are subject to the May 30, 1978, gas purchase contract with Chevron. On April 1, 1980, and June 2, 1980, this contract was amended to add acreage encompassing the Gulf-Grace Herman Federal #1-12 well and the Evanston Townsite Unit C-1 well, it is asserted.

Petitioner states that on February 7, 1980, and June 19, 1980, Petitioner and Mountain Fuel amended a gas purchase, transportation, and exchange agreement between them dated June 22, 1978, so that production purchased by Petitioner from the new wells would be subject to the agreement.

Petitioner proposes to sell and exchange natural gas from the additional acreage pursuant to the amended gas purchase, transportation and exchange agreement. In addition, Applicant proposes to use additional mutually agreed upon delivery points to Mountain Fuel as necessary from time to time to deliver to Mountain Fuel any additional volumes, up to 1,000 Mcf of gas per day, acquired by Petitioner in the area subject to the agreement.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 3, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the peoceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-25036 Filed 8-15-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP80-456]

Northwest Pipeline Corp.; Notice of Application

August 12, 1980.

Take notice that on July 21, 1980, Northwest Pipeline Corporation (Applicant), P.O. Box 1526, Salt Lake City, Utah 84111, filed in Docket No. CP80-456 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of an additional compressor unit at its existing North Douglas Creek Compressor Station in Rio Blanco County, Colorado, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it is in the process of constucting pipeline interconnections among its Rangely Area gathering systems in order to enhance operational flexibility and production reliability in those systems. Upon completion of these gathering system interties, Applicants states, it intends to utilize its North Douglas Creek Compressor Station as a central location to compress the volumes of gas produced in three gathering systems,

namely, North Douglas Creek, Philadelphia Creek and East Douglas Creek. The existing small, skid-mounted rental compressor units in the above-mentioned Philadelphia Creek and East Douglas Creek gathering systems would be retained in place as back-up units until no longer necessary to ensure uninterrupted production from those systems, it is asserted. Applicant further asserts that when no longer needed, the Philadelphia Creek and East Douglas Creek compressor units would be removed pursuant to budget-type authorization.

Applicant states that the current deliverability from the North Douglas Creek, Philadelphia Creek and East Douglas Creek gathering systems is approximately 13,000 Mcf per day. Applicant also states that there are 75 wells in the three systems which have been drilled and which would be connected during 1980 and 1981. The estimated additional deliverability attributable to these wells would be approximately 6,800 Mcf per day by the end of 1980 and 11,700 Mcf per day by the end of 1981, it is said. Because of this increased deliverability, Applicant asserts, it would need the capability to compress up to 19,800 Mcf per day by early 1981 and 22,400 Mcf per day by late 1981 at its North Douglas Creek Compressor Station. Applicant further asserts that future development in the three gathering areas would be sufficient to maintain an average deliverability of approximately 20,000 Mcf per day over the next ten years.

In order to produce efficiently and deliver into Applicant's main lines the volumes of gas which would be available from the said interconnected gathering systems, Applicant asserts, it would need additional compression at its North Douglas Creek Compressor Station. Accordingly, Applicant proposes to construct and operate a permanent 1,650 horsepower compressor unit in a compressor building, complete with appurtenances, located inside the perimeter fencing of the existing North Douglas Creek Compressor Station site.

The estimated cost of the proposed facilities is $2,050,500 which cost would be financed from funds on hand or from short-term borrowing which would be repaid from funds generated under a permanent form of financing, it is said.

Any persons desiring to be heard or to make any protest with reference to said application should on or before September 3, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-25037 Filed 8-15-80; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 2088]

Oroville-Wyandotte Irrigation District; Notice Granting Intervention

August 12, 1980.

The Oroville-Wyandotte Irrigation District (Licensee) filed on November 23, 1979 an application for amendment of its license for the existing South Fork Project No. 2088. The Licensee seeks authorization to construct a 90-inch diameter penstock, an outdoor-type powerhouse, and a switchyard adjacent to the powerhouse. Public notice of the application was given on June 11, 1980 with July 11, 1980 as the last day for interested parties to file comments, protests, or petitions to intervene.

On July 2, 1980 the State of California Department of Fish and Game filed a petition to intervene in order to protect its interests in the fishery, wildlife, and recreational resources of the affected area. On July 8, 1980 Pacific Gas and Electric Company filed a petition to intervene in order to protect its contractual interests in the output of Project No. 2088. No response to either petition has been received.

Intervention by the petitioners appears to be in the public interest.

Pursuant to § 375.302 of the Commission's regulations, 45 Fed. Reg. 21216 (1980), amending 18 CFR 3.5(a) 1979, as promulgated by Federal Energy Regulatory Commission rulemaking RM78-19 (issued August 14, 1979), the Petitioner is permitted to intervene in this proceeding subject to the Commission's rules and regulations under the Federal Power Act, 16 U.S.C. 791(a)-825(r). Participation of the intervenor shall be limited to matters affecting asserted rights and interests specifically set forth in its petition to intervene. The admission of the intervenor shall not be construed as recognition by the Commission that it might be aggrieved by any order entered in this proceeding.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-25038 Filed 8-15-80; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 2905]

State of Vermont, Saxon Industries Inc. and Citizens Utilities Co.; Notice Granting Intervention

August 12, 1980.

The Attorney General, Saxon Industries Inc. (Saxon) and Citizens Utilities Company (Citizens), filed a petition to intervene in the proceeding, upon the application filed on January 18, 1979 by Vermont Public Power Supply System Inc. (VPPSS) for a preliminary permit to be known as the Missisquoi Project No. 2905 to be located on the Missisquoi River in Franklin and Orleans Counties, Vermont.

The Attorney General contends in his petition that the proposed project will have an impact on the people of the State of Vermont, on the river, and on the environment of the area. Moreover, the project will impose various State regulatory responsibilities on Vermont.

Saxon is a corporation in Vermont which owns a paperboard plant and associated dam and hydropower facilities on the Missisquoi River in Sheldon Springs, Vermont. Saxon contends in its petition that: The proposed project will materially interfere with their Sheldon Springs, hydroelectric facilities which will in turn adversely affect their paperboard manufacturing operations.

Citizens contends in its petition that the proposed project will result in the inundation of a hydroelectric plant located by Phelps Falls which is owned and operated by Citizens. Additionally, the proposed project would adversely affect Citizens property and water rights on Jay Branch and Big Falls and other locations on the Missisquoi River.

No response to the Attorney General, Saxon, or the Citizens' petitions to intervene was filed with the Commission.

Intervention in these applications for a preliminary permit by the Attorney General, Saxon, and the Citizens appears to be in the public interest.

Pursuant to § 375.302 of the Commission's regulations, 45 FR 21216 (1980), *amending* 18 CFR 3.5(a) (1979), the above named petitioners are permitted to intervene in this proceeding subject to the Commission's Rules and Regulations under the Federal Power Act, 16 U.S.C. 791(a)-825(r). Participation of the Intervenors shall be limited to matters affecting rights and interests specifically set forth in their respective petitions to intervene. The admission of the Intervenors shall not be construed as recognition by the Commission that they might be aggrieved by any order entered in this proceeding.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. CP80-441]

Texas Gas Transmission Corp.; Notice of Application

August 12, 1980.

Take notice that on July 7, 1980, Texas Gas Transmission Corporation (Applicant), 3800 Frederica Street, Owensboro, Kentucky 42301. filed in Docket No. CP80-441 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of a meter station and related facilities in Clay County, Indiana, and for permission and approval to abandon the Brazil Sales Meter Station and related facilities located in Clay County, Indiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to abandon and remove the Brazil Sales Meter Station and related facilities located on Applicant's Brazil line (South Spur) approximately one mile southwest of Brazil, Clay County, Indiana. It is stated that the station is a point of delivery to Terre Haute Gas Company (Terre Haute), an existing resale gas customer, and that the station has physically deteriorated to the point that replacement is deemed advisable.

Applicant further proposes to construct and operate a dual three-inch meter run station and related facilities on Applicant's Martinsville-Brazil six-inch pipeline in Clay County, Indiana, in order to replace the meter station which Applicant proposes to abandon. Applicant asserts that the new facility would provide Applicant and Terre Haute with increased operating flexibility and allow Applicant to operate the Brazil Line (South Spur) at a lower pressure. It is stated that the relocation of the sales meter station would not result in an increase in Terre Haute's existing contract demand or quantity entitlement.

Applicant estimates that the facilities to be abandoned have a salvage value of $1,400.31. Applicant further estimates that the cost of the proposed new facilities would be $22,400, which would be financed by cash on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 2, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.70). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. CP80-467]

Texas Gas Transmission Corp., Notice of Application

August 12, 1980.

Take notice that on July 28, 1980, Texas Gas Transmission Corporation (Applicant), P.O. Box 1160, Owensboro, Kentucky 42301, filed in Docket No. CP80-467 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon its Arketex No. 3 Sales Meter Station and approximately 333 feet of related pipeline located in Clay County, Indiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant asserts that the subject sales meter station has been used as a delivery point for the sale of natural gas to the Arketex Ceramic Corporation pursuant to an industrial sales contract between Applicant and Arketex dated March 1, 1966. Applicant proposes to abandon the meter station and appurtenant facilities as the last delivery of natural gas at this delivery point was in June 1976. It is asserted that the plant has since been closed and the property sold with no future sales of natural gas anticipated.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 3, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to

V 45 A G 1 8 8 0 UMI

the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

BILLING CODE 6450-85-M

[Docket No. CP80-454]

Town of Gunnison, Miss. Applicant and Texas Gas Transmission Corp., Respondent; Notice of Application

August 12, 1980.

Take notice that on July 18, 1980, the Town of Gunnison, Mississippi (Applicant), Town Hall, Gunnison, Mississippi 38746, filed in Docket No. CP80-454 an application pursuant to Section 7(a) of the Natural Gas Act for an order directing Texas Gas Transmission Corporation (Texas Gas) to establish physical connection of its transportation facilities with the proposed facilities of, and sell natural gas to, Applicant, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that Texas Gas has two 26-inch lines, one 30-inch line, and one 36-inch gas transmission line in Washington County, Mississippi. Applicant requests connection to any one of these lines approximately 12 miles east of its corporate limits. This connection, together with the proposed distribution system, would consist of approximately 15.2 miles of lines, it is stated.

Applicant asserts that this connection is necessary to provide its citizens and businesses with natural gas. The maximum daily requirement and total annual system demand are estimated to be as follows:

Maximum Day Requirement

Year	Residential	Mcf	Small commercial	Mcf	Total Mcf
1981	275	275	3	45	320
1982	285	285	3	45	330
1983	295	295	3	45	340

3 Year Total System Demand and Consumption

End of year	Residential	Small commercial	Total annual Mcf
1981	22,830	4,520	27,350
1982	24,640	4,520	29,160
1983	25,940	4,520	30,460

Applicant estimates that the proposed gas system would cost $600,000.00 which cost would be met through bonds sold to the Farmers Home Administration.

The proposed time to commence selling gas is 1 year from the date of approval by the Commission.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 11, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. CP80-466]

United Gas Pipe Line Co.; Notice of Application

August 12, 1980.

Take notice that on July 28, 1980, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP80-466 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon a natural gas transportation service for Trunkline Gas Company (Trunkline, all as more full set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it was authorized to transport up to 1,000 Mcf per day for the account of Trunkline, pursuant to an October 24, 1978, transportation agreement. Applicant further states that the service has never been implemented and that it and Trunkline have cancelled the October 24, 1978, agreement. Applicant proposes to abandon the service because the source of gas originally contemplated to be transported has been depleted.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 3, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve, to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

BILLING CODE 6450-85-M

[Docket No. ER80-581]

Florida Power & Light Co.; Filing

August 7, 1980.

The Filing company submits the following:

Take notice that Florida Power & Light Company (FPL), on August 1, 1980 tendered for filing a document entitled "Exhibit I to Service Agreement For Interchange Transmission Service Implementing Specific Transactions Under Service Schedules A (Emergency Service), B (Short Term Firm Service), C (Economy Interchange Service) and D (Firm Service) of Contracts for Interchange Service."

FPL states that under the Exhibit, FPL will transmit power and energy for the City of Homestead (Homestead) as is required by Homestead in the implementation of its interchange agreement with the City of Vero Beach.

FPL requests that waiver of Section 35.3 of the Commission's Regulations be granted and that the proposed Exhibit be made effective immediately. FPL states that copies of the filing were served on the Director of Utilities of the City of Homestead.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules

of Practice and Procedure (18 CFR 1.8

Vice President, Pennsylvania Electric

[Docket No. ER80-559]

of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 29, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ID-1921]

William H. Hirst; Filing

August 7, 1980.

Take notice that on August 1, 1980, William H. Hirst (Applicant) filed an application pursuant to Section 305(b) of the Federal Power Act to hold the following positions:

Vice President, Pennsylvania Electric Company ("Penelec"), Public Utility.
Vice President, Metropolitan Edison Company ("Met-Ed"), Public Utility.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 4, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ER80-559]

Kansas Power & Light Co.; Filing

August 7, 1980.

The filing Company submits the following:

Take notice that The Kansas Power & Light Company (KPL) on July 29, 1980, tendered for filing proposed new increased Schedules of Rates and Charges for Wholesale Service—Rural Electric Cooperatives and for Wholesale Service—Municipalities to supersede and replace those rate provisions of KPL's contract rate schedules presently in effect and on file with the Commission which relate to seventeen (17) wholesale cooperative customers and forty-one (41) wholesale municipal customers of KPL located in the State of Kansas, as follows:

Wholesale cooperative customer	Rate schedule	Superseding and replacing
1. Ark Valley Electric Cooperative Association, Inc	Schedule RCW-80	Supplement No. 6 Schedule RCW-79 (Revised) in KPL's FERC Rate Schedule No. 148.
2. Brown-Atchison Cooperative Association, Inc	Schedule RCW-80	Supplement No. 3 Schedule RCW-79 (Revised) in KPL's FERC Rate Schedule No. 149.
3. Butler Rural Electric Cooperative Association, Inc	Schedule RCW-80	Supplement No. 3 Schedule RCW-79 (Revised) in KPL's FERC Rate Schedule No. 150.
4. C. & W. Rural Electric Cooperative Association, Inc	Schedule RCW-80	Supplement No. 3 Schedule RCW-79 (Revised) in KPL's FERC Rate Schedule No. 151.
5. Coffey County Rural Electric Cooperative Association, Inc	Schedule RCW-80	Supplement No. 3 Schedule RCW-79 (Revised) in KPL's FERC Rate Schedule No. 152.
6. D. S. & O. Rural Electric Cooperative Association, Inc	Schedule RCW-80	Supplement No. 3 Schedule RCW-79 (Revised) in KPL's FERC Rate Schedule No. 153.
7. Doniphan Electric Cooperative Association, Inc	Schedule RCW-80	Supplement No. 4 Schedule RCW-79 (Revised) in KPL's FERC Rate Schedule No. 154.
8. Flint Hills Rural Electric Cooperative Association, Inc	Schedule RCW-80	Supplement No. 3 Schedule RCW-79 (Revised) in KPL's FERC Rate Schedule No. 155.
9. Kaw Valley Electric Cooperative Company, Inc	Schedule RCW-80	Supplement No. 3 Schedule RCW-79 (Revised) in KPL's FERC Rate Schedule No. 156.
10. Leavenworth-Jefferson Electric Cooperative, Inc	Schedule RCW-80	Supplement No. 6 Schedule RCW-79 (Revised) in KPL's FERC Rate Schedule No. 157.
11. Lyon County Electric Cooperative, Inc	Schedule RCW-80	Supplement No. 4 Schedule RCW-79 (Revised) in KPL's FERC Rate Schedule No. 158.
12. Nemaha-Marshall Electric Cooperative Association, Inc	Schedule RCW-80	Supplement No. 3 Schedule RCW-79 (Revised) in KPL's FERC Rate Schedule No. 159.
13. Ninnescah Rural Electric Cooperative Association, Inc	Schedule RCW-80	Supplement No. 4 Schedule RCW-79 (Revised) in KPL's FERC Rate Schedule No. 160.
14. P. R. & W. Electric Cooperative Association, Inc	Schedule RCW-80	Supplement No. 3 Schedule RCW-79 (Revised) in KPL's FERC Rate Schedule No. 161.
15. The Smoky Hill Electric Cooperative Association, Inc	Schedule RCW-80	Supplement No. 3 Schedule RCW-79 (Revised) in KPL's FERC Rate Schedule No. 162.
16. Smoky Valley Electric Cooperative Association, Inc	Schedule RCW-80	Supplement No. 3 Schedule RCW-79 (Revised) in KPL's FERC Rate schedule No. 163.
17. Twin Valley Electric Cooperative, Inc	Schedule RCW-80	Supplement No. 3 Schedule RCW-79 (Revised) in KPL's FERC Rate Schedule No. 164.

Wholesale full requirements municipal customer	Rate schedule	Superseding and replacing
1. City of Morrill	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 121.
2. City of Seneca	Schedule WSM-80	Schedule MHW-63 or Schedule WSM-79 (Revised), whichever is applicable to KPL's FERC Rate Schedule No. 126 as of the effective date thereto of Schedule WSM-80.
3. City of Waterville	Schedule WSM-80	Schedule MHW-63 or Schedule WSM-79 (Revised), whichever is applicable to KPL's FERC Rate Schedule No. 128 as of the effective date thereto of Schedule WSM-80.
4. City of Scranton	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 129.
5. City of Wathena	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 147.
6. City of Goff	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 165.
7. City of Netawaka	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 166.
8. City of Muscotah	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 167.
9. City of Severance	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 171.
10. City of Altamont	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 172.
11. City of Marion	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 173.
12. City of Oswego	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 174.

Wholesale full requirements municipal customer	Rate schedule	Superseding and replacing
13. City of Enterprise	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 175.
14. City of Chapman	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 176.
15. City of Eudora	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 178.
16. City of DeSoto	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 179.
17. City of Axtell	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 180.
18. City of Robinson	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 181.
19. City of Hillsboro	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 188.
20. City of Reserve	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 190.
21. City of St. Marys	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 195.
22. City of Vermillion	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 196.
23. City of Alma	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 197.
24. City of Centralia	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 198.
25. City of Elwood	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 200.
26. City of Troy	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 201.
27. City of Toronto	Schedule WSM-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 203.

Wholesale partial requirements municipal customer	Rate schedule	Superseding and replacing
1. City of Herington	Schedule WTU-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 177.
2. City of Horton	Schedule WTU-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 182.
3. City of Clay Center	Schedule WTU-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 183.
4. City of Wamego	Schedule WTU-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 184.
5. City of Sabetha	Schedule WTU-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 185.
6. City of Minneapolis	Schedule WTU-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 186.
7. City of Sterling	Schedule WTU-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 187.
8. City of Holton	Schedule WTU-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 189.
9. City of Lamed	Schedule WTU-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 191.
10. City of Ellinwood	Schedule WTU-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 192.
11. City of Stafford	Schedule WTU-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 193.
12. City of Osage City	Schedule WTU-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 194.
13. City of Lindeborg	Schedule WTU-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 198.
14. City of St. John	Schedule WTU-80	Schedule WSM-79 (Revised) in KPL's FERC Rate Schedule No. 202.

The proposed changes would increase revenues from jurisdictional sales and service by $4,578,079 based on the twelve-month period ending May 31, 1981. The changes embodied in the new Schedules of Rates and Charges include revised rates for Capacity Charges and Energy Charges.

KPL states that under its presently effective rates therefor its rate of return on the allocated cost of service to wholesale cooperative customers is 6.684%. Such rates of return on allocated cost of service to the wholesale full requirements municipal customers is 7.289%, and to the wholesale partial requirements municipal customers is 10.053%. The increased annual revenues would result in rates of return of 10.214% on the cooperative class of wholesale service, 10.221% on the full requirements municipal class of service and 10.218% on the partial requirements municipal class of service based on the twelve-month period ended May 31, 1981. The most recent adjustment in rates for KPL's wholesale customers was in 1979.

Copies of the filing were served upon KPL's seventeen wholesale cooperative customers and forty-one wholesale municipal customers and upon the State Corporation Commission of the State of Kansas.

Any person desiring to be heard or to protest said application should file a Petition to Intervene or Protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Section 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 26, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a Petition to Intervene. Copies of this application are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Docket No. SA80-140]

Phelps Dodge Corp.; Application for Adjustment

August 7, 1980.

On July 29, 1980, Phelps Dodge Corporation filed with the Federal Energy Regulatory Commission an Application for Adjustment under Section 502(c) of the Natural Gas Policy Act of 1978 (NGPA) (15 U.S.C. 3301 *et seq.*) wherein the applicant seeks relief from certain incremental pricing regulations found in the Interim Rule in Docket No. RM80-16, issued on December 27, 1978 (45 FR 21, January 2, 1980).

The Applicant states that it is a direct industrial customer, consuming natural gas purchased from El Paso Natural Gas Company in industrial applications subject to Phase I incremental pricing. The Applicant has also acquired supplies of natural gas for fuel oil displacement and such "self-help" gas is being transported by El Paso and intrastate pipelines in Texas under Part 282 of the Commission's regulations and a Certificate of Eligible Use of Natural Gas to Displace Fuel Oil, issued November 6, 1979, by the Economic Regulatory Administration pursuant to CFR Part 595, in Docket No. 79-CERT-095.

Under the Interim Rule in Docket No. RM80-16, these "self-help" volumes were required to be included in the calculation of daily volumes and prorated as such between exempt and non-exempt uses in the incremental pricing program. The final order in Docket No. RM80-16, Order No. 86, issued May 8, 1980, modified the rule on "self-help" supplies to permit the designation of these supplies to non-exempt uses in certain circumstances set forth in § 282.207(c)(i)-(iii). The Applicant claims that it may now designate self-help volumes to specific end uses under Order No. 86, and so it now seeks an adjustment which would authorize a refund of the incremental surcharges collected by El Paso under the proration methodology set in the Interim Rule, which surcharges are not collectible under the Final Rule in Order No. 86.

with the Commission and are available

The procedures applicable to the conduct of this adjustment proceeding are found in § 1.41 of the Commission's Rules of Practice and Procedure, Order No. 24, issued March 22, 1979.

Any person desiring to be heard or to protest this adjustment shall file a petition to intervene or protest in accordance with the provisions of § 1.8 or § 1.10 of the Commission's Rules of Practice and Procedure. All petitions to intervene or protest shall be filed with the Secretary of the Commission, 825 N. Capitol St., N.E., Washington, D.C. 20426, and must be filed within 15 days after publication of this notice in the Federal Register. Protests will be considered by the Commission in determining appropriate action to be taken, but will not serve to make the protestant a party to the proceeding. Any person desiring to become a party must file a petition to intervene. Copies of the application are on file with the Commission and are available for public inspection.

Southland Oil Co. and VGS Corp.; Filing of Petition for Review Under 42 U.S.C. 7194

August 7, 1980

Take notice that Southland Oil Company, VGS Corporation on June 20, 1980 filed a Petition for Review under 42 U.S.C. § 7194(b) (1977 Supp.) from an order of the Secretary of Energy.

Copies of the petition for review have been served on the Secretary, Department of Energy, and all participants in prior proceedings before the Secretary.

Any person desiring to be heard with reference to such filing should on or before August 21, 1980 file a petition to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8). Any person wishing to become a party or to participate as a party must file a petition to intervene. Such petition must also be served on the parties of record in this proceeding and the Secretary of Energy through John McKenna, Office of General Counsel, Department of Energy, Room 5142, 12th and Pennsylvania Ave., N.W., Washington, D.C. 20461. Copies of the petition for review are on file with the Commission and are available for public inspection at Room 1000, 825 North Capitol St., N.E., Washington, D.C. 20426.

Wisconsin Power & Light Co.; Filing

August 7, 1980

The filing Company submits the following:

Take notice that on August 1, 1980, Wisconsin Power and Light Company (WPL) tendered for filing a revised Wholesale Power Agreement dated January 29, 1980, between the Columbus Rural Electric Cooperative and WPL. WPL states that this Agreement will supersede an existing Wholesale Power Agreement dated October 29, 1973 previously designated as WPL Rate Schedule FPC No. 103.

WPL requests a proposed effective date of March 31, 1980 and, therefore, requests waiver of the notice requirements of the Commission's regulations. WPL states that a copy of the revised Wholesale Power Agreement and the filing have been provided to the Columbus Electric Cooperative and the Public Service Commission of Wisconsin.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before August 29, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Docket No. TA80-2-20]

Algonquin Gas Transmission Co.; Rate Change Pursuant To Purchased Gas Cost Adjustment Provision

August 11, 1980.

Take notice that Algonquin Gas Transmission Company ("Algonquin Gas") on July 31, 1980, tendered for filing 53rd Revised Sheet No. 10, and in the alternative Substitute 53rd Revised Sheet No. 10, and 2nd Revised Sheet No. 10–B to its FERC Gas Tariff, First Revised Volume No. 1.

Algonquin Gas states that these sheets are being filed pursuant to Algonquin Gas' Purchased Gas Cost Adjustment Provision set forth in Section 17 of the General Terms and Conditions of its FERC Gas Tariff, First Revised Volume No. 1. The rates as shown on Sheet No. 10 reflect the following: (i) an adjustment to amortize the June 30, 1980 balances in Algonquin Gas' Unrecovered Purchased Gas Cost Account (Account 191) and (ii) an adjustment to reflect higher purchased gas costs to be charged by its supplier, Texas Eastern Transmission Corporation ("Texas Eastern"), to Algonquin Gas proposed to be effective August 1, 1980, under Texas Eastern's Fifty-fourth Revised Sheet No. 14D; Sheet No. 10–B reflects Projected Incremental Pricing Surcharges for the period September, 1980 through February, 1981.

Algonquin Gas states that 53rd Revised Sheet No. 10 and Substitute 53rd Revised Sheet No. 10 synchronize with alternate tariff sheets 52nd Revised Sheet No. 10 and Substitute 52nd Revised Sheet No. 10, which were filed as part of Algonquin Gas' motion on July 28, 1980, to place its suspended Docket No. RP80–72 rates into effect on August 1, 1980 and to comply with the Commission directive in Docket No. RP80–72 that revised rates be filed to eliminate the cost of facilities not in service by June 30, 1980.

Algonquin Gas requests that the Commission accept for filing effective September 1, 1980, 2nd Revised Sheet No. 10–B and in the alternative either 53rd Revised Sheet No. 10 or Substitute 53rd Revised Sheet No. 10 whichever Algonquin Gas states will synchronize with whichever superseded sheet is accepted by the Commission pursuant to Algonquin Gas' July 28, 1980 motion, i.e., either 52nd Revised Sheet No. 10 or Substitute 52nd Revised Sheet No. 10.

Algonquin Gas notes that a copy of this filing is being served upon each affected party and interested state commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 29, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Docket No. OR80-3]

Conoco Inc.; Petition for an Order of Exemption

August 7, 1980.

Take notice that on June 5, 1980, Conoco Inc. (Conoco) tendered for filing a petition, pursuant to Section 5(f)(2)[1] of the Outer Continental Shelf Lands Act, as amended, (the Act), for an order exempting certain facilities jointly owned by Conoco and others from the requirements of Section 5(f)(1) of the Act. Conoco states that it jointly owns with Arco Oil & Gas Company and Getty Oil Company a crude oil gathering system, operated by Conoco, which serves the West Cameron Block 66 Field, Gulf of Mexico and which transports a mixed stream of oil, water and low pressure gas to the Gibbstown (Louisiana) Separation, Treating and Storage Facility located on the Intercoastal Canal.

The pipeline system presently serves four platforms in the West Cameron Block 66 Field. Active field development is progressing and additional production platforms will be added to the system. All of platforms in the field either now produce or are expected to produce water and low pressure gas in association with oil into the pipeline system.[2]

The pipeline system consists of a 10¾" OD (10" nominal) main line that extends from the West Cameron Block 66A Platform to Gibbstown. Two 8⅝" OD (8" nominal) feeder lines connect the B and D platforms to the main 10" line. The C platform is connected to the system by a 6⅝" OD (6" nominal) line which extends from the platform to an underwater side connection on the 8⅝" line serving the B platform.

Each platform has or will have two types of oil production: high pressure and low pressure wells. The high pressure oils production is separated from its associated gas by platform separators. This gas is sold to Tennessee Gas Pipeline Company. The oil and part of the produced water enter the oil pipeline system. The full well stream, oil, water and associated gas, from the low pressure wells enter the oil pipeline system and the combined streams flow to Gibbstown.

At Gibbstown, the products of the 10" pipeline are separated, treated and stored. The gas is compressed and sold to Tennessee Gas Pipeline Company, while the produced water is injected into disposal wells. The treated oil in storage is sold and loaded into barges. According to the petitioner, the oil coming to Gibbstown is not at pipeline quality before it is separated and treated.

The pipeline owners are currently negotiating to sell an undivided interest in the pipeline system to Sonat Exploration Company and others (Sonat Group) for transportation of their crude from East Cameron Blocks 45 and 46. The Sonat Group's production and the anticipated increases in the pipeline owners production from the West

[1] 43 U.S.C. § 1334(f)(2).

[2] Conoco holds no Natural Gas Act § 7(c) certificate of public convenience and necessity with respect to these facilities.

Cameron Block 66 Field and East Cameron Block 47 are reasonably expected to require substantially all of the excess capacity of the system.

Conoco states that Section 5(f)(1) of the Act appears to require the pipeline owners to provide access to owner and nonowner shippers on the Gibbstown Gathering System. Conoco, on behalf of the pipeline owners, petitions the Federal Energy Regulatory Commission for an order exempting the Gibbstown Gathering system from the access requirements of section 5(f)(1) of the Act in accordance with Section 5(f)(2) of the Act. Section 5(f)(2) provides:

The Federal Energy Regulatory Commission may, by order or regulation, exempt from any or all of the requirements of paragraph (1) of this subsection any pipeline or class of pipelines which feeds into a facility where oil and gas are first collected or separated, dehydrated, or otherwise processed.

Conoco states that the Gibbstown Gathering System falls under this definition as a pipeline which feeds into a facility were oil and gas are separated, dehydrated and processed, and as such it is entitled to the exemption above stated.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1100.70 and 1100.38 of the Commission's Rules of Practice and Procedure for Oil Pipeline Matters (49 CFR 1100.70, 1100.38). All such petitions or protests should be filed on or before September 10, 1980. Protests and comments will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ID-1919]

Ralph W. Conrad; Filing

August 8, 1980.

Take notice that on August 1, 1980, Ralph W. Conrad (Applicant) filed an application pursuant to Section 305(b) of the Federal Power Act to hold the following positions:

Senior Vice President, Director, Pennsylvania Electric Company ("Penelec"), Public Utility.
Senior Vice President, Director, Metropolitan Edison Company ("Met-Ed"), Public Utility.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 4, 1980. Protests will be considered in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ER80-584]

Consolidated Edison Co. of New York, Inc.; Filing

August 11, 1980.

The filing Company submits the following:

Take notice that Consolidated Edison Company of New York, Inc. (Con Edison) on August 4, 1980, tendered for filing as a rate schedule an executed agreement dated July 3, 1980 between Con Edison and Public Service Electric and Gas Company (PSE&G). The proposed rate schedule provides for the interruptible transmission of power and energy by Con Edison.

The rate schedule provides for a transmission charge of 2.0 mills per kilowatt-hour for the energy transmission each hour.

Con Edison requests waiver of the notice requirements of Section 35.3 of the Commission's Regulations so that the proposed rate schedule can be made effective July 8, 1980 in accordance with the anticipated utilization by the parties.

Con Edison states that a copy of its filing was served on PSE&G.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.W., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 2, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-24900 Filed 8-15-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. TA80-2-22 (PGA80-5)]

Consolidated Gas Supply Corp.; Proposed Changes in FERC Gas Tariff

August 11, 1980.

Take notice that Consolidated Gas Supply Corporation (Consolidated) on August 1, 1980 tendered for filing, pursuant to Sections 12 (PGA clause), 12A (Incremental Pricing Surcharges), 13 (Research, Development and Demonstration Cost Adjustment) and 14 (Louisiana First Use Tax Adjustment) of the General Terms and Conditions of its tariff revisions to its FERC Gas Tariff, Third Revised Volume No. 1. The revisions, shown on Twenty-Second Revised Sheet No. 16 and Third Revised Sheet No. 72-C, provide for Consolidated's semi-annual PGA to be effective September 1, 1980.

Consolidated has included in its filing:

(a) Rate changes from pipeline suppliers in the amount of $21.6 million;

(b) Rate changes from producers suppliers in the amount of $12.6 million;

(c) A rate change to reflect a surcharge of 15.54¢ per dekatherm to recoup amounts accumulated in Account 191, Unrecovered Purchased Gas Costs; and,

(d) A rate change to reflect a Louisiana First Use Tax Adjustment of (0.41¢) to flow through overcollections.

Additionally, consolidated stated that the rates contained on Twenty-Second Revised Sheet No. 16 reflect old pipeline production (production from wells drilled prior to January 1, 1973, on leases acquired prior to October 8, 1979) on a cost-of-service basis and new pipeline production priced pursuant to the Natural Gas Policy Act of 1978. In past filings Consolidated has filed alternative tariff sheets including old pipeline production priced pursuant to the NGPA, and those tariff sheets have been rejected (Consolidated Gas Supply Corp., Docket No. RP79-22, order issued January 30, 1979). Consolidated has petitioned for court review of the Commission's orders rejecting its tariff sheets based on NGPA treatment of old pipeline production.

The filing in this proceeding on the basis of the inclusion of old pipeline production on a cost-of-service basis is without prejudice to Consolidated's position that old pipeline production is entitled to NGPA treatment and the outcome of the court proceedings. Consolidated has omitted the alternative filing to avoid the burden of Commission rejection of a tariff sheet, to be followed by another application for rehearing and petition for court review. Consolidated reserves its right to make collections based on NGPA treatment for old pipeline production.

Copies of this filing were served upon Consolidated's jurisdictional customers as well as interested State Commissions.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 29, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ER80-572]

Dayton Power & Light Co.; Filing

August 11, 1980.

The filing company submits the following:

Take notice that on July 28, 1980, Dayton Power and Light Company (DPL) submitted for filing Modification No. 1 to the Interconnection Agreement between DPL and Cincinnati Gas and Electric Company (CG&E). Modification No. 1 revises the Conservation Energy Schedule of the Interconnection Agreement.

DPL further submits that it is not feasible to estimate the transactions or revenues under the revised Conservation Energy Schedule. Accordingly, no estimates have been submitted.

A copy of this filing has been sent to CG&E and the Public Utilities Commission of Ohio.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before September 2, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Docket No. ES80-68]

Interstate Power Co.; Application

August 11, 1980.

Take notice that on August 5, 1980, Interstate Power Company (Applicant) filed an application with this Commission seeking an order pursuant to Section 204 of the Federal Power Act for authorization to issue short-term promissory notes and/or commercial paper, not to exceed an aggregate of $40 million outstanding at any one time, to be issued on or before December 31, 1981 and to mature not later than December 31, 1982. Applicant is incorporated under the laws of the State of Delaware, with its principal business office in Dubuque, Iowa and is engaged principally in the electric utility business in northern and northeastern Iowa, in southern Minnesota and a few small communities in Illinois.

Applicant states that the requested authorization will provide additional funds for its 1980-81 construction expenditures estimated to be $63,591,000 and will enable it to maintain cash working funds at normal levels.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 5, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C., 10426, petitions to intervene or protests in accordance with the requirements of the Commission's

rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The Application is on file with the Commission and available for public inspection.

BILLING CODE 6450-85-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" after the section code. Estimated annual production (PROD) is in million cubic feet (MMcf).

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Persons objecting to any of these final determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission on or before September 2, 1980.

Please reference the FERC Control Number (JD NO) in all correspondence related to these determinations.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" after the section code. Estimated annual production (PROD) is in million cubic feet (MMcf).

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Persons objecting to any of these final determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission within fifteen (15) days of the date of publication of this notice in the **Federal Register**.

Please reference the FERC Control Number (JD NO) in all correspondence related to these determinations.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ER80-585]

Kansas Gas & Electric Co.; Proposed Tariff Change

August 11, 1980.

The filing Company submits the following:

Take notice that Kansas Gas and Electric Company on August 4, 1980 tendered for filing proposed changes in its FERC Electric Service Tariff No. 101.

Kansas Gas and Electric Company states that the filing is Peaking Power Service which provides electric power and accompanying energy to be supplied to Western Power Division of Central Telephone & Utilities Corporation (WPD) as Kansas Gas and Electric Company will purchase this power and accompanying energy from The Empire District Electric Company.

Copies of the filing were served upon WPD and the Utilities Division of the Kansas Corporation Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with paragraph 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 2, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. RP80-127; TA80-2-60]

Locust Ridge Gas Co.; Change in Rates

August 11, 1980.

Take notice that on July 31, 1980, Locust Ridge Gas Company (Locust Ridge) submitted for filing as part of its FERC Gas Tariff, Original Volume No. 3 the following tariff sheets to be effective September 1, 1980:

Third Revised Sheet No. 1A.
Second Revised Sheet No. 21B.
Second Revised Sheet No. 21C.
Original Sheet No. 21D.
Original Sheet No. 21E.
Original Sheet No. 21F.

Locust Ridge states the purpose of the filing is to submit, for approval by the Commission, a revision in Locust Ridge's Purchased Gas Adjustment (PGA) clause. The overall effect of the filed for adjustments to Locust Ridge's G-1 sales rate is an increase of $0.033.

Locust Ridge requests waiver of the Commission regulations to the extent, if any, required to put the proposed tariff sheets into effect on September 1, 1980.

A copy of this filing has been mailed to Locust Ridge's jurisdictional customers.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 29, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Docket No. TA80-2-25 (PGA 80-3, IPR80-3, LFUT 80-2, AP80-2, TT80-2 and STR80-2)]

Mississippi River Transmission Corp.; Rate Change Filing

August 11, 1980.

Take notice that on July 31, 1980, Mississippi River Transmission Corporation ("Mississippi") tendered for filing Seventy-Sixth Revised Sheet No. 3A and Second Revised Sheet No. 3D to its FERC Gas Tariff, First Revised Volume No. 1. An effective date of September 1, 1980 is proposed. Mississippi states that these tariff sheets reflect rate adjustments as follows:

(1) A PGA rate adjustment in accordance with Paragraph 17 of the General Terms and Conditions of Mississippi's Tariff which reflects increases in the current cost of gas purchased from pipeline and producer suppliers;

(2) A PGA rate adjustment which reflects recovery of gas costs which have accumulated in the deferred purchased gas cost account since the date of its last effective semi-annual PGA filing;

(3) A Louisiana First Use Tax (LFUT) rate adjustment in accordance with Paragraph 19 of the General Terms and Conditions of Mississippi's Tariff;

(4) An Advance Payment tracking adjustment pursuant to Article IV of the Stipulation and Agreement at Docket No. RP78-77;

(5) A Transportation and Compression tracking adjustment pursuant to Articles V and VI of the Stipulation and Agreement at Docket No. RP78-77;

(6) A Storage Loss Amortization tracking adjustment pursuant to Article VII of the Stipulation and Agreement at Docket No. RP78-77, and

Mississippi states that the base tariff rates set forth on Seventy-Sixth Revised Sheet No. 3A are based upon the provisions of the Stipulation and Agreement at Docket No. RP78-77, which was approved by Commission letter order dated December 11, 1979.

Mississippi states that copies of its filing has been served on all jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825

BILLING CODE 6450-85-M

[Docket No. GP80-95]

Mobil Producing Texas & New Mexico, Inc., et al.; Petition

Issued: August 11, 1980.

In the matter of Mobil Producing Texas & New Mexico Inc.; Section 108 NGPA Determination; State of New Mexico, State of Texas, and United States Geological Survey; Notice of motion to amend petition of Mobil Producing Texas & New Mexico Inc. to reopen final well category determinations and request for withdrawal.

Take notice that on June 26, 1980, Mobil Producing Texas and New Mexico Inc. (MTM), successor to Mobil Oil Corporation (Mobil), Nine Greenway Plaza, Suite 2700, Houston, Texas 77046, filed with the Federal Energy Regulatory Commission (Commission) a Motion to Amend Petition of MTM to Reopen Final Well Category Determinations and Request for Withdrawal.

MTM filed a petition to reopen Final Well Category Determinations and Request for Withdrawal on May 13, 1980. The petition was noticed by the Commission on June 4, 1980.

An internal review of the Petition and Notice has revealed that several wells were erroneously listed. Accordingly, MTM, by its Motion to Amend, seeks to delete such wells, hereinafter described, from such Petition and to note a typographical error in the June 4, 1980 notice.

The wells listed below are in fact Section 103 wells rather than Section 108 wells and are to be deleted from the Exhibits to the Petition and Notice, to wit:

Well name or unit No.	API well No.	Jurisdictional agency
North Central Levelland Unit No.:		
318	42-219-32520	Railroad Commission of Texas.
319	42-219-32521	Do.
320	42-219-32516	Do.
321	42-219-32517	Do.
322	42-219-32514	Do.
323	42-219-32522	Do.
324	42-219-32518	Do.
325	42-219-32519	Do.
East Mallet Unit No.:		
112	42-079-30270	Do.
113	42-219-31296	Do.
114	42-219-31294	Do.

MTM further submitted that the following well is individually metered and continues to qualify as a Section 108 well and should be deleted from the Exhibits to Petition and Notice, to wit:

Railroad Commission of Texas, 42-495, J. B. Walton Unit.

The Commission's notice of the petition to reopen dated June 4, 1980 lists on page 3 of Exhibit "A" one well as New Mexico Oil Conservation Commission Division, API Well No. 30-025-11522, Langlie Mattix Queen *#14.* Said well should be properly listed as the Langlie Mattix Queen *#4.*

MPTM proposes to refund monies with interest, to those purchasers if any, who have paid for volumes of gas sold from such wells at the applicable Section 108 price upon the Commission's approval of reopening and withdrawal.

Any person desiring to be heard or to make any protest with reference to said petition should on or before August 18, 1980 file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-24916 Filed 8-15-80; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 3220]

Napa County and Napa County Flood Control and Water Conservation District; Application for Major License

August 7, 1980.

Take notice that an application was filed on June 18, 1980, under the Federal Power Act, 16 U.S.C. 791(a)–825(r), by Napa County and Napa County Flood Control & Water Conservation District (Applicant) for Major License for the proposed Putah Creek Power Project, FERC No. 3220, to be located on Putah Creek in Napa County, California. Correspondence with the Applicant on this matter should be addressed to: Mr. Harry D. Hamilton, Director of Public Works and District Engineer, Napa County, 1127 First Street, Napa, California 94558 and Mr. Daniel F. Gallery, Attorney, 928 Jay Building, Sacramento, California 95814. Applicant proposes to install a hydroelectric powerplant immediately downstream of the Monticello Dam, an irrigation-storage dam owned by the Water and Power Resources Service (WPRS); the WPRS reservoir, created by the impoundment of Putah Creek and known as Lake Berryessa, contains 1.6 million acre-feet of gross storage capacity between the streambed and the spillway crest elevation 440. The project would use one of two existing WPRS's steel penstocks (7'6" in diameter and approximately 130' long) installed in the dam for the passage of water.

The proposed project would consist of: (1) a reinforced concrete powerhouse to contain two Francis-type turbine-generator units with a total rated capacity of 10 MW; (2) an underground 1,700-foot long, 115 kV transmission line, to connect to an existing Pacific Gas and Electric Company transmission line via; (3) an outdoor-type substation to contain the main power transformers. Applicant estimates the powerplant would be capable of producing an annual generation of 49.55 million kWh, and proposes to sell the project energy to the California Department of Water Resources for municipal purposes. The water, discharged through the powerhouse, would continue to flow downstream on Putah Creek for about five miles into Lake Solano, created by WPRS's Putah Creek diversion dam.

The estimated total cost of the project is $11,600,000 (January 1982 prices).

The project would be located within a recreational area which has been developed by WPRS and State and County agencies. Applicant, however, has proposed to enhance the existing recreational services by providing: (1) a visitor center for the Lake Berryessa

recreational complex and (2) public transportation to and within the Lake area.

Competing Applications.—This application was filed as a competing application to Solano Irrigation District's application for the Monticello Power Plant Project No. 2780 on the Putah Creek under 18 CFR 4.33 *as amended,* 44 FR 61328 (October 25, 1979), and, therefore, since time has expired under the notice for Project No. 2780, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions to Intervene.—Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR, 1.8 or 1.10 (1979). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be filed on or before *September 22, 1980.* The Commission's address is: 825 North Capitol Street, NE., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-24917 Filed 8-15-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP79-13]

Panhandle Eastern Pipe Line Co.; Petition To Amend

August 8, 1980.

Take notice that on July 11, 1980,[1] Panhandle Eastern Pipe Line Company (Petitioner), 3000 Bissonnet Avenue, Houston, Texas 77001, filed in Docket No. CP79-13 a petition to amend the order issued April 26, 1979, in the instant docket pursuant to Section 7(c) of the Natural Gas Act and § 157.7(g) of the Regulations thereunder (18 CFR 157.7(g)) so as to authorize a waiver of the single project cost limitation for two projects constructed under the budget-type certificate, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that the cost report filed with the Commission on June 9, 1980, which pertains to construction under the budget-type certificate issued in the instant docket on April 26, 1979, reflects an overrun of $130,281 on the Lerado Compressor Station and $29,923 on the Wellsford Compressor Station of the individual project limitation of $500,000 as set forth in § 157.7(g)(iii) of the Regulations which pertains to such field compression facilities constructed under budget authorization. Petitioner asserts that such cost overruns were the result of higher than anticipated costs of material, contract labor and miscellaneous expenses.

Accordingly, Petitioner requests that the single project limitation of § 157.7(g)(iii) of the Regulations be waived with respect to the two said individual projects.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 2, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-24918 Filed 8-15-80; 8:45 am]

BILLING CODE 6450-85-M

[1] The application was initially tendered for filing on July 11, 1980; however, the fee required by Section 159.1 of the Regulations under the Natural Gas Act (18 CFR 159.1) was not paid until July 21, 1980; thus the filing was not complete until the latter date.

[Docket No. ID-1911]

Henry Robidoux; Filing

August 8, 1980.

Take notice that on August 1, 1980, Henry Robidoux (Applicant) filed an application pursuant to Section 305(b) of the Federal Power Act to hold the following positions:

Vice President, Metropolitan Edison Company ("Met-Ed"), Public Utility.

Vice President, Pennsylvania Electric Company ("Penelec"), Public Utility.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 4, 1980. Protests will be considered in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Project No 719]

Jesse I. Smith and Two Rivers, Inc.; Application for Transfer and Amendment of Minor License

August 8, 1980.

Take notice that Jesse I. Smith (Licensee) and Two Rivers Inc. (Two Rivers) filed on May 29, 1980, a joint application [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for transfer and amendment of license for the Trinity Project, FERC Project No. 719. The project is located on Phelps and James Creeks in Chelan County, Washington. Correspondence with the Applicants should be directed to: Mr. Jesse I. Smith, Lake City Mobile Home Park, 12730 Lake City Way N.E., Seattle, Washington 98125.

The Trinity Project consists of diversion dams on Phelps and James Creeks, flumes and pipelines, a 240-kW generating unit located inside a mine shop building, and a nearby residence. Approval of the application would remove the residence and the surrounding 1 acre of land from the project and transfer the remaining project works to Two Rivers.

Comments, Protests, or Petitions to Intervene.—Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR 1.8 and 1.10 (1979). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protests, or petition to intervene must be filed on or before September 19, 1980. The Commission's address is: 825 North Capitol Street, NE., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

[Docket Nos. CP79-80, et al.]

Trailblazer Pipeline Co., et al.; Commission Action

August 8, 1980.

At the conclusion of the oral presentation on August 5, 1980, the Commission entered two procedural orders with respect to the Trailblazer proceeding, Docket Nos. CP79-80, *et al.*, (Tr. pp. 243–245):

1. Staff is directed to file and serve on all parties, not later than August 20, 1980, a detailed response (including any suggested alternative) to the applicants' June 9, 1980, rate proposal and to the modification of that proposal described to the Commission during the oral presentation on August 5.

2. All parties are required to file and serve on all other parties, not later than August 20, 1980, a specific statement of those issues of material fact in dispute as legally require a hearing and those issues of policy or other issues as may legally require a hearing, and a separate statement of those issues of policy or other issues which, as opposed to lawful requirements, deserve a hearing as a predicate to Commission action.

BILLING CODE 6450-85-M

[Docket No. TA80-2-29]

Transcontinental Gas Pipe Line Corp.; Tariff Filing

August 11, 1980.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing on August 1, 1980 Third Substitute Eighteenth Revised Sheet No. 12, Third Substitute Eighteenth Revised Sheet No. 15 and Second Revised Sheet No. 16 to Second Revised Volume No. 1, and Third Substitute Twenty-Fourth Revised Sheet No. 121 to original Volume No. 2 of Transco's FERC Gas Tariff. These tariff sheets, which are proposed to be effective September 1, 1980, reflect a net increase of 55.5¢ per dekatherm (dt) in the commodity or delivery charge of Transco's CD, G, OG, E, PS and S–2 rate schedules, a net increase of 55.7¢ per dt in the commodity charge under the ACQ rate schedule, and a net decrease of 2.7¢ per dt in the delivery charge of the X–20 rate schedule.

Transco states that these changes have been computed in accordance with the tracking provisions contained in the General Terms and conditions of its FERC Gas Tariff, Second Revised Volume No. 1. The tracking rate change under the PGA clause (Section 22) amounts to an increase of 58.2¢ per dt in the commodity or delivery charge in Transco's CD, G, OG, E, PS, S–2 and ACQ rate schedules. The tracking rate change to reflect curtailment credits (Section 20) is a decrease of 0.2¢ per dt in the commodity or delivery charge under Transco's CD, G, OG, E, PS, S–2 and X–20 rate schedules. The tracking rate change for Louisiana First Use Tax (Section 25) is a decrease of 2.5¢ per dt in the commodity or delivery charge of Transco's CD, G, OG, E, PS, S–2, ACQ and X–20 rate schedules.

The Company states that copies of the filing are being mailed to each of its jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 29, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Project No. 3136]

Turlock Irrigation District; Application for Exemption for Small Conduit Hydroelectric Facility

August 7, 1980.

Take notice that on July 7, 1980, Turlock Irrigation District filed an application, under Section 30 of the Federal Power Act (Act) [16 USC 823(a)], for exemption of a proposed hydroelectric project from requirements of Part I of the Act. The proposed Upper Dawson Power Plant, FERC Project No. 3136, would be located on the Main Canal, just upstream of the Dawson Lake which is part of the Turlock Irrigation System in Stanislaus County, California. Water is diverted into Maine Canal from the Tuolumne River at LaGrange Dam, LaGrange, California. Correspondence with the Applicant should be directed to Mr. Ernest Geddes, General Manager, Turlock Irrigation District, P.O. Box 949, Turlock, California 95380.

Purpose of Project.—Project energy would be used to meet present and anticipated loads within the Applicant's electric system.

Estimated Cost.—The cost of the project is estimated by the Applicant to be $9,528,000.

Project Description.—The proposed project would consist of a powerhouse containing a single generating unit with a rated capacity of 4,000 kW and appurtenant facilities. The power plant would utilize an effective head of 18 feet, would be remotely monitored and controlled from the Applicant's control center in Turlock, and would produce approximately 15.9 million kilowatt-hours of energy per year.

Agency Comments.—The U.S. Fish and Wildlife Service and the California Department of Fish and Game are requested, pursuant to Section 30 of the Federal Power Act, to submit appropriate terms and conditions to protect any fish and wildlife resources. Other Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions to Intervene.—Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1979). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be filed on or before September 19, 1980. The Commission's address is: 825 North Capitol Street, NE., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-85-M

[Docket No. CP80-447]

United Gas Pipe Line Co.; Application

July 31, 1980.

Take notice that on July 11, 1980, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP80-447 an application pursuant to Section 7 of the Natural Gas Act and Section 157.7(g) of the Regulations thereunder (18 CFR 157.7(g)) for a certificate of public convenience and necessity authorizing the construction and for permission and approval to abandon various field compression and related metering and appurtenant facilities, for the 12-month period commencing November 13, 1980, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to enable Applicant to act with reasonable dispatch in constructing and abandoning facilities which would not result in changing Applicant's salable capacity or service from that authorized prior to the filing of the instant application.

Applicant requests new budget-type authorization for construction and abandonment in the total amount of $5,000,000 with no individual project to exceed $750,000. Applicant states it seeks a waiver of the Commission's rules which set a total authorization limit of only $3,000,000 because of the inflationary trend of construction costs.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 22, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.70). All protests filed with the Commission will be considered by it in determining the

appropriate action to be taken but will not serve to make protestants parties to

unnecessary for Applicant to appear or

party in any hearing therein must file a

having a 15-foot maximum height and an

appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. CP80-461]

United Gas Pipe Line Co.; Application

August 8, 1980.

Take notice that on July 24, 1980, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP80-461 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon the Raccourci Compressor Station, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant herein proposes to abandon its Raccourci Compressor Station, Lafourche Parish, Louisiana, which consists of four solar units. Applicant states that because of diminished gas supply, the compressor facility is no longer useful in the operation of Applicant's transmission system.

Applicant submits that the proposed abandonment would have no adverse impact on its existing system and would not affect Applicant's existing customers. It is further stated that disposition of material and equipment after the proposed abandonment is not known at the present time.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 2, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

BILLING CODE 6450-85-M

[Docket No. CP80-462]

United Gas Pipe Line Co.; Application

August 8, 1980.

Take notice that on July 24, 1980, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP80-462 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon the Hattiesburg Compressor Station, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant herein proposes to abandon its Hattiesburg Compressor Station, Perry County, Mississippi, which consists of two 550 horsepower units. Applicant states that because of diminished gas supply, the compressor facility is no longer useful in the operation of Applicant's transmission system.

Applicant submits that the proposed abandonment would have no adverse impact on its existing system and would not affect Applicant's existing customers. It is further stated that disposition of material and equipment after the proposed abandonment is not known at the present time.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 2, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Secretary.

[FR Doc. 80-24830 Filed 8-15-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP80-460]

United Gas Pipe Line Co.; Application

August 8, 1980.

Take notice that on July 24, 1980, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP80-460 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the installation of a farm tap on Applicant's Erath-Weeks Island Junction line in Iberia Parish, Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to install a farm tap on its Erath-Weeks Island Junction 30-inch line located in Iberia Parish, Louisiana, in order to enable Entex, Inc. (Entex), a local distributor, to provide gas service for the residence of J. Dorice LeLeux. Applicant states that in a letter of commitment dated May 9, 1980, LeLeux granted Applicant a right-of-way and easement to construct the Erath-Weeks line in exchange for Applicant's agreement that upon LeLeux's request, it would install a tap on the line for gas service to the principal dwelling.

It is stated the estimated cost of the proposed tap, $1,200, would be financed with available funds.

Applicant asserts that implementation of the proposed farm tap service would not require an increase in its allocation to Entex and would enable Entex to provide residential gas service in satisfaction of Applicant's herein described service commitment.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 2, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

BILLING CODE 6450-85-M

[Project No. 596]

Utah Power & Light Co.; Application for a New Major License

August 7, 1980.

Take notice that the Utah Power & Light Company (Applicant) filed on April 7, 1975, and most recently revised on April 25, 1980, an application for a new major license [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for the constructed Olmsted Hydroelectric Project, FERC No. 596, located on the Provo River, in Utah County, Utah, near the Cities of Orem and Provo, Utah. The project affects lands of the United States, within the Uinta National Forest. The original license for Project No. 596 expired on October 20, 1975.

Correspondence concerning the application should be directed to: Mr. Sidney G. Baucom, Senior Vice President and General Counsel, Utah Power & Light Company, Box 899, Salt Lake City, Utah 84110, with copies to Sam F. Chamberlain, Esquire, Utah Power & Light Company, Box 899, Salt Lake City, Utah 84110, and to Mr. Lee S. Sherline, Leighton and Sherline, Suite 803, 1701 K Street, N.W., Washington, D.C. 20006.

Project Description—the run-of-the-river Olmsted Hyrdoelectric Project consists of: (1) a concrete diversion dam having a 15-foot maximum height and an 80-foot length, including a 62-foot long spillway having a crest elevation of 5,176.16 USGS topped by variable height stop log flashboards; (2) a pond with negligible storage capacity and a normal water surface elevation of 5,183 USGS; (3) a screened water intake structure 104 feet in length along the right bank leading to; (4) a 4.91-mile long, 8½-foot diameter steel or concrete gravity pipeline including (a) a Taintor gate control and screening structure (b) a siltation structure (c) two siphons and (d) a siphon spillway leading to; (5) a wood and/or concrete lined tunnel 950 feet long, 13 feet wide, and 10 feet high opening into; (6) a concrete and steel "pressure box" structure 50 feet long, 50 feet wide, and 60 feet high with trash screens and four Taintor gates connecting to; (7) three 730-foot long steel penstocks varying in diameter from 60 to 48 to 54 inches and a 730-foot long, 6-foot diameter steel penstock; (8) a concrete, brick, and steel powerhouse containing three 2,400-kW generating units and a 5,500-kW generating unit; (9) a tailrace 800 feet long; (10) electrical facilities conecting to a 44-kV switchyard; and (11) appurtenant facilities.

Minimum recreational use is made of the project because of the steep, almost inaccessible terrain. The Applicant does not propose the installation of any recreational facilities at the project.

Purpose of Project—All power generated by the project is and will continue to be incorporated into the Applicant's inerconnected system.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before *September 19, 1980*, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than *Jan. 19, 1981*. A notice of intent must conform with the requirements of 18 CFR 4.33(b) and (c), *as amended* 44 FR 61328, (October 25, 1979). A competing application must conform with the requirements of 18 CFR 4.33(a) and (d), *as amended*, 44 FR 61328 (October 25, 1979).

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR, § 1.8 or § 1.10 (1979). Comments not in the nature of a protest may also be submitted by conforming to

the procedures specified in §1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be filed on or before *September 19, 1980.* The Commission's address is: 825 North Capitol Street, NE., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. SA80-136]

Vessels Gas Processing Co.; Application for Staff Adjustment

August 11, 1980.

Take note that on July 14, 1980, the Vessels Gas Processing Company (Vessels) filed an application for an adjustment of § 271.1105 of the Commission's regulations. The application of Vessels was filed under section 502(c) of the Natural Gas Policy Act of 1978 (NGPA), 15 U.S.C. 3301 *et seq.*, and §§ 1.41, 270.202(d) and 271.1106 of the Commission's regulations. Vessels is located at Suite 1220, 600 South Cherry Street, Denver, Colorado 80222.

Vessels operates natural gas gathering and processing facilities. On January 1, 1974, Vessels entered into a processing and purchase agreement with the Colorado Interstate Gas Company (CIG). Under the agreement, CIG purchases residue gas delivered at the tailgate of Vessels' processing plant in Adams County, Colorado. The residue gas is purchased by Vessels at the wellhead. Vessels pays the maximum lawful price of NGPA section 102 or 105 for most of this gas.

Under the gas purchase agreement between Vessels and CIG, the price per Mcf to be paid by CIG to Vessels for the residue gas is equal to 120 percent of the weighted average price per Mcf paid by Vessels at the wellhead. Vessels submits that the 120 percent factor was intended to permit Vessels to recover its costs of purchasing the wellhead gas and of gathering, compressing and processing gas for delivery to CIG, and its capital investment in certain gathering, compression and processing facilities.

According to vessels, the Commission's regulations preclude Vessels from charging CIG more than the applicable, maximum lawful prices of sections 102 and 105 of the NGPA; in other words, Vessels contends, it presently may not collect the full price allowed under the 1974 gas purchase agreement with CIG for the residue gas. Vessels submits that it is the exclusion of § 271.1105(b)(2) of the Commission's regulations that prevents Vessels from collecting the full contract price.

Section 271.1105 implements section 110(a)(2) of the NGPA, which provides an increase in the otherwise applicable, maximum lawful prices of the NGPA, for production-related costs allowed by the Commission. The Commission, under § 271.1105(b)(2) does not allow an add-on for production-related costs to the maximum lawful price of section 105 of the NGPA.

Vessels maintains that the exclusion of § 271.1105(b)(2) creates a special hardship, inequity and unfair distribution of burdens because Vessels would be denied the right to collect its contract price. Without an adjustment from § 271.1105, alleges Vessels, it will be forced to terminate its service to CIG and future attempts to develop and to gather new supplies of gas will be severely limited.

The procedures applicable to the conduct of this proceeding are found in § 1.41 of the Commission's Rules of Practice and Procedure. *See,* Order No. 24, issued March 22, 1979.

Any person desiring to be heard or to protest Vessels' application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before August 22, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of Vessels' application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

Raymond E. Werts; Filing

August 8, 1980.

Take notice that on August 1, 1980, Raymond E. Werts (Applicant) filed an application pursuant to Section 305(b) of the Federal Power Act to hold the following positions:

Comptroller Director, Metropolitan Edison Company ("Met-Ed"), Public Utility.
Comptroller, Pennsylvania Electric Company ("Penelec"), Public Utility.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 4, 1980. Protests will be considered in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[FR Doc. 80-24923 Filed 8-15-80; 8:45 am]

BILLING CODE 6450-85-M

Conduct of Employees; Waiver of Post-Employment Conflict of Interest

Section 737.17 of the regulations under the Ethics in Government Act of 1978, as amended (Pub. L. 95-521, hereinafter referred to as the "Act"), authorizes the Chairman of the Federal Energy Regulatory Commission to waive the post-employment restrictions of the Act for a former employee with outstanding qualifications in a scientific, technological, or other technical discipline in connection with a particular matter which requires such qualifications, where it has been determined that such a waiver would serve the national interest.

It has been established to my satisfaction that Michael J. Sotak, who will shortly be vacating the position of Chief, Environmental Evaluation Branch, Division of Pipeline Certificates, Office of Pipeline and Producer Regulation, has outstanding scientific and technical qualifications concerning the biology and fisheries of the Alaskan arctic ecosystem and pipeline routing and construction, and that it will serve the national interest for him to assume the responsibilities of Vice President, Environmental Affairs, for the Northwest Alaskan Pipeline Company.

The Alaska Natural Gas Transportation Act of 1976, 15 U.S.C. 719, *et seq.*, mandates expeditious construction of the Alaska Natural Gas Transportation System (ANGTS).

Both the U.S. Senate and House of Representatives have recently reaffirmed that the ANGTS should be built. The resolution, approved by the Senate on June 27, 1980, and by the House on July 1, 1980, states that "it is the sense of the Congress that the System remains an essential part of securing this Nation's energy future and, as such, enjoys the highest level of Congressional support for its expeditious construction and completion by the end of 1985." Most recently, on July 17, 1980, the Canadian government, in announcing its final approval for commencement of construction of the lower half of the ANGTS, published a letter (received on that date) from President Carter to Prime Minister Trudeau reiterating U.S. commitments to complete construction of the entire system by the end of 1985.

Northwest Alaskan can complete this project only if it secures the best available technical talent. Mr. Sotak's knowledge of the Alaskan project and the environmental concerns associated with the route, his primary training in biology and fisheries research, and his leadership of an environmental organization at the FERC equip him uniquely with the experience necessary to coordinate environmental activities for the Alaska Natural Gas Transportation System. During the past six years, he has developed working relationships with many state, Federal, and local officials as well as environmental organizations. The environmental problems to be encountered by this project are unique and, if not properly considered, could cause significant delays, serious and irreparable damage to the environment, and/or substantial cost overruns.

In addition, since Mr. Sotak will be responsible for all environmental affairs related to the ANGTS and since the Office of the Federal Inspector will coordinate all government actions, the Federal Inspector, by letter dated August 4, 1980, has concurred with the decision to provide this waiver.

I therefore certify that in the case of Michael J. Sotak the national interest would be served by his participation as Vice President of Environmental Affairs for the Northwest Alaskan Pipeline Company, and that pursuant to 5 C.F.R. 737.17, after consultation with the Director, Office of Government Ethics, hereby waive the provisions of subsections (a) and (b) of Title 18 U.S.C. 207 which may be applicable to Mr. Sotak by reason of his employment at the Federal Energy Regulatory Commission.

Dated: August 11, 1980.

Charles B. Curtis,

Chairman.

BILLING CODE 6450-85-M

[Docket No. RP80-57]

High Island Offshore System; Order Rejecting Late Filed Petition for Review of Staff Rejection of Tariff Filing

Issued: August 8, 1980.

On February 1, 1980, High Island Offshore System (HIOS) filed a Petition for Review of the rejection of HIOS' tariff filing of November 30, 1979, by the Director of the Office of Pipeline and Producer Regulation (OPPR). The letter of rejection by OPPR was issued December 21, 1979, in accordance with the authorities delegated under § 3.5(f)(2)(ii) of the Commission's Rules of Practice and procedure.

An appeal from this delegated action taken by Commission Staff is subject to the provisions of § 1.7(d) of the Commission's Rules of Practice and Procedure. HIOS, in fact, notes that § 1.7(d) is controlling for purposes of review, but misstates the appropriate period for which appeal is timely. Contrary to HIOS' claim that its appeal within thirty days of notice is timely, § 1.7(d) allows appeal within thirty days of the action. No request for waiver of this requirement has been made by HIOS, nor does the Commission, on its own motion, have reason to waive this requirement concerning timely appeal of Staff actions. Furthermore, we are satisfied that the Director's letter order was correct on the merits for the reasons stated in that letter order.

Therefore, since the Petition was not timely filed, the Commission by this order rejects HIOS Petition.

The Commission Orders:

The late filed Petition for Review by HIOS on February 1, 1979 is bereby rejected.

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL 1573-5]

Approval of PSD Permit to General Motors Corp., Wentzville, Mo.

Notice is hereby given that on May 14, 1980, the Environmental Protection Agency (EPA) issued a conditional permit to General Motors Corporation for approval to construct a new facility in Wentzville, Missouri under the Prevention of Significant Air Quality Deterioration (PSD) regulations (40 CFR 52.21).

This facility consists of an automobile assembly plant and coal-fired steam generating unit to supply the process heat and space heating and cooling needs for the assembly plant.

Under Section 307(b)(1) of the Clean Air Act, judicial review of this permit is available *only* by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of

today's notice may *not* be challenged later in civil or criminal proceedings brought by the EPA to enforce these requirements.

In this case, the appropriate court is the Eighth Circuit Court of Appeals. A petition for review must be filed with this court on or, before October 17, 1980.

The permit and background information are available for public inspection at: U.S. Environmental Protection Agency, Air and Hazardous Materials Division, Air Support Branch, 324 East 11th Street, Kansas City, Missouri 64106.

Dated: August 6, 1980.

Kathleen Q. Camin,

Regional Administrator, Region VII.

BILLING CODE 6560-01-M

[FRL 1574-1]

Determination of Nonapplicability of PSD; Regulations to Ralston Purina Co., Kansas City, Mo.

Notice is hereby given that on September 18, 1979, EPA formally determined that the addition of an oil-fired boiler and a grain dryer at the Ralston Purina Company facilities located in Kansas City, Missouri, is not subject to the review requirements under the regulations for the Prevention of Significant Air Quality Deterioration (PSD) (40 CFR 52.21) nor the review requirements for sources locating in non-attainment areas, the Emission Offset Interpretative Ruling (44 FR 3282). This determination is based on EPA findings that the modification's potential emissions of particulates or volatile organic compounds (the non-attainment pollutants) will not exceed 100 tons-per-year and that potential emissions of other pollutants regulated under the Clean Air Act will not exceed 250 tons-per-year.

Under Section 307(b)(1) of the Clean Air Act, judicial review of this determination is available *only* by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought by the EPA to enforce the requirements.

In this case, the appropriate court is the Eighth Circuit Court of Appeals. A petition for review must be filed with this court on or before October 17, 1980.

The determination and related background information are available for public inspection at: U.S. Environmental Protection Agency, Air and Hazardous Materials Division, 324 East 11th Street, Kansas City, Missouri 64106.

Dated: August 6, 1980.

BILLING CODE 6560-01-M

[FRL 1573-6]

Nonapplicability to PSD Regulations To Rockwell International, Atchison, Kans., et al.

Notice of Non-applicability of PSD regulations to Rockwell International, Atchison, Kansas; Derby Refing Company, Wichita, Kansas; H. B. Reed & Company, Incorporated, La Cygne, Kansas; Mobil Oil Corporation, Augusta, Kansas; Iowa Beef Processors Incorporated, Holcomb, Kansas; Getty Refining and Marketing Company, El Dorado, Kansas; CRA, Incorporated, Coffeyville, Kansas; Blacktop Construction Company, Osage County, Kansas.

Notice is hereby given that the Environmental Protection Agency (EPA) has determined that construction proposals by the above companies are not subject to the review requirements of the Prevention of Significant Air Quality Deterioration (PSD) regulations (40 CFR 52.21)

On March 10, 1980, the EPA issued a non-applicability determination to Rockwell International for the proposed addition of an electric arc furnace at its facility in Atchison, Kansas. The furnace addition will not significantly increase potential emissions of any pollutant regulated under the Clean Air Act.

On March 26, 1980, the EPA issued a non-applicability determination to Derby Refining Company for modifications to its Wichita, Kansas refinery. The proposed modifications include the addition of a carbon monoxide boiler and a new fluid catalytic cracking unit. The modifications will not significantly increase potential emissions of any regulated pollutant.

On April 1, 1980, the EPA issued a non-applicability determination to H. B. Reed & Company, Incorporated for its proposed coal boiler slag processing facility in La Cygne, Kansas. The proposed facility does not have the potential to emit 250 tons per year of any regulated pollutant.

On April 16, 1980, the EPA issued a non-applicability determination to Mobil Oil Corporation for the proposed addition of a Claus sulfur recovery unit at its refinery in Augusta, Kansas. The sulfur recovery unit will not significantly increase potential emissions of any regulated pollutant.

On May 6, 1980, the EPA issued a non-applicability determination to Iowa Beef Processors, Incorporated for its proposed new facility near Holcomb, Kansas. The proposed facility does not have the potential to emit 250 tons per year of any pollutant regulated under the Clean Air Act.

On May 12, 1980, the EPA issued a non-applicability determination to Getty Refining and Marketing Company for its proposal to replace two existing process heaters with two new heaters at its refinery in El Dorado, Kansas. This replacement will not contribute to a net significant increasae in emissions from the refinery.

On June 18, and June 26, 1980, the EPA issued non-applicability determinations to CRA, Incorporated for proposed modifications at its refinery in Coffeyville, Kansas. The modifications are a reboiler project and the addition of a new 150,000-barrel storage tank. Neither of these qualifies as a "Major modification."

On June 19, 1980, the EPA issued a non-applicabiity determination to Blacktop Construction Company for its proposed asphalt plant in Osage County, Kansas. The proposed plant does not have the potential to emit 250 tons per year of any regulated pollutant.

Under Section 307(b)(1) of the Clean Air Act, judicial review of any of these determinations is available *only* by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought by the EPA to enforce these requirements.

In these cases, the appropriate court is the Tenth Circuit Court of Appeals. A petition for review must be filed with this court on or before October 17, 1980.

The determinations and related background information are available for public inspection at: U.S. Environmental Protection Agency, Air and Hazardous Materials Division, Air Support Branch, 324 East 11th Street, Kansas City, Missouri 64106.

Dated: August 6, 1980.

Kathleen Q. Camin,

Regional Administrator, Region VII.

[FR Doc. 80-25020 Filed 8-15-80; 8:45 am]

BILLING CODE 6560-01-M

[FRL 1573-4]

Nonapplicability to PSD Regulations to Yonker Construction Co., Grimes, Iowa, et al.

Notice of non-applicability of PSD regulations to Yonker Construction Company, Grimes, Iowa; American Can Company, Des Moines, Iowa; Deere and Company, Waterloo, Iowa, Davenport, Iowa, Dubuque, Iowa; Amoco Oil Company, Sugar Creek, Missouri; Interstate Quarries, Lebanon, Missouri; New Era Construction Company, Inc., Sullivan, Missouri; Simpco Stone, Moberly, Missouri; Prestolite Battery Division, Manchester, Iowa; Royal Asphalt, Inc., Kansas City, Missouri; Johnson Brothers Corporation, Keokuk, Iowa; AMAX, Molybdenum Division, Fort Madison, Iowa; Martin-Marietta Aggregate, Independence, Missouri, Dallas County, Iowa; Associated Electric Coop., Inc., Randolph County, Missouri; Ash Grove Cement Company, Springfield, Missouri; Missouri Petroleum Products, Poplar Bluff, Missouri; Ozark Asphalt Company, West Plains, Missouri; St. Louis Metropolitan Sewer District, St. Louis, Missouri; Chemplex Company, Clinton, Iowa; Howard Construction Company, Sedalia, Missouri; Rochester Products, General Motors Corp., Sioux City, Iowa.

Notice is hereby given that the Environmental Protection Agency (EPA) has determined that construction proposals by the above companies are not subject to the review requirements of the Prevention of Significant Deterioration (PSD) regulations (40 CFR 52.21).

On February 20, 1980, the EPA issued a non-applicability determination to Yonker Construction Company for its proposed asphalt plant near Grimes, Iowa. This determination was based on EPA findings that the asphalt plant does not have the potential to emit 250 tons per year of any pollutant regulated by the Clean Air Act.

On March 6, 1980, the EPA issued a non-applicability determination to the Molybdenum Division of AMAX for its proposed tungsten processing facility in Fort Madison, Iowa. This detemination was based on EPA findings that the proposed facility does not have the potential to emit 250 tons per year of any regulated pollutant.

On March 6, 1980, the EPA issued a non-applicability determination to American Can Company for its proposed addition of a flexographic printing press to its Des Moines, Iowa facility. This determination was based on EPA findings that the proposed addition does not have the potential to emit 250 tons per year of any regulated pollutant.

On March 6, 1980, the EPA issued a non-applicability determination to Martin-Marietta Aggregates for its proposed portable limestone processing plant in Independence, Missouri. The proposed plant does not have the potential to emit 250 tons per year of any regulated pollutant.

On March 19, 1980, the EPA issued a non-applicability determination to Deere & Company for the addition of an electric foundry furnace to its facilities in Waterloo, Iowa. A second determination was issued to Deere & Company on May 5, 1980 for the addition of custom and touch-up paint booths at its Davenport and Dubuque, Iowa facilities. The PSD regulations do not apply to any of these modifications because none will significantly increase potential emissions of any regulated pollutant.

On March 28, 1980, the EPA issued a non-applicability determination to Associated Electric Cooperative, Inc., for the proposed addition of a coal preparation plant at the Thomas Hill Power Plant in Randolph County, Missouri. The proposed modification will not significantly increase potential emissions of any regulated pollutant.

On May 5, 1980, the EPA issued a non-applicability determination to Martin-Marietta Aggregates for its proposal to construct a sand and gravel facility in Dallas County, Iowa. The PSD regulations do not apply because emissions from the proposed facility will be of a fugitive type.

On May 15, 1980, the EPA issued a non-applicability determination to Amoco Oil Company for the proposed addition of a boiler to its refinery in Sugar Creek, Missouri. The boiler does not have potential emissions for any regulated pollutant of 100 tons per year, which is the cutoff level for refineries.

On June 19, 1980, the EPA issued a non-applicability determination to Ash Grove Cement Company for its proposed rock crushing plant near Springfield, Missouri. The PSD regulations do not apply because emissions are of a fugitive type.

On June 19, 1980, the EPA issued a non-applicability determination to Interstate Quarries for its proposed quarry operation near Lebanon, Missouri. Emissions from this source are of a fugitive type.

On June 19, 1980, the EPA issued non-applicability determinations to Missouri Petroleum Products, New Era Construction Co., and Ozark Asphalt Co., for proposed asphalt plants near Poplar Bluff, Sullivan, and West Plains, Missouri, respectively. None of the proposed plants have the potential to emit 250 tons per year of any regulated pollutant.

On June 19, 1980, the EPA issued a non-applicability determination to Simpco Stone for its proposed rock crushing plant near Moberly, Missouri. The PSD regulations do not apply because emissions are of a fugitive type.

On June 19, 1980, the EPA issued a non-applicability determination to St. Louis Metropolitan Sewer District for the LeMay Sewage Treatment Plant, which does not have the potential to emit 250 tons per year of any regulated pollutant.

On June 19, 1980, the EPA issued a non-applicability determination to Prestolite Battery Division of Eltra Corporation for its proposed lead oxide production system in Manchester, Iowa. The proposed facility does not have the potential to emit 250 tons per year of any regulated pollutant.

On June 20, 1980, the EPA issued a non-applicability determination to Chemplex Company for its proposed modification of its facility in Clinton, Iowa. The modification will not increase potential emissions of any regulated pollutant by more than 250 tons per year.

On June 20, 1980, the EPA issued a non-applicability determination to Johnson Brothers Corporation for its proposal to expand throughput at its coal transfer facility near Keokuk, Iowa. The proposed modification will not increase potential emissions (excluding fugitive emissions) of any regulated pollutant by 250 tons per year.

On June 23, 1980, the EPA issued non-applicability determinations to Royal Asphalt, Inc. and Howard Construction Company for proposed asphalt plants in Kansas City and near Sedalia, Missouri, respectively. Neither of these plants has the potential to emit 250 tons per year of any regulated pollutant.

On June 24, 1980, the EPA issued a non-applicability detrmination to Rochester Products for its proposed carburetor-testing facility in Sioux City, Iowa. The proposed facility does not have the potential to emit 250 tons per year of any regulated pollutant.

Under Section 307(b)(1) of the Clean Air Act, judicial review of any of these determinations is available *only* by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought by the EPA to enforce these requirements.

In these cases, the appropriate court is

282 man-hours per year during the first three

1979. Notice of availability of the Initial

After receipt, EPA has 90 days to

published the Initial Inventory on June 1,

complying with other applicable

In these cases, the appropriate court is the Eight Circuit Court of Appeals. A petition for review must be filed with this court on or before October 17, 1980.

The determinations and related background information are available for public inspection at: U.S. Environmental Protection Agency, Air and Hazardous Materials Division, 324 East 11th Street, Kansas City, Missouri 64106.

1-Amino-4-Substituted-9, 10-Dihydro-9, 10-Dioxo-2-Anthracenesulfonic Acid, Monosodium Salt; Premanufacture Notice

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Section 5(d)(2) requires EPA to publish in the **Federal Register** certain information about each PMN within 5 working days after receipt. This Notice announces receipt of a PMN and provides a summary.

DATE: Written comments by September 28, 1980.

ADDRESS: Written comments to: Document Control Officer (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St., SW, Washington, DC 20460, 202-755-8050.

FOR FURTHER INFORMATION CONTACT: Kirk Maconaughey, Premanufacturing Review Divison (TS-794), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St., SW, Washington, DC 20460, 202/428-3936.

SUPPLEMENTARY INFORMATION: Section 5(a)(1) of TSCA [90 Stat. 2012 (15 U.S.C. 2604)], requires any person who intends to manufacture or import a new chemical substance to submit a PMN to EPA at least 90 days before manufacture or import commences. A "new" chemical substance is any substance that is not on the Inventory of existing substances compiled by EPA under Section 8(b) of TSCA. EPA first published the Initial Inventory on June 1, 1979. Notice of availability of the Initial Inventory was published in the **Federal Register** of May 15, 1979 (44 FR 28558). The requirement to submit a PMN for new chemical substances manufactured or imported for commercial purposes became effective on July 1, 1979.

EPA has proposed premanufacture notification rules and forms in the **Federal Register** issues of January 10, 1979 (44 FR 2242) and October 16, 1979 (44 FR 59764). These regulations, however, are not yet in effect. Interested persons should consult the Agency's Interim Policy pubished in the **Federal Register** of May 15, 1979 (44 FR 28564) for guidance concerning premanufacture notification requirements prior to the effective date of these rules and forms. In particular, see page 28567 of the Interim Policy.

A PMN must include the information listed in Section 5(d)(1) of TSCA. Under section 5(d)(2) EPA must publish in the **Federal Register** nonconfidential information on the identity and use(s) of the substance, as well as a description of any test data submitted under section 5(b). In addition, EPA has decided to publish a description of any test data submitted with the PMN and EPA will publish the identity of the submitter unless this information is claimed confidential.

Publication of the section 5(d)(2) notice is subject to section 14 concerning disclosure of confidential information. A company can claim confidentiality for any information submitted as part of a PMN. If the company claims confidentiality for the specific chemical identity or use(s) of the chemical, EPA encourages the submitter to provide a generic use description, a nonconfidential description of the potential exposures from use, and a generic name for the chemical. EPA will publish the generic name, the generic use(s), and the potential exposure descriptions in the **Federal Register.**

If no generic use description or generic name is provided, EPA will develop one and after providing due notice to the submitter, will publish an amended **Federal Register** notice. EPA immediately will review confidentiality claims for chemical identity, chemical use(s), the identity of the submitter, and for health and safety studies. If EPA determines that portions of this information are not entitled to confidential treatment, the Agency will publish an amended notice and will place the information in the public file, after notifying the submitter and complying with other applicable procedures.

After receipt, EPA has 90 days to review a PMN under section 5(a)(1). The section 5(d)(2) **Federal Register** notice indicates the date when the review period ends for each PMN. Under section 5(c), EPA may, for good cause, extend the review period for up to an additional 90 days. If EPA determines that an extension is necessary, it will publish a notice in the **Federal Register.**

Once the review period ends, the submitter may manufacture the substance unless EPA has imposed restrictions. When the submitter begins to manufacture the substance, he must report to EPA, and the Agency will add the substance to the Inventory. After the substance is added to the Inventory, any company may manufacture it without providing EPA notice under section 5(a)(1)(A).

Therefore, under the Toxic Substances Control Act, a summary of the data taken from the PMN is published herein.

Interested persons may, on or before September 28, 1980, submit to the Document Control Officer (TS-793), Rm. E-447, Office of Pesticides and Toxic Substances, 401 M St., SW, Washington, DC 20460, written comments regarding this notice. Three copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the document control number "[OPTS-51113]" and the PMN number. Comments received may be seen in the above office between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding holidays.

(Sec. 5, 90 Stat. 2012 (15 U.S.C. 2604))

Dated: August 12, 1980.

Douglas G. Bannerman,

Acting Deputy Assistant Administrator for Chemical Control.

PMN 80-187

Close of Review Period.—October 28, 1980.

Manufacturer's Identity.—Claimed confidential.

Specific Chemical Identity.—Claimed confidential. Generic name provided: 1-Amino-4-substituted-9,10-dihydro-9,10-dioxo-2-anthracenesulfonic acid, monosodium salt.

The following summary is taken from data submitted by the manufacturer in the PMN.

Use.—Dye.

Production Estimates.—Claimed confidential.

Physical/Chemical Properties.—Physical form: Powder.

Toxicity Data:

Acute oral LD_{50} (rat)—>5.0 g/kg.

Primary dermal irritation (rabbit)—Negative.

Eye irritation (rabbit)—Nagative.

Exposure.—The submitter states that the manufacturing operation will require one worker per shift. Exposure will not exceed 282 man-hours per year during the first three years of manufacture.

Customer exposure will not exceed 8 man-hours per week. The manufacturer estimates that 10 customers will purchase the PMN substance.

Environmental Release/Disposal.—Manufacture. The raw materials are completely reacted and there are no byproducts produced. After isolation and filtration, the product is dried and package. Process water is sent to a treatment plant. Nothing is released to the atmosphere or sent to solid waste dumps. In the dyeing process, 90-95% of the dye is exhausted on the fiber. The remainder in the dyebath would become part of the effluent from the plant as would water from washing operations.

[FR Doc. 80-25024 Filed 8-15-80; 8:45 am]

BILLING CODE 6560-01-M

[OPTS-51112; FRL 1576-2]

Bisphenol A-Epoxy Resin, 1,4-Butanediol, Para Amino Benzoic Acid, and Phthalic Anhydride Polymer; Premanufacture Notice

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Section 5(d)(2) requires EPA to publish in the **Federal Register** certain information about each PMN within 5 working days after receipt. This Notice announces receipt of a PMN and provides a summary.

DATE: Written comments by October 3, 1980.

ADDRESS: Written comments to: Document Control Officer (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St., SW, Washington, DC 20460, 202-755-8050.

FOR FURTHER INFORMATION CONTACT: Robert Smith, Premanufacturing Review Division (TS-794), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St., SW, Washington, DC 20460, 202-426-8816.

SUPPLEMENTARY INFORMATION: Section 5(a)(1) of TSCA [90 Stat. 2012 (15 U.S.C. 2604)], requires any person who intends to manufacture or import a new chemical substance to submit a PMN to EPA at least 90 days before manufacture or import commences. A "new" chemical substance is any substance that is not on the Inventory of existing substances compiled by EPA under Section 8(b) of TSCA. EPA first published the Initial Inventory on June 1, 1979. Notice of availability of the Initial Inventory was published in the **Federal Register** of May 15, 1979 (44 FR 28558). The requirement to submit a PMN for new chemical substances manufactured or imported for commercial purposes became effective on July 1, 1979.

EPA has proposed premanufacture notification rules and forms in the **Federal Register** issues of January 10, 1979 (44 FR 2242) and October 16, 1979 (44 FR 59764). These regulations, however, are not yet in effect. Interested persons should consult the Agency's Interim Policy Published in the **Federal Register** of May 15, 1979 (44 FR 28564) for guidance concerning premanufacture notification requirements prior to the effective date of these rules and forms. In particular, see page 28567 of the Interim Policy.

A PMN must include the information listed in Section 5(d)(1) of TSCA. Under section 5(d)(2) EPA must publish in the **Federal Register** nonconfidential information on the identity and use(s) of the substance, as well as a description of any test data submitted under section 5(b). In addition, EPA has decided to publish a description of any test data submitted with the PMN and EPA will publish the identity of the submitter unless this information is claimed confidential.

Publication of the section 5(d)(2) notice is subject to section 14 concerning disclosure of confidential information. A company can claim confidentiality for any information submitted as part of a PMN. If the company claims confidentiality for the specific chemical identity or use(s) of the chemical, EPA encourages the submitter to provide a generic use description, a nonconfidential description of the potential exposures from use, and a generic name for the chemical. EPA will publish the generic name, the generic use(s), and the potential exposure descriptions in the **Federal Register.**

If no generic use description or generic name is provided, EPA will develop one and after providing due notice to the submitter, will publish an amended **Federal Register** notice. EPA immediately will review confidentiality claims for chemical identity, chemical use(s), the identity of the submitter, and for health and safety studies. If EPA determines that portions of this information are not entitled to confidential treatment, the Agency will publish an amended notice and will place the information in the public file, after notifying the submitter and complying with other applicable procedures.

After receipt, EPA has 90 days to review a PMN under section 5(a)(1). The section 5(d)(2) **Federal Register** notice indicates the date when the review period ends for each PMN. Under section 5(c), EPA may, for good cause, extend the review period for up to an additional 90 days. If EPA determines that an extension is necessary, it will publish a notice in the **Federal Register.**

Once the review period ends, the submitter may manufacture the substance unless EPA has imposed restrictions. When the submitter begins to manufacture the substance, he must report to EPA, and the Agency will add the substance to the Inventory. After the substance is added to the Inventory, any company may manufacture it without providing EPA notice under section 5(a)(1)(A).

Therefore, under the Toxic Substances Control Act, a summary of the data taken from the PMN is published herein.

Interested persons may, on or before October 3, 1980, submit to the Document Control Officer (TS-793), Rm. E-447, Office of Pesticides and Toxic Substances, 401 M St., SW, Washington, D.C. 20460, written comments regarding this notice. Three copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the document control number "[OPTS-51112]" and the PMN number. Comments received may be seen in the above office between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding holidays.

(Sec. 5, 90 Stat. 2012 (15 U.S.C. 2604)).

Dated: August 12, 1980.

Douglas G. Bannerman,

Acting Deputy Assistant Administrator for Chemical Control.

PMN 80-189.

Close of Review Period. November 2, 1980.

Manufacturer's Identity. Inmont Corp., 5935 Milford Ave., Detroit, MI 48210.

Specific Chemical Identity. Bisphenol A-expoxy resin, 1,4-butanediol, para amino benzoic acid, and phthalic anhydride polymer.

The following summary is taken from data submitted by the manufacturer in the PMN.

Uses. Automotive primer (90%); appliance enamel (10%).

Production Estimates	added by the proposed unit. In addition,	combustion engines as additions to the

Significant Air Quality Deterioration

FOR FURTHER INFORMATON CONTACT:

growing season in Suffolk County with

Production Estimates

	Kilogram per year	
	Minimum	Maximum
First year	40,000	50,000
Second year	80,000	100,000
Third year	120,000	150,000

BILLING CODE 6560-01-M

[Region VII; FRL 1573-3]

Approvals of PSD Permits to Anheuser-Busch, Inc., St. Louis, Mo., Muscatine Power and Water Department, Muscatine, Iowa, Meredith Corp., Des Moines, Iowa, Union Electric Co., St. Louis County, Mo., St. Charles County, Mo.

Notice is hereby given that the Environmental Protection Agency (EPA) has issued construction permits under the Prevention of Significant Air Quality Deterioration (PSD) regulations (40 CFR 52.21) to Anheuser-Busch, Inc., Muscatine Power and Water Department, Meredith Corp., and Union Electric Company.

On September 18, 1979, the EPA formally approved Anheuser-Busch's plans to modify and construct additions to the grain handling systems at its St. Louis, Missouri plant. The PSD permit was issued based on the Tier I requirements of the PSD regulations, and the permit requires that the state-issued construction permit will not be revised in a manner which would no longer limit the emissions from the proposed modification to 50 tons per year.

On January 24, 1980, the EPA formally approved Muscatine Power and Water Departments proposal to construct new 166 megawatt coalfired steam-electric generating unit at its power plant in Muscatine, Iowa. The PSD permit requires that reductions in sulfur dioxide emissions from existing units are greater than sulfur dioxide emissions to be added by the proposed unit. In addition, sulfur dioxide and particulate matter emissions from the proposed unit must be limited to the lowest achievable emission rate.

On April 2, 1980, the EPA formally approved Meredith Corporation's proposal to install a new rotogravure printing press at its magazine printing plant in Des Moines, Iowa. The PSD permit requires that the emissions of volatile organic compounds shall not exceed ten percent of the solvent used for any calendar month.

On May 15, 1980, the EPA formally approved Union Electric Company's proposal to add three 55 megawatt oil-fired combustion turbines to its Meramec power plant in St. Louis County, Missouri and to add two 55 megawatt oil-fired combustion turbines to its Sioux power plant in St. Charles County, Missouri. The PSD permit limits emissions of sulfur dioxide, nitrogen oxides, carbon monoxide, and particulate matter from the proposed units.

Under Section 307(b)(1) of the Clean Air Act, judicial review of any of the above actions is available *only* by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought by the EPA to enforce these requirements.

In these cases, the appropriate court is the Eighth Circuit Court of Appeals. A petition for review must be filed with this court on or before October 14, 1980.

Copies of the permits and related information are available for public inspection upon request at the following location: U.S. Environmental Protection Agency, Air and Hazardous Materials Division, 324 East 11th Street, Kansas City, Missouri 64106.

Dated: August 6, 1980.

Kathleen Q. Camin,

Regional Administrator, Region VII.

[FR Doc. 80-25014 Filed 8-15-80; 8:45 am]

BILLING CODE 6560-01-M

[Region VII; FRL 1573-6]

Approval of PSD Permit to Colorado Interstate Gas Co.; Kearney County, Kans.

Notice is hereby given that on September 27, 1979, the Environmental Protection Agency (EPA) issued a permit to Colorado Interstate Gas Company, giving approval to construct five 1475 horsepower natural gas-fires internal combustion engines as additions to the Hugoton Field Compressor Station Number 4 in Kearney County, Kansas. This permit was issued under the Prevention of Significant Air Quality Deterioration regulations (40 CFR 52.21) and requires that each engine shall be operated to control the emissions of nitrogen dioxide (NO_2), and total nitrogen oxides (NO_x), to less than 1.5 grams per horsepower-hour, and 15.0 grams per horsepower-hour, respectively.

This permit and a previous PSD permit to Colorado Interstate Gas for different engines dated June 20, 1979, were revised on February 22, 1980. The revision allowed for an extension to performance test schedules and the continued operation of compressor drive White CG–14, while the stacks on existing electric generator drives Worth EG–1 through 4 and existing compressor drives are raised. It has been determined that neither of these permit modifications has any significant environmental or other impact.

Under Section 301(b)(1) of the Clean Air Act, judicial review of this permit is available *only* by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought by the EPA to enforce these requirements.

In this case, the appropriate court is the Tenth Circuit Court of Appeals. A petition for review must be filed with this court on or before October 14, 1980.

Copies of the permit are available for public inspection upon request at the following location: U.S. Environmental Protection Agency, Air and Hazardous Materials Division, Air Support Branch, 324 East 11th Street, Kansas City, Missouri 64106.

Dated: August 6, 1980.

Kathleen Q. Camin,

Regional Administrator, Region VII.

[FR Doc. 80-25015 Filed 8-15-80; 8:45 am]

BILLING CODE 6560-01-M

[Region VII; FRL 1573-7]

Approval of PSD Permit to Sunflower Electric Cooperative, Inc., Holcomb, Kans.

Notice is hereby given that on May 19, 1980, the Environmental Protection Agency (EPA) issued a permit to Sunflower Electric Cooperative, Incorporated under the Prevention of Significant Air Quality Deterioration (PSD) regulations (40 CFR 52.21).

The subject facility is a new 348 megawatt (gross) coal-fired steam-electric generating unit to be located near Holcomb, Kansas.

The permit places emission limitations on nitrogen oxides, particulate matter, sulfur dioxide, and carbon monoxide.

Under Section 307(b)(1) of the Clear Air Act, judicial review of this permit is avilaible *only* by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought by the EPA to enforce these requirements.

In this case, the appropriate court is the Tenth Circuit Court of Appeals. A petition for review must be filed with this court on or before *October 14, 1980.*

The permit and related background information are available for public inspection at: U.S. Environmental Protection Agency, Air and Hazardous Materials Division, Air Support Branch, 324 East 11th Street, Kansas City, Missouri 64106.

Dated: August 6, 1980.

BILLING CODE 6560-01-M

[OPP-180485; FRL 1575-7]

New York State Department of Environmental Conservation; Issuance of Specific Exemption To Use Fenvalerate To Control Colorado Potato Beetle on Potatoes

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted a specific exemption to the New York State Department of Environmental conservation (hereinafter referred to as the "Applicant") to use fenvalerate (Pydrin) for the control of the Colorado potato beetle on 29,500 acres of potatoes in thirteen counties in New York. The specific exemption is issued under the Federal Insecticide, Fungicide, and Rodenticide Act.

DATE: The specific exemption expires on September 15, 1980.

ADDRESS: Jack E. Housenger, Registration Division (TS–767), Rm: E–107, Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460.

FOR FURTHER INFORMATON CONTACT: Jack Housenger, (202/426–0223) at the above address.

SUPPLEMENTARY INFORMATION: The Colorado potato beetle is a significant economic pest of commercially produced potatoes in New York State. both the larvae and the adults feed on leaves of potato plants. This feeding may result in defoliation of the vines which prevents development of tubers or greatly reduces yield.

The beetle emerges from its overwintering site in early to mid-May, usually coinciding with or preceding emergence of the potato sprouts. An at-planting application of aldicarb has been effective in controlling the beetles and first brood larvae in the spring and early summer. Control with aldicarb usually lasts until the first or second week in July. However, in March 1980, after discovering residues of aldicarb in several wells in Suffolk County on Long Island, the use of aldicarb in that county was banned. The Applicant states that loss of this use poses a great threat to the potato industry and agriculture of Suffolk County.

Although azinphosmethyl, phosmet, carbaryl, methamidiphos, methoxychlor, parathion, carbofuran, endosulfan, monocrotophos, phorate, and phosalone are registered for use on potatoes to control this pest, the Applicant claims that these pesticides are either ineffective or unsatisfactory for Colorado potato beetle control due to pesticidal resistance.

Growers in Suffolk County are expected to use in at-planting treatment of phorate in place of the usual aldicarb treatment. However, its effectiveness remains questionable, and growers fear that bettles will defoliate emerging plants too quickly to protect them with registered foliage sprays. To insure that this does not in fact happen, the Applicant requested the use of Pydrin (fenvalerate) alone and/or tank-mixed with oxamyl as early foliage sprays to protect rapidly growing foliage from adult beetle attack.

The Applicant proposed to use fenvalerate, manufactured under the trade name Pydrin, at a rate of 0.2 pound active ingredient (a.i.) per acre per application, using ground or air equipment, observing a 7-day pre-harvest interval. Applications will be made in the counties of Albany, Columbia, Dutchess, Nassau, Orange, Putnam, Rennselaer, Rockland, Schenectady, Suffolk, Ulster, Wayne, and Westchester.

The Applicant further requested that Pydrin applications alone or tank-mixed with oxamyl be allowed for the entire growing season in Suffolk County, with a maximum of 14 applications; also, that Pydrin applications be allowed in upstate New York to control the first and second brood of Colorado potato beetle, with a maximum of 6 applications.

Since EPA had not yet received the necessary scientific information concerning the oxamyl/fenvalerate tank mix and the need for a pesticide was immediate, EPA granted the specific exemption for use of fenvalerate alone. New York has the option of requesting an amendment to the specific exemption granted for fenvalerate to include the tank mixture.

EPA has determined that residues of fenvalerate in or on potatoes and in milk or meat would not be expected to exceed 0.02 part per million (ppm) as a result of the proposed use. This residue level has been judged to be adequate to protect the public health. Since fenvalerate is highly toxic to bees and aquatic vertebrates and invertebrates, appropriate restrictions have been imposed. This use of fenvalerate is not expected to pose an unreasonable hazard to the environment.

After reviewing the application and other available information, EPA has determined that the criteria for an exemption have been met. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until September 15, 1980, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. The product Pydrin, manufactured by Shell Chemical Company, may be applied;
2. Pydrin may be applied at a rate of 0.2 pound a.i. per acre;
3. A maximum of fourteen applications of fenvalerate may be made in Suffolk County and a maximum of six applications may be made in the other counties named above;
4. No application will be made within seven days of harvest;
5. A maximum of 29,500 acres in New York may be treated;
6. A maximum of 63,400 pounds a.i. of fenvalerate may be used;
7. Applications will be made with air or ground equipment;
8. Spray mixture volumes of 35–125 gallons of water will be applied by ground equipment. A minimum of 3 gallons of water will be applied by aerial equipment;
9. Applications will be made by State-certified applicators or persons under their direct supervision;
10. Fenvalerate is toxic to aquatic organisms. It must be kept out of any

body of water. It may not be applied where runoff is likely to occur. It may not be applied when weather conditions favor drift from treated areas. Care must be taken to prevent contamination of water by cleaning of equipment or disposal of wastes;

11. Fenvalerate should not be applied any closer to fish-bearing waters than indicated in the chart below:

Buffer zone (feet) application height/method	Fenvalerate (application rate—lbs/acre)			
	(0.05)	(0.1)	(0.2)	(0.4)
2 ft/ground spray:				
Freshwater	100	290	300	500
Saltwater	(1)			
8ft/aerial spray: [2]				
Freshwater	450	750	1,200	1,900
Saltwater				
15 ft/aerial spray: [3]				
Freshwater	850	1,400	2,300	3,600
Saltwater				
35 ft/aerial spray: [4]				
Freshwater	2,000	3,300	5,200	5,200
Saltwater				

[1] Marine organism toxicity is low.
[2] For spraying low crops, such as celery or lettuce.
[3] For spraying taller crops, such as maturing corn.
[4] For spraying trees of even height, as in orchards.

NOTE.—Mist blowers shall be treated as aerial spray—35 R.

It is recommended that pesticide applications be made when wind speeds are between 2 and 5 miles per hour. No pesticide applications are to be made when wind speeds exceed 10 miles per hour. Applications closer than those allowed in the above chart may result in fish and/or aquatic invertebrate kills;

12. Fenvalerate is highly toxic to bees exposed to direct treatment or residues on crops or weeds. It may not be applied or allowed to drift to weeds in bloom on which economically significant numbers of bees are actively foraging. Protective information may be obtained from the State Cooperative Agricultural Extension Service;

13. Potatoes treated according to the above provisions will not have residues of fenvalerate in excess of 0.02 ppm.Residues of fenvaluate in meat and milk will not exceed 0.02 PPM. Potatoes with residues of fenvalerate which do not exceed 0.02 ppm may enter interstate commerce. The Food and Drug Administration, U.S. Department of Health and Human Services, has been advised of this action;

14. Root crops other than potatoes may not be planted for 12 months after the last application. No other crop may be planted for 60 days after the last application;

15. The EPA will be immediately informed of any adverse effects resulting from the use of fenvalerate in connection with this exemption; and

16. The Applicant is responsible for assuring that all of the provisions of this specific exemption are met and must submit a report summarizing the results of this program by February 15, 1981.

(Sec. 18 as amended (92 Stat. 819 (7 U.S.C. 136))

Dated: August 11, 1980.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

BILLING CODE 6560-01-M

[OPP-180479; FRL 1575-8]

North Dakota and South Dakota Department of Agriculture; Issuance of Specific Exemptions To Use 2,4-D To Control Annual and Perennial Broadleaf Weeds in Millet

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted specific exemptions to the North and South Dakota Department of Agriculture (hereafter referred to as "North Dakota," and "South Dakota," or the "Applicants") to use 2,4-D amine to control broadleaf weeds in 80,000 acres of millet in North Dakota and 25,000 acres of millet in South Dakota. The specific exemptions are issued under the Federal Insecticide, Fungicide, and Rodenticide Act.

DATES: North Dakota's specific exemption expires on August 1, 1980; South Dakota's exemption expires on September 1, 1980.

ADDRESS: Libby Welch, Registration Division (TS-767), Rm: E-124, Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Libby Welch, (202/426-0223) at the above address.

SUPPLEMENTARY INFORMATION: Millets are minor crops grown for grain and forage. Of at least five different groups of millets grown in the United States, foxtails and proso are the primary ones grown in North Dakota, proso in South Dakota. According to the Applicants, approximately 99 percent of the millet is harvested for grain and the major commercial use for the grains is in birdseed mixtures. Proso millet can also be foraged or cut and dried for hay. Foxtail millet hay and ground grain can be fed to livestock. Broadleaf weeds, such as redroot pigweeds, Kochia, and wild mustard, are of primary concern to millet growers. Until recently there were no EPA-registered pesticides for control of broadleaf weeds in millets. A tolerance has recently been established for residues of atrazine in or on millet. However, atrazine is not effective on perennial broadleaf weeds and may limit farmers' rotational crop practices. 2,4-D will control both annual and perennial broadleaf weeds. North Dakota has estimated a loss valued at $700,000 and South Dakota at $80,000 if broadleaf weeds are not controlled.

The Applicants proposed to make a single application of 0.50 pound dimethylamine salt of 2,4-D per acre on a maximum of 80,000 acres of millet in North Dakota and 25,000 acres in South Dakota. State-certified commercial applicators and growers using air and ground equipment will make the applications.

2,4-D is a widely used broadleaf weed herbicide and tolerances have been established on foods that make up approximately 80 percent of the total average human diet. EPA has determined that millet grain and straw residue levels of 2,4-D not in excess of 0.1 part per million (ppm) and 10 ppm, respectively, are adequate to protect the public health and that this use should not exceed these levels. The proposed use is not expected to pose an unreasonable hazard to the environment.

After reviewing the applications and other available information, EPA has determined that the criteria for exemptions have been met.

Accordingly, the Applicants have been granted specific exemptions to use the pesticide noted above until August 1, 1980 in South Dakota and September 1, 1980 in North Dakota, to the extent and in the manner set forth in the applications. The specific exemptions are also subject to the following conditions:

1. Use of EPA-registered dimethylamine salt of 2,4-D which is appropriately labeled for the intended means of application (ground or air) is authorized;

2. 2,4-D will be applied at a maximum rate of one-half pound active ingredient per acre. A maximum of one application may be made;

3. A maximum of 80,000 acres may be treated in North Dakota, 25,000 acres in South Dakota may be treated;

4. A maximum of 40,000 pounds active ingredient may be applied in North Dakota; 12,500 pounds in South Dakota may be applied;

5. Applications may be made by air or ground equipment;

6. All applications will be made by State-certified commercial applicators or by growers;

7. No application will be made within four weeks of heading time;

8. All applications shall be made only in situations where the weed problem is serious and substantial crop losses are imminent;

9. EPA has determined that residues resulting from this use will not exceed 0.1 ppm in or on millet grain and 10 ppm in or on straw. The Food and Drug Administration, U.S. Department of Health and Human Services, has been advised of this action;

10. All applicable directions, restrictions, and precautions on the EPA-registered label must be followed;

11. Precautions must be taken to minimize or avoid spray drift to non-target areas;

12. The EPA will be immediately informed of any adverse effects resulting from the use of this pesticide in connection with these exemptions; and

13. North and South Dakota shall each be responsible for assuring that all of the provisions of its specific exemption are met, and each must submit a report summarizing the results of this program. South Dakota's report is due by December 1, 1980; North Dakota's report is due by February 1, 1981.

(Sec. 18, as amended (92 Stat. 819; 7 U.S.C. 136))

Dated: August 11, 1980.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Program.

FEDERAL RESERVE SYSTEM

American Financial Services, Inc.; Proposal To Continue To Engage in Insurance Activities

American Financial Services, Inc., Miltona, Minnesota, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to continue to engage in general insurance agency activities in a community with a population of less than 5,000. These activities would be performed from offices of Applicant's subsidiary bank in Miltona, Minnesota, and the geographic area to be served is Miltona, Minnesota, and surrounding areas within 12 miles of Miltona. Such activities have been specified by the Board in section 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 8, 1980.

Board of Governors of the Federal Reserve System, August 11, 1980.

Cathy L. Petryshyn,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Bank Holding Companies; Notice of Proposed de Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act 912 U.S.C. § 1843(c)(8)) and section 225.4(b)(1) of the Board's Regulation Y (12 CFR § 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and, except as noted, received by the appropriate Federal Reserve Bank not later than September 4, 1980.

A. *Federal Reserve Bank of New York* (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

Assistant Secretary of the Board.
[FR Doc. 80-24883 Filed 8-15-80; 8:45 am]
BILLING CODE 6210-01-M

Kiowa Bancorporation, Inc.; Formation of Bank Holding Company

Kiowa Bancorporation, Inc., Kiowa, Kansas, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 80 percent or more of the voting shares of Bank of Kiowa, Kiowa, Kansas. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than September 11, 1980. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, August 11, 1980.
Cathy L. Petryshyn,
Assistant Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

Medicare Program; Schedule of Limits on Home Health Agency Costs Per Visit

AGENCY: Health Care Financing Administration (HCFA), HHS.
ACTION: Correction to final notice.

SUMMARY: This document makes certain revisions to the final notice of the Medicare schedule of limits on home health agency costs per visit that was published in the **Federal Register** on June 5, 1980 (45 FR 38014).

FOR FURTHER INFORMATION, CONTACT: Alton Cobb, 301-594-9773.

SUPPLEMENTARY INFORMATION:

In FR Doc. No. 80-17085, published on June 5, 1980, the following corrections are made:

1. On page 38018, column 3, under "Schedule of Limits" change the chart in the example as follows:

Type of visit	Visits	Limit	Adjusted limit	
Skilled nursing	5,000	42.67	50.08	$250,400
Physical therapy	1,000	42.42	49.79	49,790
Home health aide	1,000	32.26	37.86	37,860
Aggregate cost limit				338,050

2. On pages 38019-38021, "Table III, SMSA Constituent Counties" should be revised as follows. There were several errors in the table as printed on June 5, 1980; in addition, the format and spacing made accurate reading of the locations difficult. Therefore, we are reprinting the entire table in clearer form for the convenience of users.

Table III.—*SMSA Constituent Counties*

BILLING CODE 4110-35-M

Office of Human Development Services

[Program Announcement No. 13631.801]

Special Project Grant Program-Projects of National Significance in Developmental Disabilities

AGENCY: Office of Human Development Services, DHHS.

SUBJECT: Announcement of availability of grant funds for the special project Grant Program-Projects of National Significance in Developmental Disabilities.

SUMMARY: The Administration on Development Disabilities (ADD) announces that applications will be accepted for grants under the Special Project Grant Program-Projects of National Significance authorized by Title I, Section 145 of the Developmentally Disabled Assistance , and Bill of Rights Act, Pub. L. 95-602, (42 U.S.C. 6001). Regulations applicable to this program include the Administration on Developmental Disabilities general regulations, 45 CFR Part 1385, and the regulations governing Discretionary Grant Programs (45 CFR Part 1387).

DATE: Closing date for receipt of applications is September 5, 1980.

Scope of this Announcement

This program announcement covers only projects of national significance authorized under the Special Project Grants Program of the Developmentally Disabled Assistance and Bill of Rights Act, Pub. L. 95-602, and encompasses only those projects that relate to the Developmental Disabilities Protection and Advocacy Systems.

Program Purpose

The Special Projects Grant Program, as authorized in Section 145(a) of Pub. L. 95-602, enables the Administration on Developmental Disabilities to award grants for a variety of purposes, among which are:

1. To demonstrate how to establish programs which will expand or improve services to developmentally disabled persons
2. To increase public awareness and public education programs
3. To demonstrate services for economically disadvantaged developmentally disabled persons
4. To gather and disseminate information.

For the purposes of this program announcement, these projects must:

(1) Be designed to have a direct impact on Developmental Disabilities State Protection and Advocacy systems throughout the country; and

(2) Involve activities to be conducted in a number of sites in various parts of the country as part of a unified program.

Program Goal and Objective

All States and Territories participating in the Basic State Formula Grant Program have systems designed to protect and advocate for the rights of persons with development disabilities. Staff of Protection and Advocacy Systems must deal with a wide variety of programs and issues, including legal matters on behalf of the developmentally disabled persons whom they serve. May of the systems

need information in the most

project costs. The non-Federal share of

conducted by a panel of experts in the

stated purposes and objectives as stated

evidenced by the time date stamp or

need information in the most expenditious manner possible on relevant laws, court decisions, as well as guidance on legal matters in order to protect their clients' rights to services.

The purpose of these projects is to provide back-up specialized knowledge, legal expertise, and support to State Protection and Advocacy Systems that will enhance and strengthen their capabilities to engage in outreach to minority, institutionalized, geographically isolated and other hard-to-reach persons with developmental disabilities. Specifically, the objectives for these projects are:

1. To provide State Protection and Advocacy Systems with the necessary legal and technical information that will assist them in assuring the rights of institutionalized, minority and other under-served and under-involved persons with developmental disabilities; and

2. To provide technical information to State Protection and Advocacy systems to enable them to overcome obstacles to reaching underserved, traditionally separated, and isolated persons with developmental disabilities.

Eligible Applicants

Applications may be made by public or private non-profit organizations experienced in the provision of legal services and which have particular expertise in areas relevant to the rights of developmentally disabled persons. Applicants must have legal and technical expertise specifically related to the civil rights of institutionalized developmentally disabled persons as well as the rights of developmentally disabled members of racial and ethnic minority groups affirmed in Title VI of the Civil Rights Act.

Available Funds

The Administration on Developmental Disabilities expects to award two or three projects of national significance under this announcement. The size of each grant is expected to range from $150,000 to $200,000 for one (1) year.

Special Consideration for Funding

It is anticipated that one grant will be awarded to an applicant located in the Western half of the United States, and one to an applicant located in the Eastern half. The Commissioner may waive this criterion in favor of high quality and demonstrated ability to implement the objectives for these projects.

Grantee Share of Project

Grantees will be required to provide at least ten (10) percent of the total project costs. The non-Federal share of the projects may be in the form of cash or in-kind contributions. Please refer to HHS regulation 45 CFR Part 74, Administration of Grants (see 38 FR 26274, September 19, 1973) which is included in the application kit.

The Application Process

Availability of Application Forms

Application for a grant under the Special Project Grant Programs must be submitted on standard forms provided for this purpose. Application kits which contain the prescribed application form, project description, and related information may be obtained by contacting: Division of Management Services, Administration on Developmental Disabilities, Office of Human Development Services, Department of Health and Human Services, Room 3166H, North Building, 330 Independence Avenue, SW., Washington, D.C. 20201. Attention: 13631.801. Telephone: (202) 472-7236.

Application Submission

Completed applications should be submitted to: Director, Division of Grants and Contract Management, Office of Human Development Services, Room 1740, North Building, 330 Independence Avenue, SW., Washington, D.C. 20201.

The application shall be signed by an individual authorized to act for the applicant agency and to assume the obligations imposed by the terms and conditions of the grant award including the regulations for Special Project Grants-Projects of National Significance.

One signed original and two copies of the grant application, including all attachments must be submitted.

In addition, concurrently, one (1) copy of the application is to be submitted to the applicant's State Planning Council for review and comment and one (1) copy should be submitted to the appropriate DHHS Regional Office for review and comment. (Addresses for the DHHS Regional Offices are included in the application kit.)

A-95 Notification Process

Projects of National Significance are exempt from the A-95 Clearinghouse requirements.

Application Consideration

The Commissioner determines the final action to be taken with respect to each grant application.

Applications received by the closing date which are complete and conform to the requirements of this program announcement are subject to a competitive review and evaluation conducted by a panel of experts in the specific area being addressed or closely related program areas.

The Commissioner's decision takes into account the Special Eligibility Considerations outlined in the Project Description in addition to recommendations resulting from the competitive review by the panel members, the comments by the State Planning Council, and the Administration on Developmental Disabilities' Regional Program Directors, as well as any other persons qualified to give advice.

The Commissioner makes grant awards consistent with the purposes of the Act, the regulations, and program announcements within the limits of Federal funds available. The official grant award document is the Notice of Grant Awarded which sets forth in writing the amount of funds granted, the purpose of the grant, the terms and conditions of the grant award, the effective date of the award, the budget period for which support is given and the total grantee participation. The initial award also specifies the project period for which support is contemplated. After the Commissioner has reached a decision either to disapprove or not to fund a competing grant application, unsuccessful applicants will be notified in writing of that decision.

Criteria for Review and Evaluation of Applications

Competing grant applications will be reviewed and evaluated against the following criteria:

1. *Quality of the application.*—Quality of the application (20 points). The description of the purposes and objectives of the grant activities, the major tasks to be accomplished, and difficulties likely to be encountered are clearly stated and show that the applicant has a thorough understanding of State Protection and Advocacy Systems. Some specific factors that must be addressed include the roles and reponsibilities of the Protection and Advocacy systems relative to legal and civil rights of developmentally disabled persons and their service needs; the capabilities of and problems encountered by Protection and Advocacy sytems in fulfilling such roles and responsibilities; and the rights of developmentally disabled persons.

2. *Technical approach and methodology.*—Technical approach and methodology (30 points). The proposed procedures and methodology for the project should be of high quality and technically sound. The methodology should be consistent with the project's stated purposes and objectives as stated in this announcement and show how the anticipated results of the project will be clearly and systematically achieved. Timetables for completion of the project should be definitive and realistic. Applications should also include a discussion of how the procedures and results of the project will be evaluated.

3. *Qualifications.*—Qualifications (30 points). The application should identify all project staff, including curriculum vitae, their role in the project, level of time equivalents, and the position of project staff within the total organization of the applicant agency. Project staff should have general expertise relative to the developmental disabilities population and their legal and civil rights, and demonstrated capability related to assuring the rights of institutionalized and minority persons with developmental disabilities. Applications should be accompanied by letters of support from agencies and organizations whose interests and/or responsibilities are relevant to the purposes of the proposed project.

4. *Relevance of project objectives to program goals.*—Relevance of project objectives to program goals (10 points). The objectives of the project should be clearly delineated. The discussion of the objectives should articulate the relevance of the project objectives to the objectives of this grant announcement.

5. *Budget.*—Budget (10 points). The proposed budget should be realistic, reasonable, and include a *justification* in terms of the project activities. If project costs are not within the range described in the program announcement, sufficient explanation should be provided to justify the discrepancies. Applications should include discussions of the feasibility and propriety of continuing the project after Federal funding ends, and plans for securing financial support, if appropriate.

Closing Date for Receipt of Applications

The closing date for receipt of applications under this program announcement is September 5, 1980.

Applications may be mailed or hand delivered to the receiving office. Hand delivered applications will be accepted during the work hours of 9:00 a.m. to 5:00 p.m. An application will be considered to have arrived by the closing date if:

1. The application was sent by registered or certified mail no later than September 5, 1980, as evidenced by the U.S. Postal Service;

2. The application is sent by mail and received on or before the closing date in the Department of Health and Human Services or the Office of Human Development Services mailrooms as evidenced by the time date stamp or other documentary evidence of receipt maintained by such mailroom; or

3. The application is hand delivered to the office designated to receive the application in the application instructions. Hand delivered applications will be accepted no later than close of business September 5, 1980 in any case.

Late Applications

Late applications will not be accepted and applicants will be notified accordingly.

(Catalog of Federal Domestic Assistance Program Number: 13,631, Special Project Grants, DD)

Dated: August 8, 1980.

Evelyn Provitt,

Commissioner on Developmental Disabilities.

Approved: August 13, 1980.

Kathryn Morrison,

Acting Assistant Secretary for Human Development Services.

BILLING CODE 4110-92-M

Office of the Secretary

Title VI of the Civil Rights Act of 1964; Lead Status for Compliance Relating to Hospitals and Other Health Facilities

AGENCY: Department of Health and Human Services.

ACTION: Announcement of Lead Agency Status for Title VI Compliance Activities Relating to Hospitals and Other Health Facilities.

Notice is hereby given that by operation of law under the Department of Education Organization Act, Pub. L. 96-88, section 509, all Federal interagency agreements in force on May 4, 1980, the effective date of the Act, which delegated to the Department of Health, Education, and Welfare (HEW) certain compliance responsibilities under Title VI of the Civil Rights Act of 1964 with regard to hospitals and other health facilities are deemed to refer and apply to the Department of Health and Human Services (HHS).

Accordingly, HHS now has lead agency responsibility for the delegated Title VI compliance activities relating to hospitals and other health facilities under agreements entered into with the following Federal agencies:

Agency	Effective date of delegation [1]
Department of Agriculture	Feb. 7, 1967.
Department of Commerce	Feb. 14, 1967.
Department of Defense	Sept. 20, 1979.
Department of Housing and Urban Development.	May 13, 1966.
Atomic Energy Commission (Department of Energy).	Mar. 25, 1966.
General Services Administration	June 25, 1966.
Law Enforcement Assistance Administration.	Sept. 24, 1970.
National Science Foundation	Apr. 11, 1966.
Office of Economic Opportunity (Community Services Administration).	Mar. 25, 1966.
Office of Emergency Planning (Federal Emergency Management Agency).	Mar. 25, 1966.
Small Business Administration	Apr. 29, 1966.
Veterans Administration	Mar. 31, 1966.

[1] With the exception of the General Services Administration agreement which provided for a retroactive effective date, the effective date is the date the delegation was accepted by HEW.

Dated: July 28, 1980.

Patricia Roberts Harris,

Secretary, Department of Health and Human Services.

BILLING CODE 4110-12-M

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Comment Regarding Mountain Home VA Medical Center, Tennessee; Meeting

Pursuant to Section 106 of the National Historic Preservation Act, Section 2(b) of Executive Order 11593 and § 800.6(d) of the Council's regulations, "Protection of Historic and Cultural Properties" (36 CFR Part 800), a panel of the Council met on July 14 and 15, 1980, to consider a series of undertakings proposed by the Veterans Administration at Mountain Home VA Medical Center, Johnson City, Tennessee, which would have an adverse effect on the Mountain Home Historic Complex, a property determined eligible for inclusion in the National Register of Historic Places. The undertakings proposed for Mountain Home include the provision of educational space for the Medical College of East Tennessee State University, the construction of a clinical addition, the construction of a 208-bed domicile, an exchange of land with the Johnson City Memorial Hospital, and the development of a master plan. At the meeting, the Council panel adopted comments which have been transmitted to the Honorable Max Cleland, Administrator of the Veterans Administration.

This notice, pursuant to § 800.6(d)(5) of the Council's regulations, is to inform those interested that copies of these comments are available upon request from the Executive Director, Advisory Council on Historic Preservation, Suite

430, 1522 K Street NW., Washington, DC

BILLING CODE 4310-10-M

Public Information Meeting

Notice is hereby given pursuant to § 800.6(b)(3) of the Council's regulations, "Protection of Historic and Cultural Properties" (36 CFR Part 800), that on August 28, 1980, at 7:30 p.m., a public information meeting will be held at the Savannah Civic Center, Orleans Square, corner of Montgomery and Liberty Streets, Savannah, Georgia.

The meeting is being called by the Executive Director of the Council in accordance with § 800.6(b)(3) of the Council's regulations. The purpose of the meeting is to provide an opportunity for representatives of National, State, and local units of government, representatives of public and private organizations, and interested citizens to receive information and express their views concerning the proposed Harry S Truman Parkway, an undertaking licensed by the U.S. Army Corps of Engineers and the U.S. Coast Guard that will affect the Savannah Historic District and the Savannah Victorian Historic District, properties included in the National Register of Historic Places. Consideration will be given to the undertaking, its effects on National Register or eligible properties, and alternate courses of action that could avoid, mitigate, or minimize any adverse effects on such properties.

The following is a summary of the agenda of the meeting.

1. An explanation of the procedures and purpose of the meeting by a representative of the Executive Director of the Council.
2. A description of the undertaking and an evaluation of its effects on the properties by the Savannah District Corps of Engineers.
3. A statement by the Georgia State Historic Preservation Officer.
4. Statements from local officials, private organizations, and the public on the effect of the undertaking on the properties.
5. A general question period.

Speakers should limit their statement to five minutes. Written statements in furtherance of oral remarks will be accepted by the Council at the time of the meeting. Additional information regarding the meeting is available from the Executive Director, Advisory Council on Historic Preservation 1522 K Street, NW., Washington, D.C. 20005 (202–254–3495) Attention: Mr. Don L. Klima.

Robert R. Garvey, Jr.,

Executive Director.

August 12, 1980.

BILLING CODE 4310-10-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. D–80–611]

Honolulu Area Office, Region IX (San Francisco); Designation

AGENCY: Department of Housing and Urban Development.

ACTION: Designation of Acting Deputy Area Manager, Honolulu Area Office, Region IX.

SUMMARY: The designation of an individual to serve as Acting Deputy Area Manager, Honolulu Area Office, for a period of 60 days.

FOR FURTHER INFORMATION CONTACT: Alfred J. DeMartini, Acting Regional Counsel, U.S. Department of Housing and Urban Development, Region IX, 450 Golden Gate Avenue, Box 36003, San Francisco, California 94102.

Designation of Acting Deputy Area Manager, Honolulu Area Office, Region IX

Patricia M. Jones, Special Assistant/EIDP Program, is hereby designated to serve as the Acting Deputy Area Manager of the Honolulu Area Office, Region IX, with all the powers, functions and duties redelegated or assigned to Deputy Area Managers. This designation shall remain in effect for 60 days following the effective date of this document.

Effective Date: April 21, 1980.

(Delegation effective May 4, 1962, 27 FR 4319; Interim Order II, 31 FR 815, January 21, 1966)

J. P. Sabella,

Acting Regional Administrator, Region IX, San Francisco.

BILLING CODE 4210-01-M

[Docket No. D–80–613]

Los Angeles Area Office, Region IX Order of Succession; Designation

AGENCY: Department of Housing and Urban Development.

ACTION: Designating of Acting Area Manager, Los Angeles Area Office; order of succession.

SUMMARY: An updating of the designation of officials who may serve as Acting Area Manager, Los Angeles Area Office, Region IX.

Designation of Acting Area Manager, Los Angeles Area Office, Region IX:

The officers appointed to the following listed positions in the Los Angeles Area Office, Region IX, are hereby designated to serve as Acting Area Manager, Los Angeles Area Office, during the absence of the Area Manager with all the powers, functions, and duties redelegated or assigned to the Area Manager: *Provided,* That no officer is authorized to serve as Acting Area Manager unless all other officers whose titles precede his in this designation are unable to act by reason of absence or there is a vacancy in the said listed position:

1. Deputy Area Manager for Operations
2. Deputy Area Manager for Management
3. Director, Housing Division
4. Director, Community Planning & Development Division
5. Area Counsel

This designation supersedes the designation effective on August 1, 1979, published at 44 FR 54551, September 20, 1979.

(Delegation effective October 1, 1970, published at 36 FR 3389, February 23, 1971)

This designation is effective on June 16, 1980.

John J. Tuite,

Area Manager, Los Angeles Area Office, Region IX, San Francisco.

[FR Doc. 80-24675 Filed 8-15-80; 8:45 am]

BILLING CODE 4210-01-M

[Docket No. D–80–612]

Office of the Regional Administrator San Francisco Regional Office, Region IX; Designation

AGENCY: Department of Housing and Urban Development.

ACTION: Designation of Acting Regional Administrator and Acting Deputy Regional Administrator; order of succession.

SUMMARY: The Regional Administrator, Region IX, is updating the designation of officials who may serve as Acting Regional Administrator and Acting Deputy Regional Administrator for the San Francisco Regional Office, Region IX, during the absence of the Regional Administrator and Deputy Regional Administrator.

FOR FURTHER INFORMATION CONTACT: Alfred J. DeMartini, Acting Regional Counsel, U.S. Department of Housing and Urban Development, Region IX, 450 Golden Gate Avenue, Box 36003, San Francisco, California 94102.

Designation of Acting Regional Administrator, Region IX, San Francisco

The officers appointed to the following listed positions in Region IX (San Francisco) are hereby designated to serve as Acting Regional Administrator, Region IX, San Francisco, during the absence of the Regional Administrator with all the powers, functions, and duties redelegated or assigned to the Regional Administrator: *Provided,* That no officer is authorized to serve as Acting Regional Administrator unless all other officers whose titles precede his in this designation are unable to act by reason of absence or there is a vacancy in the said listed position:

1. Deputy Regional Administrator
2. Regional Counsel
3. Director, Office of Regional Community Planning and Development
4. Director, Office of Regional Housing
5. Director, Office of Regional Fair Housing and Equal Opportunity
6. Director, Office of Regional Administration

Designation of Acting Deputy Regional Administrator, Region IX, San Francisco

The officers appointed to the following listed positions in Region IX (San Francisco) are hereby designated to serve as Acting Deputy Regional Administrator, Region IX, San Francisco, during the absence of the Deputy Regional Administrator, with all the powers, functions and duties redelegated or assigned to the Deputy Regional Administrator: *Provided,* That no officer is authorized to serve as Acting Deputy Regional Administrator unless all other officers whose titles precede his in this designation are unable to act by reason of absence: *Provided, further,* That in the absence of both the Regional Administrator and Deputy Regional Administrator, if any of the officers listed below are serving as Acting Regional Administrator by virtue of the designation published concurrently herewith, the next officer in the order listed below shall serve as Acting Deputy Regional Administrator:

1. Regional Counsel
2. Director, Office of Regional Community Planning and Development
3. Director, Office of Regional Housing
4. Director, Office of Regional Fair Housing and Equal Opportunity
5. Director, Office of Regional Administration

These designations supersede and cancel the designation of Acting Regional Administrator effective November 10, 1977 (42 FR 60615); the designation of Acting Deputy Regional Administrator effective May 1, 1979 (44 FR 49794); and any supplemental designations, published or unpublished, that may be in effect prior to the date of this document.

(Delegation effective May 4, 1962, 27 FR 4319; Interim Order II, 31 FR 815, January 21, 1966)

This document is effective on June 20, 1980.

J. P. Sabella,

Acting Regional Administrator, Region IX, San Francisco.

BILLING CODE 4310-55-M

Bureau of Indian Affairs

Intent To Prepare an Environmental Impact Statement (EIS) on the Ak-Chin Water Supply Project

AGENCY: Department of the Interior, Bureau of Indian Affairs.

ACTION: Notice.

SUMMARY: This notice advises the public that the Bureau of Indian Affairs intends to prepare an environmental impact statement on a proposal to develop and construct a well field, power system, and water delivery system to meet the emergency irrigation water requirements of the Ak-Chin Indian Community, Pinal County, Arizona. This notice is being published pursuant to the requirements of the National Environmental Policy Act (NEPA) regulations (40 CFR 1501.7). A schedule for scoping meetings and a deadline for accepting written comments have not been established. Written comments or suggestions may be submitted in lieu of or in addition to participation at the meetings. Those wishing to do so may send them to: Area Director, Bureau of Indian Affairs, Phoenix Area Office, P.O. Box 7007, Phoenix, Arizona 85011, Attn: Real Property Management.

FOR INFORMATION CONTACT: For information concerning public meetings, the proposed action or the environmental impact statement, please contact: James R. Crowther, Bureau of Indian Affairs, Phoenix Area Office, P.O. Box 7007, Phoenix, Arizona 85011, Telephone: (602) 241-2275; (FTS) 8-261-2275.

SUPPLEMENTARY INFORMATION: Authorized by Public Law 95-328 of July 28, 1979, the Ak-Chin Water Supply Project is to provide water and settle all claims for water that the Ak-Chin Indian Community has against the United States. It is intended to meet the Community's emergency water needs through phased delivery of water for irrigation on the reservation including groundwater from nearby Federal lands which could result in the annual withdrawal of 85,000 acre feet of water. The delivery of groundwater shall continue until augmented or replaced by a permanent water supply.

The project will require the drilling of a well field on Federal lands and the construction of a power supply system and water delivery system traversing a combination of Federal and non-Federal lands. Alternatives to be considered include alternate water supply areas, alternate energy sources, alternate water conveyance systems, alternate conveyance routes, and the "no action" alternative.

The Bureau of Indian Affairs is the lead Federal agency for the EIS, which will be compiled under contract with an Architectural-Engineering consultant. An Interagency Environmental Committee composed of representatives from the Office of Environmental Project Review, U.S. Geological Survey, Bureau of Land Management, Water and Power Resources Service, and the Fish and Wildlife Service has been established to assist in the NEPA process.

Public hearings were held during December 1979, on the Ak-Chin Indian Reservation, and at the BIA Phoenix Area Office. Coordination with Federal, state and local agencies and the public will continue throughout preparation of the EIS. Scoping meetings at dates and times to be announced, as well as additional public meetings, will be held as necessary to ensure that the full range of issues will be identified prior to compilation of the draft EIS.

The draft environmental statement will be prepared by early 1981 and will be available for public and agency review following its publication. Public hearings will also be held after the draft environmental statement is circulated for comments.

Dated: August 8, 1980.

M. W. Babby,

Acting Deputy Commissioner of Indian Affairs.

[FR Doc. 80-25013 Filed 8-15-80; 8:45 am]

BILLING CODE 4310-02-M

Bureau of Land Management

[OR 10729]

Oregon; Proposed Continuation of Withdrawal

The Bureau of Land Management, U.S. Department of the Interior, proposes that the existing land withdrawal made by Public Land Order 5481 on February 5, 1975, be continued in its entirety for a 20-year period, pursuant to section 204 of the Federal Land Policy and Management Act of October 21, 1976, 90 Stat. 2751, 43 U.S.C. 1714. The withdrawn land is described as follows:

Willamette Meridian

Revested Oregon and California Railroad Grant Land

T. 36 S., R. 6 W.,
Sec. 3, SW¼.

The area described contains 160 acres in Josephine County, Oregon.

The purpose of the withdrawal is to protect a site used for storage of superior tree clones produced at the Sprague Tree Seed Orchard. The land is currently segregated from location and entry under the public land laws generally, including the mining laws, but not the mineral leasing laws. No change is proposed in the purpose or segregative effect of the withdrawal.

On or before September 22, 1980, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal continuation may present their views in writing to the undersigned authorized officer of the Bureau of Land Management.

Notice is hereby given that an opportunity for a public hearing is afforded in connection with the proposed withdrawal continuation. All interested persons who desire to be heard on the proposal must submit a written request for a hearing to the undersigned before September 22, 1980. Upon determination by the State Director, Bureau of Land Management, that a public hearing will be held, a notice will be published in the **Federal Register** giving the time and place of such hearing. Public hearings are scheduled and conducted in accordance with BLM Manual Sec. 2351. 16B.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demands for the land and its resources. He will review the withdrawal rejustification to insure that continuation would be consistent with the statutory objectives of the programs for which the land is dedicated; the area involved is the minimum essential to meet the desired needs; the maximum concurrent utilization of the land is provided for; and an agreement is reached on the concurrent management of the land and its resources. He will also prepare a report for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued and if so, for how long. The final determination on the continuation of the withdrawal will be published in the **Federal Register.** The existing withdrawal will continue until such final determination is made.

All communications in connection with this proposed withdrawal continuation should be addressed to the undersigned officer, Bureau of Land Management, U.S. Department of the Interior, P.O. Box 2965, Portland, Oregon 97208.

Dated: August 5, 1980.

Harold A. Berends,

Chief, Branch of Lands and Minerals Operations.

[FR Doc. 80-25008 Filed 8-15-80; 8:45 am]

BILLING CODE 4310-84-M

[OR 6920]

Oregon; Proposed Continuation of Withdrawal

The Bureau of Land Management, U.S. Department of the Interior, proposes that the existing land withdrawal made by Public Land Order 5372 on July 30, 1973, be continued in its entirety for a 20-year period, pursuant to section 204 of the Federal Land Policy and Management Act of October 21, 1976, 90 Stat. 2751, 43 U.S.C. 1714. The withdrawn land is described as follows:

Willamette Meridian

Revested Oregon and California Railroad Grant Land

T. 8 S., R. 6 W.,
Sec. 33, W½NW¼.

The area described contains 80 acres in Polk County, Oregon.

The purpose of the withdrawal is to protect the scientific, educational, and research values of the Little Sink Research Natural Area. The land is currently segregated from location and entry under the public land laws generally, including the mining laws, but not the mineral leasing laws. No change is proposed in the purpose or segregative effect of the withdrawal.

On or before September 22, 1980, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal continuation may present their views in writing to the undersigned authorized officer of the Bureau of Land Management.

Notice is hereby given that an opportunity for a public hearing is afforded in connection with the proposed withdrawal continuation. All interested persons who desire to be heard on the proposal must submit a written request for a hearing to the undersigned before September 22, 1980. Upon determination by the State Director, Bureau of Land Management, that a public hearing will be held, a notice will be published in the **Federal Register** giving the time and place of such hearing. Public hearings are scheduled and conducted in accordance with BLM Manual Sec. 2351.16B.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demands for the land and its resources. He will review the withdrawal rejustification to insure that continuation would be consistent with the statutory objectives of the programs for which the land is dedicated; the area involved is the minimum essential to meet the desired needs; the maximum concurrent management of the land and its resources. He will also prepare a report for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued and if so, for how long. The final determination on the continuation of the withdrawal will be published in the **Federal Register.** The existing withdrawal will continue until such final determination is made.

All communications in connection with this proposed withdrawal continuation should be addressed to the undersigned officer, Bureau of Land Management, U.S. Department of the Interior, P.O. Box 2965, Portland, Oregon 97208.

Dated: August 5, 1980.

Harold A. Berends,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

Call for Oil Shale Technology Nominations

AGENCY: Bureau of Land Management, Interior.

ACTION: Call for nominations of technologies to be applied and the general geographic area of application under the renewed prototype oil shale leasing program in Colorado, Utah, and Wyoming.

SUMMARY: On May 27, 1980, the Under Secretary of the Interior announced a decision to expand the Department's prototype oil shale program by leasing up to four additional tracts. The goals of the prototype program are:

To provide a new energy source to the Nation by stimulating development of commercial oil shale technology by private industry;

To insure the environmental integrity of the affected areas and at the same time to develop a full range of environmental safeguards and restoration techniques for incorporation into the planning for a mature oil shale industry;

To permit an equitable return to all parties in the development of the public resource; and

To develop management expertise in the leasing and supervision of oil shale development as a basis for future administrative procedures.

The Under Secretary announced that the additional prototype tracts considered for lease will be selected, in part, on the basis of these goals.

He also directed that recommendation of tracts should relate to technologies or development concepts planned for those tracts. He stated:

"The tract or tracts ultimately chosen to be leased must be designed and located so as to provide us with the broader experience envisioned under the program. The (Department) should review the technologies presently being employed or proposed to be employed in the existing prototype leases and all other oil shale projects and recommend which technologies should be encouraged in the additional leasing. The tract or tracts to be offered for sale should be delineated so as to invite bids for those companies that plan to use the technology or technologies which I decide * * * should be encouraged with the

limited new prototype leasing * * *. I can

Salt Lake City, Utah: September 8, 1980;

of construction charges which, if paid,

INTERSTATE COMMERCE

limited new prototype leasing * * *. I can stipulate at this time that from among the up to four tracts which may be leased, at least one will be delineated to encourage multi-mineral development."

The purpose of this call is to give the public an opportunity to identify technologies which should be developed within the Prototype Program and to indicate the *general* geographic areas where the technologies proposed will be applied. The technologies or development concepts proposed by industry will play a role in developing the tract selection criteria described by the Under Secretary in his May 27 decision. Ultimate selection of tracts for leasing will be based on nominations, environmental considerations, potential resource recovery, oil shale resources data, proposed development technology (including multi-minerals development), socioeconomic impacts, land use planning, and State preferences.

Drilling operations for resource definition within specific areas of interest may be conducted by interested parties under the regulations of the appropriate Federal land management agency. Because of the possible necessity to identify tracts for land use planning early in 1981, it may not be possible to begin a drilling program for tract nomination purposes during the 1981 season.

Upon completion of the development of the tract delineation and tract selection criteria and their publication in the **Federal Register**, the Department of the Interior will issue a call for nomination of specific tracts for prototype oil shale leasing on or about January 15, 1981.

FOR FURTHER INFORMATION CONTACT: Brock Short or Craig Hall, Bureau of Land Management (530), Department of the Interior, 18th and C Streets, NW., Washington, D.C. 20240, (202) 343–7722.

SUPPLEMENTAL INFORMATION: This notice is the first step in the continuation of the Department of the Interior's Prototype Oil Shale Leasing Program. Nominations of technologies to be commercially demonstrated and the *general* area suitable for such technology will be accepted by the Bureau of Land Management for a period of 60 days from the date of this notice.

The nomination should contain the following information:

1. Name, legal address, telephone number of the nominator.

2. A recommendation of the technology proposed in developing the tract. This description need not be exhaustive, but should provide the Government an accurate understanding of the technological approach proposed. An assessment of technical and environmental readiness of the proposed technology as it will be employed for field application should be a part of this description.

3. The quantity and quality of the mineral resource required by the proposed technology and preliminary plans to effect maximum utilization of the resource, including multi-minerals development, should such potential be present.

4. The *general* geographic area in which land considered suitable for application of the proposed technology is located. By "general geographic area," it is meant a description which is no more specific than a township(s).

5. A discussion of the need for Federal land to apply the nominated technology and an assessment of the likelihood of the technology being tested without Federal lands availability.

6. Discussions of the need for acreage beyond the present allowable maximum of 5,120 acres may be submitted for informational purposes of the Department of the Interior. This additional need may be for off-site support facilities, off-site disposal areas, or to provide an adequate resource base to insure commercial viability.

7. Other information which should be submitted shall include, but need not be limited to, water and power requirements, transportation needs, personnel needs during development phase and during production, plans for mitigation of socioeconomic impacts, and any other general information which could aid the Government in decisionmaking in the technology selection process.

DATE: Nominations should be submitted in triplicate, not later than October 14, 1980.

ADDRESS: Send nominations to: Director (530), Bureau of Land Management, 18th and C Streets, NW., Washington, D.C. 20240.

Dated: August 12, 1980.

Daniel P. Beard,

Acting Assistant Secretary for Land and Water Resources.

[FR Doc. 80-24851 Filed 8-15-80; 8:45 am]

BILLING CODE 4310-84-M

Utah; Availability of Kaiparowits Coal Development and Transportation Study

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Bureau of Land Management has released and made available for public review and comment a study of coal development and transportation on the Kaiparowits Plateau in southern Utah, and has scheduled public meetings to discuss the findings of the study.

DATES: Comments by October 15, 1980.

ADDRESSES: Comments should be sent to the Bureau of Land Management, Attention: John Stephenson, University Club Building, 136 East South Temple, Salt Lake City, Utah 84111. *Single copies* of the study may be obtained from the Public Affairs Staff, Bureau of Land Management, Telephone (801) 524–4227, at the address listed above and from the Office of Public Affairs, Bureau of Land Management, 18th and C Streets, NW., Washington, D.C. 20240, Telephone (202) 343–5717.

FOR FURTHER INFORMATION CONTACT: John Stephenson, Bureau of Land Management, University Club Building, 136 East South Temple, Salt Lake City, Utah 84111, Telephone (801) 524–5645, or Walter Rewinski, Office of Coal Management, Bureau of Land Management, 18th and C Streets, NW., Washington, D.C. 20240, Telephone (202) 343–6821.

SUPPLEMENTARY INFORMATION: The Kaiparowits Coal Development and Transportation Study identifies and analyzes major environmental and socio-economic impacts of coal production and transportation from the Kaiparowits Plateau in Southern Utah on National Parks, National Forests, public lands, and State lands. Three levels of coal production are analyzed in the study: A low production level of five million tons per year, a medium production level of 54 million tons per year and a high production level of 84 million tons per year. Transportation of coal by truck, coal slurry pipeline, and rail along various alternative routes is also analyzed in the study.

The Kaiparowits Coal Development and Transportation Study was undertaken to identify the effects of coal mining and transportation on the Kaiparowits Plateau in advance of receiving, and acting upon, specific coal mining or transportation proposals. The study is a planning tool designed to help guide Federal and State land managers in making future land management decisions. The study is intended to present potential impacts objectively and makes no value judgments about the desirability of coal development or the acceptability of impacts.

Public meetings will be held as follows to discuss the findings of the study:

Salt Lake City, Utah: September 8, 1980; 7 p.m., Room 1310, University Club Building, 136 East South Temple.

Cedar City, Utah: September 9, 1980; 7 p.m., Bureau of Land Management District Office Conference Room, 1579 North Main Street.

Kanab, Utah: September 10, 1980; 7 p.m., Kanab Elementary School Auditorium, 55 West 100 North.

Page, Arizona: September 11, 1980; 8:15 p.m., Page Townhouse, Public Meeting Room, 605 South Navajo Drive.

Flatstaff, Arizona: September 12, 1980; 7 p.m., Coconino County Health Department Auditorium, 2500 North Fort Valley Road.

August 12, 1980.

Ed Hastey,

Associate Director, Bureau of Land Management.

Water and Power Resources Service

Ash Fallout From Mount St. Helens Eruptions; Possible Deferment of Construction Payments Due the United States

The Water and Power Resources Service has received inquiries as to the possibility of deferring the construction payments that will become due from contracting entities located within the Mount St. Helens ash fallout zone. Preliminary reports on the eruptions thus far indicate substantial loss to certain crops in some affected areas, incidences of equipment failure due to abrasive quality of the ash, and major cleanup costs. It appears that several months, at least, will be required to measure the full impacts of the volcanic eruptions.

The Act of September 21, 1959 (73 Stat. 584) provides the Secretary of the Interior authority to defer the payment of construction charges which, if paid, would impose an "undue burden" on the water users. It is the responsibility of the applicant organization to demonstrate that "undue burden" does exist. This will involve the presentation of financial data and a possible audit of the applicant's records. For irrigation applicants, such relief will, in most instances, be made available only after crop returns and farm expenses data are available at the end of the irrigation season.

If a deferment is deemed appropriate, then a formal supplemental contract will be required. That contract may not lengthen the repayment period beyond that authorized for the project, nor may it reduce the total obligation payable under existing repayment arrangements.

The Regional Director, Boise, Idaho, has been delegated the authority to take final action on any deferments requested because of the Mount St. Helens eruptions and to approve the form of deferment contracts. (Secretary's Order 3055, dated July 22, 1980, redelegated by the Commissioner of Water and Power Resources on August 4, 1980.)

Criteria for deferment applications and deferment contracts are being developed. A copy will be furnished on written request, following final approval which is anticipated about August 25.

Any proposed draft contracts will be made available for public review. Thereafter, a 30-day period will be allowed for receipt of written comments from the public. Negotiating meetings, if any, will be open to the public, and advance notice will be furnished to anyone requesting it. Requests for copies of any contracts or notices of meetings must be in writing. Written requests or telephone inquiries may be directed to the following:

Office	Mailing address	Telephone contact
Columbia Basin Project Office	Project Manager, Water and Power Resources Service, P.O. Box 815, Ephrata, WA 98823.	Mr. William Hewitt, Chief Water and Land Operations Division; (509) 754–4611.

BILLING CODE 4310-09-M

INTERSTATE COMMERCE COMMISSION

[Volume No. OP4-009]

Motor Carriers; Permanent Authority Decisions

Decided: July 28, 1980.

The following applications, filed on or after July 3, 1980, are governed by Special Rule 247 of the Commission's Rules of Practice, see 49 CFR 1100.247. Special rule 247 was published in the **Federal Register** on July 3, 1980, at 45 FR 45539.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.247(B). Applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service and to comply with the appropriate statutes and Commission regulations. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings: With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements filed within 45 days of publication of this decision-notice (or, if the application later becomes unopposed) appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notice that the decision-notice is effective. Within 60 days after publication an applicant

supplies used in the manufacture and furniture), and (2) *materials, equipment,*

Mendota Rd., West St. Paul, MN 55118.

may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board Number 2, Members Chandler, Eaton, and Liberman. Member Eaton not participating.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

MC 41136 (Sub-29F), filed July 25, 1980. Applicant: FLEET CARRIER CORPORATION, 525 South Blvd., Pontiac, MI 48053. Representative: Leonard R. Kofkin, 39 South La Salle St., Chicago, IL 60603. Transporting *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), for the United States Government, between points in the U.S.

MC 109397 (Sub-517F), filed July 25, 1980. Applicant: TRI-STATE MOTOR TRANSIT CO., a corporation, P.O. Box 113, Joplin, MO 64801. Representative: A. N. Jacobs (same address as applicant). Transporting *shipments weighing 100 pounds or less* if transported in a motor vehicle in which no one package exceeds 100 pounds, between points in the U.S.

BILLING CODE 7035-01-M

Motor Carrier Finance Applications; Decision-Notice

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by Special Rule 240 of the Commission's rules of practice (49 CFR 1100.240). These rules provide, among other things, that opposition to the granting of an application must be filed with the Commission within 45 days after the date of notice of filing of the application is published in the **Federal Register.** Failure seasonable to oppose will be construed as a waiver of opposition and participation in the proceeding. Opposition under these rules should comply with Rule 240(c) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, and specify with particularity the facts, matters and things relied upon, but shall not include issues or allegations phrased generally. Opposition not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of any protest shall be filed with the Commission, and a copy shall also be served upon applicant's representative or applicant if no representative is named. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 240(c)(4) of the special rules and shall include the certification required.

Section 240(c) further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request its dismissal.

Further processing steps will be by Commission notice or order which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication (August 18, 1980) except for good cause shown.*

Any authority granted may reflect administratively acceptable restrictive amendments to the transaction proposed. Some of the applications may have been modified to conform with Commission policy.

We find with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant [except those with impediments) upon compliance with certain requirements which will be set forth in a notifiation of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Dated: August 12, 1980.

By the Commission, Review Board Number 5, Members Krock, Taylor and Williams. (In MC-F-14447F, Board member Taylor dissenting. Boychuks' Transport Ltd. is insolvent and operating at a loss. Not financially fit.)

MC-F-14447F, filed July 18, 1980. BOYCHUKS' TRANSPORT LTD. (Boychuks) (P.O. Box 6298, Station "C", Edmonton, Alberta, Canada T5B 4K6)—CONTROL AND PURCHASE—WAITE'S TRANSPORT LTD. (Waite's) (220 37th Avenue, NE, Calgary, Alberta, Canada T2E 2L9). Representatives: Richard S. Mandelson, 1600 Lincoln Center Bldg., 1660 Lincoln Street, Denver, CO 80264, and Donald R. Brown, Box 9300, 39th Floor, Bow Valley Square 2, 205 5th Avenue, SW, Calgary, AB T2P 2W5. Boychuks seeks authority to purchase the capital stock of Waite's Rice Truck Lines (Rice) (P.O. Box 395, Black Eagle, MT 59414), which controls Boychuks through stock ownership, and John S. Rice, Mary M. Rice, J. Michael Rice, Patricia R. Rice, M. Kathleen Rice, Rosemary A. Waters, and Patrick W. Rice, individually and as a trustee, and Daniel Rice, as trustee, who control Rice through stock ownership, seek to acquire concurrent control of Waite's through the transaction. Simultaneously with that transaction, the operating rights of Waite's will be acquired by Boychuks. The interstate operating rights of Waite's which Boychuks is acquiring are contained in Certificate No. MC-142690, which authorizes the transportation, as a motor common carrier, over irregular routes, of *explosives,* between the part of entry on the international boundary line between the United States and Canada, at Sweetgrass, MT, on the one hand, and, on the other, Sweetgrass, MT. Certificate to expire July 24, 1983. Boychuks has been granted authority to operate as a motor common carrier in MC-146840 (Sub-No. 1). Rice is authorized to operate as a motor common carrier pursuant to certificates issued in MC-52465 and sub-numbers thereunder. Rice is affiliated with Figol Distributors Limited, a motor common carrier pursuant to certificates issued in MC-134574 and sub-numbers thereunder. Rice is also affiliated with Transystems, Inc., which has been granted authority in MC-F-14105F, to operate as a motor common carrier. Transystems has also been authorized to operate as a motor contract carrier in MC-144872 and sub-numbers thereunder.

Note.—In MC-F-14391F, Rice Truck Lines seeks authority to continue in control of Boychuks upon the institution by Boychuks of operations, in interstate or foreign commerce, as a motor common carrier.

Agatha L. Mergenovich,
Secretary.

[Notice No. 43]

Motor Carrier Temporary Authority Applications

August 7, 1980.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in **Federal Register.** One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

MC 8958 (Sub-36TA), filed November 29, 1979, and published in the **Federal Register** issue of February 19, 1980, and republished as corrected this issue. Applicant: THE YOUNGSTOWN CARTAGE COMPANY, 825 West Federal St., Youngstown, OH 44501. Representative: Philip J. Cianciolo (same as applicant). *Common carrier* over irregular routes, transporting *Steel reinforcing bars and accompanying bar chairs, bar spacers, bar ties, bar supports, clips, screened chairs, stirrup, tie chairs or bar chairs or spacers combined not to exceed 10% of aggregate weight,* between Strongsville, OH and points in KY, for 180 days. Motor Carrier Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Between McQueeney and New Braunfels, serving all intermediate points: From McQueeney over F. M. Road 725 to New Braunfels, and return over the same route. Between Rio Grande City and Rachal, serving all intermediate points: From Rio Grade City over F. M. Road 755 to Rachal, and return over the same route. Between New Berlin and the intersection of F. M. Road 775 and Interstate Highway 10, serving all intermediate points: From New Berlin of F. M. Road 775 to its intersection with Interstate Highway 10, and return over the same route. Between Red Rock and the intersection of F. M. Road 812 and U.S. Highway 183 near Austin, serving all intermediate points: From Red Rock over F. M. Road 812 to its intersection with U.S. Highway 183, and return over the same route. Between Fort McKavett and the intersection of F. M. Road 864 and State Highway 29, serving all intermediate points: From Fort McKavett over F. M. Road 864 to its intersection with State Highway 29, and return over the same route. Between Stinton and Rockport, serving all intermediate points: From Stinton over F. M. Road 881 to Rockport, and return over the same route. Between Troy and the intersection of F. M. Road 935 and U.S. Highway 77 near Chilton, serving

all intermediate points: From Troy over F. M. Road 935 to its intersection with U.S. Highway 77, and return over the same route. Between Buda and the intersection of F. M. Road 967 and Interstate Highway 35, serving all intermediate points: From Buda over F. M. Road 967 to its intersection with Interstate Highway 35, and return over the same route. Between Austin and Webberville, serving all intermediate points: From Austin over F. M. Road 969 to Webberville, and return over the same route. Between Granger and Georgetown, serving all intermediate points: From Granger over F. M. Road 971 to Georgetown, and return over the same route. Between the intersection of F. M. Road 972 and Interstate Highway 35 north of Georgetown and the intersection of F. M. Road 972 and State Highway 95 south of Bartlett, serving all intermediate points: From the intersection of F. M. Road 972 and Interstate Highway 35 over F. M. Road 972 to its intersection with State Highway 95, and return over the same route. Between Manor and Del Valle, serving all intermediate points: From Manor over F. M. Road 973 to Del Valle, and return over the same route. Between Waco and Aquilla, serving all intermediate points: From Waco over F. M. Road 993 to Aquilla, and return over the same route. Between Lasara and the intersection of F. M. Road Road 1015 and F. M. Road 1422, serving all intermediate points: From Lasara over F. M. Road 1015 to its intersection with F. M. Road 1422, and return over the same route. Between La Gloria and Linn-San Manuel, serving all intermediate points: From La Gloria over F. M. Road 1017 to Linn-San Manuel, and return over the same route. Between Eagle Pass and El Indio, serving all intermediate points: From Eagle Pass over F. M. Road 1021 to El Indio, and return over the same route. Between Utopia and the intersection of F. M. Road 1050 and U.S. Highway 83, serving all intermediate points: From Utopia over F. M. Road 1050 to its intersection with U.S. Highway 83, and return over the same route. Between Reagan Wells and the intersection of F. M. Road 1051 and U.S. Highway 83, serving all intermediate points: From Reagan Wells over F. M. Road 1051 to its intersection with U.S. Highway 83, and return over the same route. Between Katemcy and the intersection of F. M. Road 1222 and U.S. Highway 87, serving all intermediate points: From Katemcy over F. M. Road 1222 to its intersection with U.S. Highway 87, and return over the same route. Between Troy and the intersection of F. M. Road 1237 and State Highway 36, serving all intermediate points: From Troy over F. M. Road 1237 to its intersection with State Highway 36, and return over the same route. Between Bynum and Abbott, serving all intermediate points: From Bynum over F. M. Road 1242 to Abbott, and return over the same route. Between Pipe Creek and the intersection of F. M. Road 1283 and F. M. Road 471, serving all intermediate points. From Pipe Creek over F. M. Road 1283 to its intersection with F. M. Road 471, and return over the same route. Between Aquilla and the intersection of F. M. Road 1304 and Interstate Highway 35, serving all intermediate points: From Aquilla over F. M. Road 1304 to its intersection with Interstate Highway 35, and return over the same route. Between San Antonio and La Vernia, serving all intermediate points: From San Antonio over F. M. Road 1346 to La Vernia, and return over the same route. Between Monte Alto and the intersection of F. M. Road 1422 and F. M. Road 491, serving all intermediate points: From Monte Alto over F. M. Road 1422 to its intersection with F. M. Road 491, and return over the same route. Between Penitas and the intersection of F. M. Road 1427 and U.S. Highway 83, serving all intermediate points: From Penitas over F. M. Road 1427 to its intersection with U.S. Highway 83, and return over the same route. Between the intersection of F. M. Road 1431 and the State Highway 29 and the intersection of F. M. Road 1431 and U.S. Highway 281, via Kingsland, serving all intermediate points: From the intersection of F. M. Road 1431 and State Highway 29 over F. M. Road 1431 to its intersection with U.S. Highway 281, and return over the same route. Between Jonestown and Cedar Park, serving all intermediate points: From Jonestown over F. M. Road 1431 to Cedar Park, and return over the same route. Between Schertz and the intersection of F. M. Road 1518 and U.S. Highway 87, serving all intermediate points: From Schertz over F. M. Road 1518 to its intersection with U.S. Highway 87, and return over the same route. Between the intersection of F. M. Road 1604 and the U.S. Highway 87 and the intersection of F. M. Road 1604 and Interstate Highway 10 east of San Antonio, via Somerset, serving all intermediate points: From the intersection of F. M. Road 1604 and U.S. Highway 87 over F. M. Road 1604 to its intersection with Interstate Highway 10 east of San Antonio, and return over the same route. Between Manchaca and the intersection of F. M. Road 1626 and Interstate Highway 35, serving all intermediate points: From Manchaca over F. M. Road 1626 to its intersection with Interstate Highway 35, and return over the same route. Between Alcoa and the intersection of F. M. Road 1786 and U.S. Highway 79, serving all intermediate points: From Alcoa over F. M. Road 1786 to its intersection with U.S. Highway 79, and return over the same route. Between Hutto and the intersection of F. M. Road 1825 and Interstate Highway 35, serving all intermediate points: From Hutto over F. M. Road 685 and F. M. Road 1825 to the intersection of F. M. Road 1825 and Interstate Highway 35, and return over the same route. Between Mendoza and Dale, serving all intermediate points: From Mendoza over F. M. Road 1854 to Dale, and return over the same route. Between West and the intersection of F. M. Road 2114 and F. M. Road 933, serving all intermediate points: From West over F. M. Road 2114 to its intersection with F. M. Road 933, and return over the same route. Between Rockdale and Alcoa, serving all intermediate points: From Rockdale over F. M. Road 2116 to Alcoa, and return over the same route. Between Devine and D'Hanis, serving all intermediate points: From Devine over F. M. Road 2200 to D'Hanis, and return over the same route. Between Sunrise Beach and the Intersection of F. M. Road 2233 and State Highway 71, serving all intermediate points: From Sunrise Beach over F. M. Road 2233 to its intersection with State Highway 71, and return over the same route. Between Llano and Tow, serving all intermediate points: From Llano over F. M. Road 2241 to Tow, and return over the same route. Between Lake Victor and the intersection of F. M. Road 2340 and U.S. Highway 281, serving all intermediate points: From Lake Victor over F. M. Road 2340 to its intersection with U.S. Highway 281, and return over the same route. Between Carrizo Springs and El Indio, serving all intermediate points: From Carrizo Springs over F. M. Road 2644 to El Indio, and return over the same route. Between Kingsland and the intersection of F. M. Road 2900 and F. M. Road 2233, serving all intermediate points: From Kingsland over F. M. Road 2900 to its intersection with F. M. Road 2233, and return over the same route. Between Corpus Christi and Padre Island, serving all intermediate points: From Corpus Christi over Park Road 22 to Padre Island, and return over the same route. Between Lake Hills and the intersection of Park Road 37 and State Highway 16, serving all intermediate points: From Lake Hills over Park Road 37 to its intersection with State Highway 16, and return over the same route. Between

Port Aransas and the intersection of Park Road 53 and Park Road 22, serving all intermediate points: From Port Aransas over Park Road 53 to its intersection with Park Road 22, and return over the same route. Between Port Isabel and South Padre Island, serving all intermediate points: From Port Isabel over Park Road 100 to South Padre Island, and return over the same route. Between New Berlin and the intersection of a Local Road and Interstate Highway 10 approximately five miles northwest, serving all immediate points: From New Berlin over a Local Road to its intersection with Interstate Highway 10 approximately five miles northwest and return over the same route. Applicant intends to interline with other carriers.

Restriction: Restricted to the transportation of shipments having no single article, piece or package weighing in excess of 100 pounds and would have a total weight of 500 pounds or less per shipment. There are 12 supporting shippers.

MC 75320 (Sub-5–3TA), filed August 5, 1980. Applicant: CAMPBELL SIXTY-SIX EXPRESS, INC., P.O. Box 807, Springfield, MO 65801. Representative: John A. Crawford, P.O. Box 22567, Jackson, MS 39205. *Common,* Regular. *General commodities (except those of unusual value, Classes A and B explosives, houshold goods as defined by the Commission, commodities in bulk and those requiring special equipment),* serving all points in OH and IN as off-route points in connection with carrier's authorized regular-route operations. Supporting shippers: 79.

(9) Between Dallas, TX and Marshall, TX as follows: From Dallas, TX over U.S. Hwy. 80 and I. H. Hwy. 20 to Marshall, TX and return over the same route. (10) Between Longview, TX and Gilmer, TX as follows: From Longview, TX over F. M. Road 1403 to Gilmer, TX and return over the same route. (11) Between Gilmer, TX and Atlanta, TX as follows: From Gilmer, TX over State Hwy. 155 to Atlanta, TX and return over the same route. (12) Between Daingerfield, TX and Ore City, TX as follows: From Daingerfield, TX over U.S. Hwy. 259 and its intersection with State Hwy. 155 to Ore City, TX and return over the same route. (13) Between Daingerfield, TX and Linden, TX as follows: From Daingerfield, TX over State Hwy. 11 to Linden, TX and return over the same route. (14) Between (a) Linden, TX and Marshall, TX (b) Carthage, TX and Garrison, TX via Tenaha, TX as follows: (a) From Linden, TX over U.S. Hwy. 59 to Marshall, TX via Tenaha, TX and return over the same route; and (b) From Carthage TX over U.S. Hwy. 59 to Garrison, TX via Tenaha, TX and return over the same route. (15) Between Longview, TX and Carthage, TX as follows: From Longview, TX over State Hwy. 149 to Carthage, TX and return over the same route. (16) Between Carthage, TX and Henderson, TX as follows: From Carthage, TX over U.S. Hwy. 79 to Henderson, TX and return over the same route. (17) Between Beckville, TX and the intersection with U.S. Hwy. 79 as follows: From Beckville, TX over F. M. Road 124 to the intersection with U.S. Hwy. 79 and return over the same route. (18) Between Wills Point, TX and Henderson, TX as follows: From Wills Point, TX over State Hwy. 64 to Henderson, TX and return over the same route. (19) Between Mineola, TX and Tyler, TX as follows: From Mineola, TX over U.S. Hwy. 69 to Tyler, TX and return over the same route. (20) Between Tyler, TX and Kilgore, TX as follows: From Tyler, TX over State Hwy. 31 to Kilgore, TX and return over the same route. (21) Between Troup TX and Gladewater, TX via Kilgore, TX as follows: From Troup, TX over State Hwy. 135 to Gladewater, TX via Kilgore, TX and return over the same route. (22) Between (a) Kilgore, TX and Longview, TX and (b) between Henderson, TX and Mt. Pleasant, TX as follows: (a) From Kilgore, TX over U.S. Hwy. 259 to Longview, TX and return over the same route, and (b) From Henderson, TX over U.S. Hwy. 259 to Mt. Pleasant, TX and reutrn over the same route. (23) Between Mt. Enterprise, TX and Garrison, TX as follows: From Mt. Enterprise, TX over F. M. Road 95 and U.S. Hwy. 84 to Garrison, TX and return over the same route. (24) Between Timpson, TX and Center, TX as follows: From Timpson, TX over State Hwy. 87 to Center, TX and return over the same route. (25) Between (a) Tenaha, TX and San Augustine, TX, (b) between Bronson, TX and Jasper, TX; and (c) between Kirbyville, TX and Silsbee, TX as follows: (a) From Tenaha, TX over U.S. Hwy. 96 to San Augustine, TX and return over the same route; (b) From Bronson, TX over U.S. 96 to Jasper, TX and return over the same route; and (c) From Kirbyville, TX over U.S. 96 to Silsbee, TX and return over the same route. (26) Between San Augustine, TX and Milam, TX as follows: From San Augustine, TX over State Hwy 21 to Milam, TX and return over the same route. (27) Between Milam, TX and Bronson, TX as follows: From Milam, TX over State Hwy. 87 and F. M. Road 184 to Vronson, TX and return over the same route. (28) Between Jasper, TX and Newton, TX as follows: From Jasper, TX over U.S. Hwy. 190 to Newton, TX and return over the same route. (29) Between Newton, TX and Kirbyville, TX via Bleakwood, TX as follows: From Newton, TX over State Hwy. 87 to Kirbyville, TX via Bleakwood, TX and return over the same route. (30) Between Kountze, TX and Nome, TX as follows: From Kountze, TX over State Hwy. 326 to Nome, TX and return over the same route. (31) Between Silsbee, TX and Kountze, TX as follows: From Silsbee, TX over State Hwy. 327 to Kountze, TX and return over the same route. (32) Between Paris, TX and Texarkana, TX as follows: From Paris, TX over U.S. Hwy. 82 to Texarkana, TX and return over the same route. (33) Between Pittsburg, TX and Paris, TX as follows: From Pittsburg, TX over U.S. Hwy. 271 to Paris, TX and return over the same route. (34) Between Clarksville, TX and Bogata, TX as follows: From Clarksville, TX over State Hwy. 37 to Bogata, TX and return over the same route. (35) Between Pittsburg, TX and Commerce, TX as follows: From Pittsburg, TX over State Hwy. 11 to Commerce, TX via Sulphur Springs, TX. (36) Between Honey Grove, TX and Greenville, TX, as follows: From Honey Grove, TX over State Hwy. 34 to Greenville, TX, Serving only the intermediate point of Wolfe City, TX, coordinating the service with existing services and interlining with other carriers at appropriate interline points. (37) Between Mt. Pleasant, TX and Texarkana, TX, serving the intermediate points of Omaha, Naples and Maud, TX as follows: From Mt. Pleasant over U.S. Hwys. 271 and 67 to Texarkana and return over the same route. (38) Between (a) Wolfe City, TX and Honey Grove, TX and (b) between Greenville, TX and Terrell, TX as follows: From (a) Wolfe City, TX over State Hwy. 34 to Honey Grove, TX and return over the same route; and (b) Greenville, TX over State Hwy. 34 to Terrell, TX and return over the same route. (39) Between Quinlan, TX and Point, TX as follows: From Quinlan, TX over F. M. 35 to Point, TX and return over the same route. (40) Between Greenville, TX and Mineola, TX as follows: From Greenville, TX over U.S. 69 to Mineola, TX and return over the same route. (41) Between Ladonia, TX and Cooper, TX as follows: From Ladonia, TX over F. M. 64 to Cooper, TX and return over the same route. (42) Between Petty, TX and Paris, TX as follows: From Petty, TX over F. M. 137 to Paris, TX and return over the same route. (43) Between Honey Grove, TX and Petty, TX as follows: From Honey Grove, TX over U.S. 82 to Petty, TX and return over the same route. (44) Between Mineola, TX and Winnsboro, TX as follows: From Mineola, TX over State Hwy. 37 to Winnsboro, TX and return over the same route. (45) Between Emory, TX and Sulphur Springs, TX as follows: From Emory, TX over State Hwy. 19 to Sulphur Springs, TX and return over the same route. (46) Between Quitman, TX and Sulphur Springs, TX as follows: From Quitman, TX over State Hwy. 154 to Sulphur Spring, TX and reutrn over the same route. (47) Between Alba, TX and Quitman, TX as follows: From Alba, TX over State Hwy. 182 to Quitman, TX and return over the same route. (48) Between (a) Van, TX and Tyler, TX and (b) Tyler, TX and Troup, TX as follows: From (a) Van, TX over State Hwy. 110 to Tyler, TX and return over the same route; and (b) Tyler, TX over State Hwy. 110 to Troup, TX and return over the same route. (49) Between Tyler, TX and Chandler, TX as follows: From Tyler, TX over State Hwy. 31 to Chandler, TX and return over the same route. (50) Between Kilgore, TX and Price, TX as follows: From Kilgore, TX over State Hwy. 42 to Price, TX and return over the same route. (51) Between Henderson, TX and Overton, TX as follows: From Henderson, TX over State Hwy. 323 to Overton, TX and return over the same route. (52) Between its intersection with U.S. Hwy 271 near Overton, TX and Big Sandy, TX as follows: From the intersection with U.S. Hwy. 271 near Overton, TX over State Hwy. 155 to Big Sandy, TX and return over the same route. (53) Between its intersection with State Hwy. 149 and Lakeport, TX as follows: From the intersection with State Hwy. 149 over State Hwy. 322 to Lakeport, TX and return over the same route. (54) Between Carthage, TX and Panola, TX as follows: From Carthage, TX over U.S. Hwy. 79 to Panola, TX and return over the same route. (55) Between Marshall, TX and DeBerrry, TX as follows: From Marshall, TX over F.M. 31 to DeBerry, TX and return over the same route. (56) Between Marshall, TX and its intersection with F.M. 134 near Karnack, TX as follows: From Marshall, TX over State Hwy. 43 and its intersection with F.M. 134 near Karnack, TX and return over the same route. (57) Between Karnack, TX and Jonesville, TX as follows: From Karnack, TX over F.M. 134 to Jonesville, TX and return over the same route. (58) Between Karnack, TX to Uncertain, TX as follows: From Karnack, TX over an unnumbered County Road to Uncertain, TX and return over the same route. (59) Between Marshall, TX and Waskom, TX as follows: From Marshall, TX over U.S. Hwy. 80 to Waskom, TX and return over the same route. (60) Between Marshall, TX and Waskom, TX as follows: From Marshall, TX over Interstate Hwy. 20 to Waskom, TX and return over the same route. (61) Between Waskom, TX and Panola, TX as follows: From Waskom, TX over F.M. 9 to Panola, TX and return over the same route. (62) Between Marshall, TX and its intersection with F.M. 134 near Jonesville, TX as follows: From Marshall, TX over F.M. 1998 and its intersection with F.M. 134 near Jonesville, TX and return over the same route. (63) Between Marshall, TX and Gilmer, TX as follows: From Marshall, TX over State Hwy. 154 to Gilmer, TX and return over the same route. (64) Between Gladewater, TX and Pittsburg, TX as follows: From Gladewater, TX over U.S. Hwy. 271 to Pittsburg, TX and return over the same route. (65) Between Longview, TX and Lone Star, TX as follows: From Longview, TX over U.S. Hwy 259 to Lone Star, TX and return over the same route. (66) Between Pittsburg, TX and Daingerfield, TX as follows: From Pittsburg, TX over State Hwy. 11 to Daingerfield, TX and return over the same route. (67) Between Queen City, TX and Bloomburg, TX as follows: From Queen City, TX over F.M. 74 to Bloomburg, TX and return over the same route. (68) Between Atlanta, TX and Bivins, TX as follows: From Atlanta, TX over State Hwy. 43 to Bivins, TX and return over the same route. (69) Between Linden, TX and Bivins, TX as follows: From Linden, TX over F.M. 1841 to Bivins, TX and return over the same route. (70) Between Center, TX and Shelbyville, TX as follows: From Center, TX over State Hwy. 87 to Shelbyville, Texas and return over the same route. (71) Between Center, TX and Haslam, TX as follows: From Center, TX over State Hwy. 7 to Haslam, TX and return over the same route. (72) Between Tenaha, TX and Haslam, TX as follows: From Tenaha, TX over U.S. Hwy. 84 to Haslam, TX and return over the same route. (73) Between Paxton, TX and Center, TX as follows: From Paxton, TX over F.M. 699 to Center, TX and return over the same route. (74) Between (a) Texarkana, TX and Corley, TX and (b) Omaha, TX and Mt. Pleasant, TX as follows: From (a) Texarkana, TX over U.S. Hwy. 67 to Corley, TX and (b) Omaha, TX over U.S. Hwy. 67 to Mt. Pleasant, TX and return over the same route. (75) Between Como, TX and Dike, TX as follows: From Como, TX over F.M. 69 to Dike, TX and return over the same route. (76) Between the intersection of F.M. 1537 and State Hwy. 19 and the intersection of F.M. 1537 and F.M. 69 as follows: From the intersection of F.M. 1537 and State Hwy. 19 over F.M. 1537 to its intersection with F.M. 69, south of Dike, TX and return over the same route. (77) Between New Boston, TX and Corley, TX as follows: From New Boston, TX over State Hwy. 8 to Corley, TX and return over the same route. (78) Between Paris, TX and Arthur City, TX as follows: From Paris, TX over U.S. Hwy. 271 to Arthur City, TX and return over the same route. (79) Between

V 45 AG 18 80 UMI

Arthur City, TX and Chicota, TX as follows: From Arthur City, TX over F.M. 197 to Chicota, Texas and return over the same route. (80) Between Bonham, TX and Ivanhoe, TX as follows: From Bonham, TX over F.M. 273 to Ivanhoe, TX and return over the same route. (81) Between Bonham, TX and its intersection with F.M. 1396 as follows: From Bonham, TX over State Hwy. 78 to its intersection with F.M. 1396 and return over the same route. (82) Between the intersection of F.M. 1396 and State Hwy. 78 and the intersection of F.M. 1396 and F.M. 273 as follows: From the intersection of F.M. 1396 and State Hwy. 78 over F.M. 1396 to its intersection with F.M. 273, just south of Ivanhoe, TX and return over the same route. (83) Between the intersection with State Hwy. 78 and F.M. 1753 to Ravena, TX as follows: From the Intersection with State Hwy. 78 over F.M. 1753 to Ravena, TX and return over the same route. (84) Between Denison, TX and Pottsboro, TX as follows: From Denison, TX over F.M. 120 to Pottsboro, TX and return over the same route. (85) Between Leonard, TX and Bells, TX as follows: From Leonard, TX over U.S. Hwy. 69 to Bells, TX and return over the same route. (86) Between Whitewright, TX and Ector, TX as follows: From Whitewright, TX over F.M. 898 and F.M. 3297 to Ector, TX and return over the same route. (87) Between Savoy, TX and its intersection with F.M. 898 as follows: From Savoy, TX over F.M. 1752 to its intersection with F.M. 898 and return over the same route. (88) Between Greenville, TX and McKinney, TX as follows: From Greenville, TX over U.S. Hwy. 380 to McKinney, TX and return over the same route. (89) Between Rockwall, TX and its intersection with State Hwy. 78 near Lavon, TX as follows: From Rockwall, TX over State Hwy. 205 and its intersection with State Hwy. 78 near Lavon, TX and return over the same route. (90) Between the intersection with State Hwy. 205 and its intersection with U.S. Hwy. 380 near Farmersville, TX as follows: From the intersection with State Hwy. 205 and its intersection with U.S. Hwy. 380 over State Hwy. 78 near Farmersville, TX and return over the same route. (91) Between Lavon, TX and Caddo Mills, TX as follows: From Lavon, TX over F.M. 6 to Caddo Mills, TX and return over the same route. (92) Between Royce City, TX and Josephine, TX as follows: From Royce City, TX over F.M. 1717 to Josephine, TX and return over the same route. (93) Between Alba, TX and Yantis, TX as follows: From Alba, TX over F.M. 17 and F.M. 514 to Yantis, TX and return over the same route. Applicant intends to interline with other carriers. BILLING CODE 7035-01-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Humanities Panel; Meetings

AGENCY: National Endowment for the Humanities.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the provision of the Federal Advisory Committee Act (Public Law 92–463, as amended), notice is hereby given that the following meetings of the Humanities Panel will be held at 806 15th Street, N.W., Washington, D.C. 20506:

(1) Date: September 2, 1980.
Time: 9:15 a.m. to 5:30 p.m.
Room: 314.
Program: This meeting will review applications for Fellowships for Independent Study and Research in Sociology, Psychology, and Education, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1981.

(2) Date: September 2 and 3, 1980.
Time: 9:00 a.m. to 5:30 p.m.
Room: 1134.
Program: This meeting will review applications submitted to the General Research Program for American Studies projects, Division of Research Programs, for projects beginning after December 1, 1980.

(3) Date: September 3, 1980.
Time: 9:30 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications for NEH Fellowships, Summer Seminars in Political Science and other Area Studies, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1981.

(4) Date: September 5, 1980.
Time: 9:15 a.m. to 5:30 p.m.
Room: 911.
Program: This meeting will review applications for Fellowships for Independent Study and Research, Panel 2A in English Literature, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1981.

(5) Date: September 5, 1980.
Time: 9:30 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications for NEH Fellowships, Summer Seminars in English and American Literature, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1981.

(6) Date: September 6, 1980.
Time: 9:15 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications for Fellowships for Independent Study and Research in Philosophy, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1981.

(7) Date: September 8, 1980.
Time: 9:30 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications for NEH Fellowships, Summer Seminars in German, Slavic and Classics, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1981.

(8) Date: September 8 and 9, 1980.
Time: 9:00 a.m. to 5:00 p.m.
Room: 1134.
Program: This meeting will review applications submitted for Program Development and Special Projects, Division of Special Programs, for projects beginning after April 1, 1981.

(9) Date: September 9, 1980.
Time: 9:30 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications for NEH Fellowships, Summer Seminars in American and European History, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1981.

(10) Date: September 10, 1980.
Time: 9:30 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications for NEH Fellowships, Summer Seminars in Comparative Literature and Drama, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1981.

(11) Date: September 11 and 12, 1980.
Time: 9:00 a.m. to 5:00 p.m.
Room: 1023.
Program: This meeting will review applications submitted for Program Development and Special Projects, Division of Special Programs, for projects beginning after April 1, 1981.

(12) Date: September 13, 1980.
Time: 9:30 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications for NEH Fellowships, Summer Seminars in Philosophy and Linguistics, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1981.

(13) Date: September 15, 1980.
Time: 9:30 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications for NEH Fellowships, Summer Seminars in Art History, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1981.

(14) Date: September 15 and 16, 1980.
Time: 9:00 a.m. to 5:00 p.m.
Room: 911.
Program: This meeting will review applications submitted for Program Development and Special Projects, Division of Special Programs, for projects beginning after April 1, 1981.

(15) Date: September 15 and 16, 1980.
Time: 9:00 a.m. to 5:30 p.m.
Room: 1023–1025.
Program: This meeting will review applications submitted for Higher Education/Regional and National grants, Division of Education, for projects beginning after January 1, 1981.
(16) Date: September 17, 1980.
Time: 9:30 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications for NEH Fellowships, Summer Seminars in Music, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1981.
(17) Date: September 19, 1980.
Time: 9:30 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications for NEH Fellowships, Summer Seminars in Religion and Science, Technology, and Human Values, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1981.
(18) Date: September 22, 1980.
Time: 9:30 a.m. to 5:30 p.m.
Room: 314.
Program: This meeting will review applications for NEH Fellowships, Summer Seminars in Romance Languages, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1981.
(19) Date: September 24, 1980.
Time: 9:30 a.m. to 5:30 p.m.
Room: 1134.
Program: This meeting will review applications for NEH Fellowships, Summer Seminars in American Studies and Films, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1981.
(20) Date: September 22, 1980.
Time: 7:00 p.m. to 9:00 p.m.
Room: 1023.
Program: This meeting will review applications submitted for the Media Humanities Projects Programs, Division of Public Programs, for projects beginning after January 1, 1981.
(21) Date: September 23, 1980.
Time: 8:30 a.m. to 6:00 p.m.
Room: 1023.
Program: This meeting will review applications submitted for the Media Humanities Projects Programs, Division of Public Programs, for projects beginning after January 1, 1981.
(22) Date: September 24, 1980.
Time: 8:30 a.m. to 5:30 p.m.
Room: 1023.
Program: This meeting will review applications submitted for the Media Humanities Projects Program, Division of Public Programs, for projects beginning after January 1, 1981.

The proposed meetings are for the purpose of Panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose:

(1) trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and

(3) information the disclosure of which would significantly frustrate implementation of proposed agency action; pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information about these meetings can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, D.C. 20506, or call (202) 724–0367.

Stephen J. McCleary,
Advisory Committee Management Officer.

Room: 1023.
Program: This meeting will review applications submitted for the Media Humanities Projects Program, Division of Public Programs, for projects beginning after January 1, 1981.
(3) Date: September 15 and 16, 1980.
Time: 9:00 a.m. to 5:30 p.m.
Room: 1134.
Program: This meeting will review applications submitted to the General Research Program for Basic Research Interdisciplinary Study projects, Division of Research Programs, for projects beginning after December 1, 1981.
(4) Date: September 9, 1980.
Time: 8:30 a.m. to 5:30 p.m.
Room: 1023.
Program: This meeting will review applications submitted for the Media Humanities Projects Program, Division of Public Programs, for projects beginning after January 1, 1981.
(5) Date: September 10, 1980.
Time: 8:30 a.m. to 2:00 p.m.
Room: 1023.
Program: This meeting will review applications submitted for the Media Humanities Projects Program, Division of Public Programs, for projects beginning after January 1, 1980.
(6) Date: September 16, 1980.
Time: 7:00 p.m. to 9:00 p.m.
Room: 1023.
Program: This meeting will review applications submitted for the Media Humanities Projects Program, Division of Public Programs, for projects beginning after January 1, 1981.
(7) Date: September 17, 1980.
Time: 8:30 a.m. to 6:30 p.m.
Room: 1023.
Program: This meeting will review applications submitted for the Media Humanities Projects Programs, Division of Public Programs, for projects beginning after January 1, 1980.
(8) Date: September 17, 1980.
Time: 9:00 a.m. to 5:30 p.m.
Room: 1134.
Program: This meeting will review applications submitted for Museums and Historical Organizations Humanities Projects, Division of Public Programs, for projects beginning after January 1, 1981.
(9) Date: September 18, 1980.
Time: 8:30 a.m. to 5:30 p.m.
Room: 1023.
Program: This meeting will review applications submitted for the Media Humanities Projects Program, Division of Public Programs, for projects beginning after January 1, 1981.
(10) Date: September 18, 1980.
Time: 9:00 a.m. to 5:30 p.m.
Room: 1134.
Program: This meeting will review applications submitted for Museums and Historical Organizations Humanities Projects, Division of Public Programs, for projects beginning after January 1, 1981.
(11) Date: September 19, 1980.
Time: 9:00 a.m. to 5:30 p.m.
Room: 1134.
Program: This meeting will review applications submitted for Museums and Historical Organizations Humanities Projects, Division of Public Programs, for projects beginning after January 1, 1981.
(12) Date: September 22, 1980.
Time: 9:00 a.m. to 5:30 p.m.
Room: 911.
Program: This meeting will review applications submitted by state humanities committee, Division of State Programs, for activity beginning after January 1, 1981.
(13) Date: September 23, 1980.
Time: 9:00 a.m. to 5:30 p.m.
Room: 314.
Program: This meeting will review applications submitted for Museums and Historical Organizations Humanities Projects, Division of Public Programs, for projects beginning after January 1, 1981.
(14) Date: September 22, 1980.
Time: 9:00 a.m. to 5:30 p.m.
Room: 807.
Program:-This meeting will review applications submitted for Implementation Grants/Individual Institutions, Division of Education Programs, for projects beginning after January 1, 1981.
(15) Date: September 23, 1980.
Time: 9:00 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications submitted for Implementation Grants/Individual Institutions, Division of Education Programs, for projects beginning after January 1, 1981.
(16) Date: September 24, 1980.
Time: 9:00 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications submitted for Implementation Grants/Individual Institutions, Division of Education Programs, for projects beginning after January 1, 1981.
(17) Date: September 24, 1980.
Time: 9:00 a.m. to 5:30 p.m.
Room: 314.
Program: This meeting will review applications submitted for Museums and Historical Organizations Humanities Projects, Division of Public Programs, for projects beginning after January 1, 1981.
(18) Date: September 24, 1980.
Time: 9:30 a.m. to 5:30 p.m.
Room: 911.
Program: This meeting will review applications for NEH Fellowships, Summer Seminars in Anthropology and Sociology, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1981.
(19) Date: September 25, 1980.
Time: 9:00 a.m. to 5:30 p.m.
Room: 314.
Program: This meeting will review applications submitted for Museums and Historical Organizations Humanities Projects, Division of Public Programs, for projects beginning after January 1, 1981.
(20) Date: September 25, 1980.
Time: 9:30 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications for NEH Fellowships, Summer Seminars in Composition and Rhetoric, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1981.

The proposed meetings are for the purose of Panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose:

(1) trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and

(3) information the disclosure of which would significantly frustrate implementation of proposed agency action; pursuant to authority granted my by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c)(4), (6) and (9) (B) of section 552b of Title 5, United States Code.

Further information about these meetings can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, D.C. 20506, or call (202) 724–0367.

Stephen J. MCleary,
Advisory Committee Management Officer.

BILLING CODE 7536-01-M

NUCLEAR REGULATORY COMMISSION

[Dockets Nos. 50–269, 50–270 and 50–287]

Duke Power Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 84, and 81 to Facility Operating Licenses Nos. DPR–38, DPR–47, and DPR–55, respectively, issued to Duke Power Company (the licensee), which revised the Station's common Technical Specifications for operation of the Oconee Nuclear Station, Units Nos. 1, 2 and 3, located in Oconee County, South Carolina.

These amendments were authorized July 16, 1980. They revise the Technical Specifications for Unit No. 2 by extending on an emergency temporary basis the allowable period of inoperability of the "2B" High Pressure Injection Pump by 48 hours. The urgency associated with this action was due to a power shortage in the Oconee service area.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated July 16, 1980, (2) the Commission's letter to the licensee dated July 17, 1980, (3) Amendments Nos. 84, and 81 to Licenses Nos. DPR–38, DPR—47 and DPR—55, respectively, and (4) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW, Washington, D.C. and at the Oconee County Library, 201 South Spring Street, Walhall, South Carolina. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 1st day of August 1980.

For the Nuclear Regulatory Commission.

Robert W. Reid,
Chief Operating Reactors Branch No. 4 Division of Licensing.

[FR Doc. 80-24967 Filed 8-15-80; 8:45 am]
BILLING CODE 7590-01-M

[Docket No. 50–338]

Virginia Electric and Power Co., Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 19 to Facility Operating License No. NPF–4 issued to the Virginia Electric and Power Company (the licensee) for operation of the North Anna Power Station, Unit No. 1 (the facility) located in Louisa County, Virginia. The amendment is effective as of its date of issuance.

The amendment makes changes to the license as well as the appended Technical Specifications. These changes reflect completion of a required license condition, resolution of generic safety issues and changes requested by the licensee. One license condition is deleted as being satisfied. This relates to the verification of technical specification trip setpoint values for the reactor protection system and the engineered safety features actuation system. The amendment also revises the facility Technical Specifications with respect to the definition for Operability of safety systems, emergency core cooling surveillance requirements, auxiliary feedwater surveillance requirements, addition and deletion of hydraulic snubbers and administrative changes.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action see (1) Virginia Electric and Power Company letters dated September 28, October 13, and December 12, 1978, December 28, 1979, February 25, March 31, May 16, June 2, and July 3, 1980; (2) Amendment No. 19 to Facility Operating License No. NPF–4; and (3) the Commission's related Safety Evaluation. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW, Washington, D.C. 20555 and at the Board of Supervisor's Office, Louisa County Courthouse, Louisa, Virginia 23093 and at the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

A copy of these items may be obtained upon request to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 5th day of August, 1980.

For The Nuclear Regulatory Commission.

Robert A. Clark,

Chief Operating Reactors Branch No. 3 Division of Licensing.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards; Subcommittee on Structural Engineering; Meeting

The ACRS Subcommittee on Structural Engineering will hold a meeting on September 2, 1980 in room 1046, 1717 H St., NW, Washington, DC to establish the maximum internal pressure the Sequoyah containment can withstand.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1979 (44 FR 56408), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance.

The agenda for subject meeting shall be as follows:

Tuesday, September 2, 1980

8:30 a.m. until the conclusion of business.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, will exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding this review.

Further information about topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Elpidio G. Igne (telephone 202/634–1413) between 8:15 a.m. and 5:00 p.m., EDT.

Dated: August 13, 1980.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590-01-M

Applications for Licenses To Export/Import Nuclear Facilities or Materials

Pursuant to 10 CFR 110.70(b) "Public Notice of Receipt of an Application", please take notice that the Nuclear Regulatory Commission has received the following application(s) for export/import licenses. A copy of each application is on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H St., N.W., Washington, D.C.

A request for a hearing or a petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register**. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, the Secretary, U.S. Nuclear Regulatory Commission and the Executive Secretary, Department of State, Washington, D.C. 20520.

In its review of applications for license to export production or utilization facilities, special nuclear material or source material, noticed herein, the Commission does not evaluate the health, safety or environmental effects in the recipient nation of the facility or material to be exported.

Dated this day August 12, 1980.

At Bethesda, Maryland.

For the Nuclear Regulatory Commission.

Joseph D. Lafleur,

Acting Director, Office of International Programs.

BILLING CODE 7590-01-M

[Docket No. 50–250]

Florida Power & Light Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 59 to Facility Operating License No. DPR–31 issued to Florida Power and Light Company (the licensee), which revised Technical Specifications for operation of the Turkey Point Plant Unit No. 3 (the facility) located in Dade County, Florida. The amendment is effective as of the date of issuance.

The amendment permits continued operation of the Turkey Point Plant Unit No. 3 for eight and one half equivalent months of operation from January 24, 1980 at which time the steam generators shall be inspected.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated June 30, 1980, (2) Amendment No. 59 to License No. DPR–31, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Environmental and Urban Affairs Library, Florida International University, Miami, Florida 33199. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Md., this 30th day of July, 1980.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50–315]

Indiana & Michigan Electric Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 39 to Facility Operating License No. DPR–58, issued to Indiana and Michigan Electric Company (the licensee), which revised Technical Specifications for operation of Donald C. Cook Nuclear Plant, Unit No. 1 (the facility) located in Berrien County, Michigan. The amendment is effective as of the date of issuance.

The amendment (1) revises the surveillance and monitoring requirements for the degraded voltage function, (2) revises the surveillance requirements for onsite power source testing and (3) administratively adds surveillance and monitoring requirements for the motor driven and turbine driven auxiliary feedwater pumps which had been previously inadvertently omitted.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated February 22 and May 28, 1980, (2) Amendment No. 39 to License No. DPR–58, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Maude Reston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 25th day of July, 1980.

For the Nuclear Regulatory Commission.

Steven A. Varga,

[Docket No. 50–142–OL (Proposed Renewal of Facility License)]

Regents of the University of California (UCLA Argonaut-Type Research Reactor); Order Rescheduling the Prehearing Conference

August 11, 1980.

On July 21, 1980, this Board issued an Order scheduling a prehearing conference on September 18, 1980. The order also set interim filing dates for the Petitioners, Bridge the Gap, the Applicant, the Regents, and the NRC Staff for filings prior to the prehearing conference.

On August 4, 1980, the Petitioners requested that all dates be extended one week because of the unavailability of key people for the Petitioners on September 18, 1980. The request for additional time recited that the Applicant had no objection to the delay. There was no service on or mention of the NRC Staff. This oversight must be corrected with future filings. The Board ascertained that the Staff had no objection. For good cause stated, the request is granted.

second deviation would require

A prehearing conference will be held in Courtroom No. 324, U.S. Courthouse, 312 No. Spring Street, Los Angeles, California at 9:30 a.m. (local time) on *September 25, 1980.* If Bridge the Gap desires to supplement its' petition, this must be served by August 25, 1980, the response by the Regents must be served by September 9, 1980, and the response by the NRC Staff must be served by September 17, 1980. The participants will be given a further opportunity to explain their positions at the prehearing conference.

The public is invited to attend. No limited appearance statements will be permitted at this conference.

It is so ordered.

For the Atomic Safety and Licensing Board.

Dated at Bethesda, Md. this 11th day of August 1980.

Elizabeth S. Bowers,

Chairman.

BILLING CODE 7590-01-M

[Docket No. 40-299]

Union Carbide Corp.; Availability of Final Environmental Impact Statement for Gas Hills Uranium Mill in Natrona County, Wyo.

Pursuant to the National Environmental Policy Act of 1969 and the United States Nuclear Regulatory Commission's regulations in 10 CFR Part 51, a final environmental impact statement has been prepared by the Commission's Office of Nuclear Material Safety and Safeguards related to the renewal of Union Carbide Corporation's Source Material License SUA-648. The mill is located in Natrona County, Wyoming. The final environmental impact statement is available for inspection in the Commission's Public Document Room at 1717 H Street, NW., Washington, DC. The FEIS is also being made available at the State Planning Coordinator, Office of the Governor, 2320 Capitol Avenue, Cheyenne, Wyoming, and to the Fremont County Public Library, 451 North Second, Lander, Wyoming.

The final environmental impact statement is on the proposed renewal of Source Material License SUA-648 (with amendments) issued to Union Carbide Corporation (UCC) for the operation of the Gas Hills Uranium Mill, Docket No. 40-299. The Gas Hills Uranium Mill is an acid-leach, ion-exchange and solvent-extraction uranium-ore processing mill with a design capacity of 500,000 tons (454,000 MT) of ore per year.

The notice of availability of the Draft Environmental Statement (DES) for the Gas Hill Uranium Mill and request for comments from interested persons was published in the **Federal Register** on January 19, 1979 (44 FR 4056). The comments received from the Federal, State, and local agencies and interested members of the public and the NRC staff's responses to these comments have been included as an appendix to the FEIS.

Copies of NUREG-0702 are available to the public for purchase at current rates from NRC to those with deposit accounts with the Superintendent of Documents, U.S. Government Printing Office (see 44 FR 46005, August 1979). To place orders call (301) 492-7333, or write: ATTN: Publications Sales Manager, Division of Technical Information and Document Control, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Dated at Silver Spring, Maryland, this 7th day of August, 1980.

For the Nuclear Regulatory Commission.

Ross A. Scarano,

Chief, Uranium Recovery Licensing Branch, Division of Waste Management.

BILLING CODE 7590-01-M

[Docket No. PRM-2-6]

Eckert, Seamans, Cherin & Mellott; Notice of Denial of Petition for Rulemaking

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Denial of petition for rulemaking.

SUMMARY: The Nuclear Regulatory Commission is hereby denying a petition for rulemaking (PRM-2-6) submitted by Eckert, Seamans, Cherin & Mellott. The petitioner had requested the Commission to amend its regulations to prescribe time periods for the completion of licensing review by the Commission's regulatory staff and Atomic Safety and Licensing Boards.

FOR FURTHER INFORMATION CONTACT: Bruce A. Berson, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Telephone (301) 492-7676.

SUPPLEMENTARY INFORMATION: The petition for rulemaking (PRM-2-6) submitted by Eckert, Seamans, Cherin & Mellott, 600 Grant Street, Pittsburgh, Pennsylvania, by letter dated December 29, 1978, requested the Commission to amend its regulation, "Rules of Practice for Domestic Licensing Proceedings," 10 CFR Part 2 to prescribe time periods for completion of licensing review by the Commission's regulatory staff and Atomic Safety and Licensing Boards.

The petitioner stated that:

The timely completion of Commission licensing proceedings is in large measure dependent on (1) the duration of application review by the Regulatory Staff under the immediate direction and control of the Director of Nuclear Reactor Regulation, and (2) the duration of the hearing process controlled by the Atomic Safety and Licensing Boards. The Commission's existing Rules of Practice are silent with regard to the responsibilities of the Regulatory Staff in this regard and only prescribe some time limits for the Atomic Safety and Licensing Boards. In recent years there has been an increasing tendency by the Regulatory Staff to miss, without apparent justification, scheduling commitments, and other evidence of Staff difficulty in properly managing its review function so as to bring it to a conclusion within a reasonable length of time. It is believed that such unnecessary delay on the part of the Regulatory Staff can be attributed in part to the lack of any regulations prescribing time periods for application review. It is therefore submitted that regulations of the type proposed which would prescribe time limitations for Regulatory Staff application review, limitations which could be modified for good cause shown, are needed to insure that the Staff pays more than mere lip service to the Commission's mandate for timely decision making.

The petitioner proposed that a Subpart J—Duration of Commission Review—be added to 10 CFR Part 2 in order to insure the making of both sound and timely licensing decisions by the regulatory staff. Two amendments to existing sections of Part 2 also were proposed by the petitioner with the view of insuring timely completion of the Atomic Safety and Licensing Board hearing process. The text of the proposed Subpart J and the amendments of §§ 2.751a(a) and 2.760 were set out in the petition.

Specifically, petitioner's proposed Subpart J would require the staff to establish an estimated schedule for completion of its safety and environmental reviews within 30 days after an application is docketed. The schedule would have to call for publication of the staff's safety evaluation report and draft environmental statement within 12 months of docketing. The first deviation from the schedule would require the staff to demonstrate good cause in a petition to the Director of Nuclear Reactor Regulation who could authorize an extension of up to 3 months. A second deviation would require Commission approval after a staff showing of good cause; and, upon a showing of extraordinary circumstances, the Commission could grant a third extension. The applicant and any party to the licensing proceeding could file written responses to the staff petitions. The final environmental statement would be published within 60 days after the close of the public comment period specified in the draft environmental statement. Changes from that date would be made in accordance with the procedure outlined above.

The petitioner also proposed amendments to 10 CFR 2.751a and 2.760. These amendments would require an Atomic Safety and Licensing Board to commence hearings within 60 days after publication of the relevant staff documents and render an initial decision within 60 days after the parties' proposed findings of fact and responses thereto were filed. The Commission could grant an extension for issuance of the initial decision upon a showing of good cause by the presiding officer.

A notice of filing of the petition and request for comments by April 6, 1979 was published in the **Federal Register** on February 5, 1979 (44 FR 6994). Four letters of public comment were received. One commenter opposes the petition without providing reasons. A letter from a committee on nuclear technology and law of a state bar association generally supports the petition but maintains that the proposed amendments requiring an Atomic Safety and Licensing Board to schedule hearings and render a decision within specific time periods might be overly specific and inappropriately reduce the Commission's flexibility. Two letters from electric utility companies, citing the cost of unnecessary delays, favor the proposed rule change. The petition and comments are available for public inspection and copying at the NRC Public Document Room at 1717 H Street, N.W., Washington, D.C.

The Commission has carefully considered the petitioner's proposals that time limits be prescribed for (1) completion of environmental and radiological health and safety reviews by the Commission's Regulatory Staff in licensing proceedings and (2) commencement of the hearing and issuance of an initial decision by an Atomic Safety and Licensing Board following the adjudicatory hearing. For the reasons set forth below, the Commisison has determined that the proposals, if adopted, would unduly restrict the necessary discretion of its staff and licensing boards. Therefore, the petition is denied.

The Commission has long recognized that the staff's expertise is central to, and an inherent part of, the execution of the agency's mission. In the context of operating license and construction permit proceedings, the staff subjects the utility's license application to independent radiological health and safety and environmental reviews. The staff's safety and environmental analyses are published in separate reports which are made a part of the record, along with the views of the intervening parties and the license applicant. All of these views are considered by an Atomic Safety and Licensing Board during the adjudicatory hearing it conducts. The Atomic Safety and Licensing Board then renders a decision which can be appealed to the Atomic Safety and Licensing Appeal Board, and, in the Commission's discretion, to the Commission itself. A final agency decision may be appealed to a United States Court of Appeals.

The Commission is responsible for and concerned with efficiency in the Commission's licensing process, and believes that unnecessary or inappropriate delays should be avoided whenever possible. However, of overriding importance is the Commission's statutory responsibility to ensure that the issuance of a license to an applicant will not be inimical to the health and safety of the public and will satisfy the requirements of applicable environmental laws.

The published reports, the product of the staff's environmental and radiological health and safety reviews, are vital to the adjudicatory process and the regulatory scheme. The timing of the publication of these necessary documents will, to a large extent, depend upon the adequacy and completeness of the information the staff possesses at a given time (information usually supplied by the license applicant) and the time required by the staff to analyze that information.[1] Hence schedule changes are often justified.[2]

[1] The Commission notes that its staff strives to issue its safety evaluation report and draft and final environmental statements within 20, 8 and 14 months, respectively, after an application for a construction permit is docketed. The goal is similar in operating license proceedings.

[2] The Commission's proposed amendments to its regulations implementing the National Environmental Policy Act of 1969 provide that its staff will establish a time schedule for any part of its NEPA review process upon request of an applicant and will inform the applicant in writing of the reason for any delay. See proposed 10 CFR 51.15 (45 FR 13739, March 3, 1980).

The Commission believes that as a matter of sound management policy its staff should retain discretion to make reasonable adjustments in its review schedule to account for changed or unforeseen circumstances. Within the past year, the necessity to consider the lessons learned from the accident at Three Mile Island has demonstrated the need for flexibility. Requiring formal Commission or Office Director approval for any schedule change (in the manner suggested by the petitioner) would unnecessarily burden the review process. The Commission has undoubted authority to rectify unreasonable staff delays and a mechanism already exists to promptly bring such cases to the Commission's attention. (See the decision of the Atomic Safety and Licensing Appeal Board in *Offshore Power Systems* (Floating Nuclear Power Plants), ALAB-489, 8 NRC 194 (1978).)

The Commission also believes that the petitioner's proposal to require an Atomic Safety and Licensing Board to commence required hearings and render an initial decision within a time certain unduly restricts the discretion of the Licensing Boards. The Commission recognizes that many proceedings raise novel or especially difficult questions concerning radiological health and safety or the environment. Although the Commission expects its Licensing Boards to render decisions with reasonable expedition, it is not in the public interest to place in jeopardy the quality of these decisions with an undue emphasis on speed. Possible schedule conflicts could also result from the imposition of fixed time schedules. Moreover, the Commission believes that sound management principles should not require presiding officers of Atomic Safety and Licensing Boards to routinely seek Commission approval of time extensions for rendering decisions.

In view of the foregoing, the Commission denies the petition for rulemaking filed by Eckert, Seamans, Cherin & Mellott on December 29, 1978. A copy of the Commission's letter of denial is available for public inspection and copying at the NRC public Document Room at 1717 H Street, N.W., Washington, D.C.

Dated at Washington, D.C., this 13th day of August, 1980.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 7590-01-M

DOE/NRC-741 and 741A	Jefferson B. Hill, 395-7340	SSA-0585

OFFICE OF MANAGEMENT AND BUDGET

Agency Forms Under Review

August 13, 1980.

Background

When executive departments and agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Federal Reports Act (44 U.S.C., Chapter 35). Departments and agencies use a number of techniques including public hearings to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out its responsibility under the Act also considers comments on the forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

Every Monday and Thursday OMB publishes a list of the agency forms received for review since the last list was published. The list has all the entries for one agency together and grouped into new forms, revisions, extensions, or reinstatements. Some forms listed as revisions may only have a change in the number of respondents or a reestimate of the time needed to fill them out rather than any change to the content of the form. The agency clearance officer can tell you the nature of any particular revision you are interested in. Each entry contains the following information:

The name and telephone number of the agency clearance officer (from whom a copy of the form and supporting documents is available);

The office of the agency issuing this form;

The title of the form;

The agency form number, if applicable;

How often the form must be filled out;

Who will be required or asked to report;

An estimate of the number of forms that will be filled out;

An estimate of the total number of hours needed to fill out the form; and

The name and telephone number of the person or office responsible for OMB review.

Reporting or recordkeeping requirements that appear to raise no significant issues are approved promptly. Our usual practice is not to take any action on proposed reporting requirements until at least ten working days after notice in the **Federal Register** but occasionally the public interest requires more rapid action.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained from the agency clearance officer whose name and telephone number appear under the agency name. The agency clearance officer will send you a copy of the proposed form, the request for clearance (SF83), supporting statement, instructions, transmittal letters, and other documents that are submitted to OMB for review. If you experience difficulty in obtaining the information you need in reasonable time, please advise the OMB reviewer to whom the report is assigned. Comments and questions about the items on this list should be directed to the OMB reviewer or office listed at the end of each entry.

If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer of your intent as early as possible.

The timing and format of this notice have been changed to make the publication of the notice predictable and to give a clearer explanation of this process to the public. If you have comments and suggestions for further improvements to this notice, please send them to Jim J. Tozzi, Assistant Director for Regulatory and Information Policy, Office of Management and Budget, 726 Jackson Place, Northwest, Washington, D.C. 20503.

President's Commission for a National Agenda for the Eighties; Meeting

August 12, 1980.

AGENCY: Office of Management and Budget.

ACTION: Notice of meeting.

SUMMARY: Pursuant to Pub. L. 92–463, notice is hereby given for a meeting of Panel II (The American Economy) of the President's Commission for a National Agenda for the Eighties. The meeting is scheduled for August 25, 1980, from 9:00 a.m. until 4:30 p.m., with a break for lunch. The location of the meeting is 767 Fifth Avenue, New York, New York, in the Public Relations Conference Room.

The purpose of the meeting is to discuss the staff's draft of the panel report.

Seating is extremely limited and will be assigned on a first-come basis. Please call (202) 275–0616 to reserve space.

The meeting will be open to the public.

FOR FURTHER INFORMATION CONTACT: President's Commission for a National Agenda for the Eighties, Office of Administration, 744 Jackson Pl. NW., Washington, D.C. 20006, (202) 275–0616.

Brenda Mayberry,

Acting Budget and Management Officer.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[Commandant Instruction 5420.12E]

Chemical Transportation Advisory Committee

July 30, 1980.

Ref: (a) Federal Advisory Committee Act, Pub. L. 92–463

1. *Purpose.*—This Instruction promulgates the charter for the Chemical Transportation Advisory Committee as required by reference (a).

2. *Directives Affected.*—Commandant Instruction 5420.12D is cancelled.

3. *Objectives.*—The objectives and mission of the Committee are to provide advice and consultation to the Marine Safety Council with respect to the water transportation system for hazardous materials.

4. *Duration.*—Continuing.

5. *Membership.*—The Committee is composed of not more than 40 regular members. An alternate member may be appointed to act in the absence of any specifically designated committee member. Members and alternates are appointed by the Commandant, subject to the approval of the Secretary of Transportation. A committee member shall serve for a term of three (3) years or until a replacement has been appointed by the Commandant. The terms of the members are staggered, with approximately one-third of the terms expiring each year. Not more than 50% of the members with expiring terms may be reappointed. Nonparticipation of any member in the activities of this committee is sufficient reason for the appointment of a replacement member by the Commandant after approval by the Secretary of Transportation.

6. *Committee Officers:*

a. The *Chairman* is appointed by the Commandant. The Committee submits nominations for the chairman to the Commandant at least every three years. The duties of the chairman include:

Providing an opportunity for participation by each member and by public attendees, ensuring adherence to the agenda, maintaining order, conducting each meeting in general accordance with Roberts' Rules of Order, and preparation of any recommendations submitted to the Coast Guard.

b. *Sponsor.*—The Chairman, Marine Safety Council designates a Sponsor for the Committee from the Council membership. The Committee reports to the Sponsor.

c. *Executive Director.*—The Committee has an Executive Director designated by the sponsor to manage Committee affairs. He works with the Chairman, and in his absence, performs his duties.

d. *Executive Secretary.*—The Executive Secretary, Marine Safety Council is the Executive Secretary of the Committee. He maintains Committee records required by current directives on committee management and provides such staff as is necessary.

7. *Meetings.*—The committee meets approximately once each year. Special meetings may be called as necessary. Notice of each meeting is published in the **Federal Register**. All meetings are open to the public, who are permitted to appear before, or file statements with the Committee. The sponsor approves the calling of all meetings and approves all agenda. The sponsor or a designated federal official must be present at each committee meeting. This official has the authority and duty to adjourn the meeting whenever he deems such action to be in the public interest.

8. *Cost.*—Operating expenses are borne by the Committee Sponsor. The annual costs are approximately $5000 and 1 man year. All members serve without compensation (either trvel or per diem) from the Federal Government.

9. *Availability of Records.*—Subject to section 552 of Title 5, United States Code, the records, reports, minutes, agenda, and other documents made available to the Committee are available for public inspection and copying in the offices of the Executive Secretary, Marine Safety Council, Room 2418, 2100 Second Street, S.W., Washington, DC. 20593.

10. *Reports.*—The Executive Director furnishes detailed minutes of each meeting to the Sponsor. The minutes contain a record of the persons present, a complete and accurate description of matters discussed and conclusions reached, and copies of all reports received, issued or approved by the Committee. The Chairman and Executive Director certify to the accuracy of the minutes. At the end of each calendar year, the Executive Director prepares a report summarizing all activities, including any pertinent background material. This report is furnished the sponsor and filed with the Library of Congress.

11. *Subcommittee.*—The Chairman may establish subcommittees from among the membership of the Committee, with the approval of the Sponsor. The subcommittee must comply with all regulations applicable to the parent committee.

12. *Filing Date.*—July 30, 1980. This charter expires 30 June 1982.

J. B. Hayes,

Admiral, U.S. Coast Guard, Commandant.

BILLING CODE 4910-13-M

Federal Highway Administration

Environmental Impact Statement: Monroe and Dade Counties, FLA.

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Monroe and Dade Counties, Florida.

FOR FURTHER INFORMATION CONTACT: R. V. Robertson, District Engineer, Federal Highway Administration, Post Office 1079, Tallahassee, Florida 32302, Telephone: (904) 224–8111.

SUPPLEMENTAL INFORMATION: The FHWA, in cooperation with the Florida Department of Transportation, is preparing an environmental impact statement (EIS) for a proposal to improve U.S. Route 1 (State Road 5) in Monroe and Dade Counties, Florida. The proposed improvement would involve the reconstruction of existing U.S. Route 1 from State Road S–905 in Monroe County to Card Sound Road in Florida City in Dade County for a distance of approximately 20 miles. Also included in this proposal is the replacement of the existing structures at Jewfish Creek and C–111 canal. Improvements to the corridor are considered necessary to relieve congestion, improve safety, and satisfy the anticipated growth in transportation in the community.

Alternatives under consideration include (1) no-build alternative, (2) four-lane divided highway with a median barrier wall, and (3) four-lane divided highway with a grassed median.

Federal, State, and local agencies have contributed early coordination comments through the A–95 process. There has already been extensive public and agency involvement with this proposed action. Several meetings have already been conducted with State and county environmental agencies. In addition, an interagency meeting was conducted on July 26, 1979 involving the appropriate Federal, State, and local agencies. A series of public information meetings will be held during the development of this EIS. In addition, a public hearing will be held. Public notice will be given of the time and place of the meetings and hearing. The draft EIS will be made available for public and agency review and comment prior to the public hearing. A formal scoping meeting, involving the appropriate agencies, will be conducted for this proposed action.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

Issued on: August 5, 1980.

P. E. Carpenter,

Division Administrator Tallahassee, Florida.

[FR Doc. 80-24708 Filed 8-15-80; 8:45 am]

BILLING CODE 4910-22-M

Environmental Impact Statement: Roosevelt & Curry Counties, New Mexico

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Roosevelt & Curry Counties, New Mexico.

FOR FURTHER INFORMATION CONTACT: Dewey O. Lonsberry, District Engineer, Federal Highway Administration, 117 U.S. Courthouse, Santa Fe, New Mexico 87501, Telephone: (505) 988–6696; Duane A. Gray, Field Design Engineer, New Mexico State Highway Department, P.O. Box 1149, Santa Fe, New Mexico 87503, Telephone: (505) 983–0554; or Thomas S. Scanlon, Jr., Environmental Program Manager, New Mexico State Highway Department, P.O. Box 1149, Santa Fe, New Mexico 87503, Telephone: (505) 983–0134.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the New Mexico State Highway Department, will prepare an environmental impact statement (EIS) on a proposal to improve U.S. Route 70 (U.S. 70) between Portales and Clovis, New Mexico, as a Connector Primary Demonstration Project. The proposed improvement would involve the reconstruction of the existing U.S. 70 between 1.5 miles southwest of Portales and 5 miles east of Prince Street in Clovis, a distance of approximately 25 miles. Improvements to the corridor are considered necessary to provide adequate capacity for existing and projected traffic demand and incorporate modern design features to provide safety and efficient transportation service.

Alternatives under consideration include (1) taking no action; (2) improving the existing highway; and (3) improving the existing highway plus new relief route alignments in Portales and Clovis. Incorporated into and studied with the various build alternatives will be variations of alignment.

Early coordination letters describing the proposed action and soliciting comments were sent to appropriate Federal, State and local agencies and interested private organizations. Following the transmittal of these letters, as part of the early coordination effort, a meeting was held in November, 1979 with representatives of the above agencies and organizations to solicit their comments and suggestions. A series of public involvement meetings was held in August and December, 1979 and July, 1980 to obtain community comments on the proposed action and the alternatives. In addition, a formal public hearing will be held. Upon completion of the draft EIS, public notice will be given of the time and place of the hearing. The draft EIS will be available for public and agency review and comment. No formal scoping meeting will be held.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues are identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning, and Construction. The provisions of OMB Circular No. A–95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects apply to this program.)

Issued on: August 6, 1980.

Dewey O. Lonsberry,

District Engineer, Santa Fe, New Mexico.

[FR Doc. 80-24737 Filed 8-15-80; 8:45 am]

BILLING CODE 4910-22-M

Supplemental Environmental Impact Statement; Columbia, S. C.

AGENCY: Federal Highway Administration (FHWA), DOT. Economic Development Administration (EDA).

ACTION: Notice of intent.

SUMMARY: The FHWA in cooperation with EDA is issuing this notice to advise the public that a supplement to Draft EIS FHWA–SC–EIS–79–03–D Proposed Railroad Relocation, Consolidation and grade Crossing Elimination Project will be prepared to include impact analysis of the Palmetto Center Redevelopment Project and analysis of the cumulative impact of both the Palmetto Center and the Railroad Project.

FOR FURTHER INFORMATION CONTACT: Mr. John Cole, EIS Coordinator, U.S. Department of Commerce, 1365 Peachtree Street, NE., Suite 700, Atlanta, Georgia, 30309, Telephone: (404) 881–7667; or Mr. Bill Rice, District Engineer, Federal Highway Administration, 1835 Assembly Street, Suite 758, Columbia, South Carolina 29201, Telephone: (803) 765–5411.

SUPPLEMENTARY INFORMATION: The U.S. Department of Transportation, Federal Highway Administration (FHWA) and the Economic Development Administration (EDA) as Joint Lead Agencies in cooperation with the City of Columbia, South Carolina, intend to prepare a supplement to the above referenced Draft Environmental Impact Statement. The supplement will include information on the Palmetto Center Redevelopment Project described below and the cumulative impacts when considered with the railroad relocation.

The proposal calls for acquisition of 22 parcels in a block with a total of 23 parcels, relocation of existing businesses, clearance of structures and redevelopment of the block. The redevelopment will include: An office building with approximately 400,000 square feet of space; a 300-room hotel; a public and educational component which includes space for a Convention Center; and enclosed landscaped atrium which connects the hotel and the office building, outdoor open space, and space for the University of South Carolina for additional continuing education, meeting, dining, administrative and other support activites; and a parking structure for about 1050 automobiles.

The project boundaries are Main Street (west), Washington Street (south), Sumter Street (east) and Hampton Street (north).

It is now anticipated that funding for this combined project will be sought from the Department of Housing and Urban Development (Community Development Block Grant and Urban Development Action Grant), DOT and EDA and that the project will begin in 1981 and will be completed within three to four years.

A supplement to the Draft Environmental Impact Statement is required to assess the environmental impacts of the Palmetto Center Redevelopment and its cumulative impacts when considered with the Railroad Relocation, Consolidation and Grade Crossing Project. This project requires demolition of structures (two of which may be eligible for the National Register), dislocation of businesses, increased traffic flow and accompanying increases in air quality pollutants.

At this time, the alternatives under consideration are: To carry out the project as planned; move the project to alternate locatons; modifications to the project to reduce the scope of acquisition and relocation; or to take no action.

The FHWA, EDA and the City plan to hold a Scoping Meeting with the Public, Federal, State and Local Agencies for the purpose of identifying the significant environmental isses to be addressed in the EIS. The Scoping Meeting will be held at City Hall in Columbia, South Carolina on September 18, 1980, at 2:30 p.m. in the City Council Chambers.

To ensure that full range of isses related to this proposed action are addressed and all significant issues are identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the EDA (or FHWA) at the address provided above.

Issued on August 8, 1980.

B. G. Cloyd,

Division Administrator, Columbia, South Carolina.

BILLING CODE 4910-22-M

Federal Railroad Administration

[FRA Waiver Petition Docket HS–80–6]

Little Rock & Western Railroad Co.; Petition for Exemption From the Hours of Service Act

In accordance with 49 CFR 211.41 and Section 211.9, notice is hereby given that the Little Rock and Western Railroad (LR&W) has petitioned the Federal Railroad Administration (FRA) for an exemption from the Hours of Service Act (82 Stat. 464, Pub. L. 91–169, 45 U.S.C. 64a(e)). That petition requests that the LR&W be granted authority to permit certain employees to continuously remain on duty for in excess of twelve hours.

The Hours of Service Act currently makes it unlawful for a railroad to require or permit specified employees to continuously remain on duty for a period in excess of twelve hours. However, the Hours of Service Act contains a provision that permits a railroad, which employs no more than fifteen employees who are subject to the

statute, to seek an exemption from this twelve hour limitation.

The LR&W seeks this exemption so that it can permit certain employees to remain continuously on duty for periods not to exceed sixteen hours. The petitioner indicates that granting this exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs no more than fifteen employees and has demonstrated good cause for granting this exemption.

Interested persons are invited to participate in this proceeding by submitting written views or comments. FRA has not scheduled an opportunity for oral comment since the facts do not appear to warrant it. Communications concerning this proceeding should identify the Docket Number, Docket Number HS–80–8, and must be submitted in triplicate to the Docket Clerk, Office of the Chief Counsel, Federal Railroad Administration, Nassif Building, 400 7th Street, S.W., Washington, D.C. 20590.

Communications received before September 26, 1980, will be considered by the FRA before final action is taken. Comments received after that date will be considered as far as practicable. All comments received will be available for examination both before and after the closing date for comments, during regular business hours in Room 8211, Nassif Building, 400 7th Street, S.W., Washington, D.C. 20590.

(Section 5 of the Hours of Service Act of 1969 (45 U.S.C. 64a), 1.49(d) of the regulations of the Office of the Secretary, 49 CFR 1.49(d)).

Issued in Washington, D.C. on August 8, 1980.

Joseph W. Walsh,

Chairman, Railroad Safety Board.

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8462–N	M.A.N. Maschinenfabrik, Augsburg-Nurnberg, Hamburg, West Germany.	49 CFR 173.119, 173.125, 173.126, 173.129, 173.132, 173.144, 173.245.	To authorize shipment of various hazardous materials in non-DOT specification IMCO type II portable tanks. (Modes 1, 2, 3.)
8463–N	Ethyl Corporation, Baton Rouge, LA	49 CFR 173.262(b)(1), 173.262(b)(2), 173.262(b)(3).	To authorize shipment of not over 62% hydrobromic acid in glass bottles contained in metal cans overpacked in a Specification 12A fiberboard box. (Mode 1.)
8464–N	Aireseach Manufacturing, Company of Arizona, Phoenix, AZ	49 CFR 178.65, 173.302	To authorize the manufacture, marking, and sale of toroidal pressure vessels similar to DOT Specification 39 for shipment of helium. (Modes 1, 4.)
8465–N	Chase Bag Co., Oak Brook, IL	49 CFR 173.182	To authorize the manufacture, marking, and sale of a 4 mil bag of low density polyethylene film, 50 pound capacity, for shipment of ammonium nitrate fertilizer. (Modes 1,"2.)
8466–N	Atlas Powder Company, Dallas, TX	49 CFR 173.114a(h)(3)	To authorize shipment of up to 52,000 lbs. of RXL481, classed as a blasting agent in two types of specially designed bulk semi-trailer tanks. (Mode 1.)
8467–N	ANF Industrie, Paris, France	49 CFR 173.315	To authorize shipment of sulfur dioxide in a non-DOT specification IMCo type V portable tank. (Modes 1, 2, 3.)
8468–N	Hedwin Corporation, Baltimore, MD	49 CFR 173.119, 173.125, 173.272, 173.286, 173.346.	To authorize the manufacture, marking, and sale of DOT Specification 34, 5 and 6 gallon polyethylene containers for shipment of certain flammable poison B, and corrosive liquids. (Modes 1, 2, 3.)

This notice of receipt of applications for new exemptions is published in accordance with Section 107 of the Hazardous Materials Transportation Act (49 CFR U.S.C. 1806; 49 CFR 1.53(e)).

Issued in Washington, DC, on August 1, 1980.

Applications for Renewal or Modification of Exemptions or Applications To Become a Party to an Exemption

AGENCY: Materials Transportation Bureau, DOT.

ACTION: List of applications for renewal or modification of exemptions or application to become a party to an exemption.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Trnasportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Regulation of the Materials Transportation Bureau has received the applications described herein. This notice is abbreviated to expedite docketing and public notice. Because the sections affected, modes of transportation, and the nature of application have been shown in earlier **Federal Register** publications, they are not repeated here. Except as otherwise noted, renewal applications are for extension of the exemption terms only. Where changes are requested (e.g. to provide for additional hazardous materials, packaging design changes, additional mode of transportation, etc.) they are described in footnotes to the application number. Application numbers with the suffix "X" denote renewal; application numbers with the suffix "P" denote party to. These applications have been separated from the new applications for exemptions to facilitate processing.

DATES: Comment period closes September 2, 1980.

ADDRESS COMMENTS TO: Dockets Branch, Information Services Division, Materials Transportation Bureau, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate.

FOR FURTHER INFORMATION CONTACT: Copies of the applications are available for inspection in the Dockets Branch, Room 8426, Nassif Building, 400 7th Street, S.W., Washington, DC.

[1] To renew and to authorize an additional high explosive liquid, classed as a Class A explosive.

[2] To delete reference to retesting and substitute visual internal inspection every five years, for metallic sodium portable tanks.

[3] To renew and to accommodate minor appurtenance changes.

[4] To renew and to accommodate minor appurtenance changes.

[5] To authorize poisonous liquids, n.o.s. or compounds, weed killing, and arsenic acid as additional commodities in non-DOT specification 55 gallon polyethylene containers.

[6] Request modification of hydroburst failure mode requirement.

[7] Request modification of hydroburst failure mode requirement.

[8] To authorize shipment of certain corrosive liquids, Class B poisonous liquids, flammable liquids, and organic peroxides in DOT–34 containers.

[9] Request modification of hydroburst failure mode requirement.

This notice of receipt of applications for renewal of exemptions and for party to an exemption is published in accordance with Section 107 of the Hazardous Materials Transportation Act (49 CFR U.S.C. 1806; 49 CFR 1.53(e)).

Issued in Washington, D.C., on August 4, 1980.

Grants and Denials of Applications for Exemptions

AGENCY: Materials Transportation Bureau, D.O.T.

ACTION: Notice of grants and denials of applications for exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted in April 1980. The modes of transportation involved are identified by a number in the "Nature of Exemption Thereof" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
1479–X	1479	Rockwell International Corporation, Canoga Park, CA.	49 CFR 173.119, 173.125, 173.126, 173.129, 173.132, 173.144, 173.245.	To renew and to authorize shipment of various hazardous materials in non-DOT specification IMCO type II portable tanks. (Modes 1, 2, 3.)
2913–X	2913	Department of Energy, Washington, DC.	49 CFR 173.262(b)(1), 173.262(b)(2), 173.262(b)(3).	To renew and to authorize shipment of not over 62% hydrobromic acid in glass bottles contained in metal cans overpacked in a Specification 12A fiberboard box. (Mode 1.)
3126–X	3126	Hercules, Incorporated, Wilmington, DE (See Footnote 1).	49 CFR 178.65, 173.302	To renew and to authorize the manufacture, marking, and sale of toroidal pressure vessels similar to DOT Specification 39 for shipment of helium. (Modes 1, 4.)
3216–X	3216	E. I. du Pont de Nemours & Company, Incorporated, Wilmington, DE.	49 CFR 173.182	To renew and to authorize the manufacture, marking, and sale of a 4 mil bag of low density polyethylene film, 50 pound capacity, for shipment of ammonium nitrate fertilizer. (Modes 1,"2.)
3941–X	3941	Pacific Engineering & Production Company of Nevada, Henderson, NV.	49 CFR 173.114a(h)(3)	To renew and to authorize shipment of up to 52,000 lbs. of RXL481, classed as a blasting agent in two types of specially designed bulk semi-trailer tanks. (Mode 1.)
3941–X	3941	Kerr-McGee Chemical Corporation, Oklahoma City, OK.	49 CFR 173.315	To renew and to authorize shipment of sulfur dioxide in a non-DOT specification IMCo type V portable tank. (Modes 1, 2, 3.)
3941–X	3941	Aerojet Tactical Systems, Sacramento, CA.	49 CFR 173.119, 173.125, 173.272, 173.286, 173.346.	To renew and to authorize the manufacture, marking, and sale of DOT Specification 34, 5 and 6 gallon polyethylene containers for shipment of certain flammable poison B, and corrosive liquids. (Modes 1, 2, 3.)
4460–X	4460	Ethyl Corporation, Baton Rouge, LA (See Footnote 2).	49 CFR 173.119, 173.125, 173.126, 173.129, 173.132, 173.144, 173.245.	To renew and to authorize shipment of various hazardous materials in non-DOT specification IMCO type II portable tanks. (Modes 1, 2, 3.)
4612–X	4612	MCB Manufacturing Chemists, Cincinnati, OH.	49 CFR 173.262(b)(1), 173.262(b)(2), 173.262(b)(3).	To renew and to authorize shipment of not over 62% hydrobromic acid in glass bottles contained in metal cans overpacked in a Specification 12A fiberboard box. (Mode 1.)
5038–X	5038	Synthatron Corporation, Parsippany, NJ.	49 CFR 178.65, 173.302	To renew and to authorize the manufacture, marking, and sale of toroidal pressure vessels similar to DOT Specification 39 for shipment of helium. (Modes 1, 4.)
5414–X	5414	E. I. du Pont de Nemours & Company, Incorporated, Wilmington, DE.	49 CFR 173.182	To renew and to authorize the manufacture, marking, and sale of a 4 mil bag of low density polyethylene film, 50 pound capacity, for shipment of ammonium nitrate fertilizer. (Modes 1,"2.)
5493–X	5493	Montana Sulfur and Chemical Company, Billings, MT (See Footnote 3).	49 CFR 173.114a(h)(3)	To renew and to authorize shipment of up to 52,000 lbs. of RXL481, classed as a blasting agent in two types of specially designed bulk semi-trailer tanks. (Mode 1.)
5792–X	5792	Stauffer Chemical Company, Westport, CT.	49 CFR 173.315	To renew and to authorize shipment of sulfur dioxide in a non-DOT specification IMCo type V portable tank. (Modes 1, 2, 3.)
6060–X	6060	Air Products and Chemicals, Inc., Allentown, PA.	49 CFR 173.119, 173.125, 173.126, 173.129, 173.132, 173.144, 173.245.	To renew and to authorize shipment of various hazardous materials in non-DOT specification IMCO type II portable tanks. (Modes 1, 2, 3.)
6113–X	6113	Boston Gas Company, Boston MA	49 CFR 173.262(b)(1), 173.262(b)(2), 173.262(b)(3).	To renew and to authorize shipment of not over 62% hydrobromic acid in glass bottles contained in metal cans overpacked in a Specification 12A fiberboard box. (Mode 1.)
6117–X	6117	Montana Sulphur and Chemical Company, Billings, MT (See Footnote 4).	49 CFR 178.65, 173.302	To renew and to authorize the manufacture, marking, and sale of toroidal pressure vessels similar to DOT Specification 39 for shipment of helium. (Modes 1, 4.)
6197–X	6197	Boston Gas Company Boston, MA	49 CFR 173.182	To renew and to authorize the manufacture, marking, and sale of a 4 mil bag of low density polyethylene film, 50 pound capacity, for shipment of ammonium nitrate fertilizer. (Modes 1,"2.)
6349–X	6349	Airco Industrial Gases Murray Hill, NJ.	49 CFR 173.114a(h)(3)	To renew and to authorize shipment of up to 52,000 lbs. of RXL481, classed as a blasting agent in two types of specially designed bulk semi-trailer tanks. (Mode 1.)
6392–X	6392	Northern Petrochemical Company Des Plaines, IL.	49 CFR 173.315	To renew and to authorize shipment of sulfur dioxide in a non-DOT specification IMCo type V portable tank. (Modes 1, 2, 3.)
6416–X	6416	The Dow Chemical Company Pittsburg, CA.	49 CFR 173.119, 173.125, 173.126, 173.129, 173.132, 173.144, 173.245.	To renew and to authorize shipment of various hazardous materials in non-DOT specification IMCO type II portable tanks. (Modes 1, 2, 3.)
6453–X	6453	General Motors Corporation Detroit, MI.	49 CFR 173.262(b)(1), 173.262(b)(2), 173.262(b)(3).	To renew and to authorize shipment of not over 62% hydrobromic acid in glass bottles contained in metal cans overpacked in a Specification 12A fiberboard box. (Mode 1.)
6484–X	6484	Dow Chemical U.S.A. Midland, MI	49 CFR 178.65, 173.302	To renew and to authorize the manufacture, marking, and sale of toroidal pressure vessels similar to DOT Specification 39 for shipment of helium. (Modes 1, 4.)
6538–X	6538	Wonder Corporation of America Stamford, CT.	49 CFR 173.182	To renew and to authorize the manufacture, marking, and sale of a 4 mil bag of low density polyethylene film, 50 pound capacity, for shipment of ammonium nitrate fertilizer. (Modes 1,"2.)
6569–X	6569	Bacardi International, Limited Hamilton, Bermuda.	49 CFR 173.114a(h)(3)	To renew and to authorize shipment of up to 52,000 lbs. of RXL481, classed as a blasting agent in two types of specially designed bulk semi-trailer tanks. (Mode 1.)
6602–X	6602	Dow Chemical Company Midland, MI.	49 CFR 173.315	To renew and to authorize shipment of sulfur dioxide in a non-DOT specification IMCo type V portable tank. (Modes 1, 2, 3.)
6670–X	6670	E.I. du Pont de Nemours & Company, Incorporated Wilmington, DE.	49 CFR 173.119, 173.125, 173.126, 173.129, 173.132, 173.144, 173.245.	To renew and to authorize shipment of various hazardous materials in non-DOT specification IMCO type II portable tanks. (Modes 1, 2, 3.)
6793–X	6793	Hickson & Welch, Ltd. Castleford, England.	49 CFR 173.262(b)(1), 173.262(b)(2), 173.262(b)(3).	To renew and to authorize shipment of not over 62% hydrobromic acid in glass bottles contained in metal cans overpacked in a Specification 12A fiberboard box. (Mode 1.)
6806–X	6806	Analytical Instrument Development, Inc. Avondale, PA.	49 CFR 178.65, 173.302	To renew and to authorize the manufacture, marking, and sale of toroidal pressure vessels similar to DOT Specification 39 for shipment of helium. (Modes 1, 4.)
6864–X	6864	Bacardi International Limited Hamilton, Bermuda.	49 CFR 173.182	To renew and to authorize the manufacture, marking, and sale of a 4 mil bag of low density polyethylene film, 50 pound capacity, for shipment of ammonium nitrate fertilizer. (Modes 1,"2.)
6898–X	6898	Allied Chemical Corporation Morristown, NJ.	49 CFR 173.114a(h)(3)	To renew and to authorize shipment of up to 52,000 lbs. of RXL481, classed as a blasting agent in two types of specially designed bulk semi-trailer tanks. (Mode 1.)
6902–X	6902	Synthatron Corporation Parsipanny, NJ.	49 CFR 173.315	To renew and to authorize shipment of sulfur dioxide in a non-DOT specification IMCo type V portable tank. (Modes 1, 2, 3.)
6984–X	6984	E.I. du Pont de Nemours & Company, Incorporated Wilmington, DE.	49 CFR 173.119, 173.125, 173.126, 173.129, 173.132, 173.144, 173.245.	To renew and to authorize shipment of various hazardous materials in non-DOT specification IMCO type II portable tanks. (Modes 1, 2, 3.)
7035–X	7035	Owens-Illinois (Plastic Products Division) Toledo, OH (See Footnote 5).	49 CFR 173.262(b)(1), 173.262(b)(2), 173.262(b)(3).	To renew and to authorize shipment of not over 62% hydrobromic acid in glass bottles contained in metal cans overpacked in a Specification 12A fiberboard box. (Mode 1.)
7218–X	7218	Structural Composites Industries, Inc. Azusa, CA (See Footnote 6).	49 CFR 178.65, 173.302	To renew and to authorize the manufacture, marking, and sale of toroidal pressure vessels similar to DOT Specification 39 for shipment of helium. (Modes 1, 4.)
7277–X	7277	Structural Composites Industries, Inc. Azusa, CA (See Footnote 7).	49 CFR 173.182	To renew and to authorize the manufacture, marking, and sale of a 4 mil bag of low density polyethylene film, 50 pound capacity, for shipment of ammonium nitrate fertilizer. (Modes 1,"2.)
7503–X	7503	Orval Tank Containers Paris, France.	49 CFR 173.114a(h)(3)	To renew and to authorize shipment of up to 52,000 lbs. of RXL481, classed as a blasting agent in two types of specially designed bulk semi-trailer tanks. (Mode 1.)
7640–X	7640	Mauser Packaging Ltd. New York, NY.	49 CFR 173.315	To renew and to authorize shipment of sulfur dioxide in a non-DOT specification IMCo type V portable tank. (Modes 1, 2, 3.)
7654–X	7654	J. T. Baker Chemical Company Phillipsburg, NJ.	49 CFR 173.119, 173.125, 173.126, 173.129, 173.132, 173.144, 173.245.	To renew and to authorize shipment of various hazardous materials in non-DOT specification IMCO type II portable tanks. (Modes 1, 2, 3.)
7695–X	7695	Tankcargo Container Leasing, S.A., TCL Geneva, Switzerland.	49 CFR 173.262(b)(1), 173.262(b)(2), 173.262(b)(3).	To renew and to authorize shipment of not over 62% hydrobromic acid in glass bottles contained in metal cans overpacked in a Specification 12A fiberboard box. (Mode 1.)
7701–X	7701	Tankcargo Container Leasing, S.A., TCL Geneva, Switzerland.	49 CFR 178.65, 173.302	To renew and to authorize the manufacture, marking, and sale of toroidal pressure vessels similar to DOT Specification 39 for shipment of helium. (Modes 1, 4.)
7802–X	7802	Bennett Industries Pacoima, CA	49 CFR 173.182	To renew and to authorize the manufacture, marking, and sale of a 4 mil bag of low density polyethylene film, 50 pound capacity, for shipment of ammonium nitrate fertilizer. (Modes 1,"2.)
7819–X	7819	Tank Cargo Container Leasing, S.A., TCL Geneva, Switzerland.	49 CFR 173.114a(h)(3)	To renew and to authorize shipment of up to 52,000 lbs. of RXL481, classed as a blasting agent in two types of specially designed bulk semi-trailer tanks. (Mode 1.)
7820–X	7820	Hugonnet, S.A. Paris, France	49 CFR 173.315	To renew and to authorize shipment of sulfur dioxide in a non-DOT specification IMCo type V portable tank. (Modes 1, 2, 3.)
7820–X	7820	Tank Cargo Container Leasing, S.A., TCL Geneva, Switzerland.	49 CFR 173.119, 173.125, 173.126, 173.129, 173.132, 173.144, 173.245.	To renew and to authorize shipment of various hazardous materials in non-DOT specification IMCO type II portable tanks. (Modes 1, 2, 3.)
7820–X	7820	CATU Containers, S.A. Geneva, Switzerland.	49 CFR 173.262(b)(1), 173.262(b)(2), 173.262(b)(3).	To renew and to authorize shipment of not over 62% hydrobromic acid in glass bottles contained in metal cans overpacked in a Specification 12A fiberboard box. (Mode 1.)
7820–X	7820	T. I. C., S.A. Paris, France	49 CFR 178.65, 173.302	To renew and to authorize the manufacture, marking, and sale of toroidal pressure vessels similar to DOT Specification 39 for shipment of helium. (Modes 1, 4.)
7820–X	7820	Eurotainer Paris, France	49 CFR 173.182	To renew and to authorize the manufacture, marking, and sale of a 4 mil bag of low density polyethylene film, 50 pound capacity, for shipment of ammonium nitrate fertilizer. (Modes 1,"2.)
7820–X	7820	Lowaco, S.A. Geneva, Switzerland	49 CFR 173.114a(h)(3)	To renew and to authorize shipment of up to 52,000 lbs. of RXL481, classed as a blasting agent in two types of specially designed bulk semi-trailer tanks. (Mode 1.)
7897–X	7897	Tank Cargo Container Leasing, S.A., TCL Geneva, Switzerland.	49 CFR 173.315	To renew and to authorize shipment of sulfur dioxide in a non-DOT specification IMCo type V portable tank. (Modes 1, 2, 3.)
7991–X	7991	Union Pacific Railroad Company Omaha, NE.	49 CFR 173.119, 173.125, 173.126, 173.129, 173.132, 173.144, 173.245.	To renew and to authorize shipment of various hazardous materials in non-DOT specification IMCO type II portable tanks. (Modes 1, 2, 3.)
8013–X	8013	Air Products and Chemicals, Inc. Allentown, PA.	49 CFR 173.262(b)(1), 173.262(b)(2), 173.262(b)(3).	To renew and to authorize shipment of not over 62% hydrobromic acid in glass bottles contained in metal cans overpacked in a Specification 12A fiberboard box. (Mode 1.)
8017–X	8017	Air Products and Chemicals, Inc. Allentown, PA.	49 CFR 178.65, 173.302	To renew and to authorize the manufacture, marking, and sale of toroidal pressure vessels similar to DOT Specification 39 for shipment of helium. (Modes 1, 4.)
8035–X	8035	NL McCullough, NL Industries, Inc. Houston, TX.	49 CFR 173.182	To renew and to authorize the manufacture, marking, and sale of a 4 mil bag of low density polyethylene film, 50 pound capacity, for shipment of ammonium nitrate fertilizer. (Modes 1,"2.)
8074–X	8074	Matheson Lyndhurst, NJ	49 CFR 173.114a(h)(3)	To renew and to authorize shipment of up to 52,000 lbs. of RXL481, classed as a blasting agent in two types of specially designed bulk semi-trailer tanks. (Mode 1.)
8157–X	8157	Born Free Plastics, Inc. Gardena, CA (See Footnote 8).	49 CFR 173.315	To renew and to authorize shipment of sulfur dioxide in a non-DOT specification IMCo type V portable tank. (Modes 1, 2, 3.)
8162–X	8162	Structural Composites Industries, Inc. Azusa, CA (See Footnote).	49 CFR 173.119, 173.125, 173.126, 173.129, 173.132, 173.144, 173.245.	To renew and to authorize shipment of various hazardous materials in non-DOT specification IMCO type II portable tanks. (Modes 1, 2, 3.)
5206–P	EE5206	Boren Explosives Company Sumiton, AL.	49 CFR 173.262(b)(1), 173.262(b)(2), 173.262(b)(3).	To authorize shipment of not over 62% hydrobromic acid in glass bottles contained in metal cans overpacked in a Specification 12A fiberboard box. (Mode 1.)
6016–P	EE6016	Kanweld Welding Equipment & Supplies Kankakee, IL.	49 CFR 178.65, 173.302	To authorize the manufacture, marking, and sale of toroidal pressure vessels similar to DOT Specification 39 for shipment of helium. (Modes 1, 4.)
6614–P	EE6614	Esbro Chemical Redwood City, CA	49 CFR 173.182	To authorize the manufacture, marking, and sale of a 4 mil bag of low density polyethylene film, 50 pound capacity, for shipment of ammonium nitrate fertilizer. (Modes 1,"2.)
6762–P	EE6762	Schaefer Chemical Products Company Saginew, MI.	49 CFR 173.114a(h)(3)	To authorize shipment of up to 52,000 lbs. of RXL481, classed as a blasting agent in two types of specially designed bulk semi-trailer tanks. (Mode 1.)
6762–P	EE6762	Oxford Chemicals, Inc. Atlanta, GA	49 CFR 173.315	To authorize shipment of sulfur dioxide in a non-DOT specification IMCo type V portable tank. (Modes 1, 2, 3.)
7052–P	EE7052	Bren-Tronics, Inc. Commack, NY	49 CFR 173.119, 173.125, 173.126, 173.129, 173.132, 173.144, 173.245.	To authorize shipment of various hazardous materials in non-DOT specification IMCO type II portable tanks. (Modes 1, 2, 3.)
7052–P	EE7052	Gearhart Industries, Inc. Fort Worth, TX.	49 CFR 173.262(b)(1), 173.262(b)(2), 173.262(b)(3).	To authorize shipment of not over 62% hydrobromic acid in glass bottles contained in metal cans overpacked in a Specification 12A fiberboard box. (Mode 1.)
7052–P	EE7052	Plainview Electronics Corporation Plainview, NY.	49 CFR 178.65, 173.302	To authorize the manufacture, marking, and sale of toroidal pressure vessels similar to DOT Specification 39 for shipment of helium. (Modes 1, 4.)
7202–P	EE7202	University of Miami Miami, FL	49 CFR 173.182	To authorize the manufacture, marking, and sale of a 4 mil bag of low density polyethylene film, 50 pound capacity, for shipment of ammonium nitrate fertilizer. (Modes 1,"2.)
7938–P	EE7938	ABC Containerline N.V. Antwerp, Belgium.	49 CFR 173.114a(h)(3)	To authorize shipment of up to 52,000 lbs. of RXL481, classed as a blasting agent in two types of specially designed bulk semi-trailer tanks. (Mode 1.)
8002–P	EE8002	Compagnie des Containers Reservoirs Paris, France.	49 CFR 173.315	To authorize shipment of sulfur dioxide in a non-DOT specification IMCo type V portable tank. (Modes 1, 2, 3.)
8206–P	EE8206	Copps Industries, Inc. Menomonee Falls, WI.	49 CFR 173.119, 173.125, 173.126, 173.129, 173.132, 173.144, 173.245.	To authorize shipment of various hazardous materials in non-DOT specification IMCO type II portable tanks. (Modes 1, 2, 3.)
8207–P	EE8207	Copps Industries, Inc. Menomonee Falls, WI.	49 CFR 173.262(b)(1), 173.262(b)(2), 173.262(b)(3).	To authorize shipment of not over 62% hydrobromic acid in glass bottles contained in metal cans overpacked in a Specification 12A fiberboard box. (Mode 1.)
8222–P	EE8222	Compagnie des Containers Reservoirs.	49 CFR 178.65, 173.302	To authorize the manufacture, marking, and sale of toroidal pressure vessels similar to DOT Specification 39 for shipment of helium. (Modes 1, 4.)
8324–P	EE8324	Copps Industries, Inc. Menomonee Falls, WI.	49 CFR 173.182	To authorize the manufacture, marking, and sale of a 4 mil bag of low density polyethylene film, 50 pound capacity, for shipment of ammonium nitrate fertilizer. (Modes 1,"2.)
8467–P	EE8467	Societe Auxiliaire de Transorts et d'Industries Paris, France.	49 CFR 173.114a(h)(3)	To authorize shipment of up to 52,000 lbs. of RXL481, classed as a blasting agent in two types of specially designed bulk semi-trailer tanks. (Mode 1.)

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
		Renewal and Party to Exemptions		
2709–X	DOT–E 2709	Hercules, Incorporated, Wilmington, DE	49 CFR 173.52, 177.834(l)(1)	To authorize the use of non-DOT specification drums for the transportation of a Class A and a Class B explosive liquid. (Mode 1.)
3992–X	DOT–E 3992	Stauffer Chemical Co., Westport, CT	49 CFR 173.314	To authorize the transportation of hydrogen chloride in a DOT Specification 105A600W tank car. (Mode 2.)
3992–X	DOT–E 3992	Union Carbide Corp., Bound Brook NJ	49 CFR 173.314	To authorize the transportation of hydrogen chloride in a DOT Specification 105A600W tank car. (Mode 2.)
4108–X	DOT–E 4108	Liquid Air Corporation, Chicago, IL	49 CFR 173.315(a)	To authorize the transportation of liquefied argon, nitrogen, and oxygen in non-DOT specification cargo tanks insulated with perlite. (Mode 1.)
4291–X	DOT–E 4291	Kerr McGee Chemical Corp., Oklahoma City, OK	49 CFR 173.239a(a)(2)	To authorize the transportation of ammonium perchlorate, an oxidizer, in an aluminum portable tank. (Modes 1, 2.)
4291–X	DOT–E 4291	Pacific Engineering & Production Co. of Nevada, Henderson, NV.	49 CFR 173.239a(a)(2)	To authorize the transportation of ammonium perchlorate, an oxidizer, in an aluminum portable tank. (Modes 1, 2.)
4291–X	DOT–E 4291	United Technologies, Sunnyvale, CA	49 CFR 173.239a(a)(2)	To authorize the transportation of ammonium perchlorate, an oxidizer, in an aluminum portable tank. (Modes 1, 2.)
4400–X	DOT–E 4400	AIRCO Industrial Gases, Murray Hill, NJ	49 CFR 172.101, 173.315(a)	To authorize the shipment of liquefied hydrogen and pressurized liquid helium in non-DOT specification insulated cargo tanks. (Modes 1, 3.)
4453–P	DOT–E 4453	Atlas Powder Company, Dallas, TX	49 CFR 173.182(c), 173.114a(h)(3)	To become a party to Exemption 4453. (Mode 1.)
4453–P	DOT–E 4453	Casebier Bulk Transport Co., Inc., Beaver Dam, KY.	49 CFR 173.182(c), 173.114a(h)(3)	To become a party to Exemption 4453. (Mode 1.)
4453–P	DOT–E 4453	Beaver Explosives, Inc., Edinburg, PA	49 CFR 173.182(c), 173.114a(h)(3)	To become a party to Exemption 4453. (Mode 1.)
4460–X	DOT–E 4460	Ethyl Corporation, Baton Rouge, LA	49 CFR 173.29(f)(2), 173.206(a), 176.74(c), 176.76(g)(3).	To authorize the transportation of metallic sodium, a flammable solid, in DOT Specification 51 portable tanks. (Mode 3.)
4554–X	DOT–E 4554	B.F. Goodrich Chemical Company, Cleveland, OH.	49 CFR 172.101, 173.315(a)(1)	To authorize the transportation of liquefied ethylene, classed as a flammable gas, in non-DOT specification cargo tanks. (Mode 1.)
5122–X	DOT–E 5122	E.I. du Pont de Nemours & Company, Incorporated, Wilmington, DE.	49 CFR 173.314(c)	To authorize transportation of a certain nonflammable compressed gas in DOT Specification 106A500X and 110A500W multi-unit tank car tanks. (Modes 1, 2.)
5200–X	DOT–E 5200	E.I. du Pont de Nemours & Company, Incorporated, Wilmington, DE.	49 CFR 173.314(c), 179.101–1(a)	To authorize the use of DOT Specification 105A400W and 114A340W tank car tanks for the transportation of certain liquefied compressed gases, flammable and nonflammable. (Mode 2.)
5372–X	DOT–E 5372	Vulcan Materials Company, Wichita, KS	49 CFR 173.301(d), 173.302(a)(3), 173.304(a)(2).	To authorize the transportation of certain flammable and nonflammable gases in modified DOT Specification 3T cylinders.
5372–X	DOT–E 5372	Stauffer Chemical Company, Westport, CT	49 CFR 173.301(d), 173.302(a)(3), 173.304(a)(2).	To authorize the transportation of certain flammable and nonflammable gases in modified DOT Specification 3T cylinders.
5485–P	DOT–E 5485	Air Products & Chemicals, Inc., Allentown, PA	49 CFR 172.101, 173.315(a)	To become a party to Exemption 5485.
5526–X	DOT–E 5526	MC/B Chemical Company, Norwood, OH	49 CFR 173.119, 173.125, 173.126, 173.129, 173.127, 173.131, 173.132, 173.144, 173.145, 173.147, 173.221, 173.222, 173.223, 173.245, 173.247, 173.248, 173.250a, 173.253, 173.262, 173.263, 173.265, 173.266, 173.267, 173.268, 173.269, 173.272, 173.276, 173.277, 173.278, 173.291.	To authorize transportation of those flammable liquids, liquid organic peroxides, liquid oxidizers, corrosive liquids, or poison B liquids authorized by 49 CFR Part 173 for transportation in DOT Specification 1D or 1K packaging in non-DOT specification glass carboys. (Modes 1, 2.)
5526–X	DOT–E 5526	Allied Chemical Corporation, Moristown, NJ	49 CFR 173.119, 173.125, 173.126, 173.129, 173.127, 173.131, 173.132, 173.144, 173.145, 173.147, 173.221, 173.222, 173.223, 173.245, 173.247, 173.248, 173.250a, 173.253, 173.262, 173.263, 173.265, 173.266, 173.267, 173.268, 173.269, 173.272, 173.276, 173.277, 173.278, 173.291.	To authorize transportation of those flammable liquids, liquid organic peroxides, liquid oxidizers, corrosive liquids, or poison B liquids authorized by 49 CFR Part 173 for transportation in DOT Specification 1D or 1K packagings in non-DOT specification glass carboys. (Modes 1, 2.)
5948–X	DOT–E 5948	Department of Energy, Washington, DC	49 CFR 173.398(c)	To authorize the shipment of radioactive waste materials in ATMX 500 or 600 rail cars. (Mode 2.)
5951–X	DOT–E 5951	Ashland Chemical Co., Columbus, OH	49 CFR 173.314(c)	To authorize the shipment of chlorine and sulfur dioxide, nonflammable gases, in DOT specification 106 type tanks. (Modes 1, 2.)
5972–X	DOT–E 5972	E.I. du Pont de Nemours & Company, Incorporated, Wilmington, DE.	49 CFR 173.119(b), 173.125, 173.128, 46 CFR 98.35.	To authorize the transportation of certain flammable and combustible liquids in non-DOT specification stainless steel portable tanks. (Modes 1, 3.)
6016–X	DOT–E 6016	Strate Welding Supply Co., Inc., Buffalo, NY	49 CFR 173.315(a)	To authorize the shipment of liquid oxygen, nitrogen, and argon in non-DOT specification portable tanks. (Mode 1.)
6113–X	DOT–E 6113	Philadelphia Gas Works, Philadelphia, PA	49 CFR 172.101, 173.315(a)	To authorize the transportation of certain flammable gases in non-DOT specification cargo tanks. (Mode 1.)

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
		Renewal and Party to Exemptions—Continued		
6113–X	DOT–E 6113	Utility Propane Company, Elizabeth, NJ	49 CFR 172.101, 173.315(a)	To authorize the transportation of certain flammable gases in non-DOT specification cargo tanks. (Mode 1.)
6113–X	DOT–E 6113	Northwest Natural Gas Co., Portland, OR	49 CFR 172.101, 173.315(a)	To authorize the transportation of certain flammable gases in non-DOT specification cargo tanks. (Mode 1.)
6197–X	DOT–E 6197	New Jersey Natural Gas Company, Asbury Park, NJ.	49 CFR 172.101, 173.315(a)(1)	To authorize the use of a non-DOT specification vacuum-perlite insulated cargo tank for the transportation of certain flammable gases. (Mode 1.)
6250–X	DOT–E 6250	Department of Defense, Washington, DC	49 CFR 173.69, 173.79, 173.87, 173.92, 173.94, 173.101, 173.102, 176.83, 177.848.	To authorize transportation of partially dis-assembled aircraft with explosive components (ejection seat and canopy related devices) remaining installed in non-DOT specification packaging. (Modes 1, 3.)
6299–X	DOT–E 6299	Minnesota Valley Engineering, New Prague, MN	49 CFR 173.315(a)(1)	To authorize the manufacture, marking, and sale of non-DOT specification portable tanks for use in the transportation of certain nonflammable gases. (Modes 1, 3.)
6526–P	DOT–E 6526	Coastal Chemical Corporation, Greenville, NC	49 CFR 173.353(a)(3), 173.357(b)(1)	To become a party to Exemption 6526. (Modes 1, 2, 3.)
6526–P	DOT–E 6526	Asgrow Florida Company, Plant City, FL	49 CFR 173.353(a)(3), 173.357(b)(1)	To become a party to Exemption 6526. (Modes 1, 2, 3.)
6525–P	DOT–E 6526	Southern Agricultural Insecticides, Inc., Palmetto, FL.	49 CFR 173.353(a)(3), 173.357(b)(1)	To become a party to Exemption 6526. (Modes 1, 2, 3.)
6589–X	DOT–E 6589	Robertshaw Controls Company, Anaheim, CA	49 CFR 173.302(a)(1), 175.3	To authorize the use of a non-DOT specification cylinder for the transportation of compressed air, classed as a nonflammable gas. (Modes 1, 2, 4.)
6614–X	DOT–E 6614	All Pure Chemical Co., Inc., Tracy, CA	49 CFR 173.263(a)(28), 173.277(a)(6)	To authorize the transportation of certain corrosive liquids in non-DOT specification polyethylene bottles packed inside a high density polyethylene box. (Mode 1.)
6614–X	DOT–E 6614	Hasa Chemical, Inc., Saugus, CA	49 CFR 173.263(a)(28), 173.277(a)(6)	To authorize the transportation of certain corrosive liquids in non-DOT specification ploye thylene bottles packed inside a high density polyethylene box. (Mode 1.)
6614–P	DOT–E 6614	Olsen Chemical Company, Los Angeles, CA	49 CFR 173.263(a)(28), 173.277(a)(6)	To become a party to Exemption 6614. (Mode 1.)
6614–P	DOT–E 6614	Chem-Bright Industries, West Bloomfield, MI	49 CFR 173.263(a)(28), 173.277(a)(6)	To become a party to Exemption 6614. (Mode 1.)
6629–X	DOT–E 6629	Fenwal Incorporated, Ashland, MA	49 CFR 173.304(a)(1), 173.305(c), 175.3.	To authorize the use of a modified DOT specification 4B cylinder for the transportation of certain gases, or mixtures of gases, or a non-hazardous material and a gas. (Modes 1, 4, 5.)
6629–X	DOT–E 6629	The Boeing Company, Seattle, WA	49 CFR 173.304(a)(1), 173.305(c), 175.3.	To authorize the use of a modified DOT Specification 4B cylinder for the transportation of certain gases, or mixtures of gases, or a non-hazardous material and a gas. (Modes 1, 4, 5.)
6746–X	DOT–E 6746	The Firestone Tire and Rubber Company, Akron, OH.	49 CFR 173.315(a)(1)	To authorize the shipment of anhydrous ammonia, a nonflammable gas, in modified DOT Specification MC–331 portable tanks. (Modes 1, 3.)
6825–X	DOT–E 6825	Lox Equipment Company, Livermore, CA	49 CFR 172.101, 173.314(c)	To authorize the transportation of a liquefied flammable compressed gas in non-DOT specification tank cars. (Mode 2.)
6919–X	DOT–E 6919	Minnesota Gas Company, Minneapolis, MN	49 CFR 172.101, 173.315(a)	To authorize the use of non-DOT specification insulated cargo tanks for the transportation of certain flammable gases. (Mode 1.)
6921–X	DOT–E 6921	Cities Service Company, Tulsa, OK	49 CFR 172.101, 173.315(a)(1)	To authorize the use of a non-DOT specification portable tank for the transportation of a nonflammable gas. (Modes 1, 3.)
6921–X	DOT–E 6921	Air Products and Chemicals, Inc., Allentown, PA	49 CFR 172.101, 173.315(a)(1)	To authorize the use of a non-DOT specification portable tank for the transportation of a nonflammable gas. (Modes 1, 3.)
7015–P	DOT–E 7015	Air Products and Chemicals, Inc., Allentown, PA	49 CFR 173.315(a)(1), 172.101	To become a party to Exemption 7015. (Modes 1, 2, 3.)
7015–X	DOT–E 7015	Cities Service Company, Tulsa, OK	49 CFR 173.315(a)(1), 172.101	To authorize the use of non-DOT specification portable tanks for the transportation of a nonflammable gas. (Modes 1, 2, 3.)
7024–X	DOT–E 7024	Burlington Industries, Inc., Burlington, NC	49 CFR 173.249(a)(7)	To authorize the transport of an alkaline corrosive liquid in non-DOT specification collapsible rubber containers. (Mode 1.)
7071–X	DOT–E 7071	Philip A. Hunt Chemical Corporation, Palisades Park, NJ.	49 CFR 173.245	To authorize polyethylene packagings in a quantity not provided for in the regulations, for the transportation of a certain corrosive liquid. (Modes 1, 2, 3.)
7227–X	DOT–E 7227	Lox Equipment Company, Livermore, CA	49 CFR 172.101, 173.315	To authorize the use of non-DOT specification vacuum insulated portable tanks for the transportation of liquid nitrogen, a nonflammable gas. (Mode 3.)
7257–X	DOT–E 7257	Brewer Chemical Corporation, Honolulu, HI	49 CFR 173.245, 173.249, 173.263	To authorize the transportation of certain corrosive liquids in non-DOT specification portable tanks. (Mode 3.)
7438–X	DOT–E 7438	Ethyl Corporation, Baton Rouge, LA	49 CFR 173.354(a)(5)	To authorize the transportation of a Class B poisonous liquid in non-DOT specification cargo tanks. (Mode 1.)
7477–X	DOT–E 7477	Systron Donner Corporation, Berkeley, CA	49 CFR 173.302a(a)(1), 173.304(a)(1), 175.3.	To authorize the use of non-DOT specification seamless aluminum cylinders for the transportation of certain nonflammable compressed gases. (Modes 1, 2, 3, 4.)
7549–X	DOT–E 7549	Stauffer Chemical Company, Westport, CT	49 CFR 173.245a(a)	To authorize the use of a 316L stainless steel portable tank for the transportation of a certain corrosive material. (Modes 1, 2, 3.)
7605–P	DOT–E 7605	Department of Defense, Washington, DC	49 CFR 173.87, 173.92, 173.101, 173.102, 173.113, 175.3, 176.83, 177.848.	To become a party to Exemption 7605. (Modes 1, 3, 4.)

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
		Renewal and Party to Exemptions—Continued		
7607–X	DOT–E 7607	E. I. du Pont de Nemours & Company, Wilmington, DE.	49 CFR 172.101, 175.3	To authorize the shipment of hydrogen, a flammable gas, in non-DOT specification seamless stainless steel cylinders. (Mode 5.)
7607–X	DOT–E 7607	Dow Chemical Company, Freeport, TX	49 CFR 172.101, 175.3	To authorize the shipment of hydrogen, a flammable gas, in non-DOT specification seamless stainless steel cylinders. (Mode 5.)
7616–X	DOT–E 7616	Missouri Pacific Railroad Company, Saint Louis, MO.	49 CFR 172.204(a), 172.204(d)	To authorize the carrier to certify the shipping papers on behalf of the shipper when transporting certain hazardous materials by rail. (Mode 2.)
7636–X	DOT–E 7636	Minnesota Valley Engineering, New Prague, MN	49 CFR 173.304(a), 175.3	To authorize the shipment of certain nonflammable gases in a DOT specification 4L welded cylinder. (Modes 1, 2, 3, 4.)
7641–X	DOT–E 7641	American President Lines, Ltd., Seattle, WA	49 CFR 176.905(c)	To authorize the transportation of motor vehicles having fuel tank one-fourth or less full (ORM–C) aboard cargo vessels with battery cables connected. (Mode 3.)
7674–X	DOT–E 7674	Department of Defense, Washington, DC	49 CFR 174.104(a)	To authorize shipment of a Class A explosive on flat-cars and open-top rail cars. (Mode 2.)
7770–X	DOT–E 7770	Ugine Kuhlmann, Paris, France	49 CFR 173.143, 173.264(b)(4)	To authorize the transportation of anhydrous hydrogen fluoride or anhydrous methylchloromethyl ether in certain non-DOT specification portable tanks. (Modes 1, 2, 3.)
7772–X	DOT–E 7772	Ugine Kuhlmann, Paris, France	49 CFR 173, Subpart D	To authorize the use of non-DOT specification portable tanks for the transportation of certain flammable liquids. (Modes 1, 3.)
7793–X	DOT–E 7793	Hooker Chemical Company, Houston, TX	49 CFR 173.245	To authorize the transportation of a corrosive liquid, which is also a poison, in non-DOT specification portable tanks. (Modes 1, 2, 3.)
8087–X	DOT–E 8087	Union Carbide Corporation, Bound Brook, NJ	49 CFR 173.154	To authorized the transportation of a certain water reactive solid and an oxidizing material in DOT Specification 56 portable tanks. (Mode 1.)
8128–P	DOT–E 8354	Transport International Containers, Paris, France	49 CFR 173.123, 173.315	To become a party to Exemption 8354. (Modes 1, 2, 3.)
8184–P	DOT–E 8184	International Minerals & Chemical Corporation, Allentown, PA.	49 CFR 173.65	To become a party to Exemption 8184. (Modes 1, 2, 3.)
8232–X	DOT–E 8232	Eurotainer, Paris, France	49 CFR 173.315(a)	To authorize the use of a non-DOT specification portable tank for the transportation of certain compressed flammable gases. (Modes 1, 2, 3.)
8246–X	DOT–E 8246	Honeywell Inc., Minneapolis, MN	49 CFR 173.302, 178.36, 178.42	To authorize the transportation of helium and neon gases in non-DOT specification cylinders. (Mode 1.)
8126–N	DOT–E 8354	Fauvet-Girel, Paris, France	49 CFR 173.123, 173.315	To authorize the use of a non-DOT specification portable tank for the transportation of certain flammable gases and flammable liquids. (Modes 1, 2, 3.)
8195–N	DOT–E 8195	McDonell Douglas Corporation, St. Louis, MO	49 CFR 173, Subpart D, F, H, 173.6(b)(3).	To authorize the use of non-DOT specification metal drums as outside containers in lieu of prescribed DOT specification fiberboard or wood containers for shipments of flammable liquids, corrosive materials, and Class B poisons subject to 49 CFR 173.6(b)(3). (Modes 1, 2, 4, 5.)
8234–N	DOT–E 8234	GM Magyar, S.A., Gray, France	49 CFR 173.119, 173.125, 173.127, 173.128, 173.129, 173.131, 173.132, 173.135, 173.136, 173.141, 173.145, 173.245, 173.247, 173.276, 173.280, 173.295, 173.346, 173.347, 173.349, 173.358, 173.361, 173.362, 173.362a, 173.510, 173.610, 173.655.	To authorize the use of non-DOT specification portable tanks for the transportation of certain flammable, corrosive, combustible, poison B, and ORM–A materials. (Modes 1, 2, 3.)
8264–N	DOT–E 8264	Hercules Incorporated, Wilmington, DE	49 CFR 173.93	To authorize the shipment of certain solid propellant explosives (Class B) and smokeless powders for small arms (flammable solids) in non-DOT specification fiber cans or tubes packed in fiberboard boxes. (Mode 1.)
8265–N	DOT–E 8265	Hercules Incorporated, Wilmington, DE	49 CFR 173.93, 173.197a, 177.838(g).	To authorize shipment of certain solid propellant explosives (Class B) in non-DOT specification fiber tubes packed in telescoping DOT Specification 12B fiberboard boxes, and certain smokeless powders for small arms (flammable solids) in DOT Specification 21C fiber drums packed in fiberboard boxes. (Mode 1.)
8281–N	DOT–E 8281	IMC Chemical Group, Inc., Allentown, PA	49 CFR 173.93	To authorize the transportation of a solid propellant explosive in non-DOT specification polyethylene-lined polypropylene bags and non-DOT specification polyethylene tubes. (Mode 1.)
8282–N	DOT–E 8282	Chevron Chemical Company, San Francisco, CA	49 CFR 173.359	To authorize the transportation of a liquid organic phosphate compound mixture, a flammable and poison B liquid, in DOT Specification 37P 5-gallon steel drum with inside polyethylene liner. (Modes 1, 2.)
8283–N	DOT–E 8283	Allied Chemical Corporation, Morristown, NJ	49 CFR 173.273(a)(4), 174.3	To authorize shipment of stabilized sulfur trioxide in DOT Specification 111A60W2 tank cars equipped with standpipe electrical heaters. (Mode 2.)
8284–N	DOT–E 8284	Allied Chemical Corporation, Morristown, NJ	49 CFR 173.272(a)(i)22, 174.3, 179.202–12(b).	To authorize shipment of oleum in DOT Specification 103AW or 111A100W2 tank cars equipped with safety valves instead of safety vents. (Mode 2.)
8287–N	DOT–E 8287	Rohm & Haas Company, Philadelphia, PA	49 CFR 173.245(a)(16), 173.245(a)(26), 178.19–4(c).	To authorize the shipment of a corrosive liquid in a DOT–6D/2SL composite container or DOT–34 drum equipped with a bung vent. (Modes 1, 2, 3.)

Application No.	Exemption No	Applicant	Regulation(s) affected	Nature of exemption thereof
		Renewal and Party to Exemptions—Continued		
9269–N	DOT–E 8269	Olin Corporation, East Alton, IL	49 CFR 173.93	To authorize shipment of certain identified solid propellant explosives, Class B, in non-DOT specification cylindrical metal cans overpacked in fiberboard boxes. (Modes 1.)
8305–N	DOT–E 8305	Eldorado Chemical Company, Incorporated, San Antonio, TX.	49 CFR 173.245(a)	To authorize the use of an MC–300 cargo tank for the transportation of certain corrosive materials. (Mode 1.)
8327–N	DOT–E 8327	Dow Chemical Company, Midland, MI	49 CFR 173.245	To authorize the use of a DOT Specification 51 portable tank for the transportation of 4 tertiary butyl catechol, a corrosive liquid. (Modes 1, 2, 3.)
8336–N	DOT–E 8336	Cities Service Company, Tulsa, OK	49 CFR 173.315(a)(1), 173.315(c)(1)	To authorize the use of an insulated DOT MC–331 cargo tank for the transportation of a flammable gas. (Mode 1.)
8344–N	DOT–E 8344	All-Sports Supply, Inc., Portland, OR	49 CFR 173.197a	To authorize the transportation of fiberboard boxes containing different brands of smokeless powder without B or E approval of each box. (Mode 1.)
8345–N	DOT–E 8345	International Minerals and Chemical Corporation, Allentown, PA.	49 CFR 173.184	To authorize the transportation of nitrostarch, wet, with not less than 20 percent water in DOT Specification 12H fiberboard boxes lined with polyethylene. (Mode 1.)
8347–N	DOT–E 8347	Fabricated Metals, Incorporated, San Leandro, CA.	49 CFR 173.119(b)	To authorize the use of a DOT Specification 57 steel or stainless steel portable tank not previously authorized for the transportation of certain flammable and combustible liquids. (Mode 3.)
8353–N	DOT–E 8353	Thiokol Corporation, Huntsville, AL	49 CFR 178.252–2(b)	To authorize an alternate closure device in a DOT Specification 56 portable tank used in the transportation of ammonium perchlorate, an oxidizer. (Mode 2.)
8365–N	DOT–E 8365	Berton Pumping and Sewer Service, Incorporated, Forest Park, GA.	49 CFR 173.119(a)(17), 173.245(a)(30), 173.245(a)(31), 178.340–5(a), 178.340–7, 178.342–5, 178.343–5.	To authorize the use of a modified DOT Specification MC–312 or MC–307 cargo tank for the transportation of certain flammable and corrosive liquids. (Mode 1.)
8371–N	DOT–E 8371	Connecticut Bulk Carriers, Inc., Stamford, CT	49 CFR 173.271	To authorize the transportation of a corrosive material in non-DOT specification portable tank lined with baked phenolic resin. (Modes 1, 3.)

EE 8401–N	DOT–E 8401	ERA Helicopters, Inc., Anchorage, AK	49 CFR 175.3, 175.310(d)	To authorize the carriage of fuel in cargo compartments of passenger-carrying helicopters. (Mode 5.)
EE 8402–N	DOT–E 8402	IBM Corporation, Tarrytown, NY	49 CFR Parts 171–178., Section 173.21, excluded.	To authorize the movement of hazardous wastes from Seymour, Indiana to Calumet City, Illinois. (Mode 1.)
EE 8402–P	DOT–E 8402	Cummins Engine Company, Inc., Columbus, IN	49 CFR Parts 171–178., Section 173.21, excluded.	To become a party to Exemption 8402. (Mode 1.)
EE 8402–P	DOT–E 8402	Chemical Waste Management of Illinois, Calumet City, IL.	49 CFR Parts 171–178., Section 173.21, excluded.	To become a party to Exemption 8402. (Mode 1.)
EE 8405–N	DOT–E 8405	Alaska International Airline, Anchorage, AK	49 CFR 172.101, 173.315(a)(1), 175.3	To authorize a one-time shipment of liquefied nitrogen in a non-DOT specification portable tank. (Mode 4.)
EE 8419–N	DOT–E 8419	Russet Chemical Company, Fort Hall, ID	49 CFR Parts 171–178., Part 107, Appendix B(2), excluded, Section 173.21, excluded.	To authorize the bulk shipment of various class B poisons and debris contaminated therewith in open top motor vehicles covered with polyethylene sheets and tarpaulin. (Mode 1.)
Application No.		Applicant	Regulation(s) affected	Nature of exemption thereof
		Withdrawals		
6932–P		Fauvet-Girel, Paris, France	49 CFR 173.264(b)(4)	To become a party to Exemption 6932. (Modes 1, 3.)
8368–N		Spectrum West Inc., Torrance, CA	49 CFR 173.101	To authorize shipment of small arms ammunition packaged loosely in strong outside containers. (Mode 1.)

Denials

6969–X—Request by Kansas State Dept. of Health & Environmental, Topeka, KA to authorize the air shipment of a transport incubator denied April 30, 1980, as being unnecessary.

6969–X—Request by State of Alaska, Juneau, AK to authorize the air shipment of a transport incubator containing a nonflammable gas denied April 30, 1980, as being unnecessary.

8194–N—Request by Matheson, Lyndhurst, NJ to authorize an alternate method of testing cylinders charged with phosgene for leakage denied April 30, 1980.

8296–N—Request by Allied Engineering Corporation, New York, NY to authorize shipment of vinyl bromide and two low pressure gases in non-DOT specification IMCO type V portable tanks denied April 30, 1980.

8297–N—Request by Equip Rail Company, Washington, DC to authorize shipment of liquid hazardous materials of various classifications in non-DOT specification IMCO type II portable tanks denied April 30, 1980.

8313–N—Request by Osmose Wood Preserving Company, Buffalo, NY to authorize shipment of a poison B liquid, n.o.s., in DOT Specification 57 steel portable tanks denied April 30, 1980.

8343–N—Request by Westerwalder Eisenwerk, Weitefeld, W. Germ. to authorize shipment of various flammable, combustible, and corrosive liquids in non-DOT specification IMCO type II portable tanks denied April 30, 1980.

8358–N—Request by General American Transportation Corporation, Sharon, PA to authorize the manufacture, marking, and sale of non-DOT

specification portable tanks constructed in accordance with ASME Section VIII requirements for shipment of diisobutylamine, classed as a flammable liquid, n.o.s. denied April 30, 1980.

Issued in Washington, DC, on August 5, 1980.

J. R. Grothe,

Chief, Exemptions Branch, Office of Hazardous Materials Regulation, Materials Transportation Bureau.

BILLING CODE 4910-60-M

[Docket No. 80-6w; Notice-1]

Transportation of Natural Gas and Other Gas by Pipeline Petition for Waiver

The Columbia Gas Transmission Corporation has petitioned the Materials Transportation Bureau (MTB) for a waiver from compliance with the requirement of 49 CFR 192.327(e) that a gas pipeline crossing a navigable river, stream, or harbor must have a minimum cover of forty-eight inches in soil or twenty-four in consolidated rock. Under the proposed waiver, the petitioner would replace Transmission Line MA at its crossing of the Susquehanna River, two miles above the Conowingo Dam in Harford and Cecil Counties, Maryland, with a portion of the crossing exposed without any cover.

According to the petition, the replacement of the existing crossing of the Susquehanna River is part of petitioner's plan to replace sections of its twenty-inch Line MA in Baltimore, Harford, and Cecil counties in Maryland. The existing crossing consists of five separate ten-inch lines which were constructed in 1931 and were laid on the river bottom without trenching or cover. The existing five-line crossing will be replaced by a single twenty-inch line, located adjacent to and downstream from the existing crossing. The existing crossing will be disconnected from all sources of gas and will be abandoned in place.

The proposed replacement crossing will be located approximately two miles upstream of the Conowingo Dam. The reservoir is 3,400 feet wide and up to 100 feet deep at the crossing location. A Maryland Geological Survey report (Geological Survey, Harford County) indicates that the bed of the Susquehanna River in this area is dense rock. Visual observations by petitioners of the riverbanks downstream of the Conowingo Dam at low flow conditions confirm the Geological Survey data. Petitioner calculates flow velocity at normal flow conditions to be approximately 0.43 feet per second, and maximum flooding conditions (taken from the Dam Authority's records) are calculated to be approximately 5.1 feet per second.

Columbia Transmission further stated in its petition that if the waiver is granted, the new crossing will be installed with at least twenty-four inches of cover in consolidated rock for a distance of 100 feet from mean low water line on each side of the reservoir, at which points the water depth is approximately twenty to thirty feet deep. The remaining 3,200 feet of the crosing would be installed without cover by laying pipe on a bed prepared by removing all obstructions potentially damaging to the pipe. The bottom contour would be confirmed by hydrographic survey and inspected by divers before the pipe is lowered into place. The entire underwater portion of the pipeline will be coated with a concrete coating approximately three inches thick.

The petitioner also stated that in its opinion the proposed construction of the pipline without cover will in no way impair the future safe operation of the pipeline, inasmuch as the existing crossing had been similarly installed about fifty years ago and safely operated without incident since then. Additionally, if the requested waiver is granted, petitioner promises to use professional divers to visually inspect the pipe on a regular basis.

The extremely difficult and costly construction procedures required to open a trench in solid rock river bottom at water depths up to 100 feet is one consideration for requesting the waiver. Columbia Transmission's preliminary estimate of the construction costs are: $1,000,000 by the method proposed in the petition for waiver and $2,500,000 if the waiver is not granted. Furthermore, the granting of the waiver would allow the petitioners to minimize the use of explosives and shorten the construction time, thus reducing the environmental impact and lessening the interference with normal uses of the reservoir.

MTB is considering granting the requested waiver from the requirements of 49 CFR 192.327(e) for the following reasons:

1. The marine traffic in the vicinity of the proposed pipeline is not of the type that constitutes a danger to the pipeline.

2. The recorded maximum current flow, as shown by the records at the Conowingo Dam, would not be sufficient to damage the pipeline.

3. There will be a considerable reduction in construction costs.

4. The proposed construction would require less blasting, thereby reducing the potential environmental impact.

5. The proposed three inch coating of concrete on the pipe would furnish the necessary negative buoyancy to hold the pipeline on the bottom and to protect the pipeline from waterborne debris.

6. Based upon the fact that the existing pipeline was installed in a manner similar to the proposed new pipeline and has been in operation for approximately fifty years without any incident of damage, it does not appear that the proposed new pipeline would be any less safe.

Interested persons are invited to comment on the proposed waiver by submitting in triplicate such data, views, or arguments as they may desire. Communications should identify the Docket and Notice numbers and be submitted to: Dockets Branch, Room 8426, Materials Transportation Bureau, Department of Transportation, Washington, D.C. 20590.
